

**Errata No. 3 to  
2012 Power Rate Schedules and General Rate Schedule Provisions  
(FY 2012-2013), October 2011**

2012 Power Rate Schedules and General Rate Schedule Provisions (FY 2012-2013), October 2011; Section II. Adjustments, Charges, and Special Rate Provisions; Sub-section I. Load Shaping Charge True-up Billing Determinants; section 2(b), True-up Credit (page 54):

Revise paragraph I.2(b) (True-up Credit) as show in redline, below:

*(b) True-up Credit*

If Annual Deviation is positive, the Customer is eligible for a True-up credit if Above-Forecast Amount is positive (greater than zero).

$$\text{Above-Forecast Amount} = \frac{\text{RHWM (calculated)}}{\text{TOCA Load (calculated)}} \text{ minus}$$

If Above-Forecast Amount is positive, the True-up Credit billing determinant equals negative one (-1) multiplied by the lesser of:

- (1) Annual Deviation ~~multiplied by a negative one (-1)~~, or
- (2) Above-Forecast Amount ~~multiplied by a negative one (-1)~~.

There is no True-up if Above-Forecast Amount equals zero (0).
