

Charleston District - Corps of Engineers Regulatory Division

Courtesy List of South Carolina Environmental Consultants

Updated February 2013

The following list of environmental consulting firms is presented as a courtesy to help the general public find professional assistance in matters related to the Clean Water Act and Rivers and Harbors Act, which may include wetland delineations, endangered species surveys and the preparation of permit applications to the Corps for projects occurring within the State of South Carolina.

This list is organized first by State in which the firm is located, then by City/Town of the consultants' office and/or mailing address, followed by name of the consulting firm in alphabetical order. The location of the office does not necessarily indicate the geographical area in South Carolina where the consultant works. The consultant should be contacted directly to determine the geographical area the consultant works, what type of work the consultant specializes in and the costs associated with the consultant's services, etc.

Note: These companies have indicated to us that they remain available for this type of work and have requested that they be placed on this list. This office is willing to work with any and all qualified environmental consultants. It is the responsibility of the consulting firms to update this office with changes to their contact information.

Please be aware that inclusion on this list should not be considered an endorsement by the Charleston District - Corps of Engineers of any listed consultant or firm.
