SURVEY OF CURRENT BUSINESS

UNITED STATES DEPARTMENT OF COMMERCE
ECONOMICS AND STATISTICS ADMINISTRATION / BUREAU OF ECONOMIC ANALYSIS

SURVEY OF CURRENT BUSINESS

U.S. Department of Commerce

Robert A. Mosbacher / *Secretary*

Economics and Statistics Administration

Michael R. Darby / *Under Secretary for Economic Affairs and Administrator*

Bureau of Economic Analysis

Allan H. Young / *Director*
Carol S. Carson / *Deputy Director*

Editor-in-Chief: Douglas R. Fox
Managing Editor: Leland L. Scott

Publication Staff: W. Ronnie Foster,
M. Gretchen Gibson, Eric B. Manning,
Donald J. Parschalk

SURVEY OF CURRENT BUSINESS. Published monthly by the Bureau of Economic Analysis of the U.S. Department of Commerce. Editorial correspondence should be addressed to the Editor-in-Chief, SURVEY OF CURRENT BUSINESS, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Annual subscription: *Second-class mail*—\$23.00 domestic, \$23.75 foreign; *first-class mail*—\$52.00. Single copy—\$6.50 domestic, \$8.13 foreign.

Mail subscription orders and address changes to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Make checks payable to the Superintendent of Documents.

Second-class postage paid at Washington, DC and at additional mailing offices. (USPS 337-790).

The Secretary of Commerce has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department.

Inside back cover: BEA Information

NOTE.—This issue of the Survey went to the printer on August 5, 1991.

It incorporates data from the following monthly BEA news releases:

- Gross National Product (July 26),
- Personal Income and Outlays (July 29), and
- Composite Indexes of Leading, Coincident, and Lagging Indicators (July 31).

the BUSINESS SITUATION

OVERALL economic conditions, as reflected in the national income and product accounts (NIPA's), showed improvement in the second quarter of 1991.

- Real GNP, a measure of U.S. production, increased 0.4 percent after decreasing 2.8 percent in the first quarter and 1.6 percent in the fourth quarter of 1990 (chart 1).¹
- Real gross domestic purchases, a measure of U.S. demand, increased 2.9 percent after decreasing in the two preceding quarters.
- Inflation as measured by the (fixed-weight) price index for gross domestic purchases slowed to 2.4 percent.

NOTE.—Daniel Larkins of the Current Business Analysis Division was primarily responsible for preparing this article, with contributions from Larry R. Moran, Ralph W. Morris, and Mira A. Piplani.

1. The regularly featured estimate of real GNP is based on 1982 weights. An alternative estimate of real GNP growth based on more current weights can be calculated using the change in the chain price index, which is published in table 8.1 of the "Selected NIPA Tables." This alternative measure increased 1.5 percent in the second quarter after decreasing 2.9 percent in the first quarter and 2.6 percent in the fourth. Growth of real GNP in 1987 dollars, another measure based on more current weights, will be published in the "Reconciliation and Other Special Tables" in the August 1991 SURVEY OF CURRENT BUSINESS.

- Real disposable personal income increased 1.2 percent after decreasing in the three preceding quarters.

The upswing in GNP was concentrated in motor vehicles and construction (table 1). Motor vehicles increased substantially in the second quarter after a large decrease; construction changed little after a decrease. Excluding motor vehicle and construction output, GNP decreased 0.9 percent in the second quarter after increasing in the two previous quarters.²

A detailed discussion of the major components of GNP will be presented in the August "Business Situation." In brief, personal consumption expenditures—which had decreased in the two preceding quarters, largely reflecting purchases of motor vehicles—increased substantially in the second quarter. This increase and smaller increases in several other major components were largely offset by a sharp drop in net exports.

2. The output of the motor vehicle industry is derived by summing auto output (shown in table 1.18 of the "Selected NIPA Tables") and truck output (shown in table 1.20). The output of the construction industry may be approximated by "structures," shown in NIPA table 1.4. This approximation excludes maintenance and repair construction and includes brokers' commissions on the sale of structures, as well as mining exploration, shafts, and wells; nevertheless, it probably tracks movements in construction output closely. The value of motor vehicle and construction output includes the value of inputs, such as steel, obtained from other domestic industries and from foreign suppliers as imports.

Looking Ahead...

• **National Income and Product Accounts Revision.** The upcoming comprehensive, or benchmark, revision of the national income and product accounts (NIPA's) is scheduled for release in November 1991 (see the box on page 4). The annual NIPA revision covering 1988–90, which would usually have been released this month, will be combined with the comprehensive revision.

• **U.S. Direct Investment Abroad.** Preliminary results of the 1989 benchmark survey of U.S. direct investment abroad will be presented in a fall issue of the SURVEY; revised estimates from the 1988 annual survey will be available in late August (see the box on page 93).

CHART 1
Selected Measures:
Change from Preceding Quarter

Note.—Percent change at annual rate from preceding quarter; based on seasonally adjusted estimates.

Table 1.—Gross National Product, Motor Vehicle Output, and Construction Output
(Seasonally adjusted at annual rates)

	Billions of 1982 dollars					Percent change from preceding quarter			
	Level	Change from preceding quarter				1990		1991	
		1991:II	III	IV	I	II	III	IV	I
	Gross national product	4,128.4	14.9	-16.6	-29.3	4.3	1.4	-1.6	-2.8
Motor vehicle output	133.9	5.5	-27.3	-19.9	12.5	14.2	-50.7	-45.5	48.0
Construction output	333.8	-8.1	-11.4	-18.1	.2	-8.4	-12.0	-19.1	.2
Gross national product less motor vehicle and construction output	3,660.7	17.5	22.1	8.7	-8.4	1.9	2.5	1.0	-9

NOTE.—Motor vehicle output is derived by summing auto output (table 1.18 of the "Selected NIPA Tables") and truck output (table 1.20). Construction output may be approximated by "structures," shown in table 1.4 of the "Selected NIPA Tables." This approximation excludes maintenance and repair expenditures and includes brokers' commissions as well as mining exploration, shafts, and wells; nevertheless, it probably tracks movements in construction output closely. The value of motor vehicle and construction output includes the value of inputs, such as steel, obtained from other domestic industries and from foreign suppliers as imports.

Imports are subtracted from exports in the calculation of GNP. It is tempting to suppose that if imports had not increased \$31.6 billion, second-quarter GNP would have been that much higher. However, this temptation should be resisted because, conceptually and as a matter of *accounting*, imports do not affect GNP: The negative entry for imports is offset by positive entries for foreign produced goods and services in other GNP components (such as personal consumption expenditures). As a matter of *economics*, imports may affect GNP. An analysis of this effect must take into account both direct and indirect effects: Direct effects include impacts on the wholesaling and retailing of imported goods, and indirect effects include impacts on the demand for domestically produced goods and services.

Motor vehicles.—Motor vehicle production and sales both increased but remained weak after decreasing in the two preceding quarters. Inventories remained low.

Motor vehicle output increased 48.0 percent in the second quarter after

falling 45.5 percent in the first quarter and 50.7 percent in the fourth. The upswing in production—most of which was in trucks—probably was a response by manufacturers to an upturn in sales during the first quarter and an effort by manufacturers to keep truck inventories from falling further.

Real final sales of motor vehicles (sales to domestic purchasers plus net sales to foreigners) increased 20.3 percent after dropping 34.2 percent in the first quarter and 28.1 percent in the fourth; the turnaround in truck sales occurred earlier and was stronger than the turnaround in car sales. The second-quarter increase in car sales reflected increases both in unit sales and in the average expenditure per car.

Domestic car production increased to 5.3 million units (seasonally adjusted annual rate) in the second quarter from 5.1 million—the lowest level in 8 years—in the first. Currently, manufacturers plan a substantial increase in production, to 6.5 million, in the third quarter. Reflecting a small increase in sales to consumers, domestic car sales edged up to 6.1 million units in the

second quarter from 6.0 million in the first. The low production level kept inventories low; domestic car inventories slipped to 1.0 million at the end of the second quarter from 1.1 million at the end of the first. The inventory-sales ratio fell to 1.9 from 2.1.

The small second-quarter increase in car sales to consumers was consistent with (mostly small) improvements in many of the factors usually associated with consumer spending: Real disposable personal income increased after decreasing in three consecutive quarters, initial claims for State unemployment insurance decreased for the first time in five quarters, and the Index of Consumer Sentiment (prepared by the University of Michigan's Survey Research Center) increased for the second consecutive quarter but remained well below its second-quarter 1990 level. In addition to these general factors, manufacturers offered more attractive sales-incentive programs in the second quarter than in the first.

Sales of imported cars increased to 2.4 million units in the second quarter from 2.2 million in the first.

Sales of new trucks jumped to 4.1 million units in the second quarter from 3.8 million in the first. Light domestic truck sales accounted for the increase. Sales of imported light trucks increased slightly, and sales of "other" trucks decreased. Truck inventories increased for the first time in four quarters.

Prices

The fixed-weighted price indexes for both GNP and gross domestic purchases decelerated in the second quarter: The GNP price index slowed to a 3.0-percent increase after increasing 5.2 percent, and the gross domestic purchases price index slowed to a 2.4-percent increase after increasing 3.7 percent (table 2). Prices of gross domestic purchases less food and energy, which may be viewed as measuring the underlying inflation rate in the U.S. economy, slowed to a 3.3-percent increase after increasing 5.7 percent (chart 2).

Export prices, which are included in the GNP price index but not in the gross domestic purchases price index, increased at a slower rate in the second quarter than in the first. Import prices, which are subtracted in deriving the GNP price index but not in deriving the gross domestic purchases price index, decreased at a slower rate in the second quarter than in the

NOTE.—Quarterly estimates in the national income and product accounts are expressed at seasonally adjusted annual rates, and quarterly changes are differences between these rates. Quarter-to-quarter percent changes are annualized. Real, or constant-dollar, estimates are expressed in 1982 dollars. The advance GNP estimate for the second quarter is based on the following major source data, some of which are subject to revision. (The number of months for which data were available is shown in parentheses.)

Personal consumption expenditures: Sales of retail stores (3), and unit auto and truck sales (3);

Nonresidential fixed investment: Unit auto and truck sales (3), construction put in place (2), manufacturers' shipments of machinery and equipment (3), and exports and imports of machinery and equipment (2);

Residential investment: Construction put in place (2), and housing starts (3);

Change in business inventories: Manufacturing and trade inventories (2), and unit auto inventories (3);

Net exports of goods and services: Merchandise exports and merchandise imports (2);

Government purchases of goods and services: Federal outlays (2), and State and local construction put in place (2);

GNP prices: Consumer Price Index (3), Producer Price Index (3), nonpetroleum merchandise export and import price indexes (3), and values and quantities of petroleum imports (2).

first. Movements of import prices in recent quarters are largely traceable to imported petroleum. Prices of imported petroleum decreased in the second quarter but at a slower rate than in the first.

Prices of personal consumption expenditures (PCE) increased 2.6 percent after a 3.3-percent increase. Food prices were up less than in the first quarter, although prices of vegetables increased sharply as a result of shortages caused by unusually cold winter weather. In energy, the prices of all major categories decreased less than in the first quarter. Prices of "other" PCE increased less than in the first

quarter; the slowdown was largely accounted for by autos and by clothing and shoes.

Among the investment components, prices of nonresidential structures and producers' durable equipment (PDE) increased less than in the first quarter; the deceleration in PDE prices was substantial and widespread. Prices of residential investment registered a modest upswing.

Prices of government purchases moderated in the second quarter. Prices of Federal Government purchases increased much less than in the first quarter, when they had been boosted by a pay raise for civilian and military personnel. Prices of State and local government purchases increased at the same rate as in the first quarter.

proprietors' income increased \$8.8 billion after a decrease. The upswing reflected a pickup in single-family construction (the part of the construction industry in which proprietorships and partnerships are concentrated) and turnarounds in wholesale and retail trade and in real estate.

Transfer payments increased \$13.1 billion in the second quarter, considerably less than in the first. In the first quarter, cost-of-living adjustments to benefits under social security and several other Federal retirement and income support programs added \$17.8 billion to transfer payments.

Personal interest income decreased more than in the first quarter; in both quarters, the decreases reflected lower interest rates.

Table 2.—Price Indexes (Fixed Weights): Change From Preceding Quarter

[Percent change at annual rates; based on seasonally adjusted index numbers (1982=100)]

	1990		1991	
	III	IV	I	II
GNP	4.2	4.7	5.2	3.0
Less: Exports	2.6	5.0	3.4	1.1
Plus: Imports	12.6	24.9	-11.8	-5.9
Equals: Gross domestic purchases ...	5.1	6.3	3.7	2.4
Less: Change in business inventories				
Equals: Final sales to domestic purchasers	5.1	6.3	3.6	2.3
Personal consumption expenditures	5.7	7.1	3.3	2.6
Food	4.2	4.9	6.2	5.1
Energy	21.3	51.2	-23.6	-14.7
Other personal consumption expenditures	4.8	4.2	5.6	3.7
Nonresidential structures	2.9	2.2	2.5	1.3
Producers' durable equipment	2.2	4.9	5.4	.9
Residential investment	2.4	-6	-3	2.3
Government purchases	4.6	6.1	4.8	2.0
Addenda:				
Merchandise imports	14.3	34.4	-18.2	-10.5
Petroleum and products	135.7	346.2	-75.0	-46.3
Other merchandise	2.4	5.4	4.1	-3.0

NOTE.—Percent changes in major aggregates are found in table 8.1 of the "Selected NIPA Tables." Most index number levels are found in tables 7.1 and 7.3.

CHART 2

Gross Domestic Purchases Prices (Fixed Weights): Change From Preceding Quarter

Note.—Percent change at an annual rate from preceding quarter; based on seasonally adjusted index numbers (1982 = 100).

Personal income

Real disposable personal income increased 1.2 percent in the second quarter after decreasing in three consecutive quarters (chart 3). The increase reflected both a pickup in current-dollar personal income and the slowdown in the implicit price deflator for PCE.

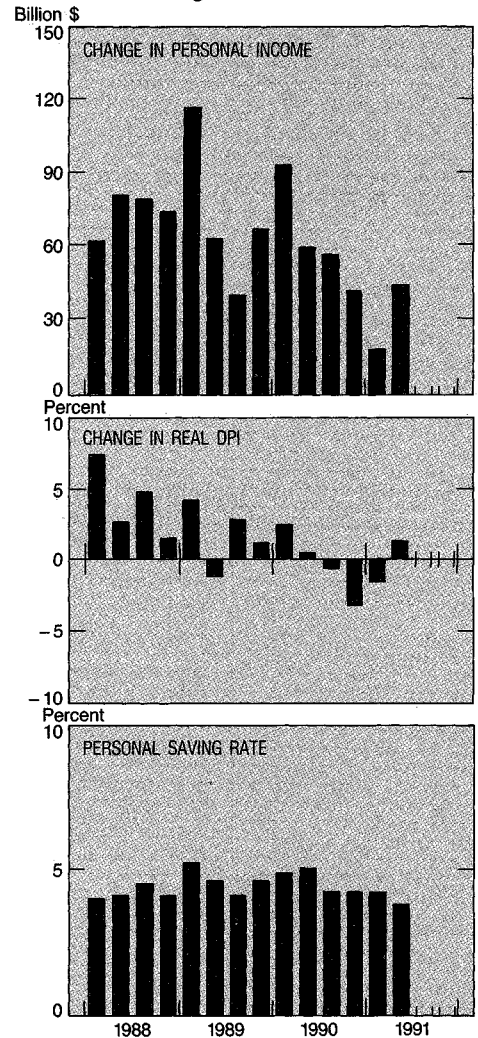

In current dollars, personal income increased \$43.4 billion in the second quarter after increasing \$17.3 billion in the first. The acceleration reflected an upswing in wages and salaries in private industries and an upswing in proprietors' income, which were partly offset by a slowdown in the growth of transfer payments (table 3).

Wage and salary disbursements increased \$27.7 billion in the second quarter after increasing \$3.9 billion in the first. The step-up was in private-industry wages and salaries, and it was due to further gains in average hourly earnings and to an upswing in average weekly hours. (Employment continued to fall; the number of payroll jobs decreased 0.4 million in the second quarter and fell 1.6 million from June 1990 to June 1991.) Government wages and salaries increased less than in the first quarter, when they were boosted by a pay raise for Federal Government civilian and military personnel.

Proprietors' income increased \$12.1 billion in the second quarter after decreasing \$1.8 billion in the first. Farm proprietors' income increased \$3.4 billion after a slight drop. The upswing largely reflected higher crop prices received by farmers. In addition, Federal farm subsidy payments decreased less than in the first quarter. Nonfarm

CHART 3

Selected Personal Income and Saving Measures

Based on Seasonally Adjusted Annual Rates

Note.—Changes are from preceding quarter.

Personal contributions for social insurance, which are subtracted in deriving the personal income total, increased considerably less than in the first quarter, when several social insurance program changes added \$7.0 billion.

Personal tax and nontax payments increased \$6.4 billion in the second quarter after declining \$2.0 billion in the first. The second-quarter increase reflected growth in the taxable earnings base.

In the second quarter, personal outlays—mainly PCE—increased substantially more than disposable personal income; thus, personal saving decreased. The personal saving rate fell 0.5 percentage point to 3.7 percent after holding steady at 4.2 percent for three consecutive quarters.

BEA Vacancies

BEA is hiring additional staff—primarily economists and accountants. The positions are in national economic accounting, balance of payments accounting, and international investment surveys. Applications (Standard Form 171 and college transcripts) should be addressed to Administrative Office, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, ATTN: SCB.

In personal contributions for social insurance:					
Social security rate and base changes and increase in premium for supplementary medical insurance				7.0	

NOTE.—Most dollar levels are found in table 2.1 of the "Selected NIPA Tables."

Comprehensive Revision of the NIPA's

Revised and updated estimates of the national income and product accounts (NIPA's) resulting from a comprehensive, or benchmark, revision are scheduled for release at the end of November 1991 and will appear in the November SURVEY OF CURRENT BUSINESS. These estimates will incorporate statistical revisions resulting from (1) newly available source data, such as the 1982 benchmark input-output tables, the 1987 Economic Censuses, and several annual surveys for 1989 and 1990, (2) changes in methodology, and (3) a shift, from 1982 to 1987, in the base period used to express constant-dollar GNP in prices of a single period. The estimates will also reflect changes in definitions and classifications. In addition, table formats will be revised and new series presented. The most important of the new series will be alternative measures of constant-dollar GNP; these measures, described in the April 1989 SURVEY, involve approaches to weighting that use prices for more than one year. The changes to be introduced in the comprehensive revision will be described in upcoming articles in the SURVEY.

In general, the statistical revisions will affect the estimates back to 1978, the changes in definitions and classifications will affect the estimates as far back as necessary, and the shift in base period will affect the estimates back to 1929. The estimates released in November will be limited to 1959 forward and will exclude the GNP by industry series; estimates for earlier periods and for the industry series will be released during 1992.

NATIONAL INCOME AND PRODUCT ACCOUNTS

Selected NIPA Tables

New estimates in this issue: Second quarter 1991, advance.

The selected set of 54 national income and product accounts (NIPA) tables shown in this section presents quarterly estimates, which are updated monthly. (In most of these tables, annual estimates are also shown.) The full set of 132 tables usually shown in July presents annual NIPA revisions. For more information on the presentation of the estimates, see "National Income and Product Accounts Estimates: When They are Released, Where They are Available, and How They are Presented" in the July 1988 SURVEY.

The tables shown are available the day of the GNP news release on printouts and diskettes on a subscription basis or from the Commerce Department's Economic Bulletin Board. Estimates for 1986-89 are in the July 1990 issue of the SURVEY; estimates for 1985 are in the July 1988 issue; estimates for 1984 are in the July 1987 issue; estimates for 1983 are in the July 1986 issue. Estimates for 1929-82 are in *National Income and Product Accounts, 1929-82: Statistical Tables*. For more information, write to National Income and Wealth Division (BE-54), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

NOTE.—This section of the SURVEY is prepared by the National Income and Wealth Division and the Government Division.

Addenda:								
Exports of agricultural products ⁴	41.5	40.4	43.8	41.3	38.9	37.4	39.3	37.6
Exports of nonagricultural products	328.5	357.6	350.4	353.7	354.5	371.7	371.3	385.0
Imports of nonpetroleum products	430.0	440.4	435.4	435.5	445.3	445.6	428.8	436.4

1. Estimates beginning with the first quarter of 1986 exclude repairs and alterations of equipment, which was reclassified to services other than factor income.

2. Beginning with 1987, reexports—that is, exports of foreign merchandise—are assigned to end-use categories in the same manner as exports of domestic merchandise. For earlier periods, all reexports are included in the "other" categories.

3. Because no data are available to distribute exports and imports of "other" merchandise between durable and nondurable goods prior to 1986, or to distribute imports of "other" merchandise for all time periods, estimates were distributed equally.

4. Includes parts of line 2 and line 5.

NOTE.—Beginning with 1985, the definitions of the end-use categories have been changed. For a description of the new definitions, see the technical notes in "U.S. International Transactions, First Quarter 1988," SURVEY OF CURRENT BUSINESS 68 (June 1988): 34-39 and 57.

1. Estimates beginning with the first quarter of 1986 exclude repairs and alterations of equipment, which was reclassified to services other than factor income.

2. Beginning with 1987, reexports—that is, exports of foreign merchandise—are assigned to end-use categories in the same manner as exports of domestic merchandise. For earlier periods, all reexports are included in the "other" categories.

3. Because no data are available to distribute exports and imports of "other" merchandise between durable and nondurable goods prior to 1986, or to distribute imports of "other" merchandise for all time periods, estimates were distributed equally.

4. Includes parts of line 2 and line 5.

NOTE.—Beginning with 1985, the definitions of the end-use categories have been changed. For a description of the new definitions, see the technical notes in "U.S. International Transactions, First Quarter 1988," SURVEY OF CURRENT BUSINESS 68 (June 1988): 34-39 and 57.

1. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (first-in, first-out; last-in, first-out; etc.) underlying book value inventories derived primarily from Census Bureau statistics. This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

Nonfarm inventories to final sales of goods and structures	4.48	4.49	4.55	4.52	4.48	4.44

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this 90b6 is not the current-dollar change in business inventories (CBI) component of GNP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this 90b6 are at quarterly rates, whereas CBI is stated at annual rates.

2. Quarterly totals at monthly rates. Business final sales equals final sales less gross product of households and institutions, government, and rest of the world, and includes a small amount of final sales by farms.

Selected Annual NIPA Tables, 1989-90

A complete set of annual national income and product accounts (NIPA) tables is usually published this month in conjunction with an annual revision of the NIPAs. This year, the annual revision covering 1988-90 will be combined with the upcoming comprehensive NIPA revision scheduled for release in November 1991 (see the box on page 4). The following tables present the annual estimates (other than those that appear each month in the "Selected NIPA Tables"), on an unrevised basis, that are available for 1990. (Other estimates for 1990 will not be available until the comprehensive revision.) The tables also show the annual estimates for 1989, which are the same as those published in the July 1990 SURVEY.

1. See footnotes 28 and 29.

2. Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms.

3. Includes luggage.

4. Consists of watch, clock, and jewelry repairs, costume and dress suit rental, and miscellaneous personal services related to clothing.

5. Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances, furniture, fuel, and electricity.

6. Consists of space rent (see footnote 5) and rent for appliances, furnishings, and furniture.

7. Consists of transient hotels, motels, clubs, schools, and other group housing.

8. Consists of refrigerators and freezers, cooking ranges, dishwashers, laundry equipment, stoves, air conditioners, sewing machines, vacuum cleaners, and other appliances.

9. Includes such house furnishings as floor coverings, comforters, quilts, blankets, pillows, picture frames, mirrors, art products, portable lamps, and clocks. Also includes writing equipment and hand, power, and garden tools.

10. Consists largely of textile house furnishings including piece goods allocated to house furnishing use. Also includes lamp shades, brooms, and brushes.

11. Consists of maintenance services for appliances and house furnishings, moving and warehouse expenses, postage and express charges, premiums for fire and theft insurance on personal property less claims paid, and miscellaneous household operation services.

12. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.

13. Consists of osteopathic physicians, chiropractors, private duty nurses, chiropractors, podiatrists, and others providing health and allied services, not elsewhere classified.

14. Consists of (1) current expenditures (including capital consumption allowances with capital consumption adjustment) of nonprofit hospitals, sanitariums, and nursing homes, and (2) payments by patients to proprietary hospitals, sanitariums, and nursing homes.

15. Consists of (1) premiums, less benefits and dividends, for health, hospitalization, and accidental death and dismemberment insurance provided by commercial insurance carriers, and (2) administrative expenses (including capital consumption allowances with capital consumption adjustment) of Blue Cross and Blue Shield plans and of other independent prepaid and self-insured health plans.

16. Consists of premiums, less benefits and dividends, for income loss insurance.

17. Consists of premiums, less benefits and dividends, for privately administered workers' compensation.

18. Consists of (1) operating expenses of life insurance carriers and private noninsured pension plans, and (2) premiums, less benefits and dividends, of fraternal benefit societies. Excludes expenses allocated by commercial carriers to accident and health insurance.

19. Consists of current expenditures (including capital consumption allowances with capital consumption adjustment) of trade unions and professional associations, employment agency fees, money order fees, spending for classified advertisements, and other personal business services.

20. Consists of baggage charges, coastal and inland waterway fares, travel agents' fees, and airport bus fares.

21. Consists of admissions to professional and amateur athletic events and to racetracks including horse, dog, and auto.

22. Consists of dues and fees excluding insurance premiums.

23. Consists of billiard parlors; bowling alleys; dancing, riding, shooting, skating, and swimming places; amusement devices and parks; golf courses; sightseeing buses and guides; private flying operations; and other commercial participant amusements.

24. Consists of net receipts of lotteries and expenditures for purchases of pets and pet care services, cable TV, film processing, photographic studios, sporting and recreation camps, and recreational services, not elsewhere classified.

25. Equals current expenditures (including capital consumption allowances with capital consumption adjustment) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and less expenditures for research and development financed under contracts or grants.

26. Consists of (1) fees paid to commercial, business, trade, and correspondence schools and for educational services, not elsewhere classified, and (2) current expenditures (including capital consumption allowances with capital consumption adjustment) by research organizations and foundations for education and research.

27. Equals current expenditures (including capital consumption allowances with capital consumption adjustment) of religious, social welfare, foreign relief, and political organizations, museums, libraries, and foundations. The expenditures are net of receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and excludes relief payments within the United States and expenditures by foundations for education and research.

28. Estimates beginning with 1986 cover U.S. students' expenditures abroad and incorporate new data on travel and passenger fares and thus are not comparable with earlier estimates.

29. Estimates beginning with 1986 cover foreign students' expenditures in the United States and incorporate new data on travel and passenger fares and thus are not comparable with earlier estimates.

NOTE—Consumer durable goods are designated (d.), nondurable goods (n.d.), and services (s.).

Table 2.5.—Personal Consumption Expenditures by Type of Product in Constant Dollars
[Billions of 1982 dollars]

	Line	1989	1990
Personal consumption expenditures¹	1	2,656.8	2,681.6

Plus: Payments of income on U.S. Government liabilities (10)	24	35.9	37.9
Adjustment for U.S. territories and Puerto Rico (6-16)	25	8.8	9.5
Equals: Net exports of goods and services, NIPA's (8-18)	26	-46.1	-31.2
Allocations of special drawing rights, BPA's	27	0	0
Plus: Other items	28	0	0
Equals: Capital grants received by the United States, net, NIPA's	29	0	0
Unilateral transfers (excluding military grants of goods and services), net, BPA's	30	15.5	22.3
Less: Statistical differences ³	31	.8	-2
Other items ⁷	32	0	7.1
Plus: Adjustment for U.S. territories and Puerto Rico ⁵	33	.1	1.1
Equals: Transfer payments to foreigners, net, NIPA's	34	14.8	15.5
Payments of income on U.S. Government liabilities, BPA's	35	35.9	37.9
Less: Statistical differences ³	36	-1	-9
Equals: Interest paid by government to foreigners, NIPA's	37	36.0	38.8
Balance on current account, BPA's (19-30)	38	-106.3	-92.1
Less: Gold (20)	39	-2.8	-2.6
Capital gains net of losses in direct investment income, BPA's (21)	40	-1.1	3.0
Statistical differences (22-31-36)	41	2.2	6.3
Other items (23-32)	42	0	-3.9
Plus: Capital grants received by the United States, net, NIPA's (29)	43	0	0
Adjustment for U.S. territories and Puerto Rico (25-33)	44	8.7	9.4
Equals: Net foreign investment, NIPA's (26+29-34-37)	45	-96.8	-85.5

1. The treatment of net exports of gold in the NIPA's differs from that in the BPA's. BPA gold exports (line 2) and imports (line 11) are removed from the NIPA's. Imports of gold in the NIPA's (line 15) is the excess of the value of gold in domestic final sales plus the change in business inventories over the value of U.S. production of gold.

2. BPA capital gains and losses included in U.S. direct investment income abroad (line 3) and in foreign direct investment income in the United States (line 12) are removed from the NIPA's. Direct investment income abroad in the BPA's excludes capital gains and losses associated with currency translation adjustments.

3. Consists of statistical revisions in the BPA's that have not yet been incorporated in the NIPA's.

4. Transfers of goods and services under military grant programs, net, are classified as exports in the BPA's. In the NIPA's, these transactions are included in Federal Government purchases; they are included in "Other items" in this table. Also, in 1990 includes certain military sales to Saudi Arabia (\$1.1 billion) and interest received by the Federal Government from Egypt (\$2.1 billion), which were treated as exports in the BPA's but not in the NIPA's.

5. Consists of transactions between the United States and its territories and Puerto Rico. The treatment of U.S. territories and Puerto Rico in the NIPA's differs from that in the BPA's. In the NIPA's they are included in the rest of the world; in the BPA's, they are treated as part of the United States. The adjustments to exports and imports of goods and services are shown in lines 6 and 16 respectively; however, because data are not available to adjust service exports and imports separately, line 6 includes the net of exports and imports of services by U.S. territories and Puerto Rico. The adjustment to unilateral transfers, net (line 33) consists only of transfer payments from persons because transfer payments, subsidies, and grants-in-aid from the Federal Government to residents of U.S. territories and Puerto Rico are excluded from NIPA transfer payments to foreigners.

6. Represents interest paid by government to foreigners. This item is treated as an import of services in the BPA's. In the NIPA's, it is excluded from government purchases and, thus, also from imports.

7. Includes military grants. Also in 1990 includes forgiveness of Egyptian debt to Federal Government (\$7.0 billion), which was treated as a transfer payment in BPA's but not in NIPA's.

1. In this table, purchases of structures includes compensation of government employees engaged in new force-account construction. In tables 1.3, 3.1, and 3.7, this compensation is classified as a service and is included as part of government compensation of employees.

2. Consists of hotels and motels, buildings used primarily for social and recreational activities, and buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.

3. Consists of streets, dams and reservoirs, sewer and water facilities, parks, airfields, etc.

4. Consists of dormitories, fraternity and sorority houses, nurses' homes, etc.

5. Consists of general office buildings, police and fire stations, courthouses, auditoriums, garages, passenger terminals, etc.

6. Consists of electric and gas facilities, transit systems, airfields, etc.

NOTE.—Quarterly estimates for selected items are shown in table 5.12.

Net purchases of used structures	45	125.1	127.6

1. Consists of hotels and motels, buildings used primarily for social and recreational activities, and buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.

2. Consists of streets, dams and reservoirs, sewer and water facilities, parks, airfields, etc.

3. Consists of dormitories, fraternity and sorority houses, nurses' homes, etc.

4. Consists of general office buildings, police and fire stations, courthouses, auditoriums, garages, passenger terminals, etc.

5. Consists of electric and gas facilities, transit systems, airfields, etc.

Table 7.13.—Fixed-Weighted Price Indexes for Private Purchases of Producers' Durable Equipment by Type, 1982 Weights

[Index numbers, 1982=100]

	Line	1989	1990
Private purchases of producers' durable equipment	1	114.0	117.9
Nonresidential equipment	2	114.1	118.2

NIPA Charts

REAL GNP AND ITS COMPONENTS: TRENDS AND CYCLES

SELECTED SERIES: RECENT QUARTERS

1. Percent change at annual rate from preceding quarter, based on seasonally adjusted estimates.
 2. Seasonally adjusted annual rate; IVA is inventory valuation adjustment, and CCAAdj is capital consumption adjustment.
 3. Personal saving as percentage of disposable personal income, based on seasonally adjusted estimates.

Benchmark Input-Output Accounts for the U.S. Economy, 1982

THIS article presents the 1982 benchmark input-output (I-O) accounts for the U.S. economy.¹ These accounts show the production of commodities (goods and services) by each industry, the use of commodities by each industry, the commodity composition of GNP, and the industry distribution of value added. BEA prepares these accounts primarily on the basis of data collected every 5 years in the economic censuses for agriculture, mining, construction, manufacturing, wholesale trade, retail trade, and selected services; data for other services are from other government reports and surveys and from private sources. The summary tables in this article present estimates for 85 industries, which are roughly equivalent to the two-digit level of the Standard Industrial Classification (SIC) for non-manufacturing and the three-digit SIC level for manufacturing. Information on obtaining the benchmark tables at the 500-industry level is in the box on page 34.

This article is in three sections. The first section describes the I-O accounts and the tables that present related detail. The second section discusses some uses of these estimates, highlighting analytical uses and providing recent examples. The third section is a summary of the sources and methods used to prepare these accounts.

The I-O accounts and related detail

The I-O accounts are typically displayed in matrix form to show compactly the relationships between all industries in the economy and all the commodities they produce and use.²

1. Annual I-O accounts for 1982 were presented in the April 1988 SURVEY OF CURRENT BUSINESS. For an explanation of the relationship between the benchmark and the annual I-O accounts, see the box on BEA's I-O program on page 32.

2. In the detail that they provide on industries and commodities, the I-O accounts can be viewed as a deconsolidation of the account in the national income and product accounts (NIPA's) that shows the components

Estimates for commodities are typically shown at producers' prices (although they can be shown at purchasers' prices). When producers' prices are used, wholesale and retail trade margins, which are measured as sales less the cost of goods sold, and transportation costs are treated as commodities that are separately produced and used by industries.

Make and use tables.—Two tables are basic to the accounts. The first, referred to as the "make" table, is a matrix showing the industry production of each commodity in the economy (table 1). The second, referred to as the "use" table, is a matrix showing the commodities consumed, or used, by each industry and final consumer (table 2). (Tables of coefficients that are derived from the make and use tables are described in the next section.) Chart 4 provides a schematic representation that highlights the relationship between the make and use tables.

that sum to GNP. For a further discussion of the relationship of the I-O accounts to the NIPA's, see U.S. Department of Commerce, Bureau of Economic Analysis, *An Introduction to National Economic Accounting*, Methodology Paper Series MP-1 (Washington, DC: U.S. Government Printing Office, March 1985): 15-16.

In the make table, the entries in a row represent the dollar value of commodities produced by the industry named at the beginning of the row. In chart 4, each row shows one white cell. That cell, called the diagonal cell, shows the value of production of the commodity for which the industry has been designated the "primary" producer. Any entries in the other cells in the row show the value of production of commodities for which other industries are the primary producers (that is, the value of production of commodities for which the given industry is a "secondary" producer). The entries in a column represent the value of the production by each industry of the commodity named at the head of the column.

The row total in the make table is total industry output, and the column total is total commodity output. As indicated by the shading on the chart, the row totals of the make table equal the column totals of the use table, and the column totals of the make table equal the row totals of the use table.

In the use table, the entries in a row represent the dollar value of the use by each industry of the commodity named

Acknowledgments

Paula C. Young, former Chief of the Interindustry Economics Division, planned and directed the preparation of the 1982 benchmark input-output study and wrote this article. Robert P. Parker, Associate Director for National Economic Accounts, provided guidance. Claiborne M. Ball, Belinda L. Bonds, and Mark A. Planting assisted in the review and finalization of the data. Leo C. Maley, in his capacity as Assistant Chief of the Division—with assistance from Edwin J. Albettski, Belinda L. Bonds, Colin B. Brown, Brian D. Kajutti, Arthur A. Morton, Mark A. Planting, Joanne S. Thompson, and Gregory M. Wilson—prepared the computer programs for assembling the data to produce the tables. Peggy L. Burcham, Esther M. Carter, Marjorie S. Crenshaw, Kimberley A. Karman, and Conswella L. McGhee provided secretarial and clerical assistance.

The following BEA staff also contributed to the input-output study: William A. Allen, Rudolph P. Andras, Sandra D. Baker, Claiborne M. Ball, Wharton H. Berger, Alvin D. Blake, Carl A. Chentrens, Susan P. Clements, Richard J. DeKaser, Sergio B. Delgado, Nicholas R. Dopuch, Jennifer A. Duane, Teresa M. Germann, Mary E. Joyce, Myles J. Levin, John J. Linek, Jodi L. Lis, Jennie M. Mangan, David W. McCarthy, Rhonda E. Monroe, Raymond J. Murphy, David R. Nelson, James E. O'Malley, Georgeanne E. Patmios, Anne L. Probst, Robert S. Robinowitz, Arlene K. Shapiro, Gerald Silverstein, Nancy W. Simon, George M. Swisko, Joanne S. Thompson, Patricia A. Washington, Patricia A. Weiss, and Robert E. Yuskavage.

Estimates for the agricultural industries were prepared by Gerald Schluter and his staff, Economic Research Service, U.S. Department of Agriculture.

at the beginning of the row and of the sales of the commodity to final uses. The industry uses sum to total intermediate use, shown in the far right column of the industries portion. The final uses sum to GNP, shown in the far right column of the final-uses por-

tion. The entries in a column represent the value of the commodities—that is, of raw materials, semifinished products, and services—used and the value added that is generated in production by the industry named at the head of the column. The row total (total

commodity output) is the production of the commodity (no matter which industry contributed to that production), and the column total (total industry output) is the production of the industry (no matter what commodity was produced).

	Other value added**																		
	Total																		
TOTAL INDUSTRY OUTPUT																			

* Includes government enterprises, scrap, used and second-hand goods, government industry, rest-of-the-world industry, household industry, and inventory valuation adjustment.

** Consists of net interest, capital consumption allowances, proprietors' income, rental income of persons, corporate profits, and business transfer payments less subsidies less current surplus of government enterprises.

The entries in the industries and final-uses portions of the table include imported, as well as domestically produced, commodities.³ Imports by commodity are treated as negative entries in the imports column in the final-uses portion. The entries in the industries portion exclude capitalized purchases. Purchases of equipment and structures are treated as positive entries in gross private fixed investment or government purchases in the final-uses portion.

Supplementary tables.—Additional detail on I-O commodities and industries is presented in a series of supplementary tables, which are described below.⁴

The *personal consumption expenditures by NIPA category table* expands the personal consumption expenditures (PCE) component of the use table to show, in both producers' and purchasers' prices, the commodities that make up the detailed PCE categories in the national income and product accounts (NIPA) table 2.4. For example, the table shows relative proportions of agriculture, manufactured food, and chemical (salt and monosodium glutamate) commodities that make up the NIPA PCE category "food purchased for off-premise consumption." This table is essential to analyses that attempt to relate the effects of changes in consumption to industry and commodity output.

The *gross private fixed investment by NIPA category table* expands the gross private fixed investment component of the use table to show, in both producers' and purchasers' prices, the commodities that make up the detailed categories for structures and for producers' durable equipment purchases in NIPA tables 5.4 and 5.6. For example, the table shows the relative proportions of new office buildings and utility plants that make up the NIPA structures category "electric light and power." This table is essential to analyses that attempt to relate the effects of changes in investment to industry and commodity output.

3. In the summary tables presented in this article, commodity and industry output are shown as domestic output. However, for some analyses, it is preferable to show domestic supply—that is, imports plus domestic output—by eliminating the import column in the use table and adding an import row in the make table. The coefficients from the resulting table are referred to as "total based."

4. The availability of the supplementary tables will be announced in the Survey.

The *capital flows table* expands the gross private fixed investment component of the use table to show the type of equipment and structures purchased by industry. Frequently, the analytical use of the I-O accounts requires the construction of a dynamic model in which the purchases of equipment and structures are included in the model as intermediate purchases; this table makes it possible to compute entries in the industries portion that include capitalized purchases.

The *employment and employee compensation table* expands the employee compensation component of the use table to show the number of employees and to separate supplements to wages and salaries from wages and salaries by industry. This table can be used to relate industry output to employment and to calculate employment multipliers.

The *exports and imports by balance of payments category table* expands the exports and imports component of the use table to show the commodities classified according to the detailed categories in table 2 of BEA's balance-of-payments presentation. This new table shows relative proportions of commodities that make up the categories. For merchandise exports and imports, the table also provides a concordance between I-O commodity codes and the commodity classifications used for data on merchandise trade (Schedule B of the Statistical Classification of Domestic and Foreign Commodities Exported from the United States for exports and the Tariff Schedules of the U.S. Annotated for imports).

The *I-O workfile table* expands the commodity detail of the use table to show the products within the commodity. The workfile identifies over 7,000 products. Within a consistent definitional framework, it provides the maximum detail on product use for each industry that is permitted by the source data. It also notes the survey, report, or other reference for the source data.

Uses of I-O estimates

I-O accounts, both the benchmark accounts and the annual accounts that are based on them, are less well known than other parts of the Nation's economic accounts. Similarly, their uses are less well known. This section describes two kinds of uses—uses in analyses of the economy and uses in the preparation of economic statistics.

Analytical uses.—The make and use tables, because they completely account for commodity production and use for the entire economy and because they include detailed information for products, provide useful information to market researchers and others who wish to analyze and project the use of particular products. For example, a trade association has used the accounts to estimate import penetration in the apparel industry, and the U.S. Copyright Office has used the accounts to measure the size of U.S. copyright-related industries.

The major analytical use of the estimates in the I-O accounts is in economic analyses that require the measurement of both the direct and indirect

BEA's Input-Output Program

BEA's input-output (I-O) program includes the preparation of benchmark and annual I-O accounts. The benchmark I-O accounts are prepared for years for which there are economic censuses. The censuses provide comprehensive data—including information on production, product receipts, secondary products, materials consumed, and operating expenses—that are not available on a more frequent basis. The benchmark I-O tables include over 500 industries and commodities. With the completion of the 1982 table, the number of years covered by BEA benchmark I-O tables is increased to seven—1947, 1958, 1963, 1967, 1972, 1977, and 1982.

The annual I-O accounts are prepared using basically the same procedures as used to prepare the benchmark accounts. However, primarily for census-covered industries, the source data used are less comprehensive and less reliable than those used for the benchmark accounts: For agriculture, construction, manufacturing, part of wholesale trade, retail trade, and selected services, the major data sources are annual surveys; for mining, quantity and price data are used to estimate output. Where comprehensive data are not available, as is the case for most estimates for secondary products and intermediate consumption, proportions from the most recent benchmark accounts are used to estimate the detailed components. The basic I-O tables are prepared at the summary level only; the supplementary detail is not prepared. Annual I-O tables were prepared for most years beginning with 1966. Annual tables based on the 1977 benchmark tables were prepared for the years 1980 through 1986. Annual tables based on the 1982 benchmark will be prepared beginning with 1987. The annual I-O accounts do not provide a consistent time series, because they are not prepared by interpolating between benchmark tables and because they are not revised to reflect definitional changes that are introduced in later benchmark years.

effects of changes in demand.⁵ Tables, referred to as "coefficient tables," that quantify these direct and indirect effects are calculated using the estimates in the make and use tables. BEA publishes three coefficient tables, which appear in this article at the summary 85-industry level.

The *commodity-by-industry direct requirements table* is prepared using the use table to relate commodity input for an industry to the industry's output (table 3). The values in this table, referred to as the "direct requirements coefficients," show the amount of a commodity required by the industry to produce a dollar of the industry's output.

The *commodity-by-commodity total requirements table* is prepared using both the make and use tables (table 4). The values in this table, referred to as "commodity-by-commodity total requirements coefficients," show the production required both directly and indirectly of the commodity named at the beginning of each row per dollar of delivery to final use of the commodity named at the head of the column.

The *industry-by-commodity total requirements table* is also prepared using both the make and use tables (table 5). The values in this table, referred to as "industry-by-commodity total requirements coefficients," show the production required directly and indirectly from the industry named at the beginning of the row per dollar of delivery to final use of the commodity named at the head of the column.

These coefficient tables can be used, for example, to determine the impact of a disaster on the economy or to compute the effect on employment of an increased demand for imported, rather than domestic, goods. The Federal Emergency Management Agency, the Department of Defense, and the Bureau of the Census have used the accounts for such studies. When the accounts are used in conjunction with regional data, they can be modified to

show the regional impacts. For example, a trade association analyzed the economic effect of the fishing industry in areas bordering the Gulf of Mexico, and a real estate developer analyzed the impact of constructing a new airport. BEA's Regional Economic Analysis Division performs such analyses for other government agencies.

Statistical uses.—The I-O accounts are used in several ways in the preparation of economic statistics. First, I-O accounts are a source of weights that can be used to prepare price or output indexes. For example, the Bureau of Labor Statistics uses I-O-based weights to calculate producer price indexes by stage of fabrication. BEA uses I-O-based weights to prepare the constant-dollar estimates of GNP. The weights also can be applied to NIPA totals for nonbenchmark years to estimate commodity composition. For example, the weights from the I-O accounts can be applied to the NIPA expenditure total for drug preparation and sundries to estimate spending on prescription drugs. Second, the I-O accounts are used by BEA to benchmark the national economic accounts. For example, PCE for 1982 will be derived from the 1982 benchmark I-O accounts.⁶ Third, the I-O accounts are used to identify data gaps and inconsistencies in economic statistics. For example, discrepancies between construction activity reported in the Census Bureau's value put-in-place survey and that reported in the census of construction and other economic census data were identified during the preparation of the 1982 benchmark I-O accounts. As a result, the Census Bureau undertook a number of special studies, two of which have already led to major improvements in the current statistics.

Sources and methods

There are three major steps in the preparation of the benchmark accounts. Each of these steps and the major source data are described below.

1. *Determine industry and commodity output totals.*—The SIC groups establishments into industries based on their principal product. For most

SIC groups, the economic censuses, conducted by the Bureau of the Census, provide detailed data for industries and commodities for establishments with payroll. For 1982, the censuses did not cover finance, insurance, real estate, transportation, utilities, hospitals, and schools; for these industries, survey or regulatory information was used to derive output. To determine the output totals, two adjustments were made to the published data for the censuses-covered industries: Where necessary, they were adjusted by adding estimates of the output of establishments with no payroll, and where the Census Bureau uses tax return records rather than reports that it directly collects, they were adjusted for misreporting.⁷

The SIC-based totals were then adjusted to the industry classification system used in the I-O accounts. The SIC groups require adjustment when the SIC industry's input structure is more heterogeneous than is desirable for I-O analysis. (The I-O industry categories and their composition in terms of the 1972 SIC industries are given in appendix A—see page 68.) These definitional differences usually relate to secondary activity. Adjustments are made, for example, to include all construction work—wherever performed—in the construction industry, all manufacturing performed at trade and service establishments in the manufacturing industry, all services performed by trade establishments in the service industry, and all reselling by any industry in the trade industry. For each of these differences, production is transferred to the appropriate I-O industry. In a few cases, these differences involve primary activity. For instance, chemical establishments primarily producing aluminum oxide are included in the SIC chemical products industry, but they are included in the I-O primary aluminum industry because their primary input is bauxite. After these adjustments, industry output by commodity is summed for all producing industries to derive total commodity output.

2. *Derive the GNP components and their commodity composition.*—Estimates of some final uses are derived from direct information; for example, imports are from Census Bu-

5. These direct and indirect effects may be illustrated by tracing a few of the impacts resulting from a change in consumer demand for autos. An increase in consumer demand for autos will lead, first, to an increase in the production of autos. The increase in the production of autos will result in more steel production, which in turn will require more chemicals, more iron ore, more limestone, and more coal. The increased production of autos will also require more upholstery fabrics, and the increased production of these fabrics will require more natural fibers, more synthetic fibers, and more plastics. There will be even further impacts; for instance, the increased production of synthetic fibers will require more electricity and containers.

6. For more information on the use of the I-O accounts in benchmarking the NIPA's, see U.S. Department of Commerce, Bureau of Economic Analysis, *Personal Consumption Expenditures*, Methodology Paper Series MP-6 (Washington, DC: U.S. Government Printing Office, June 1990): 31-34.

7. See Robert P. Parker, "Improved Adjustments for Misreporting of Tax Return Information Used to Estimate the National Income and Product Accounts, 1977," *SURVEY*, 64 (June 1984): 17-25.

reau foreign trade statistics. For other estimates, the commodity-flow method is the mostly widely used method. This method first converts domestic sales, which is the value of sales of commodities produced by domestic firms at producers' prices, to domestic supply, which is the value of sales to domestic purchasers at purchasers' prices and, therefore, includes imports and excludes exports. It then allocates domestic supply among domestic purchasers—that is, persons, business, and government.⁸

3. *Estimate the commodities used by industries.*—For industries covered by the economic censuses, the data do not always include all intermediate uses, and they are primarily for establishments with payroll (and therefore must be adjusted to cover all establishments). For other industries, the data are from government or private sources. In some cases, the source data provide direct information on the use of a commodity—for example, purchased electricity. In other cases, the data provide a total for a broad category of purchases—for example, office supplies, equipment repairs, or equipment rental. For these totals, estimates of individual commodities are made using commodity-shipment weights and

other applicable data. When direct information is not available, estimates of intermediate use are derived using related information. For instance, ac-

counting fees are distributed based on the number of employees, and auto-related expenditures are distributed based on estimates of auto use.

Data Availability

The estimates from the 1982 benchmark input-output (I-O) accounts are available at a two-digit and six-digit I-O industry level on magnetic tapes, diskettes, or computer printout. They can be ordered for "transactions," for "total requirements coefficients," or for "all." "Transactions" include the make table, use table, direct requirements coefficients, and transportation and wholesale and retail trade estimates by commodity. "Total requirements coefficients" include industry-by-commodity or commodity-by-commodity or both. Products specifying "all" contain all of these data, but for the two-digit I-O industry level only. All products include information on the mathematical derivation of the coefficients tables. The specific products available, their BEA accession numbers, and their prices follow.

Item	BEA accession number	Price
<i>Magnetic tapes:</i> *		
1982 benchmark six-digit, transactions	51-91-00-002	\$100
1982 benchmark six-digit, total requirements coefficients	51-91-00-003	100
1982 benchmark two-digit, all	51-91-00-004	100
<i>Diskettes:</i>		
1982 benchmark six-digit, transactions:		
3½ inch	51-91-40-002	40
5¼ inch	51-91-40-003	120
1982 benchmark six-digit, industry-by-commodity total requirements:		
3½ inch	51-91-40-004	40
5¼ inch	51-91-40-005	100
1982 benchmark six-digit, commodity-by-commodity total requirements:		
3½ inch	51-91-40-006	40
5¼ inch	51-91-40-007	100
1982 benchmark two-digit, all (5¼ inch only)	51-91-40-008	20
<i>Printout:</i>		
1982 benchmark two-digit, all	51-91-20-002	55

* Orders for magnetic tapes must specify density (1600 BPI or 6250 BPI) and whether or not internal labels are needed.

To order, write to Public Information Office, Order Desk, BE-53, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230. Specify the item, BEA accession number, and price of the product(s) being ordered. For foreign shipment, add 25 percent to the total amount of the order. A check or money order payable to "Bureau of Economic Analysis" must accompany all written orders. Be sure to include a return address.

For further information about these products or how to order them, or to place an order using MasterCard or VISA, call the Interindustry Economics Division at (202) 523-0792.

8. For more information, see *Personal Consumption Expenditures*, 31-34.

Direct Requirements, 1982
output, at producers' prices]

Table with 28 columns representing commodity categories and 1 commodity number column. The categories are: Repair and maintenance construction, Ordnance and accessories, Food and kindred products, Tobacco manufactures, Broad and narrow fabrics, yarn and thread mill, Miscellaneous textile goods and floor coverings, Apparel, Miscellaneous fabricated textile products, Lumber and wood products, except containers, Wood containers, Household furniture, Other furniture and fixtures, Paper and allied products, except containers, Paperboard containers and boxes, Printing and publishing, Chemicals and selected chemical products, Plastics and synthetic materials. Rows are numbered 1 through 90, with a total row 'T' at the bottom. Each cell contains a numerical value representing the output at producers' prices.

Table 4.—Commodity-by-Commodity

[Total requirements, direct and indirect, per dollar

Commodity number	Each entry represents the output required, directly and indirectly, of the commodity named at the beginning of the row for each dollar of delivery to final demand of the commodity named at the head of the column	Drugs, cleaning and toilet preparations	Paints and allied products	Petroleum refining and related industries	Rubber and miscellaneous plastics products	Leather tanning and finishing	Footwear and other leather products	Glass and glass products	Stone and clay products	Primary iron and steel manufacturing	Primary nonferrous metals manufacturing

Table 4.—Commodity-by-Commodity

[Total requirements, direct and indirect, per dollar]

Commodity number	Each entry represents the output required, directly and indirectly, of the commodity named at the beginning of the row for each dollar of delivery to final demand of the commodity named at the head of the column	Electric lighting and wiring equipment	Radio, TV, and communication equipment	Electronic components and accessories	Miscellaneous electrical machinery and supplies	Motor vehicles and equipment	Aircraft and parts	Other transportation equipment	Scientific and controlling instruments	Optical, ophthalmic, and photographic equipment	Miscellaneous manufacturing

Table 5.—Industry-by-Commodity
 [Total requirements, direct and indirect, per dollar]

Industry number	Each entry represents the output required, directly and indirectly, of the commodity named at the beginning of the row for each dollar of delivery to final demand of the commodity named at the head of the column	Livestock and livestock products	Other agricultural products	Forestry and fishery products	Agricultural, forestry, and fishery services	Iron and ferroalloy ores mining	Non-ferrous metal ores mining	Coal mining	Crude petroleum and natural gas	Stone and clay mining and quarrying	Chemical and fertilizer mineral mining	New construction

Table 5.—Industry-by-Commodity

[Total requirements, direct and indirect, per dollar

Industry number	Each entry represents the output required, directly and indirectly, of the commodity named at the beginning of the row for each dollar of delivery to final demand of the commodity named at the head of the column	Drugs, cleaning and toilet preparations	Paints and allied products	Petroleum refining and related industries	Rubber and miscellaneous plastics products	Leather tanning and finishing	Footwear and other leather products	Glass and glass products	Stone and clay products	Primary iron and steel manufacturing	Primary nonferrous metals manufacturing
		Commodity number	29	30	31	32	33	34	35	36	37

Table 5.—Industry-by-Commodity

[Total requirements, direct and indirect, per dollar

Industry number	Each entry represents the output required, directly and indirectly, of the commodity named at the beginning of the row for each dollar of delivery to final demand of the commodity named at the head of the column	Electric lighting and wiring equipment	Radio, TV, and communication equipment	Electronic components and accessories	Miscellaneous electrical machinery and supplies	Motor vehicles and equipment	Aircraft and parts	Other transportation equipment	Scientific and controlling instruments	Optical, ophthalmic, and photographic equipment

Appendix A.—Industry Classification of the 1982 Input-Output Accounts¹

[The titles in boldface represent the groupings of industries used for the summary version of the 1982 tables. An asterisk preceding an SIC code indicates that the SIC industry is included in more than one I-O industry.]

Industry number and title	Related 1972 SIC codes	Industry number and title	Related 1972 SIC codes
AGRICULTURE, FORESTRY, AND FISHERIES			
1 Livestock and livestock products:		11.0308 Local transit facilities	*16-17
1.0100 Dairy farm products	0241, *0191, *0259, 0291	11.0400 Highways and streets	*16-17
1.0200 Poultry and eggs	025 (excl. 0254 and *0259), *0191, *0219, *0291	11.0501 Farm housing units and additions and alterations	*15, *17
1.0301 Meat animals	021 (excl. *0219), *0191, *0259, *0291	11.0502 Farm service facilities	*15, *17
1.0302 Miscellaneous livestock	027 (excl. *0279), *0191, *0219, *0259, *0291	11.0601 Petroleum and natural gas well drilling	*138
2 Other agricultural products:		11.0602 Petroleum, natural gas, and solid mineral exploration	*108, *1112, *1213, *138, *148
2.0100 Cotton	0131, *0191, *0219, *0259, *0291	11.0603 Access structures for solid mineral development	*108, *1112, *1213, *148
2.0201 Food grains	*011, *0191, *0219, *0259, *0291	11.0701 Military facilities	*15-17
2.0202 Feed grains	*011, *0139, *0191, *0219, *0259, *0291	11.0702 Dams and reservoirs	*15-17
2.0203 Grass seeds	*0139, *0191, *0219, *0259, *0291	11.0703 Other conservation and development facilities	*15-17
2.0300 Tobacco	0132, *0191, *0219, *0259, *0291	11.0704 Other nonbuilding facilities	*15-17
2.0401 Fruits	*017, *0191, *0219, *0259, *0291	12 Maintenance and repair construction:	
2.0402 Tree nuts	0173, *0179, *0191, *0219, *0259, *0291	12.0100 Nonfarm residential structures	*15, *17
2.0501 Vegetables	0134, 0161, *0119, *0139, *0191, *0219, *0259, *0291	12.0201 Other nonfarm buildings	*15-17
2.0502 Sugar crops	0133, *0191, *0219, *0259, *0291	12.0202 Farm residential buildings	*15, *17
2.0503 Miscellaneous crops	*0119, *0139, *0191, *0219, *0259, *0291	12.0203 Farm service facilities	*15, *17
2.0600 Oil bearing crops	0116, *0119, *013, *0173, *0219, *0259, *0291	12.0204 Telephone and telegraph facilities	*16-17
2.0701 Forest products	*018, *0191, *0219, *0259, *0291	12.0205 Railroads	*16-17
2.0702 Greenhouse and nursery products	*018, *0191, *0219, *0259, *0291	12.0206 Electric utility facilities	*16-17
3 Forestry and fishery products:		12.0207 Gas utility facilities	*16-17
3.0001 Forestry products	081-4, 097	12.0208 Petroleum pipelines	*16-17
3.0002 Commercial fishing	091	12.0209 Water supply facilities	*16-17
4 Agricultural, forestry, and fishery services:		12.0210 Sewer facilities	*16-17
4.0001 Agricultural, forestry, and fishery services	0254, 07 (excl. 074, and 078), 085, 092, *0279, 078	12.0211 Local transit facilities	*16-17
4.0002 Landscape and horticultural services	078	12.0212 Military facilities	*15-17
MINING			
5 Iron and ferrous alloy ores mining:		12.0213 Conservation and development facilities	*15-17
5.0000 Iron and ferrous alloy ores	101, 106	12.0214 Highways and streets	*16-17
6 Nonferrous metal ores mining:		12.0215 Petroleum and natural gas wells	*138
6.0100 Copper ore	102	12.0216 Other nonbuilding facilities	*15-17
6.0200 Nonferrous metal ores, except copper	103-5, *108, 109	MANUFACTURING	
7 Coal mining:		13 Ordnance and accessories:	
7.0000 Coal	1111, *1112, 1211, *1213	13.0100 Guided missiles and space vehicles	3761
8 Crude petroleum and natural gas:		13.0200 Ammunition, except for small arms, n.e.c.	3483
8.0000 Crude petroleum and natural gas	131, 132	13.0300 Tanks and tank components	3795
9 Stone and clay mining and quarrying:		13.0500 Small arms	3484
9.0001 Dimension, crushed and broken stone	141-2	13.0600 Small arms ammunition	3482
9.0002 Sand and gravel	144	13.0700 Other ordnance and accessories	3489
9.0003 Clay, ceramic, and refractory minerals	145	14 Food and kindred products:	
9.0004 Nonmetallic mineral services and miscellaneous minerals	*148, 149	14.0101 Meat packing plants	2011
10 Chemical and fertilizer mineral mining:		14.0102 Sausages and other prepared meats	2013
10.0000 Chemical and fertilizer mineral	147	14.0103 Poultry dressing plants	2016
CONSTRUCTION			
11 New construction:		14.0104 Poultry and egg processing	2017
11.0101 Residential 1-unit structures, nonfarm	*15, *17, 6552	14.0200 Creamery butter	2021
11.0102 Residential 2-4 unit structures, nonfarm	*15-17	14.0300 Cheese, natural and processed	2022
11.0103 Residential garden apartments	*15-17, 6552	14.0400 Condensed and evaporated milk	2023
11.0104 Residential high-rise apartments	*15-17	14.0500 Ice cream and frozen desserts	2024
11.0105 Residential additions and alterations, nonfarm	*15-17	14.0600 Fluid milk	2026
11.0106 Hotels and motels	*15-17	14.0700 Canned and cured seafoods	2091
11.0107 Dormitories and other group housing	*15-17	14.0800 Canned specialties	2032
11.0201 Industrial buildings	*15-17	14.0900 Canned fruits and vegetables	2033
11.0202 Office buildings	*15-17	14.1000 Dehydrated food products	2034
11.0203 Warehouses	*15-17	14.1100 Pickles, sauces, and salad dressings	2035
11.0204 Garages and service stations	*15-17	14.1200 Fresh or frozen packaged fish	2092
11.0205 Stores and restaurants	*15-17	14.1301 Frozen fruits, fruit juices and vegetables	2037
11.0206 Religious buildings	*15-17	14.1302 Frozen specialties	2038
11.0207 Educational buildings	*15-17	14.1401 Flour and other grain mill products	2041
11.0231 Hospitals	*15-17	14.1402 Cereal breakfast foods	2043
11.0232 Residential institutions and other health related facilities	*15-17	14.1403 Blended and prepared flour	2045
11.0241 Amusement and recreation buildings	*15-17	14.1501 Dog, cat, and other pet food	2047
11.0250 Other nonfarm buildings	*15-17	14.1502 Prepared feeds, n.e.c.	2048
11.0301 Telephone and telegraph facilities	*16-17	14.1600 Rice milling	2044
11.0302 Railroads	*16-17	14.1700 Wet corn milling	2046
11.0303 Electric utility facilities	*16-17	14.1801 Bread, cake, and related products	2051, 5462
11.0304 Gas utility facilities	*16-17	14.1802 Cookies and crackers	2052
11.0305 Petroleum pipelines	*16-17	14.1900 Sugar	2061-3
11.0306 Water supply facilities	*16-17	14.2001 Confectionery products	2065
11.0307 Sewer system facilities	*16-17	14.2002 Chocolate and cocoa products	2066

1. The I-O industry classification shown in this appendix defines the industry data shown in the 1982 I-O accounts. A comparable commodity classification is not shown. However, the commodity titles used in the I-O tables are the same as the industry titles and, for the most part, the commodity output for the I-O industry is consistent with the primary product of the related SIC. Where the same commodity is the primary product of more than one SIC, the I-O accounts group the commodity as output of the I-O industry that is the largest producer.

2. Although the SIC assigns the same codes to activities of both private firms and government agencies, SIC codes in the I-O accounts are used only for classifying private activities.

3. Noncomparable imports include imported commodities that are not commercially produced in the United States, imported used goods, and commodities that are produced abroad and used abroad by U.S. residents—for example, defense spending abroad.

4. Industry output is zero because there is no primary producing industry. Scrap is a secondary product of

many industries, and used goods are sales and purchases typically between final uses. The sales are shown as negative values in the use table.

5. Industry output is defined as the compensation of general government employees except for those engaged in construction work; their compensation is included in industries 11 and 12. It also excludes the compensation of employees of government enterprises.

6. Industry output is defined as receipts of factor income by U.S. residents from abroad, less payments of factor income by U.S. residents to foreigners. The commodity entries include adjustments to personal consumption expenditures and government purchases that eliminate items that are actually exports.

7. Industry output is defined as the compensation of domestic household workers.

8. The inventory valuation adjustment converts the inventory change based on withdrawals valued primarily at historical cost as reported by most businesses to replacement cost, the valuation used in the I-O accounts.

U.S. Affiliates of Foreign Companies: Operations in 1989

OPERATIONS of nonbank U.S. affiliates of foreign companies continued to grow rapidly in 1989, according to preliminary results of BEA's latest annual survey of foreign direct investment in the United States.¹ In 1989, as in 1988, affiliate employment—a key measure of affiliate operations—increased significantly faster than in previous years, largely reflecting acquisitions of U.S. business enterprises.

The following are the highlights for 1989.

- Employment by U.S. affiliates increased 596,000, or 16 percent, to 4,440,000 in 1989, after a 19-percent increase in 1988 (table 1). By comparison, employment increased at an average annual rate of only 7 percent from 1980 to 1987.
- The share of all-U.S.-business employment accounted for by U.S. affiliates was 4.8 percent in 1989,³ up from 4.3 percent in 1988 and 3.7 percent in 1987. The increase in share from 1987 to 1989 exceeded the entire increase in share in the previous 7 years.
- By country of ultimate beneficial owner (UBO), affiliates with UBO's in the United Kingdom had

the largest employment (981,000) at yearend 1989; employment was next largest for UBO's in Canada (755,000) and Japan (504,000).² The largest increase in employment in 1989 was by affiliates with UBO's in the United Kingdom (159,000).

- Among States, the largest increases in employment were in California (89,000) and Ohio (37,000).
- Sales by U.S. affiliates increased \$154 billion, or 17 percent, to \$1,041 billion, after a 19-percent increase. Net income of U.S. affiliates declined \$0.2 billion, or 2 percent, to \$11.8 billion, after a 54-percent increase.
- U.S. merchandise exports shipped by affiliates increased \$15 billion, or 21 percent, to \$84 billion, after a 45-percent increase. U.S. merchandise imports shipped to affiliates increased \$14 billion, or 9 percent, to \$170 billion, after an 8-percent increase.
- The estimated book value of total assets of U.S. affiliates increased \$201 billion, or 17 percent, to \$1,402 billion, after a

27-percent increase.³ A sharp deceleration in the rate of growth in nonbank finance—an industry in which total assets are both large and volatile—contributed to the slowdown; assets in this industry increased only 8 percent in 1989 after increasing 30 percent in 1988.

- The gross book value of U.S. affiliates' property, plant, and equipment increased \$64 billion, or 15 percent, to \$482 billion, after an 18-percent increase.
- Commercial property owned by affiliates increased \$16 billion, or 16 percent, to \$121 billion.⁴ Among

3. These estimates include all assets of affiliates, irrespective of the share of total assets financed by foreign direct investors. The estimates are available only on a book value, or historical-cost, basis. Another direct investment measure provided by BEA—the foreign direct investment position in the United States—measures the net financing of affiliates supplied by foreign parent companies. Estimates of the position, unlike those of assets, are valued in current-period prices, as well as in terms of historical cost. The most recent estimates of the position are presented in "The International Investment Position of the United States in 1990," SURVEY OF CURRENT BUSINESS 71 (June 1991): 23–35.

4. The book value of commercial property owned by all U.S. affiliates is a measure of U.S. affiliates' ownership of U.S. real estate. This measure consists of the book value of all buildings and associated land that the affiliates lease or rent to others and all commercial property that the affiliates own and use or operate. Commercial property includes apartment buildings, office buildings, hotels, motels, and buildings used for wholesale, retail, and services trades, such as shopping centers, recreational facilities, department stores, bank buildings, restaurants, public garages, and automobile service stations. It also includes the book value of the land associated with these buildings. Commercial property excludes the following: Property that is used for agriculture, mining, and manufacturing and other industrial purposes; property that is used to support these activities, such as research labs and warehouses; office buildings located at industrial sites (as opposed to office buildings owned by an industrial company but not located at an industrial site, which are included); educational buildings; hospital and institutional buildings; and all undeveloped land.

Affiliates in industries other than real estate hold substantial amounts of commercial property. Table 11.2 shows commercial property of affiliates by industry of affiliate, and it indicates that, in 1989, commercial property held by affiliates in real estate—that is, by affiliates whose major activity was in the real estate industry—was \$63.4 billion, or about 53 percent of all affiliates' commercial property.

NOTE.—James L. Bomkamp, Chief, Direct Investment in the United States Branch, International Investment Division, supervised the survey from which the estimates were derived. Juris E. Abolins, Beverly A. Feeser, and Dorrett E. Williams coordinated the editing and processing of the forms. D. Richard Mauery designed the computer programs for data retrieval and analysis.

1. A U.S. affiliate is a U.S. business enterprise in which there is foreign direct investment—that is, in which a single foreign person owns or controls, directly or indirectly, 10 percent or more of the voting securities of an incorporated U.S. business enterprise or an equivalent interest in an unincorporated U.S. business enterprise. An affiliate is called a U.S. affiliate to denote that it is located in the United States; in this article, "affiliate" and U.S. affiliate are used interchangeably.

2. The UBO is that person, proceeding up a U.S. affiliate's ownership chain, beginning with and including the foreign parent, that is not owned more than 50 percent by another person. The foreign parent is the first foreign person in the affiliate's ownership chain. Unlike the foreign parent, the UBO of an affiliate may be located in the United States. The UBO of each U.S. affiliate is identified to ascertain the person that ultimately owns or controls and that, therefore, ultimately derives the benefits from owning or controlling the U.S. affiliate.

Additional detail from BEA's annual surveys of foreign direct investment in the United States is available in other publications and on computer diskettes. Revised 1988 estimates and preliminary 1989 estimates will be available later this summer. For ordering and other information, see page 93 of this issue.

States, the largest increases were in New York and California (\$3 billion each).

- The share of all-U.S.-business employment accounted for by majority-owned U.S. affiliates was 3.8 percent in 1989, up from 3.5 percent in 1988 and 3.0 percent in 1987. Majority ownership usually means that the affiliates are unambiguously controlled by their foreign owners.

The 1989 estimates cover the universe of nonbank U.S. affiliates. They supplement similar estimates for 1977-88 from BEA's annual and benchmark surveys. The 1989 estimates were derived by combining data reported by a sample of affiliates in the annual survey with estimates of data for affiliates not in the sample.⁵

The 1988 estimates have been revised. Employment and sales were each revised up 4 percent; assets were revised up 5 percent.

The remainder of this article analyzes changes in affiliate employment in 1989, the share of the U.S. economy accounted for by U.S. affiliates, and estimates for majority-owned U.S. affiliates. In the analysis, information from outside sources, mainly press reports on specific companies, is used to supplement BEA's survey data.

Employment in 1989

This section discusses affiliate operations based on employment. Because employment is not directly affected by inflation, it probably provides a more accurate indication of changes in levels and shares of real economic activity than other available measures. The accompanying tables present a number of key items, in addition to employment, on U.S.-affiliate operations.

Employment by U.S. affiliates increased 596,000 in 1989, to 4,440,000. Because the increase primarily reflects acquisitions of existing U.S. businesses by foreigners, it should not be taken as a measure of the direct impact of increased foreign direct investment on aggregate U.S. employment.

By industry

By industry of affiliate, about one-half of the increase in employment was in manufacturing, and about one-fifth was in retail trade. In manufac-

5. For a description of the methods used to prepare the estimates, see the technical note in "U.S. Affiliates of Foreign Companies: Operations in 1988," *SURVEY* 70 (July 1990): 142.

^r Revised.

^p Preliminary.

1. See footnote 4 in the text.

2. The data on employment of all nonbank U.S. businesses are from table 6.6B of the "National Income and Product Accounts Tables" in the July 1990 issue of the *SURVEY*. The total is equal to employment in private industries less the employment of banks and private households.

turing, employment rose 295,000, to 2,123,000 (table 2). Within manufacturing, the increase was widespread. The largest increases were in primary and fabricated metals (80,000) and food and kindred products (65,000); in both industries, the increases reflected acquisitions of large U.S. companies. Increases were also large in chemicals (52,000), "other manufacturing" (50,000), and machinery (48,000).

These changes in affiliate employment refer to data classified by industry of affiliate (shown in the first seven columns of table 2). For this classification, an affiliate's primary industry—that is, the industry that accounts for the largest portion of its sales—is determined, and all data are shown in that industry even if the affiliate has activities in secondary industries. This classification is the one used in most of the tables that present data by industry in this article.

For sales and employment, data are also classified by industry of sales (shown in the last seven columns of table 2). On this basis, the affiliate's sales and employment in secondary industries are shown in those industries rather than in the affiliate's primary industry.⁶ Data classified by industry

6. Affiliate employment classified by industry of sales should generally approximate that classified by industry of establishment (plant), because an affiliate that has an establishment in an industry usually also has sales in that industry. However, if one establishment of an affiliate provides all of its output to another establishment of the affiliate, the affiliate will not have sales in the industry of the first establishment. For ex-

ample, if an affiliate operates both a metal mine and a metal-manufacturing plant and if the entire output of the mine is used by the manufacturing plant, all of the affiliate's sales will be in metal manufacturing, and none in metal mining. When the mining employees are distributed by industry of sales, they would be classified in manufacturing even though the industry of the establishment is mining.

of sales are preferable to those classified by industry of affiliate for analyzing the various activities in which diversified affiliates are engaged. Table 3 presents a matrix showing employment and sales classified by industry of sales and distributed by industry of affiliate and vice versa.

In the rest of this section, changes in employment by industry are discussed in terms of data classified by industry of sales. The pattern of changes in employment by industry of sales and that by industry of affiliate may differ because changes in affiliates' employment in secondary industries, which is often substantial, may not parallel the changes in their primary industries.⁷

ample, if an affiliate operates both a metal mine and a metal-manufacturing plant and if the entire output of the mine is used by the manufacturing plant, all of the affiliate's sales will be in metal manufacturing, and none in metal mining. When the mining employees are distributed by industry of sales, they would be classified in manufacturing even though the industry of the establishment is mining.

As part of a joint project between BEA and the Census Bureau, efforts are under way to link the enterprise data on foreign direct investment in the United States collected by BEA with the establishment data collected by the Census Bureau. The results will provide information on foreign-owned U.S. companies disaggregated by industry of establishment and by State, so that a more detailed profile of the economic activities of U.S. affiliates can be constructed. The initial results, which will be for 1987, are scheduled to be available in June 1992.

7. Affiliates classified in certain industries have particularly large portions of their employment in secondary industries: Those classified in petroleum have substantial employment in manufacturing; those classified in manufacturing have substantial employment in wholesale trade; and those classified in wholesale trade, services, or "other industries" have substantial employment in manufacturing.

¹ Suppressed to avoid disclosure of data of individual companies.
² Less than \$500,000 or less than 50 employees.
 1. For a discussion of the differences between classification by industry of affiliate and by industry of sales, see the text.
 2. In the breakdown of sales and employment by industry of sales, U.S. affiliates that filed long forms in the benchmark and annual surveys had to specify their eight largest sales categories, and U.S. affiliates that filed short forms had to specify their three largest sales categories. Sales or employment in all unspecified industries combined are shown in this line.
 NOTE.—The 1989 estimates are preliminary.

The pattern of changes may also differ when an affiliate's industry of classification changes; when employment is classified by industry of affiliate, all employees are shifted from the old to the new industry, but when employment is classified by industry of sales, changes in employment for a given industry reflect only actual changes in the affiliate's employment. Some of the larger changes noted below reflect employment in secondary industries of companies acquired by foreign investors in 1989.

By industry of sales, the largest increases in employment were in manufacturing—226,000—and retail trade—185,000. Within manufacturing, the largest increases were in "other manufacturing" (81,000) and machinery (76,000).

Within "other manufacturing," increases were particularly large in instruments and related products (21,000), in stone, clay, and glass products (16,000), and in transportation equipment (14,000). The increase in

instruments largely reflected several acquisitions by U.S. affiliates with European UBO's, and the increase in stone, clay, and glass products was due largely to several acquisitions by affiliates with UBO's in Mexico and Australia. The increase in transportation equipment largely reflected the expansion

of operations of Japanese-owned automobile plants and acquisitions in "other transportation equipment" by U.S. affiliates with European UBO's.

Within machinery, the increase was about evenly split between nonelectrical machinery (40,000) and electrical machinery (36,000). In nonelectrical

* Revised.
^P Preliminary.

machinery, much of the increase was due to the acquisition of a minority interest in a U.S. engine manufacturer by a New Zealand company; the remainder largely reflected acquisitions by European UBO's or their U.S. affiliates. In electrical machinery, much of the increase resulted from the acquisition of a home appliance manufacturer by a Canadian UBO and the acquisition of a manufacturing and engineering firm that makes power-generating equipment by the U.S. affiliate of a Swiss company.

Employment in manufacturing also increased in primary and fabricated metals (29,000), in chemicals and allied products (21,000), and in food products (19,000). In fabricated metals, most of the increase was accounted for by the acquisition of the manufacturing and engineering firm by the U.S. affiliate of the Swiss company and of a manufacturer of fasteners by a British firm. In primary metals, the increase was more than accounted for by new Japanese investments in the U.S. steel industry and a few acquisitions

by Swiss and British companies. In chemicals, most of the increase was accounted for by the merger of a British drug firm with a U.S. drug firm and by several sizable acquisitions by U.S. affiliates of European companies. In food, the increase was largely due to the acquisition of a large U.S. food manufacturing and retail trade firm by the U.S. affiliate of a British company; subsequently, sizable units of the U.S. firm were sold to other investors—both U.S. and foreign.

^r Revised.

^p Preliminary.

* Less than 0.5 percent or 50 employees (±).

1. Manufacturing employees are employees on the payroll of manufacturing plants. Total affiliate manufacturing employment in this table differs from the total when classified by industry of sales, which is shown in tables 2 and 3. In this table, total manufacturing employment consists only of employees on the payroll of manufacturing plants, whereas in tables 2 and 3, it includes some nonmanufacturing employees (see footnote

6 in the text). Also, total manufacturing employment in this table includes, but in tables 2 and 3 excludes, petroleum refining employees. Affiliates' manufacturing employment in this table is defined to be consistent with data on total U.S. manufacturing employment to which these data can be compared (see table 8).

2. Consists of the Virgin Islands, Guam, American Samoa, U.S. offshore oil and gas sites; and all other outlying U.S. areas.

3. Consists of employees of U.S. affiliates working abroad.

In retail trade, employment increased 185,000. The increase was mainly accounted for by the acquisition of two firms with extensive operations throughout the United States.

In "other industries," employment increased 97,000. Within "other industries," a large increase in transportation (50,000) was mainly due to the acquisition of a minority interest in a U.S. airline.

In services, employment increased 48,000. Part of the increase was accounted for by various hotel investments (many by Japanese UBO's). The increase also reflected the merger of the British and U.S. drug firms—which resulted in a substantial increase in affiliate employment in the research, development, and testing services industry—and the acquisition of the manufacturing and engineering firm by the U.S. affiliate of the Swiss company.

In wholesale trade, employment increased 22,000. The acquisition of an electrical goods wholesaler by a German company contributed to the increase. Partly offsetting were decreases associated with the restructuring and liquidation of several affiliates.

In insurance, employment increased 11,000. Most of the increase resulted from acquisitions and expansions by existing U.S. affiliates of European companies.

By country

By country of UBO, the largest increase in employment by U.S. affiliates (159,000) was attributable to UBO's in the United Kingdom (table 4). Most of this increase was the result of the acquisition of the large U.S. food manufacturing and retail trade firm and the merger of the British and U.S. drug firms.

Employment by affiliates with UBO's in Panama increased largely because of the acquisition of a minority interest in a U.S. firm. Affiliates with UBO's in Japan, Switzerland, and Australia also had large increases in employment. For Japan, the increase (77,000) reflected both acquisitions and expansions. For Switzerland, the increase (60,000) was largely due to the acquisition of the manufacturing and engineering firm and, to a lesser extent, to acquisitions in the construction and insurance industries. For Australia, the increase (56,000) largely reflected the acquisition of the minority interest in the U.S. airline.

At the end of 1989, affiliates with British and Canadian UBO's had by far the largest employment—981,000 and 755,000, respectively. Employment by affiliates with Japanese UBO's—at 504,000—was third largest, and employment by affiliates with German UBO's—at 436,000—was fourth.

By U.S. region and State

Among U.S. regions, the largest increases in affiliate employment were in the Southeast (150,000), the Far West (109,000), and the Great Lakes (105,000) (table 5). The largest increases in manufacturing employment were in the Southeast (54,000) and the Great Lakes (48,000). Neither total affiliate employment nor manufacturing employment decreased in any region,

but there were small decreases in a few States.

By State, the largest increases in affiliate employment were in California (89,000) and Ohio (37,000). These States also had the largest increases in manufacturing employment, primarily because of acquisitions.

Share of the U.S. Economy

Two measures—employment and total assets—are used in this article to gauge the share of the U.S. economy accounted for by U.S. affiliates. In terms of employment, the size of U.S. affiliates is compared with that of all U.S. businesses by industry and by State. The comparisons by industry use affiliate employment data classified by industry of sales, because

^a Revised

^b Preliminary

n.a. Not applicable.

1. Classified by industry of sales. In this table, petroleum is not shown as a separate major industry. Instead, in order to be consistent with the all-U.S.-business data, affiliate employment in the various petroleum subindustries is distributed among the other major industries. Thus, manufacturing includes petroleum and coal products, wholesale trade includes petroleum wholesale trade, retail trade includes gasoline service stations, and so on.

2. Classified by industry of establishment. These data are from table 6.6B of the "National Income and Product Accounts (NIPA) Tables" in the July 1990 issue of the SURVEY. The total is equal to employment in private industries less the employment of banks and private households. All-U.S.-business employment totals in this table differ slightly from those shown in tables 7 and 8; the data in tables 7 and 8 are from BEA's Regional Economic Information System and are derived as the sum of the State estimates. They differ from the NIPA estimates of employment because, by definition, they exclude U.S. residents temporarily employed abroad by U.S. businesses. They also differ from the NIPA estimates because of different data sources and revision schedules.

3. For consistency with the coverage of the all-U.S.-business employment data, U.S. affiliate employment in Puerto Rico, in "other territories and offshore," and in the "foreign" category (see table 7) was excluded from the U.S. affiliate employment total when computing the percentage shares on this line.

4. Total affiliate manufacturing employment and the shares of all-U.S.-business manufacturing employment accounted for by affiliates shown in this table differ from those shown in table 8. In this table, employment is classified by industry of sales, and the total for manufacturing includes some nonmanufacturing employees (see footnote 6 to the text), whereas in table 8, affiliate manufacturing employment consists only of employees on the payroll of manufacturing plants. Data on the latter basis are not available for the subindustries within manufacturing shown in this table.

5. The affiliate and all-U.S.-business employment data in petroleum and coal products are not comparable and, hence, are not shown here, because affiliate employment in this industry includes a substantial number of nonmanufacturing employees. When a rough adjustment is made to remove the nonmanufacturing employees from the affiliate data, the affiliate share of all-U.S.-business employment in petroleum and coal products is about 28 percent in 1988 and 31 percent in 1989. See footnote 10 in the text for further explanation.

6. Excludes private households.

7. See footnote 2 to table 2.

these data correspond most closely to the data classified by industry of establishment used for all-U.S.-business employment. The comparisons by State of nonbank business employment and of manufacturing employment are presented for the first time.

In terms of total assets, the comparison is restricted to manufacturing because comparable data classified by

industry of enterprise for both U.S. affiliates and all U.S. businesses are available only for manufacturing.

In terms of employment

In 1989, employment by nonbank U.S. affiliates of foreign companies accounted for 4.8 percent of the employees of all nonbank U.S. businesses, up from 4.3 percent in 1988 (table 6). The

increase reflected the strong growth in affiliate employment in 1989, which, as mentioned earlier, largely reflected acquisitions of U.S. companies by foreign investors.⁸

8. The data on employment by all nonbank U.S. businesses are from table 6.6B of the "National Income and Product Accounts Tables" in the July 1990 issue of the SURVEY. The total used here is equal to employment by private industries less employment by banks and private households.

n.a. Not available.

1. The data on employment of all nonbank U.S. businesses are from BEA's Regional Economic Information System. The totals are equal to employment in private industries less employment of banks and private households. The all-U.S.-business employment totals shown in this table differ slightly from those shown in table 6, which are from table 6.6B of the "National Income and Product Accounts (NIPA) Tables" in the July 1990 issue of the SURVEY. The all-U.S.-business employment data in this table are derived as the sum of the State estimates. They differ from the NIPA estimates of employment because, by definition, they exclude U.S. residents temporarily employed abroad by U.S. businesses. They also differ from the NIPA estimates because of different data sources and revision schedules.

2. For consistency with the coverage of the all-U.S.-business employment data, U.S. affiliate employment in Puerto Rico, in "other territories and offshore," and in "foreign" was excluded from the U.S. affiliate employment total when computing the percentage shares on this line.

3. Includes employment by banks.

4. See footnote 2 to table 5.

5. See footnote 3 to table 5.

By industry, affiliate shares of all-U.S.-business employment were highest in mining (12.6 percent) and manufacturing (10.0 percent).⁹ Within manufacturing, the affiliate share was highest in chemicals and in petroleum and coal products—approximately 30 percent in each case.¹⁰ The largest increases in the affiliate shares were in instruments, in stone, clay, and glass products, and in mining. In instruments and in stone, clay, and glass products, the increases were largely due to the acquisitions mentioned earlier. In mining, the increase largely reflected acquisitions combined with a decline in total U.S. employment in that industry.

By State, the sharpest increases in affiliate shares of total U.S. nonbank employment were in Minnesota (1.6 percentage points, to 4.5 percent) and Hawaii (1.3 percentage points, to 10.1 percent) (table 7). The increase in Minnesota partly reflected the acquisitions of the large food manufacturing and retail trade firm and of the minority interest in the U.S. airline. The increase in Hawaii largely reflected additional Japanese investments. For manufacturing employment, the sharpest in-

9. In table 6, petroleum is not shown as a separate major industry, as it normally is in the direct investment data. Instead, to be consistent with the all-U.S.-business data, affiliate employment in the various petroleum subindustries is distributed among the other major industries. Thus, in table 6, manufacturing includes petroleum and coal products, wholesale trade includes petroleum wholesale trade, retail trade includes gasoline service stations, and so on.

10. If the affiliate share in petroleum and coal products were calculated from the data shown in table 6, it would be significantly higher than 30 percent. However, this share would be significantly overstated because affiliate employment in this industry includes a substantial number of nonmanufacturing employees. The share cited in the text is based on a rough adjustment to exclude these employees.

In petroleum and coal products, affiliate employment is largely accounted for by integrated petroleum companies that are involved in all phases of the petroleum industry, which includes the extraction and refining of crude oil and the marketing of gasoline and other petroleum products. When employment is classified by industry of sales, all of the employees of the integrated companies in any of these activities are included under petroleum and coal products manufacturing, even though they may be engaged in nonmanufacturing activities. In contrast, in the all-U.S.-business data, which are classified by industry of establishment, the employment of integrated companies is distributed among the activities of the companies' individual establishments; thus, only employees in the companies' manufacturing establishments are included in petroleum and coal products manufacturing.

The adjustment of affiliate employment in petroleum and coal products also slightly reduces the affiliate share of total U.S. manufacturing employment—to 9.9 percent in 1989. As part of the adjustment, the employees subtracted from petroleum and coal products should be added to other petroleum-related subindustries. Although it is likely that most of the employees would be added to retail trade (gasoline service stations) or mining (oil and gas extraction), information on the number of employees that should be added to each subindustry is not available.

creases were in West Virginia (3.3 percentage points, to 20.1 percent) and Kentucky (2.9 percentage points, to 12.7 percent) (table 8). In West Virginia, much of the increase reflected new investments by European companies; in Kentucky, much of the increase

was due to Japanese investment in the steel and motor vehicle industries.

At yearend 1989, affiliate shares of total U.S. nonbank employment were highest in Delaware (14.4 percent) and Hawaii (10.1 percent). In Delaware, the share was dominated by one

1. The data on manufacturing employment of all nonbank U.S. businesses are from BEA's Regional Economic Information System. The all-U.S.-business manufacturing employment totals shown in this table differ slightly from those shown in table 6, which are from table 6.6B of the "National Income and Product Accounts (NIPA) Tables" in the July 1990 issue of the SURVEY. The all-U.S.-business employment data in this table are derived as the sum of the State estimates. They differ from the NIPA estimates of employment because, by definition, they exclude U.S. residents temporarily employed abroad by U.S. businesses. They also differ from the NIPA estimates because of different data sources and revision schedules.

2. Total affiliate manufacturing employment and the shares of all-U.S.-business manufacturing employment accounted for by affiliates shown in this table differ from those shown in table 6. In table 6, affiliate employment is classified by industry of sales, and the total for manufacturing includes some nonmanufacturing employees (see footnote 6 in the text), whereas in this table, affiliate manufacturing employment consists only of employees on the payroll of manufacturing plants.

3. For consistency with the coverage of the all-U.S.-business employment data, U.S. affiliate employment in Puerto Rico, in "other territories and offshore," and in "foreign" was excluded from the U.S. affiliate employment total when computing the percentage shares on this line.

4. See footnote 2 to table 5.

5. See footnote 3 to table 5.

very large minority-owned affiliate; in Hawaii, the share was dominated by many Japanese direct investments. Affiliate shares of manufacturing employment were highest in West Virginia (20.1 percent) and Alaska (17.5 percent). In West Virginia, affiliates with European and Canadian UBO's accounted for the high share. In Alaska, the share was largely accounted for by food-products-manufacturing affiliates with Japanese and Canadian UBO's.

In terms of assets

In manufacturing, U.S. affiliates' share of the book value of total assets of all U.S. businesses increased to 17.2 percent in 1989 from 15.3 percent in 1988 (table 9).¹¹ In both years, affiliates' shares of manufacturing assets were substantially higher than their shares of manufacturing employment for two main reasons. First, affiliates are more concentrated than all U.S. businesses in capital-intensive industries, such as chemicals and petroleum and coal products, that have relatively low employment-to-assets ratios.¹² Second, much of the growth in foreign direct investment in recent years has been through acquisitions, and when a company is acquired, either by foreign or by U.S. buyers, its assets are often revalued to reflect the new, generally higher, value implicit in the acquisition price. Consequently, the portion of assets that has been recently revalued is probably higher for affiliates than for all U.S. businesses.¹³

11. The comparisons based on total assets cover only manufacturing because comparable data on total assets of all U.S. businesses in other industries are not available. Comparisons based on sales are also shown in table 9, but they are not discussed. All-U.S.-business total assets and sales are from the Census Bureau's *Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations (QFR)*. Comparisons for mining and trade are not appropriate, because the *QFR* data for these industries cover only corporations with assets over \$25 million for 1987-88 and over \$50 million for 1989. The exclusion of unincorporated businesses and small corporations from the *QFR* mining and trade data means that a significant portion of the all-U.S.-business activity in these industries is missing.

12. In some industries—such as stone, clay, and glass products—the higher affiliate share based on assets may also reflect a higher degree of diversification for affiliates than for other U.S. businesses. In such industries, an enterprise-based classification, like that used here for the comparisons of total assets, would result in higher affiliate shares than an activity-based classification, like the industry-of-sales and industry-of-establishment classifications used for the comparisons of employment, because data for secondary activities are included in the enterprise-based classification.

13. A comparison of affiliates' share of all-U.S.-business sales with their share of all-U.S.-business assets may indicate the importance of differences in valuation. Comparisons based on sales, unlike those based on assets, are not distorted by differences in valuation, because sales are generally valued at current prices.

^P Suppressed to avoid disclosure of data of individual companies.

1. The U.S. affiliate and all-U.S.-business data are classified by industry of enterprise. In this table, unlike most other tables on direct investment published here and elsewhere, petroleum and coal products is included in manufacturing in order to be consistent with the all-U.S.-business data.

2. Data for 1987 in this table correct an industry classification error in the U.S. affiliate data in table 6 of the July 1990 SURVEY article on U.S. affiliate operations in 1988.

3. Includes tobacco manufacturing.

NOTE.—Total assets and sales of all U.S. businesses cover U.S. corporations and are from the first quarter 1988, first quarter 1989, and first quarter 1990 issues of *Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations* published by the Census Bureau.

The largest increases in affiliate shares of all-U.S.-business assets were in fabricated metal products and chemicals. In fabricated metal products, the increase reflected the acquisition of the manufacturing and engineering firm by the U.S. affiliate of the Swiss company and, to a lesser extent, acquisitions by British and Japanese companies. In chemicals, the increase reflected several new investments by European companies.

Majority-Owned U.S. Affiliates

The estimates presented in this article have covered the operations of all U.S. nonbank affiliates—that is, all U.S. nonbank companies that are owned 10 percent or more by foreigners. In this section, the analysis covers

the operations of nonbank majority-owned U.S. affiliates (MOUSA's)—that is, nonbank affiliates that are owned more than 50 percent by foreigners.

Table 10 shows estimates of selected items—total assets, employment, gross property, plant, and equipment, and sales—for MOUSA's and gives the percent of the nonbank affiliate totals accounted for by MOUSA's.¹⁴ Most of the shares accounted for by MOUSA's are high because most U.S. affiliates are majority owned. The following discussion covers MOUSA shares of total assets and employment of all nonbank affiliates by industry, by area, and by country. The distributions of MOUSA shares of gross property, plant, and equipment and of sales are not discussed, but they tend to be similar to those of assets and employment.

In 1989, MOUSA's accounted for 72 percent of the total assets and 79 percent of the employment of all nonbank

For manufacturing as a whole, U.S. affiliates' share of all-U.S.-business sales in 1989 was 14.9 percent—lower than their 17.2-percent share of total assets but higher than their 10.0-percent share of employment. These percentages suggest that some of the difference between the asset- and employment-based shares may be due to differences in asset valuation.

14. These estimates for MOUSA's are based on data reported to BEA on a fully consolidated basis. To prepare the estimates, the foreign investor's ownership share of the top U.S. company in the consolidation was used, even though its share of other companies included in the consolidation may be lower.

Table 10.—Selected Data of Nonbank Majority-Owned U.S. Affiliates, by Industry of Affiliate and by Country of Ultimate Beneficial Owner, 1988 and 1989

^r Revised.
^p Preliminary.
^b Suppressed to avoid disclosure of data of individual companies.

U.S. affiliates. MOUSA shares of assets and employment were high in most industries. Among major industries, MOUSA shares were highest—92 percent of assets and 90 percent of employment—in wholesale trade and were lowest—53 percent of assets and 30 percent of employment—in finance (except banking). In finance (except banking), the shares were relatively low because foreign investors held minority interests in a few large U.S. companies.

In manufacturing, MOUSA's accounted for 80 percent of the assets and 83 percent of the employment of all U.S. affiliates. Within manufacturing, the MOUSA shares of assets and employment were highest in food manufacturing and were lowest in chemicals. The low shares in chemicals reflected the minority interest of a Canadian investor in a major U.S. chemical company.

By area, the MOUSA shares were highest—79 percent of assets and 88 percent of employment—for affiliates with UBO's in Europe and were lowest for affiliates with UBO's in the United States.¹⁵ By country, MOUSA's with UBO's in West Germany and the Netherlands had particularly high shares of assets (93 percent each), and MOUSA's with UBO's in the United Kingdom had a particularly high share of employment (94 percent). The shares for MOUSA's with UBO's in Japan—69 percent of assets and 72 percent of employment—were somewhat below average, primarily because of minority investments in fi-

15. A U.S. affiliate with a UBO in the United States has a foreign parent (that is, a foreign person owns at least 10 percent of it), but its ultimate beneficial owner is located in the United States. See the definition of UBO in footnote 2. Affiliates with U.S. UBO's are included because the definition of direct investment is based on whether a U.S. company has a foreign parent rather than on the location of the UBO.

nance. In 1989, the share of assets accounted for by MOUSA's with UBO's in Switzerland declined; the decline largely reflected a firm's conversion from majority-owned to minority-owned status. The share of employment accounted for by MOUSA's with UBO's in "Latin America and Other Western Hemisphere" declined; the decline largely reflected the acquisition of a minority interest in a company.

The preceding section of this article discussed the shares of all-U.S.-business employment and assets accounted for by all nonbank U.S. affiliates—both majority and minority owned. When only MOUSA's are used to calculate these shares, the affiliate share of all-U.S.-business employment is 3.8 percent (compared with 4.5 percent for all affiliates), and their share of all-U.S.-business assets in manufacturing is 14.0 percent (compared with 17.2 percent).

Tables 11 - 16 follow.

^r Revised.^p Preliminary.^D Suppressed to avoid disclosure of data of individual companies.

1. See footnote 4 in the text.

2. See footnote 2 to table 5.

3. Consists primarily of movable fixed assets temporarily located outside the United States and of any foreign assets, including mineral rights, carried on the U.S. affiliates' books.

Availability of Data on Foreign Direct Investment in the United States

Additional information on U.S. affiliates' operations in 1977-89 is available—including data on U.S. affiliates' balance sheets and income statements; external financial position; property, plant, and equipment; employment and employee compensation; U.S. merchandise trade; research and development expenditures; and U.S. land owned and leased.

The publications for 1977-85 and the computer diskettes for 1977-89 may be obtained from Public Information Office, Order Desk, BE-53, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230. Make checks or money orders payable to "Bureau of Economic Analysis" and include your return address with the order. The publications for 1986 forward may be obtained from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, DC 20402. The titles, BEA accession or GPO stock numbers, and prices of the publications and the years, BEA accession numbers, and prices of the diskettes, which should be quoted when ordering, are as follows:

Year	Publication				Diskette ²

1. Call GPO at (202) 783-3238 for price or stock number.

2. Note to diskette users: All files are copied, using DOS, onto 5¼-inch diameter diskettes (9 sector, double-sided, double-density). Documentation is included.

New Data Available for U.S. Direct Investment Abroad

In late August, revised estimates from BEA's 1988 annual survey of U.S. direct investment abroad, which collected key items on the operations of nonbank U.S. parent companies and their nonbank foreign affiliates, will be available in a publication titled *U.S. Direct Investment Abroad: Operations of U.S. Parent Companies and their Foreign Affiliates, Revised 1988 Estimates*. The revised estimates will also be available on diskette.

The publication may be ordered from the U.S. Government Printing Office (GPO); for order information, see inside back cover. The diskette, priced at \$20.00, may be ordered from the International Investment Division of BEA; call (202) 523-0568 to order; when ordering, refer to accession number 50-91-40-403.

A summary of preliminary results from BEA's 1989 benchmark survey of U.S. direct investment abroad, which replaced the annual survey for 1989, is scheduled to be published in a fall issue of the SURVEY OF CURRENT BUSINESS. More detailed data will be available from GPO in a publication scheduled for late November.

REGIONAL PERSPECTIVES

Personal Income by Region, First Quarter 1991

PERSONAL income growth in the Nation slowed for the fourth consecutive quarter. It increased only 0.3 percent in the first quarter of 1991, down from a 1.0-percent increase in the fourth quarter of 1990 (table 1).¹ The first-quarter increase was the smallest of the past two decades.

The slowdown in the first quarter was widespread by region and by industry: Growth slowed in all regions except the Southeast and in all major industries except the finance-insurance-real estate group and government. In the first quarter, personal income declined in the New England region and in two farm regions—Rocky Mountain and Plains.

NOTE.—This article was written by Rudolph E. DePass and Howard L. Friedenber.

1. Percent changes shown in this article are not at annual rates.

Personal income declined in 14 States, most of which were farming States or northeastern and midwestern manufacturing States. (For estimates by State, see "State Personal Income, Summary Estimates for First Quarter 1991" beginning on page 97.) Swings in farm income, reflecting Federal farm subsidy payments, dominated the changes in personal income in the States that had large changes. In North Dakota, Montana, South Dakota, and Kansas, farm income fell in the first quarter following large fourth-quarter payments on the 1990 wheat crop and on conservation reserve programs.² In Arkansas, farm income was boosted in the first quarter by subsidy payments on the 1990 rice crop. In Mississippi, it was boosted by payments on the 1990 rice and cotton crops. In Iowa, it was boosted by

2. Under conservation reserve programs, Federal and State agencies share with farmers and ranchers the costs of carrying out conservation and environmental protection practices on agricultural land.

payments on the 1990 and 1991 corn crops.

Because farm income often fluctuates sharply from quarter to quarter, the remainder of this article focuses on nonfarm personal income in order to track more directly the effects of the national economic slowdown on regions and States.

Nonfarm personal income for the Nation increased 0.3 percent in the first quarter, down from a 0.9-percent increase in the fourth quarter and a 1.5-percent increase in the third. The first-quarter slowdown was particularly pronounced in the Far West and Great Lakes regions. New England was the only region in which nonfarm income declined in the first quarter; the Southeast was the only region in which nonfarm income increased more in the first quarter than in the fourth. By State, the first-quarter change in nonfarm income was less than the fourth-quarter change in 34 States (chart 5).

In the Far West, nonfarm personal income increased 0.3 percent in the first quarter, down from a 1.5-percent increase in the fourth quarter and a 1.7-percent increase in the third. The first-quarter slowdown was widespread by industry. Payroll declines in durables manufacturing and in construction were larger in the first quarter than in the fourth (table 2). Payrolls in nondurables manufacturing, in the transportation-public utilities

group, and in wholesale trade declined in the first quarter after fourth-quarter gains. Payrolls in retail trade and in services grew slower in the first quarter than in the fourth. Nonfarm income growth slowed in all Far West States, particularly in California.

In the Great Lakes region, nonfarm personal income increased 0.1 percent in the first quarter, down from a 1.0-percent increase in the fourth quarter and a 1.4-percent increase in the third. Payrolls in durables manufacturing declined more in the first quarter than in the fourth; the first-quarter decline was the largest since the 1981-82 recession. Payrolls in nondurables manufacturing, in the transportation-public utilities group, and in retail trade declined after fourth-quarter gains. Payrolls in construction, in wholesale trade, in services, and in government grew slower in the first quarter than in the fourth. By State, nonfarm income growth slowed in Illinois, Ohio, and Wisconsin. In Michigan and Indiana, nonfarm income declined in the first quarter after increasing in the fourth;

the declines partly reflected a cutback in motor vehicle production.

In the Rocky Mountain region, nonfarm income increased 1.0 percent in the first quarter after increasing 1.8 percent in the fourth quarter and 1.7 percent in the third. The first-quarter slowdown reflected downswings in payrolls in the transportation-public utilities group and in retail trade. In addition, payrolls in nondurables manufacturing, in construction, and in services grew slower in the first quarter than in the fourth. By State, nonfarm income growth slowed in Colorado, Montana, and Utah; in Wyoming, it declined in the first quarter after increasing in the fourth. In Idaho, nonfarm income increased more in the first quarter than in the fourth.

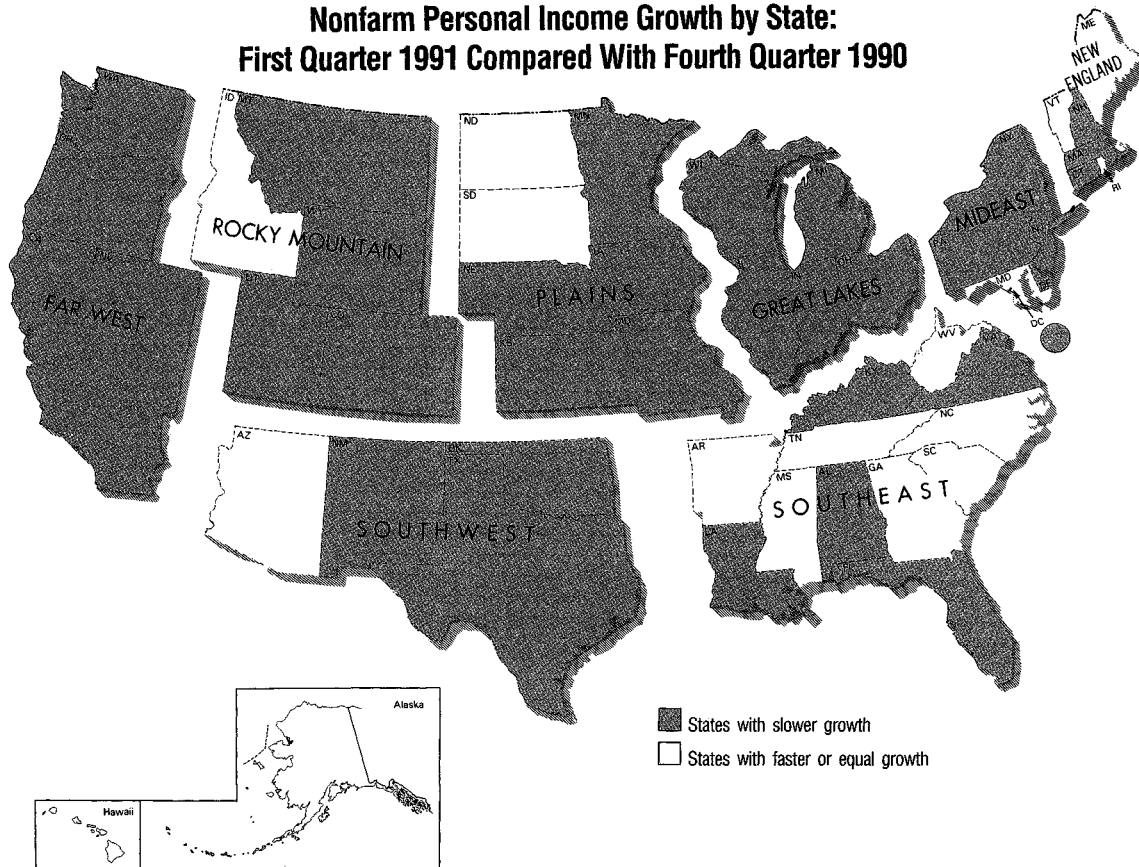

In the Plains region, nonfarm personal income increased 0.4 percent in the first quarter, down from a 1.1-percent increase in the fourth quarter and a 1.3-percent increase in the third. Payroll declines in durables manufacturing and in construction were larger in the first quarter than in the fourth; the first-quarter decline

in durables payrolls was the largest since the 1981-82 recession. After fourth-quarter gains, payrolls declined in the transportation-public utilities group and in retail trade and were unchanged in nondurables manufacturing. Payrolls in wholesale trade and in services grew slower in the first quarter than in the fourth. Nonfarm income growth slowed in all Plains States except South Dakota and North Dakota.

In New England, nonfarm personal income declined 0.6 percent in the first quarter after increasing 0.1 percent in the fourth quarter and 1.0 percent in the third. The first-quarter downswing reflected payroll declines in all major industries except government. Payrolls in construction, in the transportation-public utilities group, and in wholesale trade declined more in the first quarter than in the fourth; construction payrolls have been down for the past nine quarters. Payrolls in the finance-insurance-real estate group and in services declined after fourth-quarter gains. By State, nonfarm income in New Hampshire and Mas-

CHART 5

**Nonfarm Personal Income Growth by State:
First Quarter 1991 Compared With Fourth Quarter 1990**

U.S. Department of Commerce, Bureau of Economic Analysis

sachusetts declined more in the first quarter than in the fourth, and in Connecticut, it declined in the first quarter after increasing in the fourth. In contrast, nonfarm income in Maine declined less in the first quarter than in the fourth, and in Rhode Island and Vermont, it increased in the first quarter after declining in the fourth.

In the Mideast, nonfarm personal income increased 0.2 percent in the first quarter, down from a 0.8-percent increase in the fourth quarter and a 1.4-percent increase in the third. Payroll declines in durables manufacturing and in construction were larger in the first quarter than in the fourth; construction payrolls have been down for seven of the past eight quarters. Payrolls in nondurables manufacturing and in wholesale trade declined in the

first quarter after fourth-quarter gains. Payrolls in the finance-insurance-real estate group and in services grew slower in the first quarter than in the fourth. By State, nonfarm income growth slowed in New York and Pennsylvania; in Delaware and New Jersey, it declined in the first quarter after increasing in the fourth. In Maryland, nonfarm income increased slightly more in the first quarter than in the fourth.

In the Southwest, nonfarm personal income increased 0.8 percent in the first quarter, down from a 1.3-percent increase in the fourth quarter and a 2.0-percent increase in the third. The first-quarter slowdown reflected payroll declines in construction and in the transportation-public utilities group after fourth-quarter gains; the decline in construction was the first in

2 years. In addition, payrolls in trade and in services grew slower in the first quarter than in the fourth. Nonfarm income growth slowed in all Southwest States except Arizona.

In the Southeast, nonfarm personal income, in contrast to that in the other regions, increased slightly more in the first quarter (0.6 percent) than in the fourth (0.5 percent). Payrolls in nondurables manufacturing and in government increased in the first quarter after declining in the fourth; payrolls in the finance-insurance-real estate group increased after no change. By State, nonfarm income growth picked up in North Carolina, West Virginia, Arkansas, South Carolina, Tennessee, and Mississippi. It was unchanged in Georgia, and it slowed in Florida, Alabama, Louisiana, Virginia, and Kentucky.

^r Revised.

^p Preliminary.

1. The personal income level shown for the United States is derived as the sum of the State estimates; it differs from the national income and product accounts (NIPA) estimate of personal income because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents

employed abroad temporarily by private U.S. firms. It can also differ from the NIPA estimate because of different data sources and revision schedules.

NOTE.—The quarterly estimates of State personal income were prepared by Francis G. McFaul, James P. Stehle, Isabelle B. Whiston, and James M. Zavrel, under the supervision of Robert L. Brown.

^r Revised.^p Preliminary.

NOTE.—Nonfarm personal income is total personal income less farm earnings.

Data Availability

Quarterly estimates for the years 1969–88 are available from the Regional Economic Information System, Regional Economic Measurement Division, BE-55, Bureau of Economic Analysis, U. S. Department of Commerce, Washington, DC 20230, or call (202) 254-6630.

New from BEA!

CD-ROM

**Containing Over 20 Years of Economic Data
For All U.S. Counties and Metro Areas**

Have local area economic data at your fingertips with this new product from the Bureau of Economic Analysis. The CD-ROM contains annual data for 3,107 counties and 337 metropolitan areas for 1969-89, including:

- Personal income by major source
- Per capita personal income
- Earnings by two-digit Standard Industrial Classification (SIC) industry
- Full- and part-time employment by one-digit SIC industry
- Regional economic profiles
- Transfer payments by major program
- Farm income and expenses

The CD-ROM contains 450 megabytes of data and documentation. All the estimates are stored as ASCII files that can be accessed in either sequential or random mode. The package includes a program, on a separate floppy disk, that allows the user to display, print, or copy one or more of the standard tables.

All this for \$35.00!

To Order

Request Accession No. 55-89-30-599, enclose a check or money order for \$35.00 payable to Bureau of Economic Analysis, and mail to: Public Information Office, Order Desk, BE-53, Bureau of Economic Analysis, U.S. Department of Commerce, Washington DC 20230. Be sure to include your return address. For orders of 25 or more, the price is \$30.00 per CD-ROM.

Telephone (202) 523-0966 or (202) 523-0777 for further information or to place an order using MasterCard or VISA.

Fax a request for further ordering information to the BEA Regional Economic Information System (REIS) at (202) 523-4499.

L,C,Lg,U Cyclical indicator series are classified as L (leading), C (coincident), Lg (lagging), or U (unclassified) at reference cycle peaks, troughs, and overall. Series classifications are shown in parentheses following the series titles.

‡ Cyclical indicator series denoted by ‡ are inverted (i.e., the sign is reversed) for cyclical analysis calculations, including classifications, contributions to composite indexes, and current high values.

† Cyclical indicator series denoted by † are smoothed by an autoregressive-moving-average filter developed by Statistics Canada.

For information on composite indexes and other concepts used in this section, see "Composite Indexes of Leading, Coincident, and Lagging Indicators" in the November 1987 SURVEY OF CURRENT BUSINESS and "Business Cycle Indicators: Revised Composite Indexes" in the January 1989 SURVEY.

References to series in this section use the prefix "BCI-" followed by the series number. Unless otherwise noted, series are seasonally adjusted.

Percent change data are centered within the spans: 1-month changes are placed in the ending month, 3-month changes are placed in the 3d month, 6-month changes are placed in the 4th month, 1-quarter changes are placed in the ending quarter, and 4-quarter changes are placed in the 3d quarter.

Diffusion indexes are defined as the percent of components rising plus one-half of the percent of components unchanged. Diffusion index data are centered within the spans: 1-month indexes are placed in the ending month and 6-month indexes are placed in the 4th month.

High values reached by cyclical indicators since the last reference cycle trough (November 1982) are shown in boldface type; high values reached prior to the period shown in the table are listed at the bottom of each page. For inverted series, low values are indicated as highs.

Sources for series in this section are shown on pages C-27 and C-28 in the April 1991 SURVEY.

Page C-1

1. A component's contribution measures its impact, in percentage points, on the percent change in the index. Each month, the sum of the contributions plus the trend adjustment factor equals (except for rounding differences) the index's percent change from the previous month. The trend adjustment factors are 0.142 for the leading index, -0.186 for the coincident index, and 0.030 for the lagging index.

2. Excludes BCI-57, for which data are not available.

3. Excludes BCI-77 and BCI-95, for which data are not available.

Page C-2

NOTE.—Major data revision: Data on the value of construction put in place have been revised by the source agency to reflect the updating of the basic data, a change in methodology, and the computation of new seasonal adjustment factors. This revision affects BCI-20 (contracts and orders for plant and equipment in 1982 dollars) from 1948 forward and BCI-69 (manufacturers' machinery and equipment sales and business construction expenditures) from 1969 forward. For further information on construction put in place data, contact the U.S. Department of Commerce, Bureau of the Census, Construction Statistics Division, Washington, DC 20233. For information concerning the compilation of BCI-20 and BCI-69, contact the U.S. Department of Commerce, Bureau of Economic Analysis, Business Outlook Division, Washington, DC 20230.

1. Data exclude Puerto Rico, which is included in figures published by the source agency.

2. Copyrighted. This series may not be reproduced without written permission from the University of Michigan, Survey Research Center, P.O. Box 1248, Ann Arbor, MI 48106-1248.

3. Copyrighted. This series may not be reproduced without written permission from McGraw-Hill Information Systems Company, F.W. Dodge Division, 1221 Avenue of the Americas, New York, NY 10020.

Page C-3

NOTE.—Major data revision: Manufacturers' machinery and equipment sales and business construction expenditures (BCI-69)—see note for page C-2.

* Preliminary July values: BCI-23 = 279.8, BCI-19 = 379.24, BCI-85 = 0.35; anticipated 3d quarter values: BCI-61 = 553.52, BCI-100 = 546.41; and anticipated 4th quarter values: BCI-61 = 555.93, BCI-100 = 549.07.

1. Copyrighted. This series may not be reproduced without written permission from Commodity Research Bureau, Inc., 75 Wall Street, 22d Floor, New York, NY 10005.

Page C-4

* Preliminary July values: BCI-119 = 5.93, BCI-114 = 5.58, BCI-116 = 9.39, BCI-115 = 8.51, BCI-117 = 7.05, and BCI-109 = 8.50.

1. This index is compiled by the Center for International Business Cycle Research (CIBCR), Graduate School of Business, Columbia University, New York, NY 10027.

Page C-5

* Preliminary July values: BCI-19 = 412.5, BCI-748 = 1,613.4, BCI-745 = 330.9, BCI-746 = 778.9, BCI-742 = 1,151.5, BCI-747 = 323.1, BCI-743 = 389.4, BCI-750 = 95.98, BCI-758 = 137.87, BCI-755 = 1,805.5, BCI-756 = 6,124.2, BCI-752 = 0.6121, BCI-757 = 1,343.61, and BCI-753 = 1.1475.

1. Balance of payments basis: Excludes transfers under military grants and Department of Defense sales contracts (exports) and Department of Defense purchases (imports).

2. Organisation for Economic Co-operation and Development.

3. This index is the weighted-average exchange value of the U.S. dollar against the currencies of the other G-10 countries plus Switzerland. Each country is weighted by its 1972-76 global trade. For a description of this index, see the August 1978 *Federal Reserve Bulletin* (p. 700).

CURRENT BUSINESS STATISTICS

New feature in this issue: The "Employment Cost Index" section has been expanded to include indexes for wages and salaries.

Series originating in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers and are subject to their copyrights.

Current data for the series shown in the S-pages are available on diskette on a subscription basis or from the Commerce Department's Economic Bulletin Board. Historical data, data sources, and methodological notes for each series are published in BUSINESS STATISTICS, 1961-88. For more information, write to Business Statistics Branch, Current Business Analysis Division (BE-53), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

NOTE.—This section of the SURVEY is prepared by the Business Statistics Branch.

Unless otherwise stated in footnotes below, data through 1988 and methodological notes are as shown in <i>Business Statistics, 1961-88</i>	Annual		1990									1991

- † Revised series. See Tables 2.6-2.9 in the July 1990 SURVEY for revised estimates for 1987-89.
- ‡ Includes inventory valuation and capital consumption adjustments.
- § Monthly estimates equal the centered three-month average of personal saving as a percentage of the centered three-month moving average of disposable personal income.
- ◇ See note "◇" for p. S-2.

Page S-2

- 1. Based on data not seasonally adjusted.
- ◇ Effective April 1990 SURVEY, the industrial production index has been revised back to 1977 and has a new base year of 1987. A more detailed explanation of this revision is in the April 1990 *Federal Reserve Bulletin*. Historical data are available from the Industrial Output Section, Mail Stop 82, Division of Research and Statistics, Federal Reserve Board, Washington, DC 20551.
- # Includes data not shown separately.

Page S-3

- # Includes data for items not shown separately.
- † Effective with the April 1991 SURVEY, M3 data have been revised to benchmark the data to the 1987 Census of Manufactures and 1988 Annual Survey of Manufactures, and to convert the series to the 1987 SIC codes. Revisions related to benchmarking affect all categories back to 1982. Revisions resulting from the SIC conversion affect about half the categories back to 1958. The coverage for some of the series in the market category has been changed.

Page S-4

- 1. Based on data not seasonally adjusted.
- # Includes data for items not shown separately.
- ‡ Includes textile mill products, leather and products, paper and allied products, and printing and publishing industries; unfilled orders for other nondurable goods industries are zero.
- ◇ For these industries (food and kindred products, tobacco, apparel and other textile products, petroleum and coal, chemicals and allied products, and rubber and plastics products) sales are considered equal to new orders.
- † See note "†" for p. S-3.

Page S-5

- @ Compiled by Dun & Bradstreet, Inc.
- # Includes data for items not shown separately.
- § Ratio of prices received to prices paid (parity index).
- ‡ See note "‡" for p. S-4.
- † In the Feb. and July issues of the SURVEY each year, data for the most recent six to eight years are subject to revise and are available upon request.
- †† See note "††" for p. S-3.

Page S-6

- § For producer price indexes of individual commodities, see respective commodities in the Industry section beginning p. S-19. All indexes subject to revision four months after original publication.
- # Includes data for items not shown separately.
- ‡ Effective with the Feb. 1991 SURVEY, data have been revised back to 1986 and are available upon request.

Page S-7

- 1. Computed from cumulative valuation total.
- 2. Index as of July 1, 1991: building, 408.1; construction, 451.9.
- 3. Beginning Dec. 1988, series has been discontinued by the Bureau of the Census.
- ‡ Effective July 1991 SURVEY, data have been revised back to 1986. Effective July 1990 SURVEY, data were revised back to 1985. Revised data are available from the Construction Statistics Division at the Bureau of the Census, Washington, DC 20233.
- # Includes data for items not shown separately.
- § Data for Mar., May, Aug., and Nov. 1990, and Jan., May, Aug., and Oct. 1991 are for five weeks; other months four weeks.
- ◇ Effective Feb. 1990 SURVEY, data for seasonally adjusted housing starts have been revised back to 1987. These revisions are available upon request.
- @ Effective Feb. 1990 SURVEY, data for seasonally adjusted manufacturers' shipments of mobile homes have been revised back to 1987.
- † Effective May 1990 SURVEY, data for seasonally adjusted building permits have been revised back to 1988 and are available upon request.

* Series first shown in the July 1990 SURVEY. The fixed-weighted price index is a weighted average of the individual price index series used to deflate the Value of New Construction Put in Place (VIP) series. In calculating the index, the weights (the composition of current dollar VIP in 1987 by category of construction) are held constant. Consequently, the index reflects only changes in prices. The implicit price deflator is a derived ratio of total current to constant dollar VIP (multiplied by 100). It is the average of the individual price indexes used in the deflation of VIP, but the prices are weighted by the composition of VIP each period. As a result, the implicit price deflator reflects not only changes in prices, but also changes in the composition of VIP, and its use as a measure of price change is discouraged. Effective July 1991 SURVEY, data have been revised back to 1986.

- †† Effective May 1991 SURVEY, the Boeckh indexes have a new base year of 1987.
- ‡‡ Effective Sept. 1990 SURVEY, the construction cost index for the Federal Highway Administration has been revised back to 1986 and has a new base year of 1987=100.

Page S-8

- 1. Advance estimate.
- 2. Beginning with Feb. 1989 data, associations in conservatorship are excluded.
- ◇ Home mortgage rates (conventional first mortgages) are under money and interest rates on p. S-14.
- § Data include guaranteed direct loans sold.
- # Includes data for items not shown separately.
- @ Data are for closed mortgage loans of thrift institutions insured by the Savings Association Insurance Fund (SAIF)—FSLIC-insured institutions prior to Sept. 1989.
- † Effective April 1991 SURVEY, estimates of wholesale sales have been revised back to January 1988 and wholesale inventories have been revised back to January 1989. Revised data and a summary of changes appear in the report *Revised Monthly Wholesale Trade, Sales and Inventories January 1984-December 1990, BW90-R*, available from the Bureau of the Census, Washington, DC 20233.
- ‡ Effective March 1991 SURVEY, retail trade data have been revised. Estimates of retail sales have been revised back to January 1988 and inventories have been revised back to January 1989. (In 1990 data were revised back to 1982.) Revised data and a summary of changes will appear in the report *Revised Monthly Retail Sales and Inventories, January 1981-December 1990, BR90-R*, available from the Bureau of the Census, Washington, DC 20233.

Page S-9

- 1. Advance estimate.
- # Includes data for items not shown separately.
- ◇ Effective with the January 1991 SURVEY, the seasonally adjusted labor force series have been revised back to January 1986. The January 1991 issue of *Employment and Earnings* contains the new seasonal adjustment factors, a description of the current methodology, and revised data for the most recent 13 months or calendar quarters. Revised monthly data for the entire 1986-90 revision period appear in the February 1991 issue of *Employment and Earnings*.
- † The participation rate is the percent of the civilian noninstitutional population in the civilian labor force. The employment-population ratio is civilian employment as a percent of the civilian noninstitutional population, 16 years and over.
- @ Data include resident armed forces.
- ‡ See note "‡" for p. S-8.

Page S-10

- ◇ See note "◇" for p. S-9.
- § Effective with the Sept. 1990 and June 1991 issues of the SURVEY, data have been revised, respectively back to April 1988 and April 1989, unadjusted, and back to Jan. 1985 and Jan. 1986, seasonally adjusted, to reflect new benchmarks and seasonal adjustment factors. In addition the Sept. 1990 revision included the conversion of the industry series to 1987 SIC codes. Industry series affected by revisions in the SIC have been revised back to the inception of the series, to the extent possible. In addition, all constant-dollar and indexed series were recomputed on a 1982 base. The Sept. 1990 and June 1991 issues of *Employment and Earnings* contain detailed descriptions of the effects of these revisions. All of the revised historical series will be published in a special supplement to *Employment and Earnings*. This supplement, when combined with the historical bulletin, *Employment, Hours, and Earnings, United States, 1909-90* will comprise the full historical series on national data obtained from the establishment survey.

Page S-11

- § See note "§" for p. S-10.
- ‡ This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision.
- ◇ Production and nonsupervisory workers.

Page S-12

1. This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision. Use the corresponding unadjusted series.

§ See note "§" for p. S-10.

◇ Production and nonsupervisory workers.

† Earnings in 1982 dollars reflect changes in purchasing power since 1982 by dividing by Consumer Price Index. Effective Feb. 1990 and 1991 issues of the SURVEY, this series has been revised, respectively, back to 1985 and 1986 to reflect new seasonal factors for the CPI-W. Revised data are available upon request.

§§ Effective with the June 1991 SURVEY, data have been revised back to 1989 and are available upon request. Wages as of July 1, 1991: Common, \$18.98; Skilled, \$24.84.

† Excludes farm, household, and Federal workers.

@ Effective with the April 1990 SURVEY, the employment cost index is based on June 1989=100, rather than June 1981=100. Historical data for both June 1989 and June 1981 bases are available from the Bureau of Labor Statistics, Division of Employment Cost Trends, 441 G Street, N.W., Washington, DC 20212.

†† These series were affected by an error in the Sept. 1990 SURVEY. The stub for "Transportation equipment" was omitted. Hourly earnings for "Transportation equipment" were shown following the stub for "Electronic and other electrical equipment". Hourly earnings for "Electronic and other electrical equipment" were shown following the stub for "Industrial machinery and equipment". Hourly earnings for "Industrial machinery and equipment" were shown following the stub for "Machinery, except electrical", which was the former name for that industry (SIC 35).

* Series first shown in the July 1991 SURVEY. Wages and salaries are defined as the hourly straight-time wage rate or, for workers not paid on an hourly basis, straight-time earnings divided by the corresponding hours. Straight-time wage and salary rates are total earnings before payroll deductions, excluding premium or supplemental pay for overtime and for work on weekends and holidays, shift differentials, and nonproduction bonuses such as lump-sum payments provided in lieu of wage increases. Production bonuses, incentive earnings, commission payments, and cost-of-living adjustments are included in straight-time wage and salary rates.

Page S-13

1. Effective Feb. 28, 1989, there was a break in the series due to the enlargement of the panel of reporting dealers to 17 and of reporting direct issuers to 36. End of month figures on the old basis are as follows: All issuers, 481,734; financial companies, 373,717; dealer placed, 172,330; directly placed, 201,387; and nonfinancial companies, 108,017.

2. Average for Dec.

Includes data for items not shown separately.

§ Excludes loans and federal funds transactions with domestic commercial banks and includes valuation reserves (individual loan items are shown gross; i.e., before deduction of valuation reserves).

† Covers 50 States and the District of Columbia. Only regular benefits are included.

@ Average weekly insured unemployment for 12-month period divided by average monthly covered employment (tagging 4 full quarters for annual figure and 2 full quarters for monthly figure).

† Effective Oct. 1989 SURVEY, loans by loan type are provided by the Federal Farm Credit Banks Funding Corporation.

◇ Effective with the April 1990 SURVEY, the reserves of depository institutions have been revised back to 1984 and are available upon request.

Page S-14

1. Data are for fiscal years ending Sept. 30 and may include revisions not distributed to the months.

2. Weighted by number of loans.

3. Beginning Feb. 1988, data suspended by the Farm Credit Administration, which is revising the information it collects and amending the reports it distributes.

§ Effective Mar. 1990 SURVEY, data have been revised to reflect new benchmark and seasonal adjustments and are available from the Banking and Money Market Statistics Section of the Division of Monetary Affairs at the Federal Reserve Board, Washington, DC 20551.

Includes data for items not shown separately.

◇ Excludes loans to commercial banks in the U.S.

† Rates on the commercial paper placed for firms whose bond rating is Aa or the equivalent.

†† Courtesy of *Metals Week*.

@ Average effective rate

† Effective May 1990 SURVEY, the consumer installment credit series have been revised back to 1980 to incorporate new information and updated seasonal adjustment factors. These revisions are available upon request.

* Series first shown in the June 1990 SURVEY.

†† This series, first shown in the June 1990 SURVEY, represents the outstanding balances of loans that the loan originator has sold and are no longer carried on the loan originator's books. The loans are pooled and securities are issued on the pools.

Page S-15

1. Beginning Jan. 1989, the primary public offering statistics have been discontinued by the Securities and Exchange Commission.

2. Effective April 1991 SURVEY, the Security Markets series have been discontinued.

† Effective Feb. 1990 SURVEY, the money stock measures and components have been revised and are available from the Banking Section of the Division of Research and Statistics at the Federal Reserve Board, Washington, D.C. 20551.

†† Includes ATS and NOW balances at all depository institutions, credit union share draft balances, and demand deposits at thrift institutions.

◇ Overnight (and continuing contract) RP's are those issued by commercial banks to the nonbank public, and overnight Eurodollars are those issued by Caribbean branches of member banks to U.S. nonbank customers.

@ Small time deposits are those issued in amounts of less than \$100,000. Large time deposits are those issued in amounts of \$100,000 or more and are net of the holdings of domestic banks, thrift institutions, the U.S. Government, money market mutual funds, and foreign banks and official institutions.

Includes data for items not shown separately.

Page S-16

1. The railroad average was discontinued by Moody's on July 13, 1989. Therefore, the July average reflects only eight working days.

2. Effective Oct. 3, 1990, the German Democratic Republic (GDR; East Germany) ceased to exist as a sovereign state and became a part of the Federal Republic of Germany. Accordingly, effective with the statistics for Oct. 1990, all merchandise imported from or exported to the former GDR will be included as trade with the Federal Republic of Germany.

3. Beginning Jan. 1991 data, Roadway Services, Inc. will be included in the Dow Jones Transportation Average replacing Pan Am Corp. Roadway Services is listed on the NASDAQ National Market System. Comparability with earlier averages is not affected by this change.

@ See note "4" for p. S-19 regarding the new commodity classification systems introduced Jan. 1989. Data may not equal the sum of the geographic regions, or commodity groups and principal commodities, because the revisions to the totals are not reflected in the component items.

§ Number of issues represents number currently used; the change in number does not affect the continuity of the series.

† For bonds due or callable in 10 years or more.

Includes data for items not shown separately.

† Effective with the Mar. 1990 SURVEY, seas. adj. exports and imports have been revised back to Jan. 1988, and are available upon request.

Page S-17

1. Beginning with Jan. 1989 data, undocumented exports to Canada are now included, resulting in a break with Dec. 1988 data.

2. Beginning Jan. 1989, buses are excluded from "Motor vehicles and parts" and included in "Other manufactured goods," resulting in a break with Dec. 1988 data.

3. See note "2" for p. S-16.

@ See note "@" for p. S-16.

† See note "†" for p. S-16.

Includes data not shown separately.

◇ Data include undocumented exports to Canada, which are based on official Canadian import totals.

Page S-18

1. Reported annual total; quarterly or monthly revisions are not available.

2. For month shown.

3. Beginning Aug. 1989, the export and import indexes have been discontinued by the Census Bureau.

Includes data for items not shown separately.

§ Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled service.

† The threshold for Class I railroad status is adjusted annually by the Interstate Commerce Commission to compensate for inflation.

◇ Average daily rent per room occupied, not scheduled rates.

Data represent entries to a national park for recreational use of the park, its services, conveniences, and/or facilities.

† Before extraordinary and prior period items.

@ Changes in these unit value indexes may reflect changes in quality or product mix as well as price changes.

†† Effective with the Dec. 1989 SURVEY, data for 1981-88 have been revised and are available upon request.

††† Effective with the Mar. 1990 SURVEY, data for 1985-89 have been revised and are available upon request.

Page S-19

1. Reported annual total; monthly or quarterly revisions are not available.

2. Less than 500 metric tons.

3. Figure suppressed because it did not meet Census publication standards.

4. Beginning with 1989 data, merchandise trade data are based upon two new commodity classification systems; the International Harmonized System and, Revision 3 of the Standard International Trade Classification and, as a result, data may not be directly comparable to 1988 and earlier years.

5. Data are partially estimated for this quarter and are not available.

6. Beginning in 1991, data are available only on a quarterly basis.

Includes data for items not shown separately.

§ Data are reported on the basis of 100 percent content of the specified material unless otherwise indicated.

† Effective with the Jan. 1990 SURVEY, revisions for 1987-88 are available upon request.

Page S-20

1. Reported annual total; monthly or quarterly revisions are not available.

2. Quarterly data are no longer available.

3. See note 4 for p. S-19.

4. Beginning in 1991, data are available only on a quarterly basis.

§ Data are not wholly comparable from year to year because of changes from one classification to another.

@ Includes less than 500 electric generation customers not shown separately.

† Effective with the Jan. 1990 SURVEY, revisions for 1987-88 are available upon request.

◇ Effective with the Dec. 1989 SURVEY, revisions for 1987-88 are available upon request.

Page S-21

1. Previous year's crop. New crop is not reported until Sept. (crop year: Sept. 1–Aug. 31).
 2. Crop estimate for the year.
 3. Stocks as of June 1.
 4. Stocks as of June 1 and represents previous year's crop; new crop not reported until June (beginning of new crop year).
 5. Series has been discontinued.
 6. Stock estimates are available once a year as June 1 stocks and shown here in the May column and (as previous year's crop) in the annual column.
 7. Stocks as of Dec. 1.
 8. See note 4 for p. S-19.
- § Excludes pearl barley.
 @ Quarterly data represent the 3-month periods Dec.–Feb., Mar.–May, June–Aug., and Sept.–Nov. Annual data represent Dec.–Nov.
 † Coverage for 21 selected States, representing approximately 85 percent of U.S. production.

Page S-22

1. See note 4 for p. S-19.
- § Cases of 30 dozen.
 * Series first shown in the Jan. 1991 SURVEY.

Page S-23

1. Crop estimate for the year.
 2. Reported annual total; revisions not distributed to the months.
 3. Data suppressed because they did not meet Census publication standards.
 4. See note 4 for p. S-19.
 5. Data withheld to avoid disclosing figures for individual companies.
 6. Beginning in 1991, data are available only on a quarterly basis.
- # Totals include data for items not shown separately.

Page S-24

1. Reported annual total; monthly revisions are not available.
2. See note 4 for p. S-19.
3. Less than 500 tons.
4. Beginning in 1990, monthly data have been discontinued. Annual data will continue to be available.

Page S-25

1. Reported annual total; monthly revisions are not available.
 2. For month shown.
 3. Effective with Jan. 1989, import data are for consumption; earlier periods of data are general imports. See also note 4 for p. S-19 regarding the introduction of new classification systems.
 4. Beginning in 1990, monthly data have been discontinued. Annual data will continue to be available.
- @ Includes foreign ores.
 § Source: *Metals Week*.

Page S-26

1. Reported annual total; monthly revisions are not available.
 2. Less than 50 tons.
 3. See note 3 for p. S-25.
 4. Break in comparability beginning Jan. 1, 1991, because of a change in the *Metals Week* pricing series for zinc.
- ◇ Includes secondary smelters' lead stocks in refinery shapes and in copper-base scrap.
 † Source for monthly data: American Bureau of Metal Statistics. Source for annual data: Bureau of Mines.
 # Includes data not shown separately.
 † Effective April 1991 SURVEY, the materials handling index has been revised back to 1982 and now includes lift trucks. The index also includes new orders for automatic guided vehicles, automated storage and retrieval systems, below hook lifters, cranes, hoists, monorails, racks, shelving, casters and floor trucks, and conveyors. Revised data are available upon request.
 @@ Price represents North American Mean.
 @ Effective with the Sept. 1990 SURVEY, the new orders index numbers have been converted to a new base year of 1987=100. Data back to 1988 are available upon request.

Page S-27

1. Annual total includes revisions not distributed to the months.
 2. See note 4 for p. S-19.
 3. Beginning in 1990, quarterly data have been discontinued. Annual data will continue to be available.
 4. Beginning with May 1991 data, monochrome production numbers are no longer included.
- # Includes data for items not shown separately.
 § Includes nonmarketable catalyst coke.

◇ Includes small amounts of "other hydrocarbons and alcohol new supply (field production)," not shown separately.
 †† March, June, September and December are five-week months. All others consist of four weeks.

Page S-28

1. Reported annual total; revisions not allocated to the months.
 2. See note 4 for p. S-19.
 3. Beginning May 1991, the leaded gasoline price is not statistically valid for publication.
- # Includes data for items not shown separately.

Page S-29

1. Reported annual total; revisions not allocated to the months.
 2. See note 4 for p. S-19.
- ◇ Source: American Paper Institute. Total U.S. estimated consumption by all newspaper users. See also note "†" for this page.
 § Effective with the October 1990 SURVEY, data have been revised back to 1989 to reflect adjustments made by the Rubber Manufacturers Association's Rubber Statistical Committee.
 † Effective with the October 1990 SURVEY, synthetic data consisting of Butyl, polyisoprene, polychloroprene, silicone, and other elastomers have been revised in keeping with data provided by the Census Bureau's MA30A report beginning in 1990. Also see note "§" on this page.
 # Compiled by the American Newspaper Publishers Association.
 † Effective with the March 1990 SURVEY, Canadian newsprint statistics have been revised back to Jan. 1982 to exclude supercalendered and some soft-nip calendered paper that was originally classified as newsprint and is now classified as uncoated groundwood papers. This revision also affects estimated consumption. Revised data are available upon request.

Page S-30

1. Reported annual total; revisions not allocated to the months.
 2. Data are being withheld to avoid disclosing data from individual firms.
 3. Data cover five weeks; other months, four weeks.
 4. Beginning Jan. 1989, sales of industrial plasters are included with building plasters.
 5. Jan. 1, 1991 estimate of the 1990 crop.
 6. Total for crop year, Aug. 1–Jul. 31.
 7. Beginning in 1991, data are available only on a quarterly basis.
- # Includes data for items not shown separately.
 ◇ Cumulative ginnings to the end of month indicated.
 § Bales of 480 lbs.

Page S-31

1. Less than 500 bales.
 2. Annual total includes revisions not distributed to the months.
 3. Average for crop year; Aug. 1–Jul. 31.
 4. For five weeks; other months four weeks.
 5. See note 4 for p. S-19.
 6. Beginning in 1990, data are available only on a quarterly basis.
 7. Beginning in 1991, data are available only on a quarterly basis.
- ◇ Based on 480-lb. bales, preliminary price reflects sales as of the 15th; revised price reflects total quantity purchased and dollars paid for the entire month (revised price includes discounts and premiums).
 § Bales of 480 lbs.
 † The total may include some miscellaneous wool imports.
 * Series first shown in the July 1990 SURVEY.

Page S-32

1. Annual total includes revisions not distributed to the months.
 2. Production of new vehicles (thous. of units) for June 1991: *passenger cars, 476; trucks and buses, 319.*
 3. Data are reported on an annual basis only.
 4. See note 4 for p. S-19.
 5. Beginning Jan. 1989, shipments of trailer bodies are included with trailer chassis to avoid disclosure of data from individual firms.
 6. Effective with the August 1990 SURVEY, data have been revised back to 1987 and are available upon request.
 7. Data withheld to avoid disclosing figures for individual companies.
- # Total includes backlog for nonrelated products and services and basic research.
 § Domestic cars comprise all cars assembled in the U.S. and cars assembled in Canada and imported to the U.S. under the provisions of the Automotive Products Trade Act of 1965. Imports comprise all other cars.
 ◇ Courtesy of R.L. Polk & Co.; republication prohibited. Because data for some States are not available, month-to-month comparisons are not strictly valid.
 * Series first shown in the August 1990 SURVEY.
 † Includes some imported trucks over 10,000 lbs. GVW.
 ‡ Excludes railroad-owned private refrigerator cars and private line cars.
 @ Effective with the Mar. 1991 SURVEY, seasonally adjusted retail inventories for trucks and buses have been revised back to 1989, and are available upon request.

BEA Information

BEA's economic information is available in publications, on computer tapes, on diskettes, and through a variety of other products and services. Most of these are described in *A User's Guide to BEA Information*. For a copy, send a self-addressed stamped envelope (8 1/2 by 11 inches, with 75 cents postage) to Public Information Office, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Available From GPO

ORDER FROM: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Payment may be by check (made payable to Superintendent of Documents) or charged to a GPO deposit account number, VISA, or MasterCard. Phone (202) 783-3238 or fax (202) 275-0019.

SURVEY OF CURRENT BUSINESS. Contains estimates and analyses of U.S. economic activity. Features include a review of current economic developments; articles pertaining to BEA's work on the national, regional, and international economic accounts and related topics; quarterly national income and product accounts tables; a 28-page section of business cycle indicators containing tables for over 250 series and charts for about 130 series; and a 36-page section of current business statistics presenting over 1,900 major economic series obtained from public and private sources. Monthly. Annual subscription: \$23.00 second class mail, \$52.00 first class mail. Single copy: \$6.50.

Business Statistics, 1961-88. (1989) Provides monthly or quarterly data for 1985-88 and annual data for 1961-88 for series that appear in the SURVEY OF CURRENT BUSINESS. Also contains definitions of terms, sources of data, and methods of compilation. 328 pp. \$16.00 (GPO Stock No. 003-010-00198-4).

The National Income and Product Accounts of the United States, 1929-82: Statistical Tables. (1986) Contains detailed estimates of the national income and product accounts for 1929-82 from the comprehensive revision released in 1985. Also includes definitions of the major components of the accounts and of the major sectors of the economy. 442 pp. \$23.00 (GPO Stock No. 003-010-00174-7).

NIPA Methodology Papers:

No. 1 through No. 4: Available from NTIS (see box below).

No. 5: *Government Transactions.* (1988) Presents the conceptual basis and framework of government transactions in the national income and product accounts; describes the presentations of the estimates; and delineates the sources and methods used to prepare estimates of Federal transactions and of State and local transactions. 120 pp. \$5.50 (GPO Stock No. 003-010-00187-9).

No. 6: *Personal Consumption Expenditures.* (1990) Presents the conceptual basis and framework of personal consumption expenditures in the national income and product accounts. Describes the presentation of the estimates and the sources and methods used to prepare them. 92 pp. \$4.50 (GPO Stock No. 003-010-00200-0).

BEA Regional Projections to 2040. (1990) Three volumes. Presents regional projections for selected economic and population variables for 1995, 2000, 2005, 2010, 2020, and 2040. Includes projections for employment and earnings by industry and for personal income, as well as a statement of methodology.

NIPA Methodology Papers 1 through 4 (photocopies) are available from the National Technical Information Service (NTIS).

No. 1: *Introduction to National Economic Accounting.* (1985) 19 pp. \$11.00 (NTIS Accession No. PB 85-247567).

No. 2: *Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends.* (1985) 67 pp. \$17.00 (NTIS Accession No. PB 85-245397).

No. 3: *Foreign Transactions.* (1987) 52 pp. \$17.00 (NTIS Accession No. PB 88-100649).

No. 4: *GNP: An Overview of Source Data and Estimating Methods.* (1987) 36 pp. \$15.00 (NTIS Accession No. PB 88-134838).

ORDER FROM: U.S. Department of Commerce, National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Payment may be by check (made payable to NTIS) or charged to an NTIS deposit account number, American Express, VISA, or Mastercard. Phone (703) 487-4650 or fax (703) 321-8547.

Vol. 1: States. 144 pp. \$7.50 (GPO Stock No. 003-010-00199-2).

Vol. 2: Metropolitan Statistical Areas. 352 pp. \$17.00 (GPO Stock No. 003-010-00211-5).

Vol. 3: BEA Economic Areas. 200 pp. \$10.00 (GPO Stock No. 003-010-00212-3).

State Personal Income: 1929-87. (1989) Contains annual estimates for 1929-87 of total personal income, annual estimates for 1948-87 of disposable personal income, and quarterly estimates for 1969-88 of total personal income. Also contains a statement of methodology. 320 pp. \$16.00 (GPO Stock No. 003-010-00197-6).

New!

Local Area Personal Income, 1984-89. (1991) Contains estimates of personal income by major type of payment and earnings by major industry, population, and total and per capita personal income for regions, States, counties, and metropolitan areas.

Vol. 1. Summary: Regions, States, and Metropolitan Areas. Estimates for the United States, regions, States, and metropolitan areas. Also contains county definitions of metropolitan areas, a detailed description of sources and methods, and samples of tables available. 304 pp. \$15.00 (GPO Stock No. 003-010-00216-6).

Vol. 2. New England, Mideast, and Great Lakes Regions. (CT, DE, DC, IL, IN, ME, MD, MA, MI, NH, NJ, NY, OH, PA, RI, VT, WI) 324 pp. \$16.00 (GPO Stock No. 003-010-00217-4).

Vol. 3. Plains Region. (IA, KS, MN, MO, NE, ND, SD) 240 pp. \$12.00 (GPO Stock No. 003-010-00218-2).

The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures. (1990) Describes in detail the methodology used in constructing the balance of payments estimates for the United States. Explains underlying principles, and describes the presentation of the estimates. Includes a comprehensive list of data sources. 160 pp. \$8.50 (GPO Stock No. 003-010-00204-2).

Foreign Direct Investment in the United States: Operations of U.S. Affiliates of Foreign Companies, Preliminary 1988 Estimates. (1990) Contains information on the financial structure and operations of nonbank U.S. affiliates of foreign direct investors. Data are classified by industry of U.S. affiliate, by country and industry of ultimate beneficial owner, and, for selected data, by State. 92 pp. \$4.75 (GPO Stock No. 003-010-00203-4).

Foreign Direct Investment in the United States: 1987 Benchmark Survey, Final Results. (1990) Contains information for 1987 on the financial structure and operations of U.S. affiliates of foreign direct investors, on the foreign direct investment position in the United States, and on balance of payments transactions between U.S. affiliates and their foreign parents. Data are classified by industry of affiliate, by country and industry of ultimate beneficial owner or foreign parent, and, for selected data, by State. Also contains a complete methodology and copies of survey forms and instructions. 284 pp. \$14.00 (GPO Stock No. 003-010-00210-7).

Foreign Direct Investment in the United States: Balance of Payments and Direct Investment Position Estimates, 1980-86. (1990) Contains final estimates of the foreign direct investment position in the United States and of balance of payments transactions between U.S. affiliates and their foreign parent groups for calendar years 1980-86. Includes estimates by country of foreign parent and industry of U.S. affiliate. Most of the estimates in this publication appeared earlier in various issues of the SURVEY OF CURRENT BUSINESS. 56 pp. \$3.00 (GPO Stock No. 003-010-00215-8).

New!

U.S. Direct Investment Abroad: Operations of U.S. Parent Companies and Their Foreign Affiliates, Revised 1988 Estimates. (1991) Presents results of BEA's annual survey of the worldwide operations of U.S. multinational companies. Contains information on the financial structure and operations of both U.S. parent companies and their foreign affiliates. Data are classified by country and industry of foreign affiliate and by industry of U.S. parent. 80 pp. \$4.25. Available in late August. (GPO Stock No. 003-010-00221-2).
