UNEMPLOYMENT IN THE PORTLAND AREA BY COUNTY – APRIL 2012

All Counties Posted Lower Unemployment Rates than the Previous Year

In April, Washington County reported the lowest unemployment rate, 6.9 percent, in the Portland-Vancouver-Hillsboro, Ore.-Wash. Metropolitan Statistical Area (MSA), one of two counties to register a rate below the national average of 7.7 percent, the U.S. Bureau of Labor Statistics reported today. Richard J. Holden, the Bureau's regional commissioner, noted that the remaining five counties in the metropolitan area had jobless rates ranging from 7.7 percent in Clackamas County, to 10.4 percent in Skamania County. (See chart 1. The Technical Note at the end of this release contains the metropolitan area definition. All data in this release are not seasonally adjusted; accordingly, over-the-year analysis is used throughout.)

Chart 1. Unemployment rates for the United States and counties in the Portland-Vancouver-Hillsboro, Ore.-Wash. Metropolitan Statistical Area, April 2012, not seasonally adjusted

In April, all seven counties registered over-the-year unemployment rate declines, with the rate of decline ranging from 0.7 percentage points in Columbia, Multnomah, and Washington Counties, to 4.1 points in Clark County. Nationally, the unemployment rate fell 1.0 percentage point from April a year ago. (See table A).

Table A. Unemployment rates for the United States, the Portland-Vancouver-Hillsboro, Ore.-Wash. Metropolitan Statistical Area, and its components, not seasonally adjusted

Area	Unemployment rate			Net change from	
	April 2010	April 2011	April 2012	April 2010 to April 2012 ¹	April 2011 to April 2012 ¹
United States	9.5	8.7	7.7	-1.8	-1.0
Portland-Vancouver-Hillsboro, Ore.-Wash. MSA	10.7	9.1	7.8	-2.9	-1.3
Clackamas County, Ore.	10.2	8.6	7.7	-2.5	-0.9
Columbia County, Ore.	12.6	10.1	9.4	-3.2	-0.7
Multnomah County, Ore.	9.8	8.2	7.5	-2.3	-0.7
Washington County, Ore.	9.0	7.6	6.9	-2.1	-0.7
Yamhill County, Ore.	10.9	9.3	8.5	-2.4	-0.8
Clark County, Wash.	14.7	13.1	9.0	-5.7	-4.1
Skamania County, Wash.	14.1	13.4	10.4	-3.7	-3.0

¹Data for the Portland-Vancouver-Hillsboro, Ore.-Wash. Metropolitan Statistical Area and its components are preliminary for the most recent month.

Unemployment rates in all seven Portland area counties were lower in April 2012 than in April 2010. The largest decreases occurred in Clark County, down 5.7 percentage points, followed by Skamania County, 3.7 points. The other five counties also had rate decreases that were larger than the nationwide decrease of 1.8 percentage points. Washington County has had the lowest unemployment rate in April area each of the last three years, while Skamania County has had the highest rate for the last two years.

Technical Note

This release presents unemployment rate data for states and counties from the Local Area Unemployment Statistics (LAUS) program, a federal-state cooperative endeavor.

Definitions. The labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. Employed persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. Unemployed persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed. The labor force is the sum of employed and unemployed persons. The unemployment rate is the number of unemployed as a percent of the labor force.

Method of estimation. Estimates for the substate areas in this release are prepared through indirect estimation procedures using a building-block approach. Employment estimates, which are based largely on "place of work" estimates from the Current Employment Statistics (CES) program, are adjusted to refer to place of residence as used in the CPS. Unemployment estimates are aggregates of persons previously employed in industries covered by state unemployment insurance (UI) laws and entrants to the labor force data from the CPS. The substate estimates of employment and unemployment, which geographically exhaust the entire state, are adjusted proportionally to ensure that they add to the independently estimated state or balance-of-state totals. A detailed description of the estimation procedures is available from BLS upon request.

Annual revisions. Labor force and unemployment data for prior years reflect adjustments made at the end of each year, usually implemented with January estimates. The adjusted estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation.

Area definitions. The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget, dated December 1, 2009. A detailed list of the geographic definitions is available at <http://www.bls.gov/lau/lausmsa.htm>.

The **Portland-Vancouver-Hillsboro, Ore.-Wash., Metropolitan Statistical Area (MSA)** includes Clackamas, Columbia, Multnomah, Washington, and Yamhill Counties in Oregon; and Clark and Skamania Counties in Washington.
