IMMEDIATE RELEASE

May 11, 2012

Announcing Our New Look!

ALEXANDRIA, VIRGINIA. The IWR website has a new look! Take a few minutes to explore our website to learn more about our technical centers, programs, and news about what we've been doing. You can also learn more about our partnerships, visiting scholar programs, and history.

Our comprehensive online library includes not only the entire IWR library but also bibliographic data about the donated personal collection of the late Professors Arthur Maass and Gilbert White (housed in our renowned Maass-White Reference Room). The website includes access to Hydrologic Engineering Center (HEC) software and user guides, Navigation Data Center (NDC) publications, U.S. Waterway Data, international water resources and the UNESCO International Hydrological Programme (IHP) in connection with IWR's new International Center for Integrated Water Resources Management (ICIWaRM) (under the auspices of UNESCO), the National Drought Atlas, Corps Planning Manuals, and hundreds of other studies and reports.

Our site also includes links to many of our ongoing activities such as Value to the Nation, Responses to Climate Change Program, U.S. Section of PIANC (the World Association for Waterborne Transport Infrastructure), National Flood Risk Management Program, Corps Risk Analysis Gateway, Shared Vision Planning, and the National Shoreline Management Study.

Over the next few months, you will see additional information posted about our mission areas, so create a few bookmarks and visit us again soon!
