For Immediate Release
September 15, 2010

The National Energy Technology Laboratory (NETL) has selected Paul King as the business and outreach manager. Dr. King is responsible for a number of topics including IP and IP management, agreements, education and outreach, international collaborations and new business. Previously, he worked in the process development division as a research group leader.

Dr. King grew up in Seattle, Washington and earned BSc/MSc in applied mathematics and a PhD in structural engineering. He lives in Albany, Ore.

NETL is one of the U.S. Department of Energy's national laboratories. NETL – “the ENERGY lab” – focuses on America's economic prosperity, which requires secure, reliable energy supplies at sustainable prices. Three overarching issues characterize the energy situation in the United States. They are energy affordability, supply security, and environmental quality. The Department of Energy's only government-owned, government-operated national lab, NETL is a research and technology center where these energy challenges converge and energy solutions emerge. NETL implements a broad spectrum of energy and environmental research and development programs through its own research staff and through funded research at other labs, universities, and industry that will return benefits for generations to come.
