Text box for unit message, phone number, motto etc

The crest at the side can be customized with simple "cut and paste"? (7)

**UNIT RISK REDUCTION  
LEADER  
TIPS Card**

As a leader, one of your responsibilities is to reduce the likelihood of Soldier at-risk behaviors during post-deployment and reconstitution. Please review the following tips for expediting that process:

1. In-Theater Briefing. Your soldiers may not have driven on congested U.S. highways or been involved in social drinking situations for several weeks or months. Therefore, ensure that your briefing to them includes seat belt safety; safe driving factors such as speed limits, rest stops, and focus of attention; alcohol consumption and driving, swimming, boating, and operating other recreational vehicles; alcohol use and domestic violence; Army substance abuse policy (zero tolerance for illicit use); and motorcycle safety.
2. Review the last Risk Reduction quarterly statistics received prior to deployment for indications of at-risk behaviors and the interventions needed to reduce the likelihood of re-occurrence. Plan to incorporate those interventions during reconstitution.
3. Each leader/commander should use the Soldier Risk Assessment Checklist to assess his/her subordinates. Assessment should begin during redeployment and continue through reconstitution.
4. Schedule a Unit Risk Inventory within the 90 days of arriving at your home station.
