Conservation Reserve Program Overview

The USDA Conservation Reserve Program (CRP) is a voluntary conservation program available to agricultural producers to assist them to enhance environmentally sensitive lands. Producers enrolled in the CRP plant long-term, resource-conserving covers such as introduced or native grasses or trees to improve the quality of water, control soil erosion, and enhance wildlife habitat.

In return, USDA's FSA provides participants with rental payments and cost-share assistance for 10 to 15 years.

The 43rd CRP Signup

On February 1, 2012, USDA Acting Under Secretary for Farm and Foreign Agricultural Services (FFAS) Michael Scuse announced that a CRP general signup would begin on March 12, 2012, and continue through April 13, 2012. For land to be eligible for general signup, it must be:

- cropland that has been planted or considered planted to an agricultural commodity 4 of the 6 years between 2002 through 2007; and
- alfalfa or other multiyear grasses and legumes grown in a rotation not to exceed 12 years, and
- physically and legally capable of being planted in a normal manner to an agricultural commodity; or
- certain marginal pastureland.

Also, cropland must:

- have a weighted average Erodibility Index of 8 or greater;
- be expiring CRP; or
- be located in a national or State Conservation Priority Area.

The Erodibility Index (EI) divides potential erosion by the maximum average soil loss in which long-term productivity may be adversely affected.

Rental and Cost Share Payments

CRP rental rates are based on local dryland cash rental rates. Producers may offer land at these rates or may offer a lower rental rate to increase the likelihood that their offer will be acceptable.

CRP cost share assistance is available to eligible participants in an amount not to exceed 50 percent of the eligible costs of establishing the approved practice.

General Signup

Because not all offers can be accepted, they are evaluated and ranked using an Environmental Benefits Index (EBI) based on the environmental benefits expected to accrue if the land is enrolled in the CRP. Use of the EBI ensures that the most environmentally sensitive lands relative to cost are selected and that all offers are considered fairly.

The six EBI factors are:

- Wildlife Habitat Cover Benefits;
- Water Quality Benefits From Reduced Erosion, Runoff and Leaching;
- On-Farm Benefits of Reduced Erosion;
- Enduring Benefits;
- Air Quality Benefits; and
- Cost.
