## SUMMARY FOR MARCH.

Further increase in production was noted in March, while an increasing consumptive demand apparently digested the goods produced without an appreciable increase in stocks. For many important commodities, such as cotton goods, crude petroleum, automobiles, and pig iron, production exceeded any previous month on record, while new high records since the end of the war were made in the production of zinc, face brick, and anthracite coal, and many commodities had the largest output since 1920.

Stocks of commodities tended to decline in spite of the increased production, while sales and unfilled orders continued to increase. The principal field of activity was still in the building and metal trades, both as to sales and actual output, though enamelware

sales declined perceptibly from February. Orders for steel castings and fabricated structural steel and the awards of building contracts all touched high levels.

The transportation situation also reflected the increased distribution of commodities in the record car loadings for this season of the year, while the net car shortage was reduced.

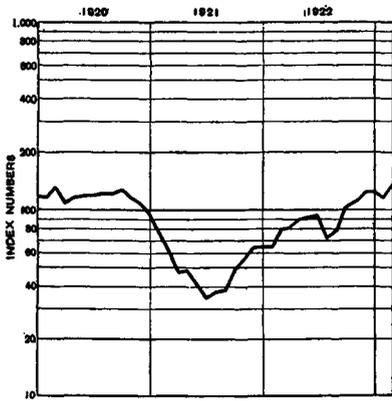

Employment in factories continued to increase, and wages were increased in a number of the basic industries. Sales of mail-order houses were at high levels for this season of the year.

Prices of commodities at wholesale continued to increase in March and the cost of living rose slightly. Retail food prices were unchanged. Farmers received more for crops than in February but less for live stock.

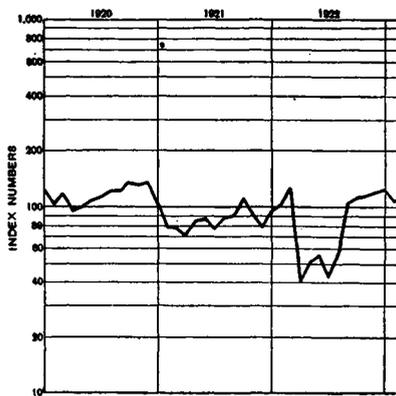

## BUSINESS INDICATORS.

(1913 monthly average=100. See explanation on inside front cover.)

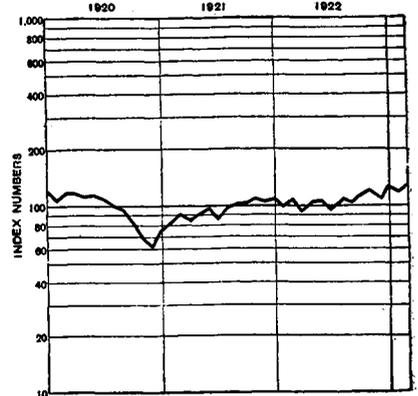

**PIG-IRON PRODUCTION.**

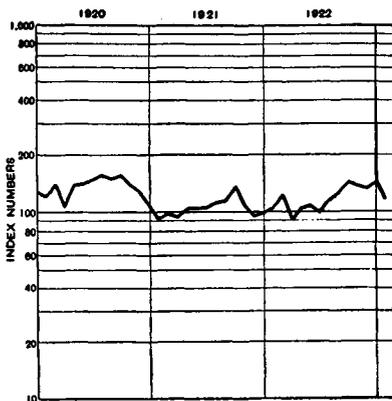

**BITUMINOUS COAL PRODUCTION.**

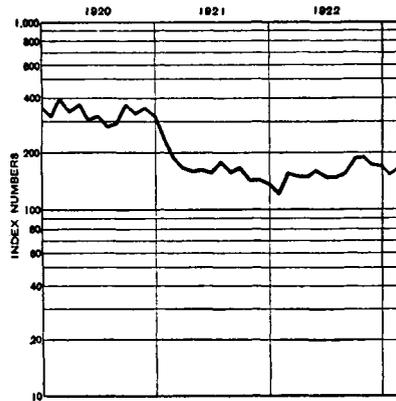

**COTTON CONSUMPTION.**

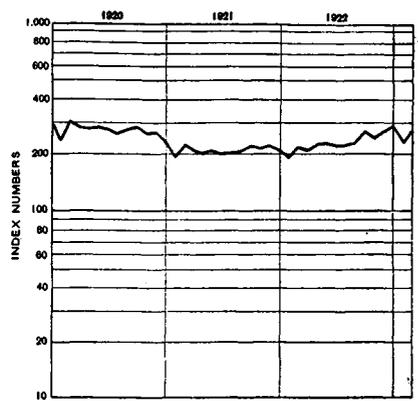

**NET FREIGHT TON-MILES.**

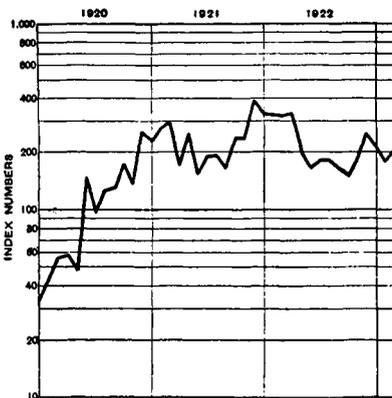

**EXPORTS (VALUES).**

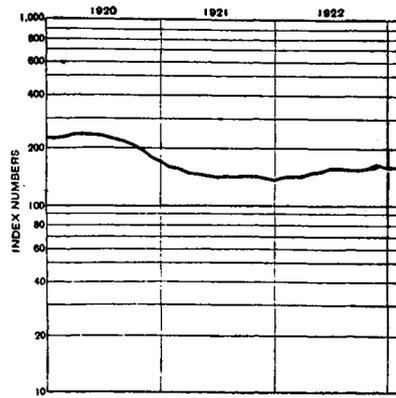

**BANK CLEARINGS OUTSIDE NEW YORK CITY (VALUES).**

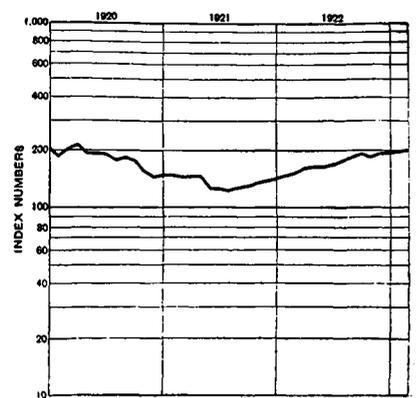

**DEFAULTED LIABILITIES (VALUES).**

**WHOLESALE PRICES.**

**PRICE OF 25 INDUSTRIAL STOCKS.**

## BUSINESS INDICATORS.

The following table gives comparative index numbers for a selected list of important business movements. It is believed that this table will prove useful, because it separates out from the large mass of material a comparatively small number of items which are often regarded as indicative of business in general.

The table has been divided into two parts, the first containing those items for which index numbers can be calculated, using 1913 as a base. The second part contains items for which comparable data back to 1913 are not available. This latter group of index numbers is calculated by letting the 1919 monthly average equal 100. Care should therefore be exercised in comparing the absolute value of the two sets of data. In either group, however, the upward or downward trend of the index numbers, compared to previous months, does reflect the present tendency in each item and will give a basis for business judgment.

\*Monthly statistics on the movements since January, 1913, or as far back as available, are given on pages 47-49 of the December Survey (No. 16).

<sup>1</sup> Monthly prices are for the 15th of the month indicated.

<sup>2</sup> Based on the total computed production reported by 5 associations. Includes southern pine, Douglas fir, western pine, North Carolina pine, and Michigan hard and soft woods. The total production of these associations in 1919 was equal to 11,190,000,000 board feet, compared with a total lumber production for the country of 24,552,000,000 board feet reported by the census.

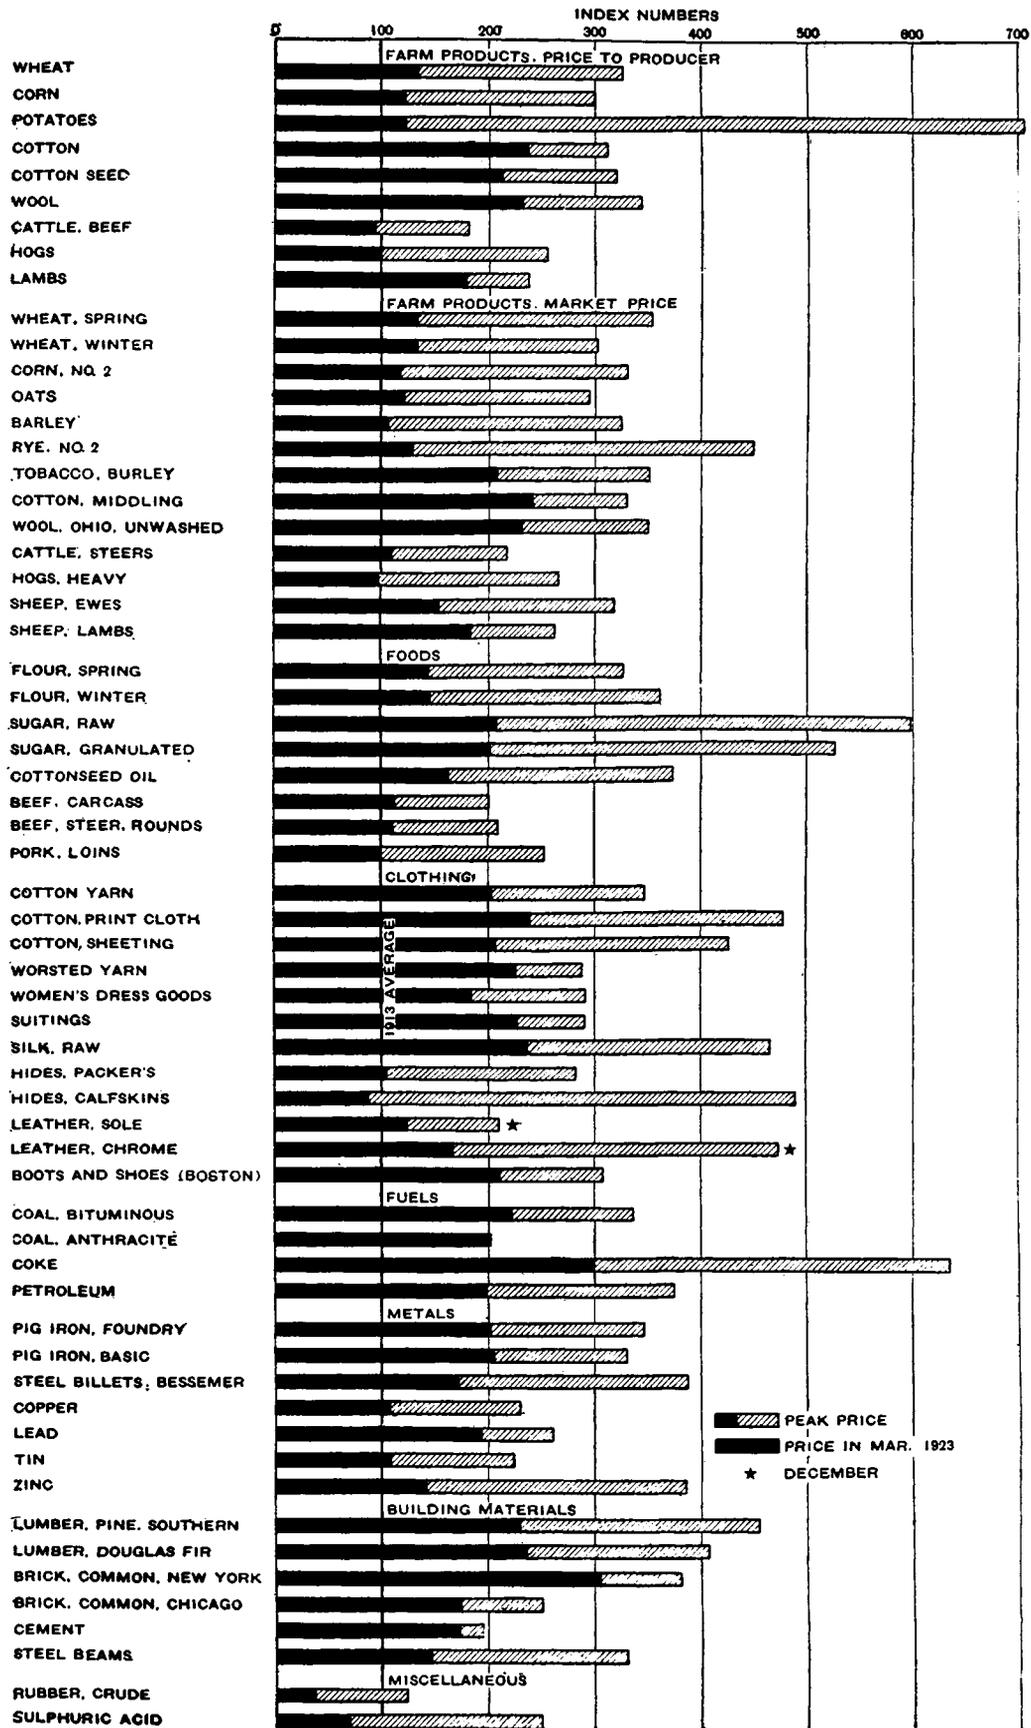

<sup>3</sup> Less than 1.

<sup>4</sup> Yearly figures are monthly averages for the crop year ending July 31 of year indicated.

<sup>5</sup> Does not include stocks of topped oil or crude oil held at refineries; this omission reduced the January stocks by about 15,000,000 barrels.

COMPARISON OF PRESENT WHOLESALE PRICES WITH PEAK AND PREWAR.

(Relative prices 1913=100.)

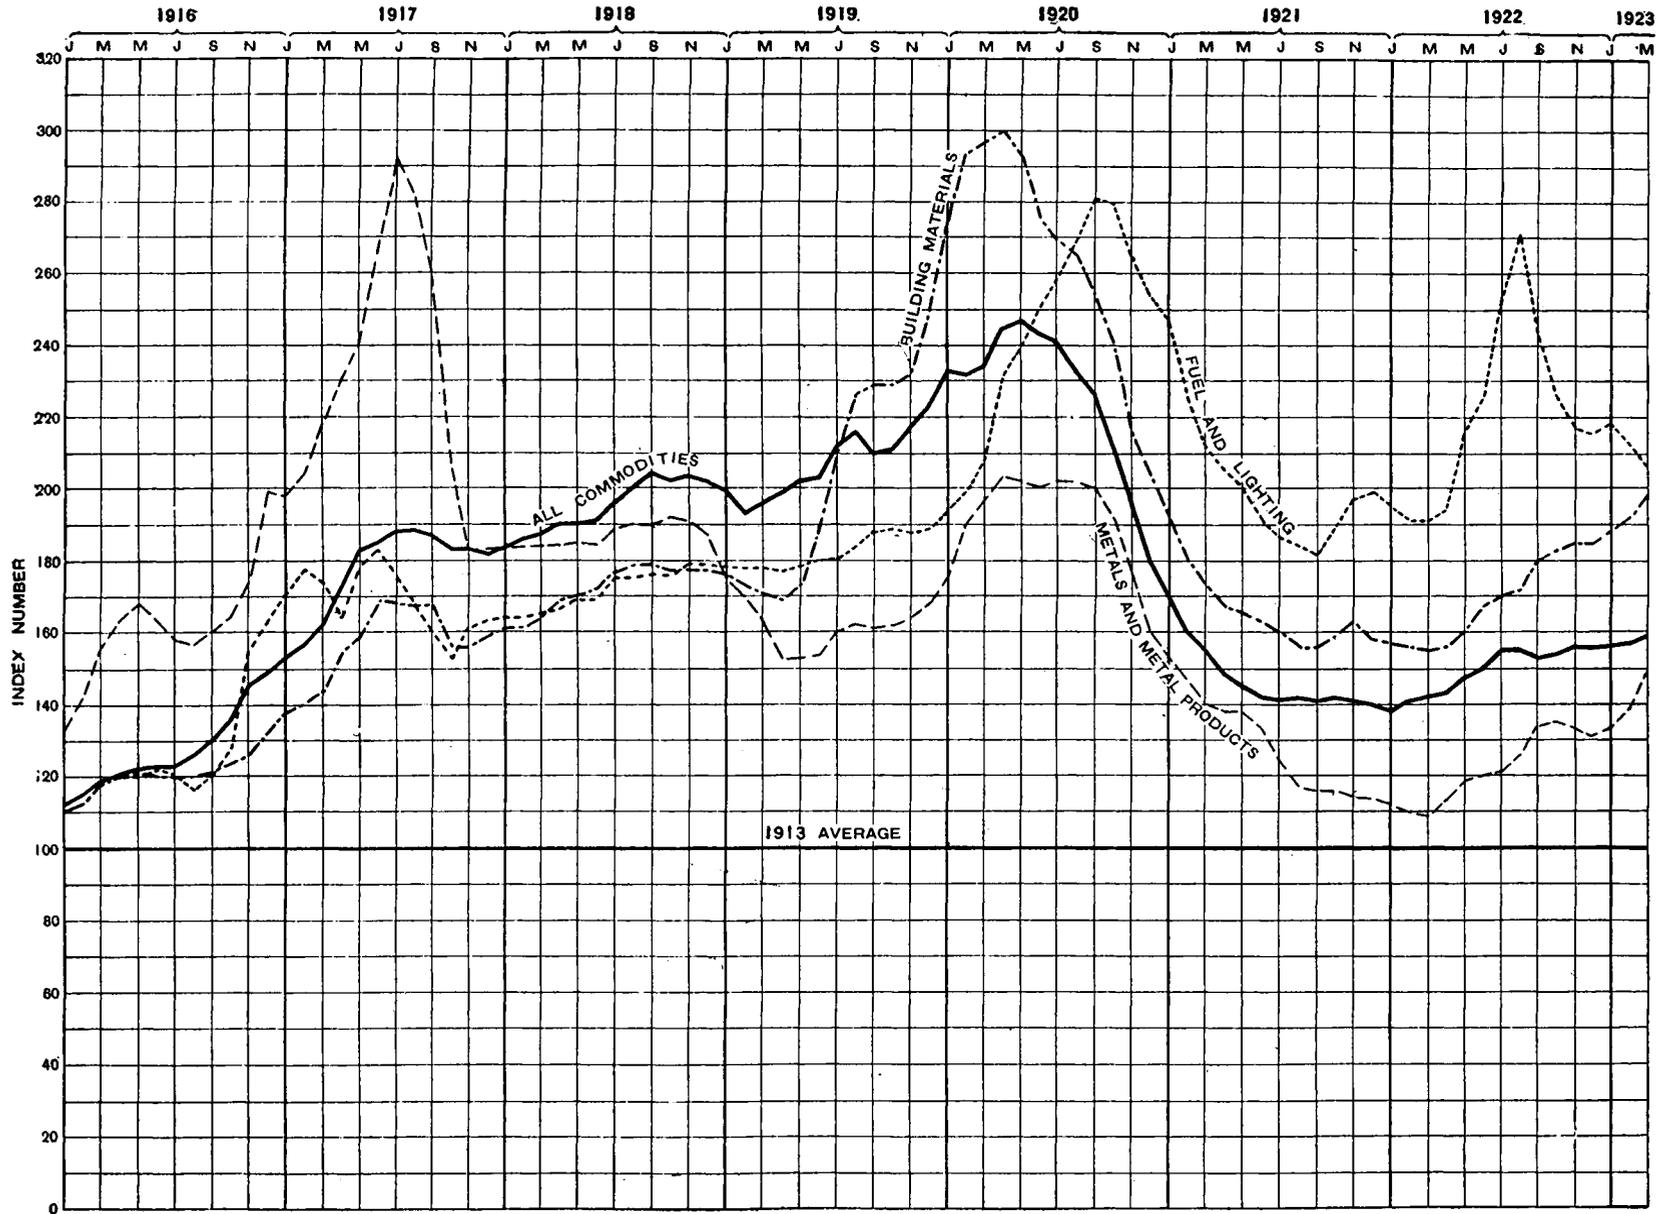

## WHOLESALE PRICE COMPARISONS.—MAXIMUM PRICE COMPARED TO PRICE IN RECENT MONTHS.

NOTE.—Prices to the producer on farm products are from U. S. Department of Agriculture, Bureau of Agricultural Economics. All other prices are from U. S. Department of Labor, Bureau of Labor Statistics, except market price of wool compiled by U. S. Department of Commerce, Bureau of the Census. As far as possible all quotations represent prices to the producer or at the mill. See diagram on opposite page.

Sulphuric acid, 66° (New York).....	Feb., 1916	250	70	70	70	0.0

# COMPARISON OF WHOLESALE PRICES BY GROUPS.

(U. S. Department of Labor Index numbers. Relative prices 1913=100.)

## BUSINESS CONDITIONS IN MARCH.

The following pages contain a review by principal industries of the more important statistics shown in the table on the "Trend of Business Movements" (page 25). Summaries of production, stocks, sales, and price changes are given also.

### PRODUCTION.

On account of the larger number of working days in March, comparison with February is made by allowing an addition of 10 per cent to the latter figures. Even with this allowance, production in March exceeded February and in many cases made new high records.

The index of mineral production on a 1919 base was 125.8 in March, as compared with 124.3 in January and the high record of 131.8 in October, 1920. The index of animal products marketings was 113.6 in March, as against 113.4 in January and the high mark of 119.6 in May, 1922.

Out of 47 commodities for which production figures are now available on a 1919 base, March production exceeded February by more than 10 per cent in 39 cases, as against only 8 declines from the adjusted February figures. Three of the declines were in the lumber group and two were seasonal declines among the food commodities, showing a decrease from February.

Compared with March, 1922, there were 40 increases and only 7 decreases, the declines occurring in many of the same commodities showing a decrease from February.

New high records since 1919 were made in March by cotton consumption and production of anthracite coal, crude petroleum, zinc, North Carolina pine and Douglas fir lumber, oak flooring, wrapping paper, clay fire brick and enamel baths, while new high records since monthly figures became available at the beginning of 1921, were made by by-product coke, copper, passenger automobiles, and trucks.

<sup>6</sup> Since July 1, 1923.

COURSE OF PRODUCTION SINCE 1919.

(Average monthly production 1919=100.)

The cumulative data representing the production record of the first quarter of 1923, in all lines for which comparable data are available, indicate without exception advances over the same quarter of the years 1921 and 1922.

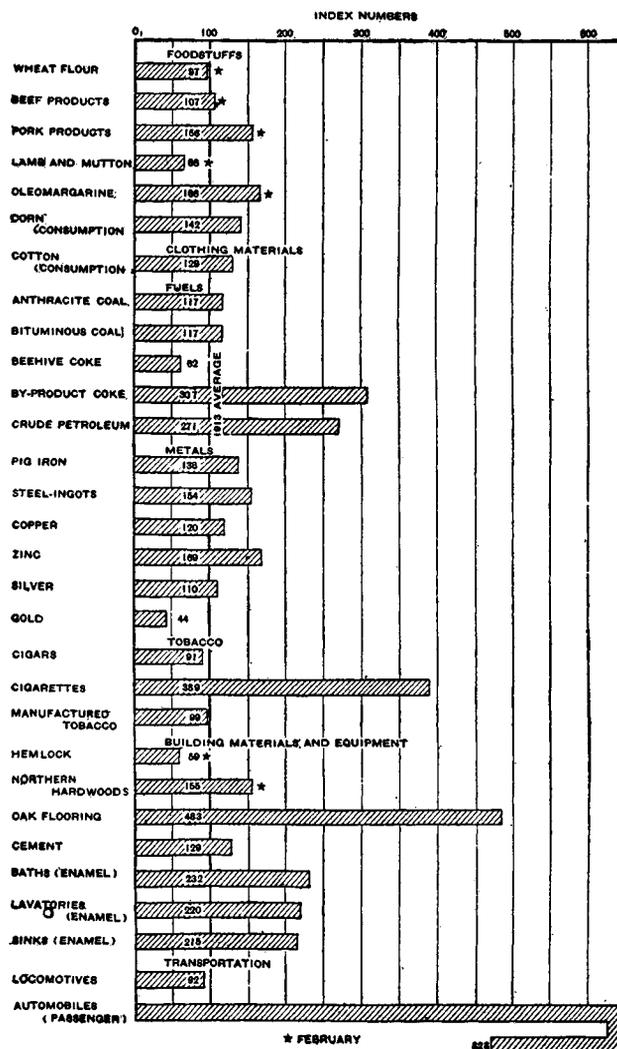

STOCKS.

Figures on stocks of commodities at the end of March show a continuation of the rapid consumption previously noted. In spite of record productive activity in March, stocks did not increase, and a declining tendency was more predominant.

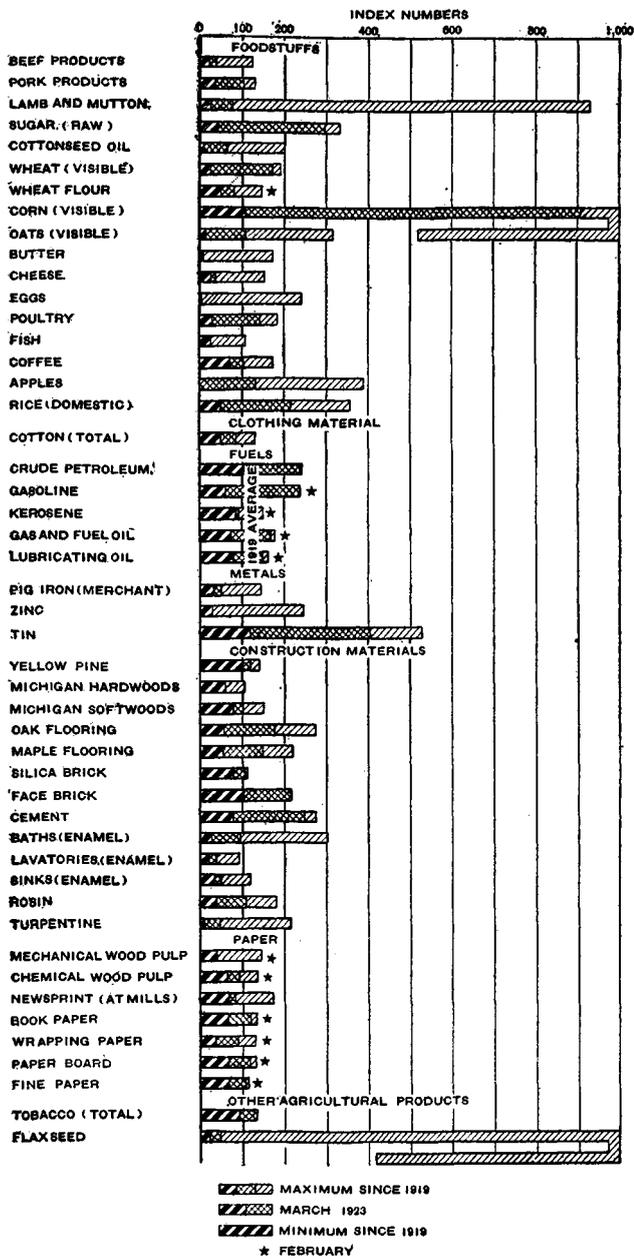

Among the food commodities, which are largely subject to seasonal conditions, there were 6 increases and 10 decreases in March, while among the other commodities there were 5 increases, 13 decreases, and 2 unchanged. Compared with a year ago, there were 12 increases and 4 decreases among the foodstuffs and 6 increases and 15 decreases among the other commodities.

SALES.

Orders for future production of commodities continue to increase. Of the 13 individual commodities for which March sales figures are now available, all but the 3 classes of enamelware showed increased sales over February. Distribution through wholesalers and retailers and the distributing services of advertising and postal transport also showed greatly increased activity. Except for the issue of new bonds, security sales were considerably higher than in February.

Compared with a year ago the 13 individual commodities and the 6 distribution movements and services for which March figures are available all show large increases, while, among the securities, increases occurred in stocks and life insurance, but sales and new issues of bonds declined.

PRICES.

Farmers' prices for crops continued to advance in March and rose to 34 per cent above the 1913 average, but the index of live-stock prices received by farmers declined during the month to within 6 per cent of the pre-war average.

The wholesale price index of the Department of Labor increased from 157 to 159, due principally to metals, building materials and chemicals. The fuel and lighting group again declined. The Federal Reserve Board's regrouping shows no change in raw products, due to the decline in mineral products, but a slight increase in consumers' goods and a 5 per cent advance in producers' goods. The Reserve Board's index for international comparison rose from 166 to 169 in March, with substantial increases in the prices of both imported and exported goods. Dun's index number increased from 158 to 160, while Bradstreet's remained unchanged at 151.

The retail food index remained unchanged in March at 42 per cent above the 1913 level.

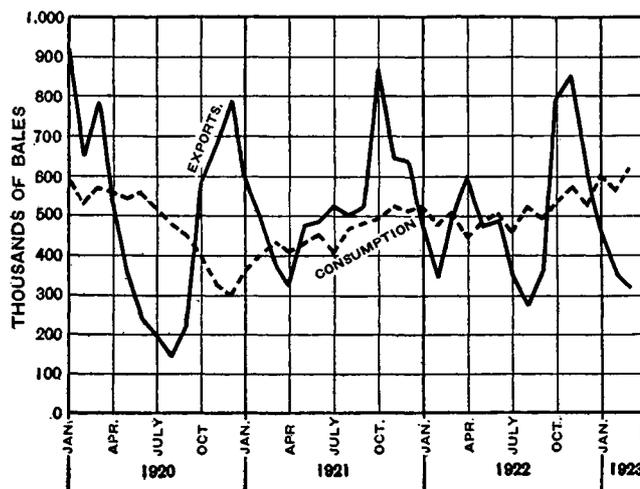

Taking up the individual prices shown in the diagram and table on pages 4 and 5, farm prices declined for only one commodity, hogs, while potatoes made an especially large increase. The market price of farm products, however, in general declined, with cotton and hogs the chief exceptions. Manufactured food products advanced, except pork and carcass beef, while flour was practically stationary. In the clothing group, cotton goods and woolen dress goods advanced, while other items were unchanged or declined slightly. Coke and petroleum advanced in price, while coal was unchanged. The metal group showed pronounced advances throughout, while lumber also made a good advance. Brick, cement, and sulphuric acid showed little change, and rubber declined. The greatest relative advances occurred in sugar, tin, potatoes, iron, steel, copper, and Douglas fir lumber, all over 10 per cent, while rubber with a decline of 5.3 per cent showed the greatest decrease.

TEXTILES.

Wool consumption in March was about 8½ per cent higher than in February but slightly lower than in January. Machinery activity was also considerably greater than in February. Wool receipts at Boston were the highest since last July, with foreign receipts the highest since March, 1921. The average price of raw wool to the producer rose to over 37 cents, the highest recorded since June, 1920, while among the wool products an increase in the price of dress goods was the only change. Imports of wool for January were the highest since April, 1921.

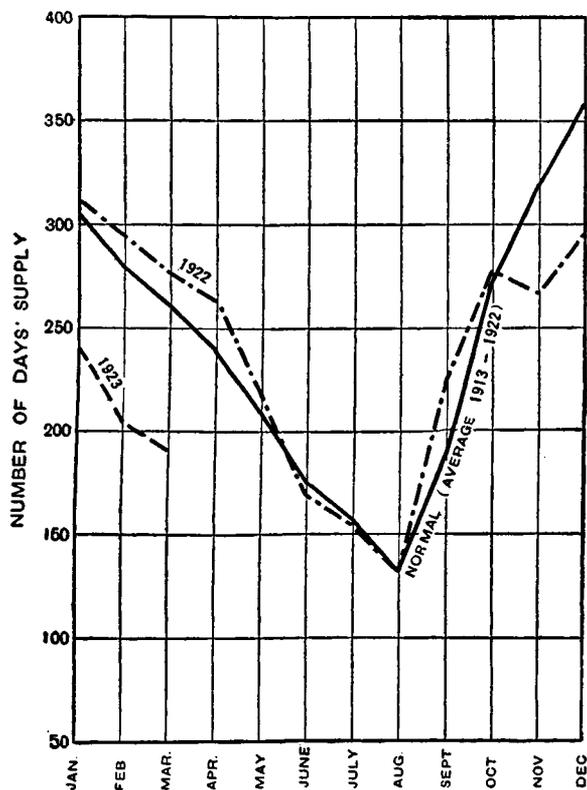

Consumption of cotton by textile mills in March broke all records, and at 623,105 bales was about 8,000 greater than in May, 1917, the previous high month. Mill stocks of cotton for March 31 were greater than those held on the last day of February while warehouse stocks continued to decline, and the total stocks of 4,413,000 bales at the end of March were the lowest reported for this season of the year

EXPORTS AND CONSUMPTION OF COTTON.

since 1914. More spindles were active in March than in February, the March activity making a record of 255 hours per spindle. Exports of raw cotton declined to 318,210 bales in March. Imports of cotton, exclusive of linters, declined to 53,219 bales. Fabric consumption by tire manufacturers in February was the highest on record since such data have become available. Prices of cotton and cotton goods made substantial advances during March.

STOCKS OF COTTON: NUMBER OF DAYS' SUPPLY AT DAILY RATE OF CONSUMPTION.

According to a special report of the Department of Agriculture, it is estimated that the cotton acreage intended to be planted in 1923, will be 12 per cent greater than the 1922 acreage and 9 per cent greater than the average for the past 5 years.

Silk deliveries to mills declined from February and stocks of raw silk again decreased. The price of silk declined.

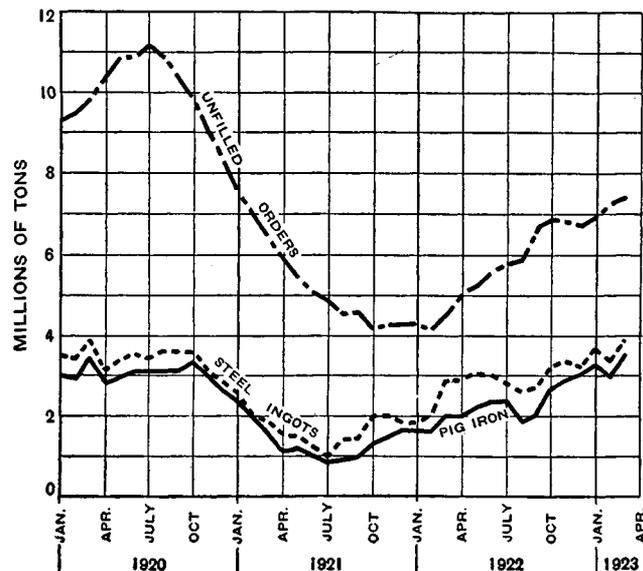

**IRON AND STEEL.**

Pig-iron production broke all previous records in March at 3,521,275 tons, and steel-ingot production, allowing for companies not reporting, amounted to 3,888,897 tons, the highest since March, 1920. Unfilled orders of the United States Steel Corporation increased to 7,403,000 tons, the highest since January, 1921. Unfilled orders for locomotives increased to 2,316, a new high record, and freight-car orders were the largest in recent years.

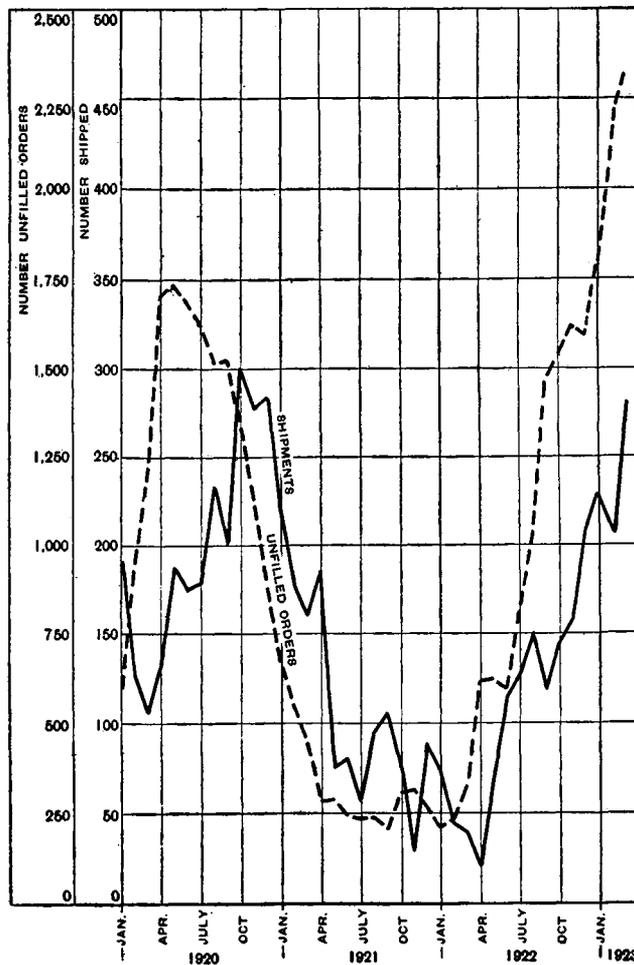

The productive activity of merchant pig-iron furnaces was greater than at any time since the end of 1921, while the sales of merchant pig iron were the

highest since February, 1920. The forward business of these furnaces as represented by their unfilled orders was the largest since October, 1920, and represents approximately four months' production based upon the March rate.

PRODUCTION OF PIG IRON AND STEEL INGOTS AND U. S. STEEL CORP.'S UNFILLED ORDERS.

LOCOMOTIVE SHIPMENTS AND UNFILLED ORDERS.

Bookings of commercial steel castings amounted to 143,564 tons, the highest on record and equal to 148 per cent of plant capacity. Railway specialties were booked to double the capacity of shops devoted to this class of castings, while miscellaneous bookings were 115 per cent of capacity.

Sales of fabricated structural steel again advanced in March, reaching 95 per cent of plant capacity. The following figures compiled by the Bureau of the Census show the total tonnage booked during the past 12 months by 168 firms, with a monthly capacity of 225,155 tons, and the estimated total sales for the United States based on a capacity of 250,000 tons per month at the rate of sales to capacity of the reporting firms.

BOOKINGS OF FABRICATED STRUCTURAL STEEL.

YEAR AND MONTH.	Actual tonnage booked.	Per cent of capacity.	Estimated total bookings.
<b>1922.</b>			
April.....	198,228	88	220,000

<sup>1</sup> Reported by 166 firms with a capacity of 224,455 tons.  
<sup>2</sup> Reported by 166 firms with a capacity of 224,755 tons.  
<sup>3</sup> Reported by 153 firms with a capacity of 220,790 tons.

Meltings of gray iron foundries in Ohio rose from 68 per cent of normal in February to 83 per cent in March. Sheet production in independent mills rose to almost 93 per cent of capacity. Shipments of sheets exceeded production, and sales in turn exceeded shipments, all three items making new high records, except for sales in December, 1922. Unfilled orders for sheets were the highest since December, 1920, and unsold stocks the lowest since that date.

Sales of stokers increased slightly but were less than in March, 1922, measured by horsepower. Shipments of steel furniture were the largest in value since October, 1920.

Production of steel barrels at 48 per cent of capacity and unfilled orders at 627,143 barrels at the end of March both were the largest on record, while shipments were slightly smaller than the high mark of last June.<sup>1</sup>

<sup>1</sup> The Steel Barrel Manufacturers' Association has entered into cooperative arrangements with the Department of Commerce for the wider distribution of the statistics compiled and issued by that association. The statistics are issued daily and monthly and cover the sales, production, shipments, and unfilled orders of steel barrels and drums specified by kind and size; shipments are distributed by states. Persons desiring to obtain this service may either apply direct to the secretary of the association, 1428 Bulkley Building, Cleveland, Ohio, from whom a statement of the subscription charges for the various reports may be obtained; or, if they prefer, may send their names to the Survey of Current Business for forwarding to the association.

## NONFERROUS METALS.

Copper production rose to 122,194,000 pounds in March, exceeding previous figures for over two years, and the price advanced to 17 cents per pound.

Zinc production at 97,462,000 pounds was the highest since 1917, while stocks on March 31 were close to the lowest on record. The movement of zinc at St. Louis increased and the price of slab zinc rose.

Stocks of tin almost doubled in March and were the highest since May, 1920. The price of tin advanced.

The movement of lead at St. Louis increased and the price continued to advance in March.

## FUELS.

Production of coal and coke increased in March, with anthracite production the largest since 1918, and both kinds of coke exceeding previous monthly figures since 1920. The bituminous output was slightly less than in January.

PRODUCTION OF BITUMINOUS AND ANTHRACITE COAL.

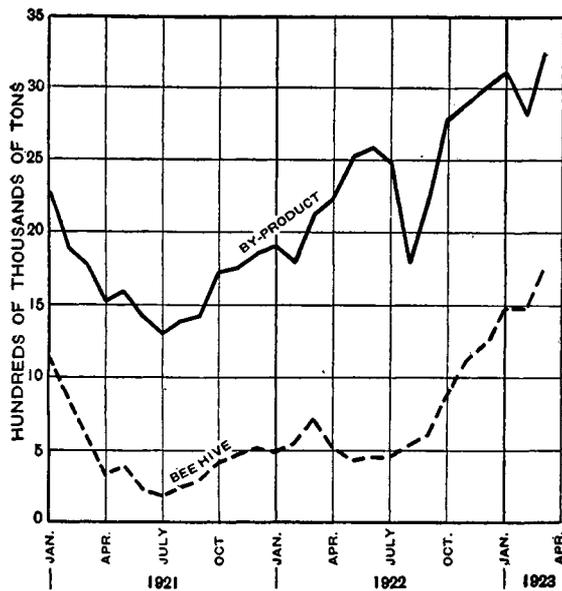

Exports of coal and coke showed a decline in February and storage of anthracite was about the same as in January. Prices of coal and coke showed little change in March.

The production of petroleum continued to break records in March, with an output of 56,132,000 barrels. Stocks again rose, but represented a smaller number of days' supply, due to the rise in consumption. The price of crude petroleum rose and more oil wells were completed than in February.

Gasoline production in February, according to figures just made available, amounted to 568,652,078 gallons, a slight decline from January, but more than 40 per cent larger than in February, 1922. Stocks of gasoline reached a new high record at 1,130,340,767 gallons. Production on a daily average was one per cent greater than in January, while consumption on this basis was almost 7 per cent less.

## PRODUCTION OF BEEHIVE AND BY-PRODUCT COKE.

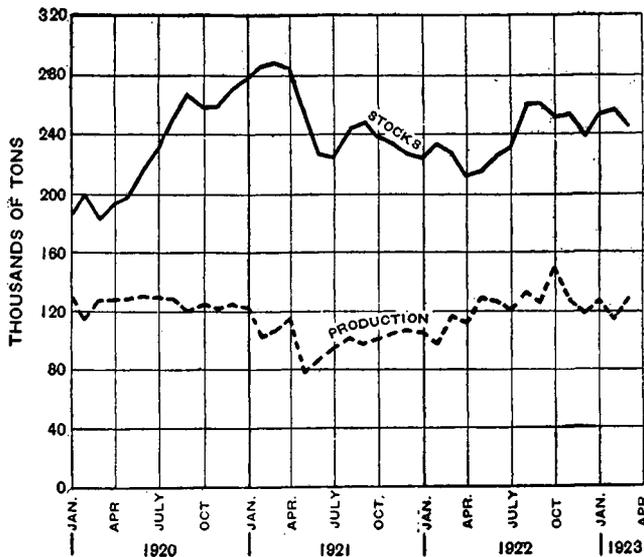

Production figures for kerosene, lubricating oil and gas and fuel oils were considerably larger than in February, 1922, while stocks were smaller.

## PAPER AND PRINTING.

Production and shipments of newsprint paper made a considerable increase in March and consumption by publishers was almost as great as the record made last October. Stocks declined in all positions and the price of newsprint, except Canadian, advanced over the February quotations.

## PRODUCTION AND STOCKS OF NEWSPRINT PAPER.

Production of corrugated paper boxes in March was the highest on record, but solid fibre board production declined.

Activity of printing establishments and their purchases and sales declined in February, but were all considerably higher than a year ago.

## AUTOMOBILES.

The output of automobiles made a new high record in March with 318,424 passenger cars and 34,593 trucks. Internal revenue tax collections increased in March on passenger cars and trucks, but declined on accessories; passenger car taxes were the highest collected since December, 1920.

## BUTTONS.

Reports furnished to the Department of Commerce by the National Association of Button Manufacturers show the following weekly comparisons regarding stocks of finished fresh-water pearl buttons and machinery activity by 17 companies representing 95.2 per cent of the machine capacity of the association members.<sup>a</sup>

WEEK ENDING—	STOCKS ON HAND (GROSS).		PER CENT OF MACHINE ACTIVITY.	
	1923	1922 <sup>1</sup>	1923	1922 <sup>1</sup>

<sup>1</sup> Based on reports from 16 firms.

## BUILDING CONSTRUCTION.

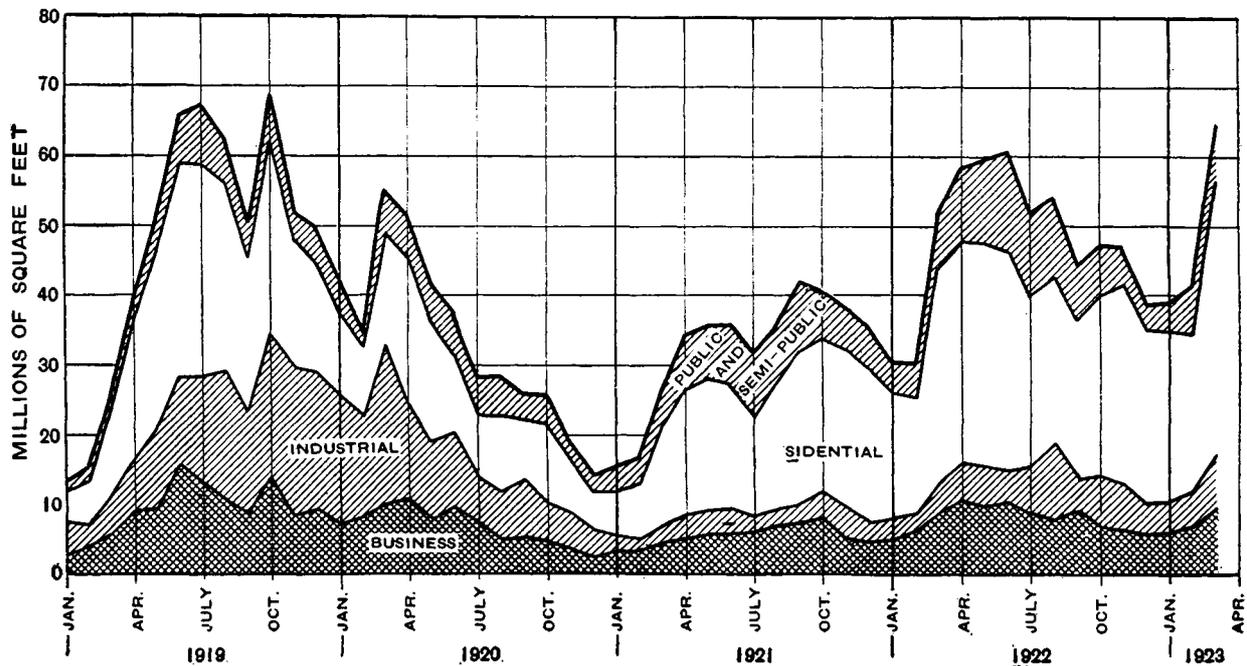

The cost of building continued to rise in March and averaged about 4 per cent greater than in February and about 110 per cent above the pre-war average.

The contracts awarded in March for building in 27 northeastern states amounted to 64,920,000 square feet, valued at \$333,518,000. The volume of building awards was the largest in over three years, but the value of the March awards was smaller than for several months in 1922. Contracts for residential buildings comprised over 60 per cent of the total floor space and were over 7,000,000 square feet in excess of any recent month. Business and industrial building contracts for March were larger than in March, 1922, but all public and semipublic buildings showed a decline from a year ago.

Fire losses were slightly smaller than in February.

<sup>a</sup> The National Association of Button Manufacturers has entered into cooperative arrangements with the Department of Commerce for the wider distribution of the statistics compiled and issued by that association. The statistics cover the quantity and price of orders received, quantity of button stocks on hand, and machinery activity weekly for freshwater pearl buttons specified by kind and grade. Persons desiring to obtain this service may either apply direct to the secretary of the association, 1182 Broadway, New York City, or, if they prefer, may send their names to the Survey of Current Business for forwarding to the association. A limited number of free copies is available for distribution by the association. If the demand for these becomes greater than the supply, a charge will be made by the association sufficient to cover merely the cost of distribution.

## VOLUME OF BUILDING CONTRACTS AWARDED, BY CLASSES.

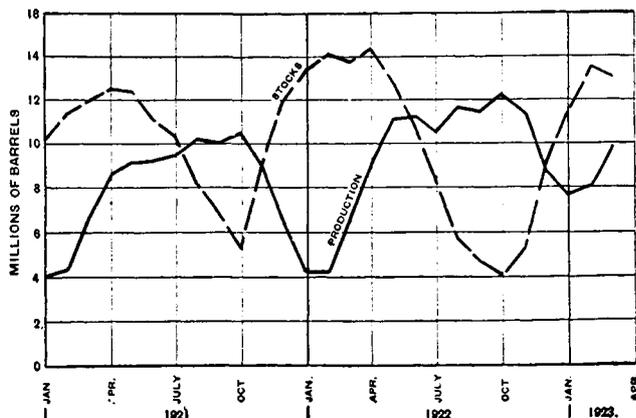

## BUILDING MATERIALS.

Production of all species of lumber was larger than in March, 1922, by a good margin, while only Michigan hardwoods showed a smaller output this year in March than in February. Shipments in March were greater than in either the previous month or the corresponding month last year. Stocks declined during March except for Michigan softwoods. Prices of lumber advanced.

Large increases occurred in March in the production, shipments, new orders, and unfilled orders for both oak and maple flooring. In all cases, except production of maple flooring, these figures are the highest of any month in recent years. Stocks of both kinds of flooring declined.

## PRODUCTION AND STOCKS OF PORTLAND CEMENT.

Brick production made a good increase in March, with clay fire brick the highest since 1919, and silica brick the highest since March, 1920. Shipments exceeded production and stocks declined, except for

face brick in both cases. Unfilled orders increased, with face-brick orders the highest on record.

Cement production and shipments were about 50 per cent greater than a year ago, while stocks declined. Concrete paving contracts let in March were smaller than in February and also less than a year ago.

Shipments of sanitary enamel ware increased but new orders declined for all classes. Stocks increased in March, except for lavatories.

Reports from the Tubular Plumbing Goods Association<sup>a</sup> show a large increase in sales in March, totaling 470,717 pieces, valued at \$445,999. Comparisons with previous months are shown on page 65.

## HIDES AND LEATHER.

The production of sole leather increased in March and exceeded any month of 1922. Increases also occurred in the production of skivers and oak and union harness. Production of boots and shoes reached a level in March not previously attained since statistics on this movement have become available.

Sales of belting rose and exceeded previous months since October, 1920. Prices of hides declined, while boots and shoes showed a similar tendency.

<sup>a</sup> The Tubular Plumbing Goods Association has completed cooperative arrangements with the Department of Commerce for the wider distribution of the statistics compiled and issued by that association. These statistics are issued semiweekly and cover manufacturers' sales, in 3-day intervals, of the classes of goods listed in the accompanying table. The figures are given in much greater detail in the regular reports, specifying the quantity subdivided by sizes, which have been sold in particular states, cities, or territories.

Persons desiring to obtain this service may do so by applying either to the secretary of the association at 25 Broad Street, New York City, or, if they prefer, may send their names to the Survey of Current Business for forwarding to the association. If there is a large demand for these sheets, a charge will probably be made by the association to cover the cost of printing and mailing.

## OILS AND CHEMICALS.

Receipts of turpentine and rosin at southern ports exceeded the March, 1922, receipts, while stocks on hand were more than 20 per cent lower than a year ago.

The price-index numbers of the various classes of chemicals all rose during March, especially crude drugs. The price of sulphuric acid remained unchanged.

The production of cottonseed oil was less than in March, 1922, but stocks of both cottonseed oil and cotton seed were higher. The price of cottonseed oil advanced rather sharply in March.

Receipts of flaxseed at Minneapolis and Duluth were slightly heavier than in February, while stocks were considerably lower than a year ago. Shipments of linseed oil and oil cake from Minneapolis were greater than a year ago.

## CEREALS.

Wheat movement for March was about the same as a year ago, but the visible supply was 28,000,000 bushels larger. The 1923 winter-wheat estimate of 572,000,000 bushels by the Department of Agriculture on April 1 points to the smallest crop since 1918. Prices of wheat and flour in general declined in March. Wheat-flour production for February, figures for which have just become available, was slightly higher than a year ago, and consumption and stocks were also greater.

Corn movement was much smaller than in March, 1922, and the visible supply was 20,000,000 bushels less. Grindings increased slightly, but were still under the figures for a year ago. The wholesale price of corn increased during March.

The visible supply of oats was 60 per cent less than the supply on March 31, 1922. Prices of oats rose, while the prices of barley and rye declined.

Car loadings of grain and grain products declined slightly, both as compared with February and with March a year ago.

According to reports to the Department of Agriculture, intended planting of spring wheat will be 5.5 per cent less than last year's acreage, corn and oats each will be 2.6 per cent greater, and barley 5.7 per cent greater.

Reports furnished to the Department of Commerce by the Iowa-Nebraska Cannery Association show spot stocks of corn on March 31 as 234,302 cases, while total future sales for the first quarter of the year amounted to 869,225 cases.<sup>a</sup>

<sup>a</sup> The Iowa-Nebraska Cannery Association has entered into cooperative arrangements with the Department of Commerce for the wider distribution of trade statistics collected, compiled, and issued by that association. These statistics cover periodic reports on acreage planted to sweet corn and the production, stocks, and sales of canned corn. Persons desiring to obtain this service may either apply direct to the secretary of the association, at Marshalltown, Iowa, or, if they prefer, may send their names to the Survey of Current Business for forwarding to the association. A limited number of free copies are available for distribution by the secretary of the association. If the demand for these is greater than the supply, a charge will be made by the association sufficient to cover merely the cost of distribution.

## OTHER CROPS.

Receipts and shipments of rice were considerably less in March than a year ago but stocks were greater.

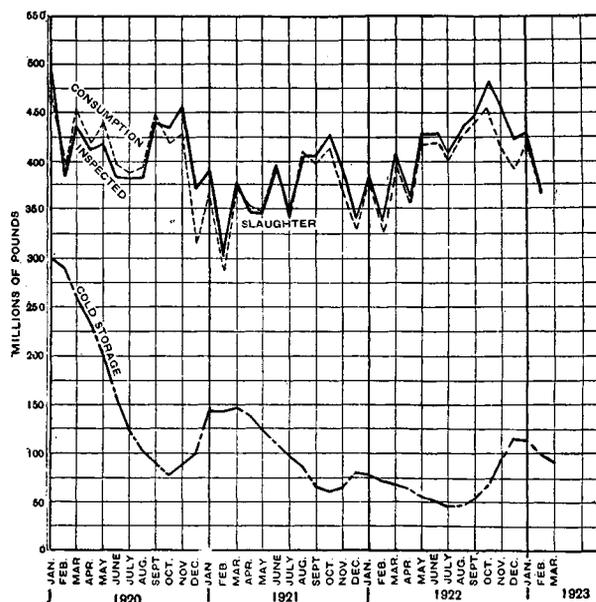

Carlot shipments of apples, potatoes, onions, and citrus fruit were larger than in February or than in March, 1922. Cold-storage holdings of apples made a seasonal decline, still exceeding the corresponding 1922 figures.

Plantings of white potatoes intended for 1923 will be 9.1 per cent less than the 1922 plantings, according to the Department of Agriculture, while intended sweet-potato plantings will be 2.5 per cent less.

## MEATS AND DAIRY PRODUCTS.

The movement and slaughter of live stock in March was slightly less than a year ago for beef and sheep but greater for hogs; slight exceptions to the above trends occurred in the increased slaughter of sheep and the smaller stocker and feeder shipments of hogs.

INSPECTED SLAUGHTER, CONSUMPTION, AND COLD-STORAGE HOLDINGS OF BEEF.

February slaughter of live stock was considerably larger than a year ago and consumption of meat was also larger. Exports of beef were slightly less than in February, 1922, but pork exports were greater. Cold-storage holdings of meats and dairy products at the end of March were considerably in excess of stocks held a year ago, except butter and eggs. Milk production in the Minneapolis district was much higher than in March, 1922.

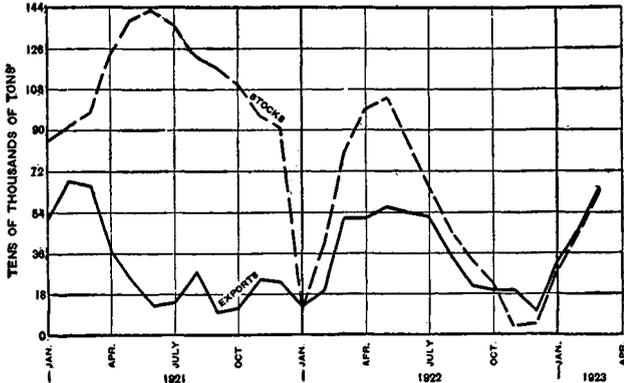

Receipts of dairy products were larger than a year ago and prices were higher. Receipts of poultry also were higher than last year, but the fish catch was smaller.

**SUGAR AND COFFEE.**

Meltings of sugar increased in March but were slightly less than a year ago. Stocks of raw sugar at refineries were slightly higher than at the end of March, 1922. Prices of sugar continued to rise.

Receipts of sugar in Cuba were almost identical with the March, 1922, receipts, but exports were considerably larger and stocks smaller than a year ago.

STOCKS OF RAW SUGAR IN CUBA AND SUGAR EXPORTS FROM CUBA.

The visible supply of coffee, both domestic and world, was smaller than a year ago, and receipts in Brazil were also less. A larger amount, however, was cleared from Brazil to the United States.

**TOBACCO.**

Increases took place in March in the output of manufactured tobacco products, as indicated by tax-paid withdrawals, but, except for cigars, the March figures were lower than for January. Stocks of unmanufactured tobacco at the end of March were higher than a year ago.

**WATER TRANSPORTATION.**

Total cargo traffic through the Panama Canal was slightly less in February than in January, but the average daily traffic was greater and the amount carried in American vessels surpassed previous months in this respect. The Sault Ste. Marie and Erie Canals were still closed to navigation in March.

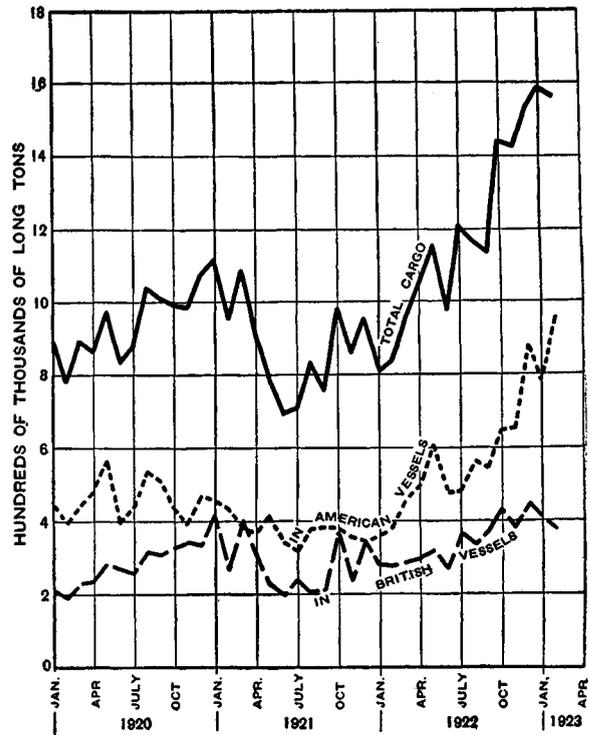

Movement of vessels in foreign trade through American ports was about the same as a year ago, but the proportion of American ships was considerably smaller. Ocean freight rates to Europe advanced slightly after a succession of declines, but the rate to Great Britain still declined slightly.

**RAILROAD TRANSPORTATION.**

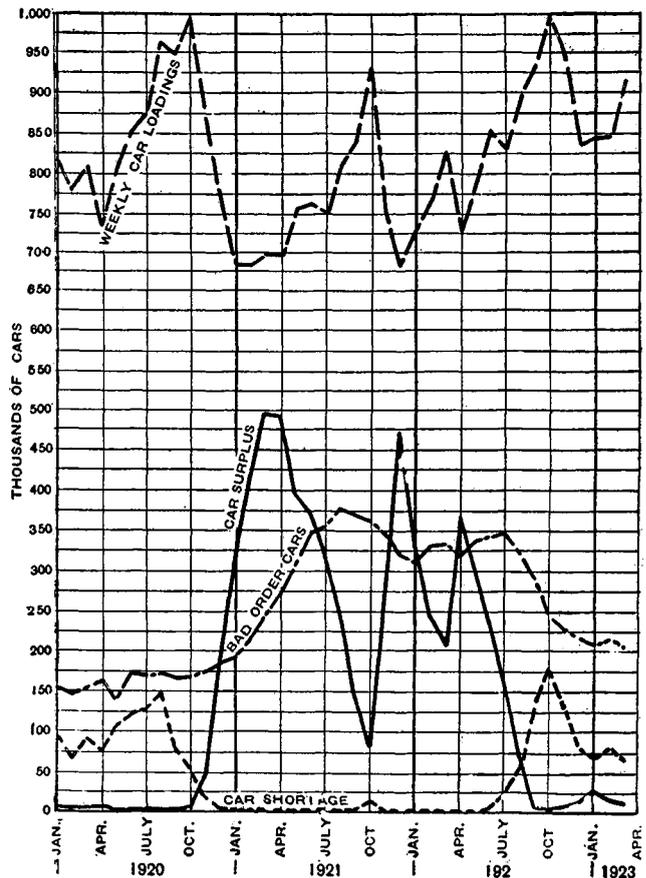

Freight-car loadings for March were not only the greatest on record for this season of the year but on a level not normally reached until about midsummer or early fall. As compared with a year ago, the March average loadings of ore were 150 per cent greater, while coal and forest products were upward of 40 per

cent greater, indicating pronounced consumption of raw materials.

PANAMA CANAL TRAFFIC.

SHORTAGE, SURPLUS, BAD-ORDER, AND TOTAL LOADINGS OF FREIGHT CARS.

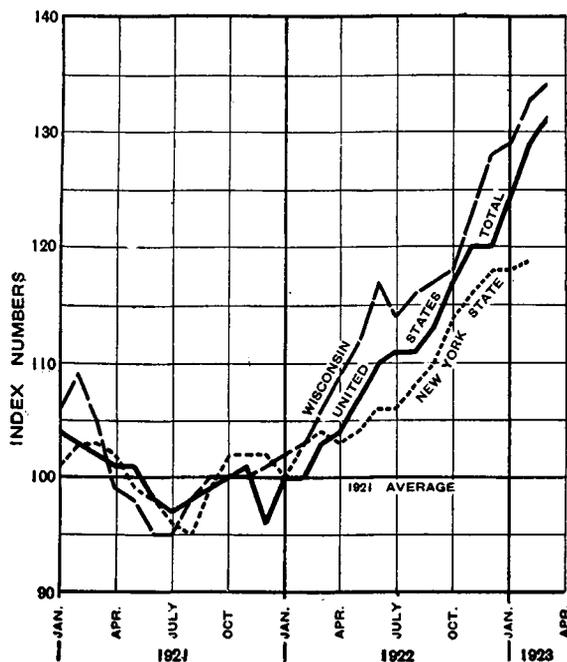

March witnessed a reduction in both the surplus and shortage of freight cars, especially the latter, indicating a better distribution of railway equipment for traffic requirements, as well as reducing the average daily net shortage from 65,000 to less than 55,000 cars. The number of bad-order cars was reduced to the lowest point in two years.

Railway operating figures for February show declines in both revenues and expenses, with net operating income smaller than a year ago. Pullman passenger traffic in March was greater than a year ago.

#### LABOR.

Employment in factories continued to increase in March, showing a gain of 27 per cent over a year ago in 1,428 representative firms throughout the United States. Unemployment figures for Pennsylvania again declined, with a decrease of 94 per cent from a year ago.

#### FACTORY EMPLOYMENT.

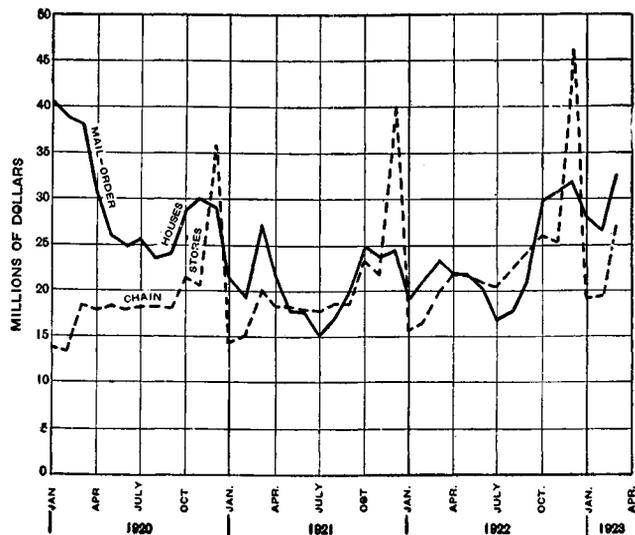

February reports of state and municipal employment agencies show a decline in workers registered and an increase in positions available. Applicants exceeded jobs offered by only 5 per cent in February. Immigration increased slightly and emigration was the lowest in recent years.

#### DISTRIBUTION.

An increase of 25 per cent in mail-order house sales brought the March total above any month back to March, 1920. Chain-store sales were 39 per cent greater than in February and made a record for any month outside of the December holiday trade. Candy sales increased slightly in March but were much less than in January, owing, no doubt, to the Lenten season.

#### SALES OF MAIL-ORDER HOUSES AND CHAIN TEN-CENT STORES.

Large increases occurred in March in magazine and newspaper advertising in postal receipts and in theater receipts. Both magazine and newspaper advertising made new high records since 1920.

#### PUBLIC FINANCE.

A very slight increase again occurred in the total interest-bearing debt of the Government, but Liberty bonds outstanding decreased slightly. Customs receipts made a new high record of \$62,172,000 and total ordinary receipts were \$90,000,000 in excess of the March figures last year, including the income-tax payments. Government disbursements were less than a year ago. Per capita money circulation again increased.

#### BANKING AND FINANCE.

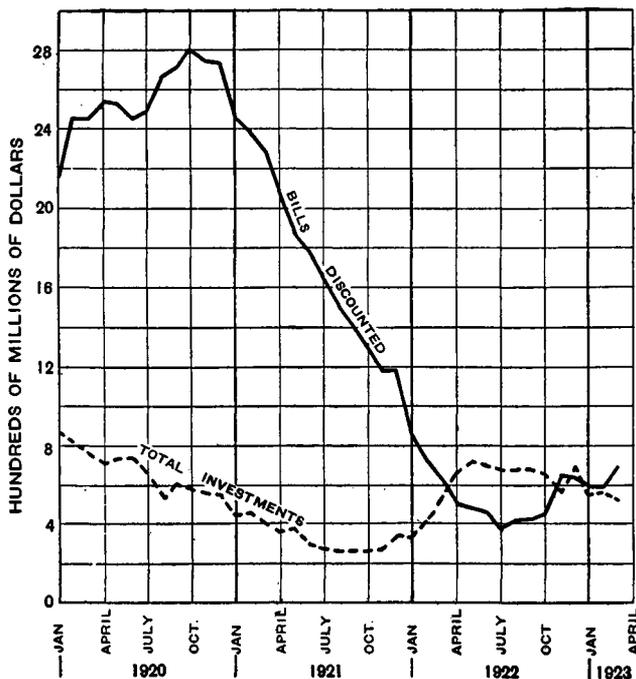

Debits and bank clearings were about 17 per cent larger than in February, with about the same relative increase in New York City as outside. Compared with a year ago, New York City debits increased about 10 per cent and clearings about 5 per cent, but in outside cities the increases were about 13 and 21 per cent, respectively.

In the Federal Reserve banks there was an increase in discounts and a decline in investments. Note circulation, total reserves, and the reserve ratio declined slightly, while deposits increased. Member banks increased both their loans and their investments, while demand deposits declined. Interest rates rose to 5 per cent for both call and time money.

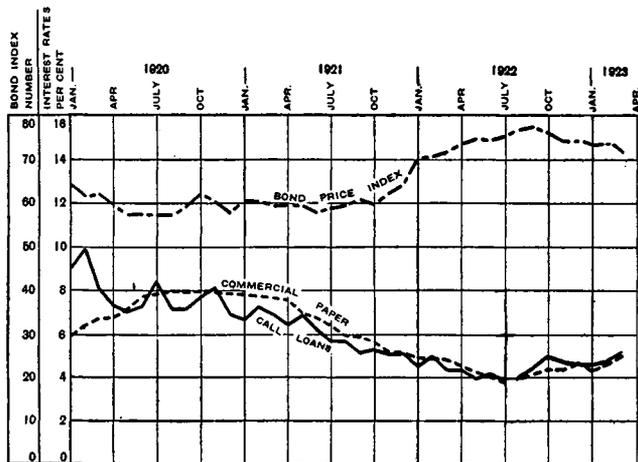

Savings deposits continued to increase, with a gain of about 1 per cent during the month. All districts except Boston, Minneapolis, and Kansas City showed a gain over February, and postal savings also increased slightly.

Life-insurance sales made a large increase over February and two of the three classes established new high records.

**BILLS DISCOUNTED AND TOTAL INVESTMENTS OF FEDERAL RESERVE BANKS.**

**INTEREST RATES AND BOND PRICES.**

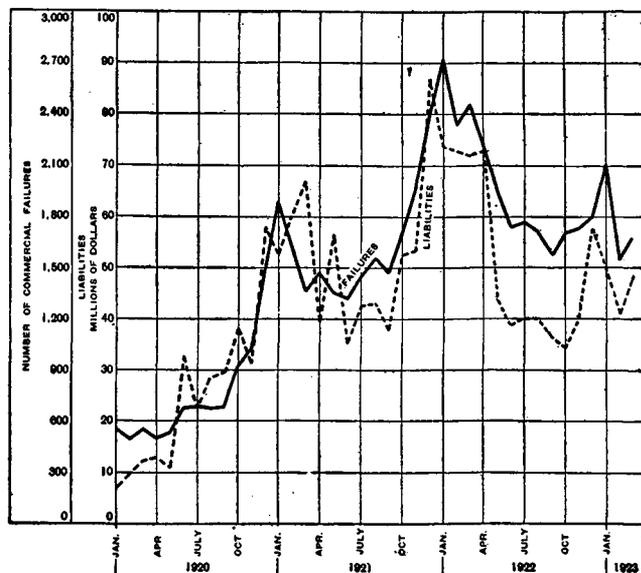

Business failures were slightly larger in March and defaulted liabilities increased 19 per cent. Dividend payments for all classes of corporations were higher than a year ago, as were interest payments, but new

incorporations declined perceptibly from both the previous month and the corresponding month last year.

In a larger volume of sales, prices of industrial stocks advanced and railroad stocks declined slightly. Bond sales also increased in March but prices declined throughout all groups.

**NUMBER OF BUSINESS FAILURES AND AMOUNT OF DEFAULTED LIABILITIES.**

**GOLD AND SILVER.**

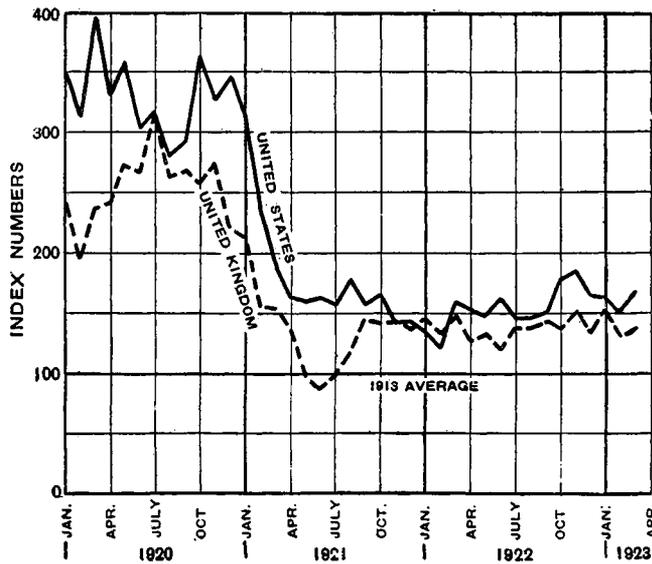

Domestic gold receipts declined in March but both imports and exports increased, the import balance being reduced to \$5,559,000. Silver production made a noticeable increase, while imports and exports almost balanced. The price of silver advanced.

**FOREIGN EXCHANGE AND TRADE.**

Little change occurred in the foreign exchanges in March, the chief increases occurring in the exchanges of Chile, France, Italy, and Belgium, while Brazil showed the greatest decline. The general index was unchanged.

Exports from the United States in March amounted to \$350,000,000, the highest since last November.

## EXPORTS FROM THE UNITED STATES AND THE UNITED KINGDOM.

Owing to the much larger number of classifications required under the new tariff act and the difficulty in getting the declarations properly made out, all import statistics have been greatly delayed. It is expected that these difficulties will be overcome shortly and that the statistics can again be brought up to date. Figures for imports during January, 1923, have just become available. Since these can not easily be fitted into the table on the "Trend of Business Movements," the imports of those items usually reported in the Survey are given in the accompanying table. Comparison is made with the quantities imported in January, 1922. With the exception of rice and mechanical wood pulp, the imports of the commodities here shown in quantities point to a marked increase in the volume of our import trade during the fiscal year 1923 as compared with 1922. In point of value, the total goods imported into the United States since the beginning of the fiscal year was 43 per cent greater than the corresponding period a year ago.

## IMPORTS OF SPECIFIED COMMODITIES.

	January, 1923.	January, 1922.	Percentage increase (+) or decrease (-), Jan- uary, 1923, from January, 1922.	CUMULATIVE TOTAL FROM JULY 1.		Percentage increase (+) or decrease (-), cumu- lative 1922- 23 from 1921-22.

## MONTHLY INDEXES OF UNFILLED ORDERS AND STOCKS.

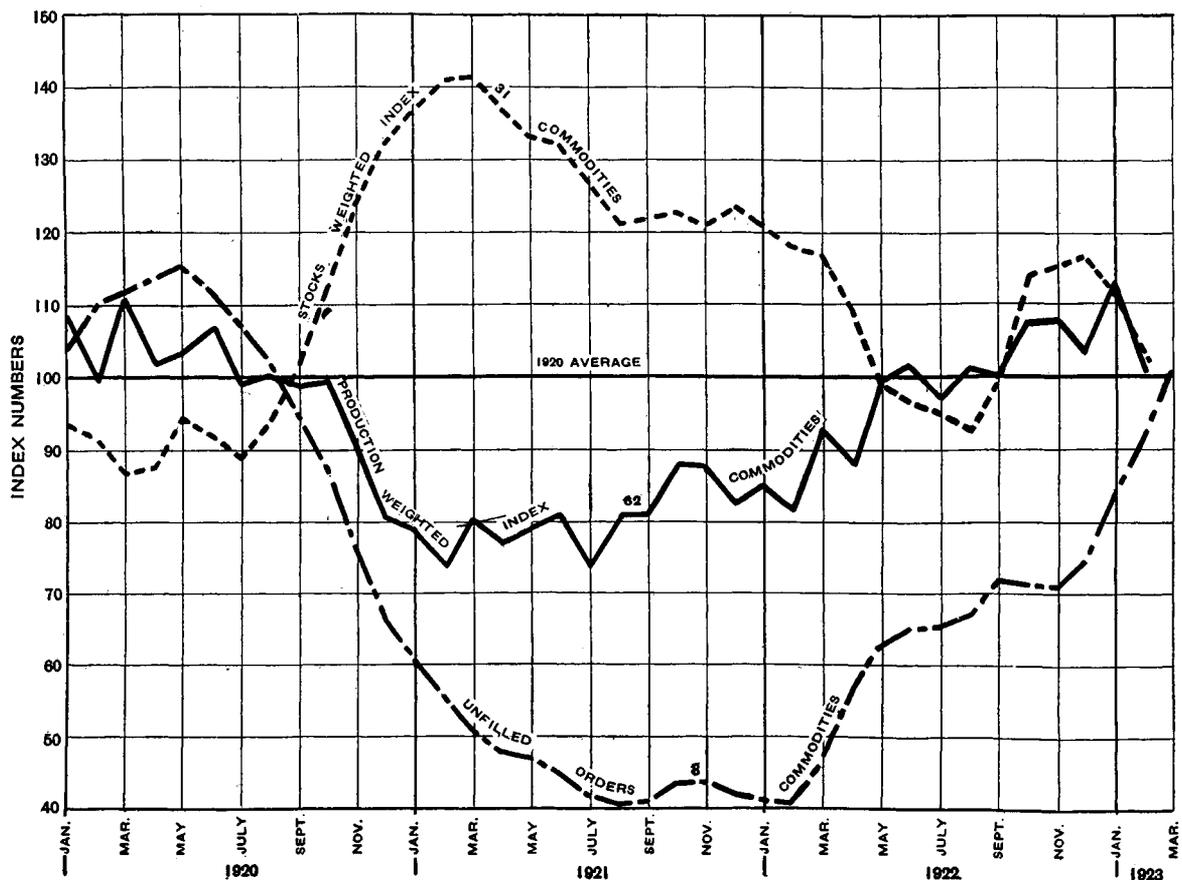

The availability of accurate data, covering the past three or four years, on unfilled orders and stocks of basic commodities and the growing need for such indexes as may sensitively reflect the situation in industry has led the Department of Commerce, supplementing its production index, to compile similar indexes for unfilled orders and stocks.

In compiling these index numbers we have taken the data published regularly as a part of the Survey of Current Business. Data on stocks and unfilled orders are lacking for many of the items on which we have production figures, so that these index numbers are not as accurate, but it is believed that the trends can be shown well enough for all practical purposes.

It is interesting to note that stocks at the end of February were, with the exception of four months

last summer, the lowest since September, 1920. On the other hand, unfilled orders were the highest since August, 1920. The accompanying diagram shows graphically the relation between these two items and production. For purposes of this graphic comparison the indexes on production and stocks have been recomputed to a 1920 base. The high point in stocks on hand during the past depression occurred in March, 1921, while the low point for production was reached in July and that for unfilled orders in August, 1921. Maximum stocks went to over 50 per cent above the 1919 average, while production at the minimum declined about 25 per cent and unfilled orders about 60 per cent from their respective averages in 1919 and 1920.

RELATIVE PRODUCTION, STOCKS AND UNFILLED ORDERS IN BASIC INDUSTRIES.

**UNFILED-ORDER INDEX.**

This index is based upon the following eight items: Unfilled orders for steel (United States Steel Corporation), locomotives, merchant pig iron, steel sheets (independent steel mills), maple flooring, oak flooring, clay fire brick, and face brick. The index is formed by weighting each item arithmetically, as far as possible, by the value added to it in the process of manufacture in 1919, as ascertained by the Census of Manufactures. The average unfilled orders in 1920 is taken as 100 in calculating relative figures. The following table lists the items included in this index with their respective weights:

INDUSTRY OR PRODUCT.	Weight used.
Locomotives.....	4
Merchant pig iron.....	9
Steel (independent sheets and United States Steel Corporation).....	57
Maple and oak flooring.....	10
Face and clay fire brick.....	7
Total weighting.....	87

**INDEX OF STOCKS ON HAND.**

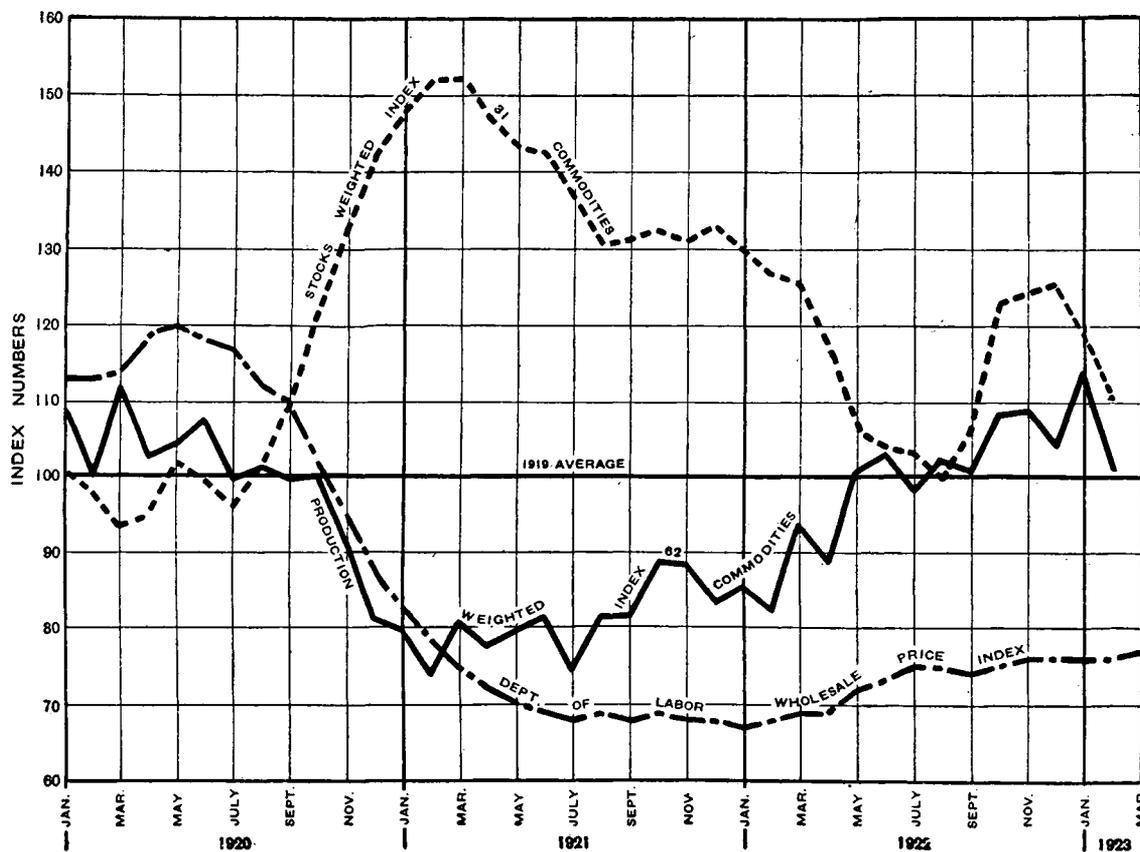

This index is based upon the 31 individual items shown by groups with their respective weights in the table at the top of next column:

INDUSTRY OR PRODUCT.	Weight used.
Cotton (total).....	44
Merchant pig iron.....	9
Lumber (includes yellow pine, California white pine, Michigan hardwoods, Michigan softwoods, having a total weighting of 48, and oak and maple flooring, having a weighting of 10), total weighting.....	56
Paper and pulp (include mechanical wood pulp, chemical wood pulp, having a weighting of 5, and newsprint, book, fine, and wrapping paper and paper board, having a weighting of 11), total weighting.....	16
Oils and naval stores (include kerosene, gas, and fuel oils and lubricating oil, having a weighting of 19, and rosin, turpentine, flaxseed, and cottonseed oil, with a weighting of 7), total weighting.....	26
Brick and enamel ware (include clay fire and face brick, with a total weighting of 7, and lavatories, baths, sinks, and miscellaneous enamel ware, having a weighting of 4) total weighting.....	11
Nonferrous metals (include zinc and tin), with a weighting of.....	6
Total weighting.....	168

The index is formed by weighting each item or series of items arithmetically, as far as possible, by the value added to it in the process of manufacture in 1919, as ascertained by the Census of Manufactures for the year 1919. The average stocks in 1919 is taken as 100 in calculating relative figures.

The following table gives the monthly indexes of unfilled orders and stocks from January, 1920, to date. The stock index, because of its more comprehensive nature, is divided into various group index numbers, while the unfilled-order index represents the combined total of 8 commodities.

**PRODUCTION, STOCKS AND WHOLESALE PRICES.**

## INDEX NUMBERS OF STOCKS AND UNFILLED ORDERS.

	STOCKS.								UNFILLED ORDERS.
	Total.	By groups.							Total index.
		Cotton.	Pig iron.	Lumber.	Paper and pulp.	Oils and naval stores.	Brick and enamel ware.	Non- ferrous metals.

## INDEX NUMBERS OF PRODUCTION AND MARKETING.

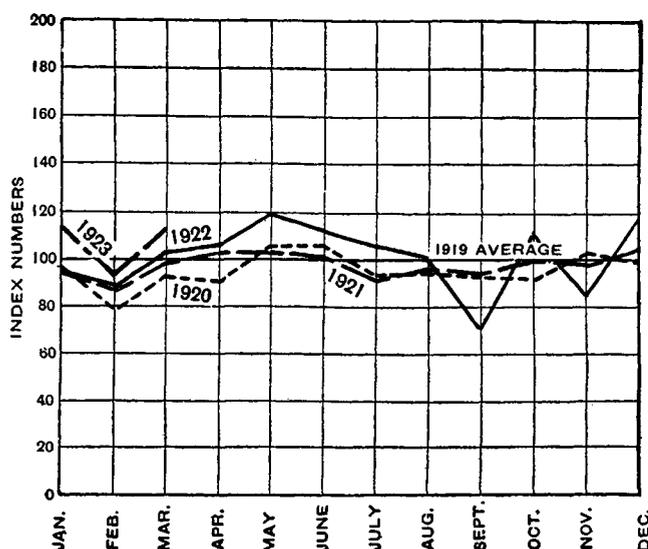

In recent numbers of the Survey there have been published detailed discussions of certain index numbers of production and marketing dealing particularly with raw materials. The following tables give the recent figures for each of these index numbers, compared with the corresponding months of 1922. The methods of compiling these indices and the weighting factors used are discussed in detail in the issues of the Survey referred to.

INDEX OF FORESTRY PRODUCTION.<sup>1</sup>  
(Relative production 1919=100.)

	1922			1923		
	Feb.	Mar.	Dec.	Jan.	Feb.	Mar.
Yellow pine.....	97.5	110.3	102.6	115.6	101.3	124.6
Western and sugar pine and white fir.....	32.3	46.6	67.4	58.2	51.7	102.7
Douglas fir.....	109.5	109.1	98.8	115.0	109.4	139.8
Redwood.....	95.5	142.9	92.2	108.3	128.3	175.1
Hemlock.....	38.9	57.8	61.6	79.8	65.7	80.9
Maple, birch, and beech.....	68.7	94.6	84.3	113.3	112.1	119.6
<b>Total lumber.....</b>	<b>88.8</b>	<b>100.4</b>	<b>94.4</b>	<b>107.8</b>	<b>97.6</b>	<b>123.8</b>
Pulp wood.....	76.2	109.7	90.4	98.4	.....	.....
Gum.....	47.9	53.6	184.3	98.2	63.9	64.3
Distilled wood.....	71.6	83.7	148.5	150.7	123.1	.....
<b>Grand total.....</b>	<b>85.7</b>	<b>99.3</b>	<b>98.1</b>	<b>106.9</b>	.....	.....

<sup>1</sup> For complete table and discussion, see August, 1922 (No. 12), issue of the Survey.  
<sup>2</sup> Revised.

INDEX NUMBERS OF MARKETINGS OF ANIMAL PRODUCTS.  
(Average monthly marketings 1919=100.)

INDEX OF MARKETINGS OF ANIMAL PRODUCTS.<sup>1</sup>

(Relative marketings 1919=100.)

	1922			1923		
	Feb.	Mar.	Dec.	Jan.	Feb.	Mar.
<b>Total.....</b>	<b>87.8</b>	<b>102.5</b>	<b>118.7</b>	<b>113.4</b>	<b>95.4</b>	<b>113.6</b>
Wool.....	75.2	61.1	44.1	37.7	33.6	52.4
Cattle and calves.....	69.0	79.0	88.9	91.4	69.5	73.2
Hogs.....	96.7	91.3	133.9	142.0	120.1	131.8
Sheep.....	61.8	64.7	66.9	72.2	60.3	63.1
Eggs.....	86.4	163.9	40.9	71.8	86.3	178.8
Poultry.....	75.8	66.6	370.9	220.8	119.3	86.6
Fish.....	123.7	107.3	54.8	45.4	67.1	89.4
Milk.....	101.9	117.9	115.0	115.9	106.9	122.5

<sup>3</sup> Revised.

## TREND OF BUSINESS MOVEMENTS.

The following table contains a summary of the monthly figures, designed to show the trend in important industrial and commercial movements. The numerical data for the latest months are given and in addition index numbers for the last four months and for two corresponding months of a year ago. In many lines the figures do not lend themselves readily to statistical uniformity, due to lateness of their publication or publication at other than monthly intervals; therefore the following explanations of the various headings are offered to make clear such distinctions and in general to facilitate the use of the table:

*February, 1923.*—This column gives the February figures corresponding to those for March shown in the next column—in other words, cover the previous month, and in some cases, where indicated by a footnote, refer to the previous quarter; that is, ending December 31, 1922.

*March, 1923.*—In this column are given the figures covering the month of March, or, as in the case of stocks, etc., the situation on March 31 or April 1. In a few cases (usually where returns are reported quarterly only) the figures are for the quarter ending March 31 or the condition on that date. Where this column is left blank, no figures for March were available at the time of going to press (May 7).

*Corresponding month, February, 1922, or March, 1922.*—The figures in this column present the situation exactly a year previous to those in the "March, 1923," column (that is, generally March, 1922), but where no figures are available for March, 1923, the February, 1922, figures have been inserted in this column for comparison with the February, 1923, figures. In the case of quarterly figures, this column shows the corresponding quarter of 1922.

*Cumulative total through latest month.*—These columns set forth, for those items that can properly be cumulated, the cumulative total for the first three months of the calendar years 1922 and 1923, respectively, except where the March, 1923, figures are lacking, in which case the cumulative total for two months in each year is given.

*Percentage increase (+) or decrease (-) cumulative, 1923 from 1922.*—This column shows the per cent by which the cumulated total for the three months ending March, 1923, is greater (+) or less (-) than the total for the corresponding period ending March, 1922.

*Base year or period.*—For purposes of comparison with a previous more or less normal period, all items, so far as possible, are related to such a period by index numbers. The period taken for each item, called the base, is the monthly average of the year or period stated in this column. Wherever possible, the year 1913 is taken as a base, and if no pre-war figures are available, 1919 is usually taken to avoid using a war year as a basis. In some cases it will be noted that figures were not available prior to 1920 or even 1921 and that sometimes a month, or an average of a few months, has to be used rather than a year's average. Also, for some industries, 1919 would not be a proper base on account of extraordinary conditions in the industry and therefore some more representative year has been chosen.

*Index numbers.*—In order to visualize the trend of each movement, index or relative numbers are given for the last four months and for two corresponding months of a year ago. These index numbers are computed by allowing the monthly average for the base period, usually 1913 or 1919, to equal 100. If the movement for a current month is greater than the base the index number will be greater than 100. If the converse is true the index number will be less than 100. The difference between 100 and any index number gives at once the per cent increase or decrease compared with the base period. Index numbers may also be used to compute the approximate per cent increase or decrease from one month to the next.

*Percentage increase (+) or decrease (-) March from February.*—The last column shows the per cent increase or decrease of the figure for the last month compared with the preceding month.

**NOTE.**—Because of the confusion resulting from the new tariff schedules, the Bureau of Customs Statistics, Treasury Department, has not been able to compile the import figures for either February or March. All import figures are therefore omitted from this table. January imports are given on page 19.

\*Not exactly comparable with monthly figures prior to July, 1922. The index numbers have been computed by chain relatives and take account of the percentage variation rather than the absolute variation in the figures, and hence show the trend of the movement irrespective of the change in the number of firms reporting.

<sup>1</sup> Receipts of wool at Boston compiled by Boston Chamber of Commerce; Imports from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; consumption and quarterly stocks from U. S. Department of Agriculture, Bureau of Agricultural Economics, until April, 1922, beginning with April, 1922, compiled by U. S. Department of Commerce, Bureau of the Census, in cooperation with U. S. Department of Agriculture, Bureau of Agricultural Economics.

<sup>2</sup> These figures have been revised to include only comparable reports each month and thus do not contain the figures for the American Woolen Company and a few small firms, for which estimates had been made in previous compilations. Stocks include wool, tops and noils.

<sup>3</sup> Average of the last two quarters of 1920.

<sup>4</sup> Average of the first three quarters of 1921.

<sup>5</sup> Includes U. S. Government stocks.

<sup>6</sup> Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

<sup>7</sup> Average of the last three quarters of 1922.

## COTTON.

<sup>1</sup> Except receipts into sight, compiled by *New Orleans Cotton Exchange*, and world visible supply of American cotton, compiled by *Commercial and Financial Chronicle*. Production estimates from *U. S. Department of Agriculture, Bureau of Agricultural Economics*; imports and exports from *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; consumption and domestic stocks from *U. S. Department of Commerce, Bureau of the Census*. Linters are not included in the statistics in this table, except in the exports. It should be noted that the monthly averages of stocks (except visible supply) and consumption are based on the crop year ending July 31 of the year stated, while for ginnings the average is for the crop grown in the year stated. Other averages are based on the calendar years.

<sup>2</sup> These figures are for fiscal years ending June 30 of the year given; those following are for calendar years.

<sup>3</sup> All bales are running bales counting round as half bales, except for imports which are given in equivalent 500-pound bales.

## MISCELLANEOUS TEXTILES.

<sup>1</sup> Imports of total raw silk, unmanufactured fibers and burlap are from *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; consumption and stocks at warehouses of raw silk are from the *Silk Association of America*; sales of elastic webbing are from the *Webbing Manufacturers Exchange*.

<sup>2</sup> Total unmanufactured silk, including raw silk, cocoons, and waste.

<sup>3</sup> Consumption figures represent withdrawals from warehouses. Note that February to December, 1920, inclusive, is used as the base period.

<sup>4</sup> Includes flax, hemp, istle, jute, kapok, manila, New Zealand flax, sisal, etc.

<sup>5</sup> Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

## ACTIVE TEXTILE MACHINERY.

<sup>1</sup> Data from U. S. Department of Commerce, Bureau of the Census.<sup>2</sup> Formerly reported as of the first of the following month representing previous month's operations but now reported as of the month to which the figures apply. In the present table each figure shows the activity for the month to which it is credited.<sup>3</sup> The monthly averages are for cotton crop years (beginning Aug. 1 and ending July 31). Figures opposite any one year represent the monthly average number of active cotton spindles for the period beginning Aug. 1 of the preceding year.<sup>4</sup> Data for 1913 collected by the National Association of Wool Manufacturers.

<sup>1</sup> Compiled by U. S. Department of Commerce, Bureau of the Census.

<sup>2</sup> Formerly reported as of the first of the following month representing previous month's operations but now reported as of the month to which the figures apply. In the present table each figure shows the activity for the month to which it is credited.

<sup>3</sup> Overtime was reported sufficient to offset all idle hours and leave an excess for October of 34,775 hours, or 6.4 per cent, for November of 65,380 hours, or 11.4 per cent, for December an excess of 20,427 hours, or 3.3 per cent, for January 16,994 hours, or 3 per cent, and for March 98,726 hours, or 17.2 per cent.

<sup>4</sup> Overtime was reported sufficient to offset all idle hours and leave an excess for March of 62,490 hours, or 3.9 per cent.

<sup>5</sup> Overtime was reported sufficient to offset all idle hours and leave an excess for March of 11,720,315 hours, or 2.1 per cent.

## TEXTILE WHOLESALE PRICES.

<sup>1</sup> Prices of cotton and wool to the producer on the 1st and 15th of each month, respectively, are weighted averages of prices received by producers throughout the United States for all grades of cotton and wool as compiled by the U. S. Department of Agriculture, Bureau of Agricultural Economics. All other prices are averages of weekly quotations compiled by the U. S. Department of Labor, Bureau of Labor Statistics, except wool prices from compilation by U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce, until June, 1922, and beginning with June, 1922, compiled by U. S. Department of Commerce, Bureau of the Census.

<sup>2</sup> The prices of cotton and wool to the producer represent a composite of all grades as they come from the farms. The market prices, especially in the case of wool, are quoted on a specific grade above the average and include handling and transportation charges.

See footnotes on opposite page also.

Iron ore movement from the U. S. War Department, Engineer Corps; figures for pig-iron production (anthracite and coke, not including charcoal iron) furnished by the Iron Age; merchant pig iron by the American Pig Iron Association, representing about 60 per cent of total merchant production and about 90 per cent of production in strictly merchant furnaces; Ohio foundry iron by Ohio State Foundrymen's Association; wholesale prices, average of weekly quotations, from U. S. Department of Labor, Bureau of Labor Statistics, except composite pig iron, which is compiled by the American Metal Market.

<sup>2</sup> No allowance made for seasonal variation in computing these index numbers. The figures represent the total iron ore movement, both for the United States canal and the Canadian canal which is equivalent to about 85 per cent of the total iron ore production of the United States. Figures for 1913 to 1922 represent monthly averages computed from the total movement for the year on a six months' basis during the equivalent of which period the total movement takes place. The canals, however, are open from April to December, inclusive, and the monthly data here shown covers the entire season during which the canals are open.

<sup>3</sup> Eleven months' average, February-December, 1921.

<sup>4</sup> Represents percentages of actual to normal melt of gray iron foundries in Ohio. Prior to September, 1921, reports represent the month beginning with the 15th day of the calendar month. September, 1921, figures are for the period Sept. 15 to 30 only. Subsequent figures are for calendar months.

<sup>5</sup> Ten months' average, March-December, 1921.

<sup>6</sup> The composite pig iron price compiled by the *American Metal Market* is the average price of 10 tons of iron distributed as follows: One ton each of Bessemer Valley; No. 2 foundry valley; No. 2 X foundry at Philadelphia and at Buffalo; No. 2 foundry at Cleveland and at Chicago; two tons each of basic valley and No. 2 Southern foundry, Cincinnati.

<sup>7</sup> Less than one.

See footnotes on opposite page also.

<sup>1</sup> Yearly figures represent the monthly averages of total production of all companies as compiled annually by the American Iron and Steel Institute. The institute reports monthly production figures for 30 companies which produced 84.2 per cent of the total output of the country in 1920, 87.48 per cent in 1921, and 84.13 per cent in 1922. In order to make the monthly figures comparable, they have been calculated to a 100 per cent production on the basis of the above percentages, the 1923 figures being calculated on the 1922 average.

<sup>2</sup> Unfilled orders of steel and earnings reported by U. S. Steel Corporation.

<sup>3</sup> Sheets, blue, black, and galvanized, reported by the National Association of Sheet and Tin Plate Manufacturers, representing almost all the independent sheet manufacturers and about 70 per cent of the total output of sheets.

<sup>4</sup> Bookings of commercial steel castings reported by the Steel Founders Society and principal nonmember firms to the U. S. Department of Commerce, Bureau of the Census. Reports are by 65 identical firms with a capacity of 96,900 tons per month, of which 58,700 tons are usually devoted to railway specialties. This represents over two-thirds of the castings capacity of the United States devoted to commercial castings (as distinguished from castings used in further manufacture in the same plant).

<sup>5</sup> Railway specialties include such items as bolsters, side arms, draft arms, couplers, and cast steel car wheels, and are reported by identical firms throughout.

<sup>1</sup> Locomotive shipments and unfilled orders reported direct by principal locomotive companies; Freight car orders by domestic railroads compiled by the *Iron Trade Review*; vessels under construction and vessels completed, *U. S. Department of Commerce, Bureau of Navigation*; fabricated structural steel by the *Bridge Builders and Structural Society* up to April, 1921, and since then compiled by *U. S. Department of Commerce, Bureau of the Census*, including reports from the *Structural Steel Society*; iron and steel exports by *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; steel furniture compiled by the *U. S. Department of Commerce, Bureau of the Census*, including reports from the *National Association of Steel Furniture Manufacturers*.

<sup>2</sup> Gross ton represents in units of 100 cubic feet the entire cubical capacity of the vessel, including crew and engine space.

<sup>3</sup> Tonnage under construction on the first of the month refers to the gross tons of shipping, building or under contract to build for private owners. Includes only steel vessels of over 100 gross tons. Does not include Government ships or ships building or contracted for by U. S. Shipping Board.

<sup>4</sup> Includes ocean-going, lake and river vessels built and officially numbered by the *U. S. Department of Commerce, Bureau of Navigation*. Includes vessels of the U. S. Shipping Board and private American owners, but not vessels built for foreign owners.

<sup>1</sup> Percentages of capacity calculated from reports of the *Bridge Builders and Structural Society* up to April, 1922, and applied to estimated total capacity each year based on a special survey by the *Bureau of the Census* (see *January, 1923*, issue, No. 17, p. 13, for details). Beginning with April, reports received from 168 firms with a total capacity of 220,790 tons have been prorated to the estimated total capacity of the United States, 250,000 tons for comparison with previous figures.

<sup>2</sup> This column gives a total of pig iron and rolled products as used in the *Iron Trade Review*, which is comparable each month back to 1913.

<sup>3</sup> Beginning with January, 1922, all commodities are given in quantities in the export reports, many of which were previously available only on a value basis. This column gives the total of all pig iron and rolling-mill products as compiled by the *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*.

<sup>4</sup> These data comprise shipments from 22 manufacturers, representing practically the entire production of stock goods, which include sections, counters, office and vault verticals, safes and interiors, desks and tables, and small miscellaneous articles, exclusive of shelving and lockers.

## MISCELLANEOUS METAL PRODUCTS.

<sup>1</sup> Patents granted compiled from the official records on file in the U. S. Department of the Interior, U. S. Patent Office, Division of Publications; stoker sales from the Stoker Manufacturers' Association, said to represent approximately 99 per cent of the industry; steel barrels and drums from the Steel Barrel Manufacturers' Association; agricultural pump shipments compiled by the Federal Reserve Bank of Chicago in cooperation with the National Association of Farm Equipment Manufacturers and covers 22 firms, except for May and June, when only 21 firms reported; brass stop cocks from The National Association of Brass Manufacturers; tubular plumbing sales from The Tubular Plumbing Goods Association.

<sup>2</sup> Relative to six months' average, July to December, 1921.

<sup>3</sup> These figures include, besides the articles shown in the other two columns, the value of cylinders shipped separately.

<sup>4</sup> Data represent the total of 22 different classes of stop cocks reported to the association by its members.

<sup>5</sup> Figures are incomplete owing to the failure of 2 or 3 member companies to report.

<sup>6</sup> Average for last seven months of 1922.

<sup>7</sup> It should be noted that inasmuch as patents are granted on Tuesdays only, the number of patents shown for a given month represents the total, peculiar to the month in question, of either 4 or 5 Tuesdays.

<sup>8</sup> Data include patents granted falling within the official classification of "agricultural implements; planters, harrows and diggers, plows, harvesters, scattering unloaders, and threshing implements."

## NONFERROUS METALS.

See footnotes on opposite page also.

<sup>1</sup> Except shipments of crude petroleum from Mexico. Crude petroleum production, stocks, imports, and consumption, and completion of oil wells, from U. S. Department of the Interior, Geological Survey; wholesale price of crude petroleum, average for the month, from U. S. Department of Labor, Bureau of Labor Statistics; data on gasoline from U. S. Department of the Interior, Bureau of Mines.

<sup>2</sup> Figures for earlier years adjusted to represent approximate net stocks to conform with data for current months.

<sup>3</sup> Mexican petroleum shipments from the three ports, Tampico, Port Lobos, and Tuxpam, form the best current measure of Mexican oil production. These figures are compiled from those published in the Oil Trade Journal. Current month is approximate from the Wall Street Journal.

<sup>4</sup> Stocks held by refiners.

<sup>1</sup> Based on figures compiled by the U. S. Department of Commerce, Bureau of the Census. The data embrace returns from packers, tanners, dealers, importers, and manufacturers. As given in the detailed monthly reports, which can be obtained upon request from the Bureau of the Census, the returns for hides and skins are expressed in numbers of hides and skins. For the above summary these have been reduced to pounds on the basis of the average weights of each class. Similarly data on leather have been converted to pounds or square feet from reports in skins, sides, backs, butts, pounds, etc.  
<sup>2</sup> Prior to July, 1922, these figures were compiled by the Tanners' Council. Since July, 1922, they have been compiled by the Bureau of the Census and for skiver and harness production represent returns from a much larger number of firms than reported to the Tanners' Council. Hence the figures from July, 1922, on are not directly comparable with those for preceding months. The index numbers in Table 27 for the months after July, 1922, have been computed by chain relatives and take account of the percentage variation rather than the absolute variation in the figures. The index numbers show the trend of the industries irrespective of the change in the number of firms reporting.

## HIDES AND LEATHER—TRADE AND PRICES.

Table 31.—INDEX NUMBERS.

Based on data from Government sources.

[Base year in bold-faced type; numerical data on opposite page.]

YEAR AND MONTH.	EXPORTS OF LEATHER. <sup>1</sup>			IMPORTS OF HIDES AND SKINS. <sup>1</sup>					WHOLESALE PRICES. <sup>2</sup>							
	Sole.	Upper. <sup>3</sup>	Total boots and shoes.	Total hides and skins.	Calf-skins.	Cattle hides.	Goat-skins.	Sheep-skins.	Hides.		Leather.		Boots and shoes.			
									Green salted, packers' heavy native steers (Chicago).	Calf-skins, country No. 1 (Chicago).	Sole, hemlock, middle No. 1 (Boston).	Chrome calf, "B" grades (Boston).	Men's black calf, blucher (Boston).	Men's dress welt tan calf (St. Louis).	Women's black kid, Good-year welt (St. Louis).

<sup>1</sup> Data from *The Container Club* and *National Association of Corrugated and Fibre Box Manufacturers*.<sup>2</sup> Average of last six months of year.<sup>3</sup> Per cent of normal operating time and left-hand production column represent 17 and 16 identical firms, respectively, as reported by *The Container Club*, except that, for the first three of the six months of 1919 reported, two companies are omitted which do not appreciably affect the total. The figures in the right-hand production column are from 17 identical firms as reported by the *National Association of Corrugated and Fibre Box Manufacturers*. No index numbers have been calculated on the per cent of operating time. The column showing the total represents the combined production of the reporting members of both associations.<sup>4</sup> Per cent of normal operating time and left-hand production column reported by *The Container Club* from six or seven firms. The right-hand figures are from the *National Association of Corrugated and Fibre Box Manufacturers*, comprising three firms, except November, 1921, when four firms reported, and December, 1921, when two firms reported. No index numbers have been calculated on the per cent of operating time. The column showing the total represents the combined production of the reporting members of both associations.<sup>5</sup> Stocks at end of year.

<sup>1</sup> Folding paper boxes and labels from the *Association of Folding Box and Label Manufacturers*; said to represent approximately 60 per cent for the folding box industry and 75 per cent for the label industry.

<sup>2</sup> Rope paper sacks from *Rope Paper Sack Manufacturers' Association*, said to represent approximately 95 per cent of the industry.

<sup>3</sup> Data compiled by the *Abrasive Paper and Cloth Manufacturers' Exchange* estimated to represent 90 per cent of the industry. The totals given include the sales of garnet, emery, flint, and artificial (silicon, carbide, and aluminous oxide) paper, cloth, and combinations. Figures are stated in equivalent reams, 9 by 11 inches in size. The data submitted show that in 1919 the total domestic sales were made up of the following approximate percentages: garnet 39, emery 8, flint 32, and artificial 20 per cent.

<sup>4</sup> Twelve months' average, July, 1921, to June, 1922. Numerical data not furnished by the association.

<sup>5</sup> Not available.

<sup>1</sup> Except building material price indexes, from the U. S. Department of Commerce, Bureau of Standards, Division of Building and Housing and Bureau of the Census, which is based on prices paid for material by contractors in some 60 cities of the United States. The prices are weighted by the relative importance of each commodity in the construction of a six-room house.

<sup>2</sup> This index number, furnished through the courtesy of the Aberthaw Construction Co., is designed to show the relative changes in the cost of constructing a standard concrete factory building. The company believes that the year 1914 gives a normal base and that July, 1920, with an index number of 265, represented the peak of costs.

<sup>3</sup> The construction cost index, computed by the Engineering News Record, is based upon the costs of steel (structural shapes, Pittsburgh base), cement (f. o. b. Chicago-exclusive of bags), lumber (southern pine, New York base), and the rates paid common labor in the steel industry through 1920, after which common labor rates are averages reported from about 20 cities by correspondents of the Engineering News Record. The prices are weighted on the basis of the total production of steel, cement, and lumber, and the total supply of common labor.

<sup>4</sup> Compiled by the Engineering News Record, on the basis of contracts let as reported by this publication and its construction cost index number, based on 1913 costs.

<sup>5</sup> Data from National Bottle Manufacturers Association, based on reports of identical firms representing approximately 90 per cent of the capacity of the industry.

<sup>6</sup> Data from reports of identical firms by the Illuminating Glassware Guild, estimated to represent from 70 to 75 per cent of the capacity of the industry, based on a normal capacity of 6,000 turns.

<sup>7</sup> Data from the Optical Manufacturers Association, representing about 60 per cent of the industry.

<sup>8</sup> Twelve months' average, May, 1921-April, 1922.

<sup>1</sup> Southern construction from *Manufacturers' Record*. Other data compiled by the *F. W. Dodge Co.*, covering small towns and rural districts as well as large cities. Prior to May, 1921, these figures covered 25 northeastern states and the District of Columbia. The states are those north and east of, and including, North Dakota, South Dakota, Iowa, Missouri, Tennessee, and Virginia, together with portions of eastern Kansas and Nebraska. Beginning May, 1921, North Carolina and South Carolina were added to the list, but this addition is stated to have little effect upon the total.

<sup>1</sup> Data compiled by the F. W. Dodge Co., covering small towns and rural districts as well as large cities in 27 northeastern states, except fire losses in the United States and Canada, included here for convenience, compiled by the New York Journal of Commerce. Prior to May, 1921, the building figures covered 25 northeastern states and the District of Columbia. The states are those north and east of, and including, North Dakota, South Dakota, Iowa, Missouri, Tennessee, and Virginia, together with portions of eastern Kansas and Nebraska. Beginning May, 1921, North Carolina and South Carolina were added to the list, but this addition is stated to have little effect upon the total.

<sup>2</sup> Grand total includes military and naval buildings and miscellaneous, in addition to the groups listed in this and the preceding table (p. 89).

<sup>1</sup> Data on Michigan hardwoods (chiefly maple, birch, basswood, and beech) are actual figures reported by about 40 mills each month to the *Michigan Hardwood Manufacturers' Association*. The number of mills varies from 35 to 62, but 44 is the highest number reporting since the beginning of 1920.

<sup>2</sup> Quarterly average.

<sup>3</sup> Ten months' average.

<sup>4</sup> Compiled by the *Northern Hemlock and Hardwood Manufacturers' Association*, representing chiefly Wisconsin and upper Michigan mills. These figures represent actual reports from 60 to 75 mills each month. The hardwoods cut are mostly maple, birch, and beech.

<sup>5</sup> Compiled by *American Walnut Manufacturers' Association* from reports of identical firms representing from 50 to 60 per cent of the walnut lumber industry.

<sup>6</sup> Combined figures representing average shipments and unfilled orders per firm from reports of 50 identical firms of the *National Association of Chair Manufacturers*, from 42 to 58 firms of the *Southern Furniture Manufacturers Association*, and from about 100 firms of the *National Alliance of Case Goods Associations*.

<sup>1</sup> The figures given for production and stocks of yellow pine are computed from data furnished by the *Southern Pine Association*. The method of computing is first to find the per cent which the actual production of the mills reporting is to the normal production of these same mills. This per cent is then applied to the normal production of 192 mills. Assuming that the mills reporting are a good sample of the industry, the resulting figure in each month is equivalent to the actual production of the 192 identical mills and hence shows the trend of the industry. The same procedure is followed in the case of stocks. The normal monthly production of the 192 mills is given as 484,065,392 feet and the normal stocks of the same mills as 1,262,450,326 feet. By normal production the *Southern Pine Association* means the average output for the first 4 months of 1916 and normal stocks refer to the average stocks during the 16 months ending with April, 1916.

<sup>2</sup> The *Western Pine Manufacturers' Association* has supplied figures showing the actual and normal production for the mills reporting in each of the periods shown. From these figures the per cent of normal production is obtained in each case, and this per cent is applied to the normal production of 54 identical mills. The normal monthly production of these 54 mills is given as 148,000,000 board feet and is estimated to represent 70 per cent of the output of the western pine territory.

<sup>3</sup> Actual figures reported by about 20 mills each month to the *California White and Sugar Pine Association*; the number of mills varies from 13 to 26.

<sup>4</sup> Northern pine from the *Northern Pine Manufacturers' Association*, and includes reports from some 24 mills, both member and nonmember, located chiefly in Minnesota.

<sup>1</sup> The figures of production and shipments of Douglas fir were obtained by applying the percentage figures of actual production and shipments to normal production of reporting mills as supplied by the *West Coast Lumbermen's Association* to the actual production of 124 mills for May, 1920. The production in that month was 447,654,540 board feet.

<sup>2</sup> Data from *U. S. Department of Labor, Bureau of Labor Statistics*, and represent average weekly prices for the month for the State of Washington.

<sup>3</sup> Data on Michigan softwoods (chiefly hemlock) are actual figures reported by about 40 mills each month to the *Michigan Hardwood Manufacturers' Association*. The number of mills varies from 35 to 62, but 44 is the highest number reporting since the beginning of 1920.

<sup>4</sup> Compiled by the *Northern Hemlock and Hardwood Manufacturers' Association*, representing chiefly Wisconsin and upper Michigan mills, from actual reports of from 60 to 75 mills each month.

<sup>1</sup> Except wholesale prices, monthly averages, from U. S. Department of Labor, Bureau of Labor Statistics. The sources of the other data in this table are: Clay fire and silica brick from the Refractories Manufacturers' Association and face brick from the American Face Brick Association.<sup>2</sup> Figures for 1921 are from reports of 68 identical mills with a monthly capacity of 78,645,942 bricks, which is estimated by the association to represent from 68 to 70 per cent of the total clay fire brick capacity of the United States. Figures for 1919, 1920, and 1922 are computed to this capacity, respectively, from reports from 53, 56, and 60 mills having a monthly capacity for the years in question of 71,572,186 and 73,526,103, and 73,307,190 bricks.

<sup>2</sup> Figures for 1921 are from reports of 15 identical mills with a monthly capacity of 27,305,500 bricks, which is estimated by the association to represent from 78 to 80 per cent of the total silica brick producing capacity of the United States. Figures for earlier years are computed to this capacity from reports of 12 identical mills with a monthly capacity of 25,448,833 bricks.<sup>1</sup> The figures on face brick include data from 32 identical firms reporting to the American Face Brick Association each month. Comparable monthly data for the months of 1919 and 1920 are shown in the April "Survey," (No. 20.)<sup>3</sup> Ten months' average.

<sup>1</sup> Data on cement is from the U. S. Department of the Interior, Geological Survey, except prices, which are average of weekly prices reported by the U. S. Department of Labor, Bureau of Labor Statistics; data on concrete pavements for roads, streets, and alleys from Portland Cement Association, Highways Bureau.

<sup>2</sup> Yearly figures represent stocks at end of year, not an average of monthly stocks, except for 1921 and 1922.

<sup>3</sup> Of the numerical 1919 monthly average, 3,221,000 yards was actually reported. The remainder is the prorated portion of a total of 3,338,309 yards for the year of pavement less than 6 inches thick not allocated by class of pavement. This has been prorated to roads on the basis of the roads' share of allocated contracts.

<sup>4</sup> Includes streets and alleys besides roads.

<sup>1</sup> Compiled from reports of the *National Wood Chemical Association* to which are added reports from the principal nonmember firms. Total reports for each month vary from firms with a capacity of 3,200 cords to 4,500 cords daily; all months are therefore prorated to a daily capacity of 4,500 cords, representing about 90 per cent of the industry, on the basis of capacity reporting each month.

<sup>2</sup> August, 1914.

<sup>3</sup> Compiled from weekly wholesale quotations of 35 drugs and pharmaceutical chemicals by the *Oil, Paint, and Drug Reporter*.

<sup>4</sup> Compiled from weekly wholesale quotations of 20 essential oils by the *Oil, Paint, and Drug Reporter*.

<sup>5</sup> Compiled from weekly wholesale quotations of 40 crude botanical drugs by the *Oil, Paint, and Drug Reporter*.

<sup>6</sup> The chemical price index from *Chemical and Metallurgical Engineering* includes quotations on 25 commodities selected on the basis of their importance as representing both qualitatively and quantitatively the principal branches of the chemical industry. These prices are weighted on the basis of total production plus total imports in the year 1919. The figures are averages of weekly prices.

<sup>7</sup> Wholesale average monthly price of sulphuric acid from *United States Department of Labor, Bureau of Labor Statistics*.

<sup>1</sup> Exports reported by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; cold-storage holdings from the U. S. Department of Agriculture, Bureau of Agricultural Economics; production of beef and pork from animals slaughtered under Federal inspection reported by the U. S. Department of Agriculture, Bureau of Animal Industry. Apparent consumption has been computed from the inspected slaughter plus imports less exports and the change in storage holdings. Wholesale prices are average for the month from U. S. Department of Labor, Bureau of Labor Statistics.

<sup>2</sup> Cold-storage holdings are distinctly seasonal. No allowance for this has been made in calculating index numbers. Figures represent storage holdings on the first day of each month.

<sup>3</sup> Total dressed weight slaughtered under Federal inspection, including veal with beef. The slaughter under Federal inspection, according to census figures in 1919, amounted to 68 per cent of the total number of animals slaughtered in the United States in the case of hogs, 82 per cent in the case of beef and 91 per cent for lamb.

## MEAT PRODUCTS.

<sup>1</sup> Receipts, stocks, and meltings and Cuban movement reported by the *Statistical Sugar Trade Journal*; Imports and exports from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; Wholesale and retail sugar prices, from U. S. Department of Labor, Bureau of Labor Statistics.

<sup>2</sup> Figures include reports from seven ports: Boston, New York, Philadelphia, Savannah, New Orleans, Galveston, and San Francisco until 1921, when Baltimore was added upon completion of refinery in that city. Prior to that year it is stated that little sugar moved through Baltimore. Meltings are calculated from weekly reports, the odd days being prorated. Stocks represent the amount of raw sugar in the hands of refiners on the dates nearest the end of the month as reported for each port.

<sup>a</sup> Covers first 21 days only, during which period the old tariff law was in effect.

## TOBACCO.

<sup>1</sup> Panama Canal traffic reported by *The Panama Canal*; Tonnage entered and cleared in foreign trade, *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; Sault Ste. Marie Canal traffic, *U. S. War Department, Engineer Corps*; New York State canal traffic from *New York State Superintendent of Public Works*; receipts and shipments of cargo by river at St. Louis (almost all by Mississippi River) from *Merchants Exchange of St. Louis*; Cargo tonnage on Government-owned barge line from *U. S. War Department, Mississippi-Warrior service*; Index of ocean freight rates from the *Federal Reserve Board, Division of Analysis and Research*.

<sup>2</sup> Represents tonnage of cargo carried by commercial vessels. Yearly figures refer to fiscal years ending June 30.

<sup>3</sup> Figures for 1913 to 1922 represent monthly averages for eight months during which the canals are usually open.

<sup>4</sup> The index of ocean freight rates represents rates to 7 ports in the United Kingdom and a total of 17 ports for all of Europe. The index numbers are weighted by the geometric means of these rates. The weights include the relative importance of each port and also the relative importance of the 5 principal products—grain, provisions, cotton, cottonseed oil, and sack flour.

<sup>1</sup> Data from the American Railway Association.<sup>2</sup> Daily average for the last period (7 or 8 days) of the month, exclusive of Canadian roads. The Association reports the number of freight cars which are idle (surplus) and also the number of requests for cars which can not be filled (shortage). The difference between these two figures represents the net freight-car situation for the country as a whole. The car shortages can not ordinarily be filled from the idle cars because of the uneven geographical distribution of the latter.<sup>3</sup> Includes other classes than groups listed.<sup>4</sup> Total includes coke shipments in addition to commodity groups listed.<sup>5</sup> Index number less than 1.<sup>6</sup> Number of railroad freight cars in need of repairs on first day of each month. Note that 1913 is the base year, having a monthly average of 150,909 cars in need of repairs.

## RAILWAY OPERATIONS.

<sup>1</sup> Data on locomotives in bad order for period 1916 to May, 1918, from Bureau of Railway Economics, from June, 1918, to February, 1920, from the U. S. Railroad Administration and since February, 1920, from the American Railway Association; data on revenues and expenses, from the Interstate Commerce Commission, represent Class 1 roads, those having annual operating revenues in excess of \$1,000,000; data on ton-mile and passenger-mile operation and percentage of net operating income on tentative valuation are from the Bureau of Railway Economics; Pullman passenger traffic furnished by The Pullman Co.; express earnings are reports of the American Railway Express Co. to the Interstate Commerce Commission, to which are added reports of the Southeastern Express Co. from the time of its organization in May, 1921.

<sup>1</sup> Telephone earnings are the combined reports of 13 largest telephone companies, and telegraph earnings are the combined reports of the Western Union and Postal Telegraph Cos., as reported to the Interstate Commerce Commission; gas and electric earnings are the combined reports to the U. S. Department of Commerce, Bureau of the Census, of 73 companies or systems operating gas, electric light, heat, power and traction services and comprising most of the large companies in the United States. Gross earnings are in general the gross operating revenues, while net earnings in general represent the gross less operating expenses and taxes, but owing to a lack of uniformity in the accounts of individual companies, it has not been possible to secure these actual items for each company, and in such cases the nearest comparable figures have been taken. Also in some cases the figures for prior years do not cover exactly the same subsidiaries owing to acquisitions, consolidations, etc., but these differences are not believed to be great in the aggregate.

<sup>1</sup> Compiled by the Federal Reserve Board, Division of Analysis and Research.<sup>2</sup> Represents a combined weighted index based upon the total value of their production in the year 1919. For details and methods of computation see Federal Reserve Bulletin for April, 1923.<sup>3</sup> Weighted average based upon the total volume of wholesale trade in lines separately shown on this and the preceding page.

See footnotes on opposite page also.

<sup>1</sup> Internal revenue taxes on admissions to theaters, cabarets, etc., and candy sales from *U. S. Treasury Department, Bureau of Internal Revenue*; postal receipts in 50 selected cities and money orders (quarterly data), from *U. S. Post Office Department*; magazine advertising as reported by *Printer's Ink*; newspaper advertising compiled by *New York Evening Post*.

<sup>2</sup> Data represent internal revenue taxes collected under the revenue acts of 1918 and 1921. For taxes on theater and cabaret admissions the rate of tax under the act of 1921 (represented by data for 1922) is "1 cent for each 10 cents or fraction thereof of the amount paid for admission," payable by the person paying such admission, except "where the amount paid for admission is 10 cents or less, no tax shall be paid." The act of 1918 provided for the same rate of taxation but allowed no exceptions and, hence, the data for 1922 are not quite as comprehensive as the earlier data. However, the variance is not such as will not allow comparison.

<sup>3</sup> Computed on the basis of a 5 per cent excise tax prior to January, 1922, and since January, 1922, on the basis of a 3 per cent tax (revenue act of 1918 superseded by revenue act of 1921).<sup>4</sup> These figures represent the number of lines of advertising carried by the leading magazines dated for the month noted.<sup>5</sup> Compiled from 22 identical cities: New York, Chicago, Philadelphia, Detroit, Cleveland, St. Louis, Boston, Baltimore, Los Angeles, Buffalo, San Francisco, Milwaukee, Washington, Cincinnati, New Orleans, Minneapolis, Indianapolis, Columbus, Louisville, St. Paul, Birmingham, and Houston. For the years 1916 to 1918 no reports were available for Boston, Louisville, Houston, and Columbus. The totals for those years were computed from the actual reports of the 18 other cities, allowing 13.85 per cent of the total to the four missing cities, the average ratio of those cities to the total in the subsequent years.<sup>6</sup> Six months' average, July to December, inclusive.

<sup>1</sup> This table is submitted in response to a demand for publication of the figures of sales of individual stores, which have been compiled from published reports. These figures represent money values of sales. On account of the tremendous increase in J. C. Penney Co. sales, this store is not included in our total of 10-cent store sales. Data on American Wholesale Corporation placed here for convenience. Mail-order and chain store sales are reported directly by the companies or compiled from the *Commercial and Financial Chronicle*, except the index of four mail-order houses.

<sup>2</sup> Compiled by the Federal Reserve Board, Division of Analysis and Research, and the index, based upon the combined average sales in 1919, includes Sears, Roebuck & Co., Montgomery Ward & Co., Larkin Co., and the National Cloak & Suit Co.

<sup>3</sup> Includes Sears, Roebuck & Co. and Montgomery Ward & Co.

<sup>4</sup> Includes F. W. Woolworth & Co., S. S. Kresge Co., McCrary, and S. H. Kress & Co.

## RETAIL SALES.

Table 104.—INDEX NUMBERS.

Based on data from Government sources.<sup>1</sup>

[Base year in bold-faced type.]

<sup>1</sup> Compiled by the Federal Reserve Board, Division of Analysis and Research. Index numbers are based upon dollar values.

<sup>2</sup> With the exception of the 4 music chains which operate only locally through the West, these data include the larger individual chain-store systems, which in the aggregate cover practically the entire country. 13,337 unit stores are represented by the 21 grocery chains; 1,708 unit stores by the 4 five and ten cent chains; 463 unit stores by the 8 drug store chains; 2,732 unit stores by the 3 cigar chains; 276 unit stores by the 5 shoe chains; and 58 unit stores by the 4 music chains.

<sup>3</sup> In calculating bases estimates are made for sales of stores in the Minneapolis and Dallas districts for the months of 1919 for which there are no reports.

<sup>1</sup> Compiled from weekly reports to the U. S. Department of Labor, Employment Service, by state and municipal employment agencies. Eastern states included in the report are Connecticut, District of Columbia, Massachusetts, New Jersey, New York, and Rhode Island (Delaware, Maryland, and Pennsylvania, now reporting, are excluded to show true comparison). Central states are Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. Southern states include Alabama, Arkansas, Georgia, Kentucky, North Carolina, Oklahoma, Texas, and Virginia. Western states include Arizona, California, Colorado, Idaho, Oregon, and Washington; Montana is included beginning with March, its figures being so small as not to affect the total.

<sup>2</sup> One week in July estimated for South Dakota.

<sup>3</sup> One week in August estimated for Iowa and Michigan.

<sup>4</sup> Month of September for South Dakota and one week for Iowa estimated.

<sup>5</sup> First two weeks in July estimated for Arkansas.

<sup>6</sup> First two weeks in July estimated for Washington.

<sup>1</sup> Except railway employment from the Bureau of Railway Economics and Detroit employment from the Employers' Association of Detroit. Data on employment in 1,423 United States factories, compiled by United States Department of Labor, Employment Service; data on New York State factories furnished by the New York Department of Labor; Wisconsin factories by the Wisconsin Industrial Commission; Unemployment in Pennsylvania, estimated as of the first of the month on the basis of reliable statistics, by the Pennsylvania Department of Labor and Industry, Bureau of Employment; Immigration and emigration statistics from U. S. Department of Labor, Bureau of Immigration; index of Illinois employment from "The Employment Bulletin."

<sup>2</sup> Information is from 1,423 factories, usually employing over 500 workers each.

<sup>1</sup> Figures represent reports from 1,648 firms in New York State employing more than one-third of the factory workers of the State. The 1914 average upon which the index numbers are calculated is an average of the 7 months, June to December, 1914, inclusive. As originally published by the *New York Department of Labor*, the index numbers are based on June, 1914, and have been recalculated to the 7-month average.

<sup>2</sup> Includes total admitted, both immigrants and nonimmigrants.

<sup>3</sup> Includes total departed, both emigrants and nonemigrants.

<sup>4</sup> Nine months' average, April to December.

<sup>5</sup> Average for the quarter beginning with the month for which figures are shown.

## COST OF LIVING.

<sup>1</sup> Index numbers represent retail prices on the first day of the month, except food, which is the retail food index of the U. S. Bureau of Labor Statistics for the 15th of the preceding month. Beginning with March, 1922, all prices shown are as of the 15th of the month indicated. The index is weighted according to the estimated consumption of average wage earners before the war, on the following basis: Food 43.1 per cent, shelter 17.7 per cent, clothing 13.2 per cent, fuel and light 5.6 per cent, sundries 20.4 per cent.

<sup>2</sup> Index numbers represent averages for the month in 32 cities: food prices reported by 15 to 25 dealers in each city, fuel and light by 10 to 15 firms, including public utilities, in each city; other quotations secured directly from records. Rentals are based on 250 to 950 houses and apartments in each city, and for each item of clothing, furniture, and miscellaneous, four quotations are secured in each city (five in New York City).

## PRICES.

<sup>1</sup> Wholesale prices and retail food prices from the U. S. Department of Labor, Bureau of Labor Statistics; farm prices from the U. S. Department of Agriculture, Bureau of Agricultural Economics.

<sup>2</sup> The revised wholesale price index number of the U. S. Department of Labor, Bureau of Labor Statistics, is based on quotations of 404 commodities. These commodities are arranged in 9 groups as given in the table. In computing this index, the price of each commodity is weighted by multiplying it by the estimated quantity of that article marketed in the census year 1919. For comparable yearly data for the period 1890 to 1921, see the Monthly Labor Review for September, 1922, p. 46; and for comparable monthly data for period 1913 to 1922, see the Monthly Labor Review for July, 1922, p. 60.

<sup>3</sup> The retail food price index compiled by the Bureau of Labor Statistics represents the changes in the price of 22 articles of food as reported by retail dealers in 51 of the larger cities as of the 15th of the month.

<sup>4</sup> As of the 15th of each month. Farm prices represent the relative average prices to farmers of the 10 leading crops and leading live stock respectively.

## WHOLESALE PRICES.

<sup>1</sup> First eight columns give the revised wholesale price index numbers of the *U. S. Department of Labor, Bureau of Labor Statistics*, as reclassified by the *Federal Reserve Board* into the groupings as shown. The weights are the same as those used by the *Bureau of Labor Statistics* and the total of all commodities is therefore the same as the revised Department of Labor index. *Dun's* and *Bradstreet's* index numbers are calculated as of the first of each month, but really refer to prices in the preceding month; the index numbers have been calculated to a 1913 base from the actual figures as published in these journals. *Bradstreet's* index is the sum of prices per pound of the commodities, while *Dun's* is weighted by the amount "annually consumed by each inhabitant."

## FOREIGN PRICE COMPARISONS.

<sup>1</sup> Data in the first three columns are original compilations of the *Federal Reserve Board* constructed for the purpose of international price comparisons; basic prices are obtained from trade journals and private firms and weighted according to the 1913 volume imported and exported, respectively, for "imported goods" and "exported goods." The total index number includes also goods produced, weighted by production in 1913, and goods consumed, weighted by consumption in 1913.

<sup>2</sup> Compiled by the *London Economist*; quotations on 44 commodities, mostly raw materials, unweighted.

<sup>3</sup> Compiled by *British Government Board of Trade*; quotations on 150 commodities.

<sup>4</sup> Compiled by *Bulletin de la Statistique Generale* of the French Ministry of Labor and Social Welfare; quotations on 45 commodities, mostly raw materials, unweighted.

<sup>5</sup> Compiled by *Prof. Bach*; quotations on 38 commodities until 1920, thereafter 76 commodities.

<sup>6</sup> Compiled by the *Federal Reserve Board* on the same basis as their United States index for international price comparison. Detailed descriptions of these index numbers may be found in the following numbers of the *Federal Reserve Bulletin*: United Kingdom, February, 1922, pp. 147-153; Canada, July, 1922, pp. 801-806; France, August, 1922, pp. 922-929; Japan, September, 1922, pp. 1052-1059.

<sup>7</sup> Compiled by *Svensk Handelstidning* as of the middle of each month; 47 quotations.

<sup>8</sup> Compiled by *Neue Zürcher Zeitung* as of the first of each month; quotations on 71 commodities.

<sup>9</sup> Compiled by the *Canadian Department of Labor*; quotations on 272 commodities, unweighted.

<sup>10</sup> Compiled by the *Bank of Japan*, quotations in Tokyo on 56 commodities, unweighted.

<sup>11</sup> Compiled by the *Australian Commonwealth's Bureau of Census and Statistics*; quotations on 92 commodities, weighted by consumption.

<sup>12</sup> Compiled by the *Indian Department of Statistics*; quotations on 75 commodities.

<sup>1</sup> Compiled by the Association of Life Insurance Presidents. The data represent only new business that has been paid for, exclusive of revivals, increases, and dividend additions. The 40 companies whose new business is included in this table had in force 77.1 per cent of the total legal reserve life insurance outstanding in the United States as of Dec. 31, 1920.

## SAVINGS DEPOSITS.

See footnotes on opposite page also.

<sup>1</sup> Business failures are from *Dun's Review*; Dividend and interest payments, New capital issues, and New incorporations from the *New York Journal of Commerce*; Municipal bond issues from *The Bond Buyer*; Southern bond issues from the *Manufacturers' Record*; Stock, Bonds, and Total Corporate securities from *Commercial and Financial Chronicle*.

<sup>2</sup> Represents the value of the authorized capital of new enterprises incorporated in the principal eastern states.

<sup>3</sup> Monthly data for the period 1913-1921 will be found in the October SURVEY (No. 24), page 46.

<sup>4</sup> Includes bank dividends not separately shown for those months where such payments are reported. The total interest payments may be obtained by subtracting total dividend payments from total interest and dividend payments, monthly data of which for the period 1913-1921 were published in the September SURVEY (No. 13), p. 51. It is to be noted that the total dividend and interest payments for July, 1918, should be stated as \$333,011,000, instead of \$633,011,000.

<sup>1</sup> Compiled by the Credit Clearing House from reports to it by manufacturers and wholesalers on items of credit facts from their ledgers concerning merchants or jobbers to whom they sell. The numerical data given above show the percentage which the number of payment items reported bears to the total number of transactions reported. The commodities covered by these transactions are largely textiles. The year 1916 is taken as a base, as payments were abnormally high in 1919.

<sup>2</sup> California, Oregon, and Washington.

<sup>3</sup> Arizona, New Mexico, Colorado, Utah, Nevada, Idaho, and Wyoming.

<sup>4</sup> Montana, North and South Dakota, Minnesota, and Wisconsin.

<sup>5</sup> Kansas, Nebraska, Iowa, Missouri, Illinois, Indiana, Kentucky, and Ohio.

<sup>6</sup> Texas, Oklahoma, Arkansas, Louisiana, Mississippi, Alabama, Tennessee, Georgia, Florida, North and South Carolina.

<sup>7</sup> States east of and including Pennsylvania, West Virginia, and Virginia.

<sup>1</sup> Compiled by the *Credit Clearing House* from reports to it by manufacturers and wholesalers on items of credit facts from their ledgers concerning merchants or jobbers to whom they sell. The numerical data given above show the percentage which the number of items reported relating to orders or to creation of indebtedness bears to the total number of transactions reported. As one transaction may cover both an order and an indebtedness or a payment, the sum of the percentages of orders, indebtedness, and payments will usually exceed 100 per cent. The commodities covered are largely textiles, and the individual orders are stated to average from \$250 to \$600, depending on trade conditions. The year 1916 is taken as a base, as it is believed to be more nearly normal than 1919, in which orders and payments were unusually large and indebtedness unusually small.

## CREDIT CONDITIONS.

<sup>1</sup> Daily averages or noon rates for cable transfers reported to the Treasury daily by the *New York Federal Reserve Bank*. Average figures for the years 1914 to 1918, inclusive, where given, are weekly averages of commercial quotations from the *Annalist*.<sup>2</sup> Parity established October, 1920. Prior to that, par value of the rupee was 32.44 cents.

<sup>1</sup> The foreign exchange index number recently computed by the *Federal Reserve Board* is based upon the average rates of exchange for 17 countries, Germany excluded, and is here substituted for the weighted geometric average previously published. The index represents the "aggregative" average of cable transfer rates on these countries and is based on the total volume of imports and exports of merchandise, gold, and silver from and to each country for the preceding 12 months. The countries used in computing the index are Belgium, Denmark, England, France, Italy, Netherlands, Norway, Spain, Sweden, Switzerland, Canada, Argentina, Brazil, Chile, China, India, and Japan. The method of computation and the reasons for the change are explained in detail in the *Federal Reserve Bulletin* for October, 1922, page 1260.

<sup>2</sup> Average value of the paper peso in 1913.

# IMPORTS INTO THE UNITED STATES.

<sup>1</sup> Compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce, from official sources. Figures for France include lignite (averaging 66,000 tons per month in 1913). Beginning 1919, Alsace-Lorraine (averaging 203,000 tons monthly in 1919 and 264,000 tons in 1920) is included with France instead of with Germany and beginning 1920 the Saar district (794,000 tons per month) is similarly transferred. Upper Silesia, whose disorders were responsible for the curtailment of German production in May, 1921, was included as a whole with Germany until June, 1922, since which time only the part of Upper Silesia allotted to Germany is included.

<sup>2</sup> One metric ton is equivalent to 2,204.6 pounds.

<sup>3</sup> Five weeks period; other months cover 4 weeks.

<sup>4</sup> Includes upper Silesia. The old territory produced 837,000 tons in July.

## METAL PRODUCTION IN FOREIGN COUNTRIES.

<sup>1</sup> Compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce, from official reports, except zinc stocks in United Kingdom, and zinc production in Belgium reported by American Bureau of Metal Statistics; iron and steel production in United Kingdom reported by British Federation of Iron and Steel Manufacturers; Canadian production by Department of Trade and Commerce, Dominion Bureau of Statistics.

<sup>2</sup> Index number less than 1.

<sup>3</sup> Average for 9 months, April-December.

<sup>4</sup> A long ton contains 2,240 pounds.

<sup>5</sup> A metric ton is equivalent to 2,204.6 pounds.

<sup>1</sup> Compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce, from official sources. Canadian figures furnished direct by Dominion Department of Labour, Employment Service of Canada. The figures, except in the case of British compulsory insurance, which relate to the operations of the Government labor bureau, represent the percentage of trade-union members employed. They have been converted, by inverting, from the original figures showing percentage unemployed.

<sup>2</sup> December.

<sup>3</sup> Average of quarters, March, June, September, and December.

<sup>4</sup> Quarter ending this month.

<sup>5</sup> The report for December covers 6,075,755 organized workers of whom only 97,687, or 1.6 per cent, were unemployed.

## INDEX—Continued.

Page numbers refer to data in detailed tables (47-192) only. Items in the table on "Trend of Business Movements" (pp. 26-47) and in the text are arranged in groups which should make reference easy without the necessity of an index. Note that only the page containing the index number tables is given here. Where the numerical data for these items are in a separate table, they will always be found on the page opposite the index numbers.

	Page.	Sugar:	Page.	United States Steel Corp.:	Page.
Receipts, United States Government..	160	Exports, stocks, prices, production, etc.....	131, 132	Earnings and unfilled orders.....	60
