Footnotes

¹Level of complexity of assessment methods used for the particular stock. Generally reflects the availability of data and the value or importance of the fishery. Levels are described in the Stock Assessment Improvement Plan (<http://www.st.nmfs.noaa.gov/StockAssessment/index.html>). A negative level indicates that an assessment was attempted at that level of complexity, but the effort was not accepted in its technical review.

²This stock was assessed in 2012, but the new benchmark assessment model was not accepted for management use due to unacceptably high levels of uncertainty in the results. The previous assessment results continue to be accepted for management use.

³Grouper Unit 1 is a single species complex; the stock assessment was conducted for Nassau grouper - Caribbean.

⁴Grouper Unit 2 is a single species complex; the stock assessment was conducted for Goliath grouper - Caribbean.

⁵The stock assessment listed is for the Grouper Unit 4 indicator stock, Yellowfin grouper - Caribbean.

⁶The stock assessment listed is for the Snapper Unit 1 indicator stock, Silk snapper - Caribbean.

⁷No indicator species has been identified for Snapper Unit 3. The stock assessment listed is for Mutton snapper - Caribbean, which has more data available than the other species in the complex.

⁸Snapper Unit 4 is a single species complex; the stock assessment was conducted for Yellowtail snapper - Caribbean.

⁹The Pacific stock of bigeye tuna is assessed as two substocks - Eastern Tropical Pacific and Central Western Pacific. Both substocks were assessed in 2011.

¹⁰The North Pacific stock of swordfish is assessed as two substocks - Eastern Tropical Pacific and Central Western Pacific. Both substocks were assessed in 2011.

¹¹Beginning in 2011, arrowtooth flounder is no longer managed as part of a complex in the Bering Sea / Aleutian Islands.

¹²The stock assessment listed is for the Flathead Sole Complex indicator stock, Flathead sole - Bering Sea / Aleutian Islands.

¹³The stock assessment listed is for the Rock Sole Complex indicator stock, Northern rock sole - Bering Sea / Aleutian Islands.

¹⁴Beginning in 2011, dusky rockfish is no longer managed as part of a complex in the Gulf of Alaska.

¹⁵The assessment for the Deep Water Flatfish Complex assessment was reviewed in 2011 and now has no indicator stock.

¹⁶The stock assessment listed is for the Demersal Shelf Rockfish Complex indicator stock, Yelloweye rockfish - Gulf of Alaska.

¹⁷The stock assessment listed is for the Thornyhead Rockfish Complex indicator stock, Shortspine thornyhead - Gulf of Alaska.
