### **OCCUPATIONAL EMPLOYMENT AND WAGES IN HATTIESBURG, MAY 2011**

Workers in the Hattiesburg Metropolitan Statistical Area had an average (mean) hourly wage of \$16.23 in May 2011, about 25 percent below the nationwide average of \$21.74, according to the U.S. Bureau of Labor Statistics. Regional Commissioner Janet S. Rankin noted that, after testing for statistical significance, wages in the local area were significantly lower than their respective national averages in 19 of the 22 major occupational groups, including management, protective service, and construction and extraction.

When compared to the nationwide distribution, local employment was more highly concentrated in 6 of the 22 occupational groups, including healthcare practitioners and technical, food preparation and serving related, and sales and related. Conversely, 10 groups had employment shares significantly below their national representation, including business and financial operations, production, and building and grounds cleaning and maintenance. (See table A and box note at end of release.)

One occupational group—sales and related—was chosen to illustrate the diversity of data available for any of the 22 major occupational categories. Hattiesburg had 7,340 jobs in sales and related, accounting for 13.2 percent of local area employment, significantly higher than the 10.6-percent share nationally. The average hourly wage for this occupational group locally was \$12.49, measurably below the national wage of \$18.04.

With employment of 2,750, retail salespersons was the largest occupation within the sales and related group, followed by cashiers (2,470) and first-line supervisors of retail sales workers (980). Among the higher paying jobs were sales representatives, wholesale and manufacturing, except technical and scientific products and first-line supervisors of retail sales workers, with mean hourly wages of \$23.80 and \$20.13, respectively. At the lower end of the wage scale were cashiers (\$8.83) and retail salespersons (\$10.16). (Detailed occupational data for sales and related are presented in table 1; for a complete listing of detailed occupations available go to [www.bls.gov/oes/current/oes\\_25620.htm](http://www.bls.gov/oes/current/oes_25620.htm).)

**Table A. Occupational employment and wages by major occupational group, United States and the Hattiesburg Metropolitan Statistical Area, and measures of statistical significance, May 2011**

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Hattiesburg	United States	Hattiesburg	Percent difference (1)
<b>Total, all occupations</b>	100.0%	100.0%	\$21.74	\$16.23 *	-25
Management	4.8	4.1 *	51.64	35.64 *	-31

Transportation and material moving	6.7	6.9	15.96	12.61 *	-21

\* The percent share of employment or mean hourly wage for this area is significantly different from the national average of all areas at the 90-percent confidence level.

(1) A positive percent difference measures how much the mean wage in Hattiesburg is above the national mean wage, while a negative difference reflects a lower wage.

Location quotients allow us to explore the occupational make-up of a metropolitan area by comparing the composition of jobs in an area relative to the national average. (See table 1.) For example, a location quotient of 2.0 indicates that an occupation accounts for twice the share of employment in the area than it does nationally. In the Hattiesburg Metropolitan Statistical Area, above average concentrations of employment were found in some of the occupations within the sales and related group. For instance, first-line supervisors of retail sales workers were employed at 1.9 times the national rate in Hattiesburg, and cashiers, at 1.7 times the U.S. average. On the other hand, sales representatives, wholesale and manufacturing, except technical and scientific products had a location quotient of 0.8 in Hattiesburg, indicating that this particular occupation's local and national employment shares were similar.

These statistics are from the Occupational Employment Statistics (OES) survey, a federal-state cooperative program between BLS and State Workforce Agencies, in this case, the Mississippi Department of Employment Security. The OES survey provides estimates of employment and hourly and annual wages for wage and salary workers in 22 major occupational groups and nearly 800 detailed occupations for the nation, states, metropolitan statistical areas, metropolitan divisions, and nonmetropolitan areas.

OES wage and employment data for the 22 major occupational groups in the Hattiesburg Metropolitan Statistical Area were compared to their respective national averages based on statistical significance testing. Only those occupations with wages or employment shares above or below the national wage or share after testing for significance at the 90-percent confidence level meet the criteria.

NOTE: A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with the ability to make confident statements about a universe based on a sample. It is entirely possible that a large difference between two values is not significantly different statistically, while a small difference is, since both the size and heterogeneity of the sample affect the relative error of the data being tested.

### **Technical Note**

The Occupational Employment Statistics (OES) survey is a semiannual mail survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. Guam, Puerto Rico, and the Virgin Islands also are surveyed, but their data are not included in the national estimates. OES estimates are constructed from a sample of about 1.2 million establishments. Forms are mailed to approximately 200,000 establishments in May and November of each year for a 3-year period. The nationwide response rate for the May 2011 survey was 77.3 percent based on establishments and 73.3 percent based on employment. May 2011 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2011, November 2010, May 2010, November 2009, May 2009, and November 2008. The sample in the Hattiesburg Metropolitan Statistical Area included 918 establishments with a response rate of 92 percent. For more information about OES concepts and methodology, go to [www.bls.gov/news.release/ocwage.tn.htm](http://www.bls.gov/news.release/ocwage.tn.htm).

The May 2011 OES estimates mark the first set of estimates based in part on data collected using the 2010 Standard Occupational Classification (SOC) system. Nearly all the occupations in this release are 2010 SOC occupations; however, some are not. The May 2012 OES data will reflect the full set of detailed occupations in the 2010 SOC. For a list of all occupations, including 2010 SOC occupations, and how data collected on two structures were combined, see the OES Frequently Asked Questions online at [www.bls.gov/oes/oes\\_ques.htm#Ques41](http://www.bls.gov/oes/oes_ques.htm#Ques41).

### **Area definitions**

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget.

The **Hattiesburg, Miss. Metropolitan Statistical Area** includes Forrest, Lamar, and Perry Counties.

### **Additional information**

OES data are available on our regional web page at [www.bls.gov/ro4/home.htm](http://www.bls.gov/ro4/home.htm). If you have additional questions, contact the Southeast Economic Analysis and Information Unit at (404) 893-4222. Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; TDD message referral phone number: 1 (800) 877-8339.

**Table 1. Employment and wage data from the Occupational Employment Statistics survey, by occupation, Hattiesburg Metropolitan Statistical Area, May 2011**

Occupation <sup>(1)</sup>	Employment		Mean Wages	
	Level <sup>(2)</sup>	Location quotient <sup>(3)</sup>	Hourly	Annual <sup>(4)</sup>
Sales and related occupations	7,340	1.2	\$12.49	\$25,970
First-line supervisors of retail sales workers	980	1.9	20.13	41,870
First-line supervisors of non-retail sales workers	(5)	(5)	23.32	48,500
Cashiers	2,470	1.7	8.83	18,370
Counter and rental clerks	100	0.6	11.17	23,240
Parts salespersons	110	1.2	12.56	26,120
Retail salespersons	2,750	1.5	10.16	21,140
Advertising sales agents	(5)	(5)	13.05	27,130
Insurance sales agents	100	0.8	18.29	38,040
Sales representatives, wholesale and manufacturing, except technical and scientific products	500	0.8	23.80	49,510
Real estate sales agents	40	0.6	12.09	25,150
Telemarketers	(5)	(5)	11.43	23,780

(1) For a complete listing of all detailed occupations in Hattiesburg, see [www.bls.gov/oes/current/oes\\_25620.htm](http://www.bls.gov/oes/current/oes_25620.htm).

(2) Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.

(3) The location quotient is the ratio of the area concentration of occupational employment to the national average concentration. A location quotient greater than one indicates the occupation has a higher share of employment than average, and a location quotient less than one indicates the occupation is less prevalent in the area than average.

(4) Annual wages have been calculated by multiplying the hourly mean wage by a 'year-round, full-time' hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

(5) Estimate not released.
