

Preliminary Estimate of Groundfish Observer/ At-Sea Monitor Coverage Rates

The coverage rates displayed here are for all groundfish trips sailing between 01MAY12 and the DOC date (date of change) detailed in the table below. These data show the number of groundfish trips made, by sector, the number of those trips covered by an Observer or At-Sea Monitor, and the associated percent coverage. Groundfish trips are defined by activity codes beginning with NMS or trips charged as multi-species trips; assuming the vessel has a positive groundfish DAS balance. Common pool handgear A and exempted small vessels are excluded from PTNS call in requirements, and therefore, excluded from these coverage rates.

The desired coverage level is 17% for the common pool and 25% for sectors.

SECTOR_NAME	TOTAL_TRIPS	OBSERVER_TRIPS	COVERAGE_PERCENT	DOC
Common	294	32	10.9	05MAR2013:11:00:02
