For Immediate Release
November 3, 2009

The National Energy Technology Laboratory (NETL) has selected Alan L. Blosser as a project manager. He will manage projects for the Industrial Technologies Program. He was formerly with the Wheeling Pittsburgh Steel Corp., and has been a Wheeling, W.Va., resident with his family for 10 years.

Blosser grew up in Cleveland, Ohio. He graduated from The Ohio State University (Columbus) with a BS in civil engineering and earned an MBA from Wheeling Jesuit University (Wheeling, W.Va.). He is a professional engineer in several states, and has worked in the steel, automotive, and chemical industries.

NETL is one of the U.S. Department of Energy's national laboratories. NETL – “the ENERGY lab” – focuses on America's economic prosperity, which requires secure, reliable energy supplies at sustainable prices. Three overarching issues characterize the energy situation in the United States. They are energy affordability, supply security, and environmental quality. The Department of Energy's only government-owned, government-operated national lab, NETL is a research and technology center where these energy challenges converge and energy solutions emerge. NETL implements a broad spectrum of energy and environmental research and development programs through its own research staff and through funded research at other labs, universities, and industry that will return benefits for generations to come.
