SUBJECT: SUMMARY OF SEPTEMBER 7-8, 2010, NRC'S PUBLIC
WORKSHOP ON DEVELOPMENT OF A REGULATORY
FRAMEWORK FOR SPENT NUCLEAR FUEL REPROCESSING
FACILITIES

On September 7-8, 2010, the U.S. Nuclear Regulatory Commission (NRC) hosted a public workshop to discuss issues associated with the development of a regulatory framework for spent nuclear fuel reprocessing facilities. The purpose of the workshop was to solicit the views and perspectives of stakeholders regarding the technical and regulatory issues that NRC staff is addressing in the development of a reprocessing regulatory framework.

CONTACT: Jose R. Cuadrado, NMSS/FCSS
(301) 492-3287

To elicit a diverse set of views from stakeholders, the NRC invited a panel of stakeholders—which included NRC staff, citizen and environmental groups, nuclear industry representatives, and other Federal agencies. The workshop discussions followed a roundtable discussion format, moderated by a professional facilitator, to promote dialogue and discussion among panelists. All discussions began with a brief NRC staff presentation of the issues, followed by a roundtable discussion among panelists, and concluded by an opportunity for questions and comments from members of the public. A transcript for both days of the workshop can be found in the Agencywide Documents Access and Management System , through Accession Numbers ML102700293 (September 7, 2010) and ML102700294 (September 8, 2010).

The workshop was a Category 3 public meeting, and approximately 50 people attended. The workshop agenda and a list of workshop attendees and panelists are enclosed. Handouts of NRC staff's presentations are also enclosed. In addition, NRC staff distributed brief, two-page fact sheets, providing an overview and short summary of the issues discussed during the workshop sessions. Copies of these fact sheets are also enclosed.

Enclosures: List of meeting attendees and panelists
Handouts of NRC presentations (7)
NRC Fact Sheets on Reprocessing Issues (5)
