Preface

The 1988 Census of Local Jails, the fifth enumeration of local confinement facilities since 1970, was authorized by the Omnibus Crime Control and Safe Streets Act of 1968, as amended (42 U.S.C. 3732), to assess the needs of the Nation's jails.

BJA hopes that practitioners, policy-makers, and researchers will benefit from this information. Practitioners will be able to compare the occupancy level, use of confinement space, and staff characteristics in their jurisdiction with those of neighboring jurisdictions. Policymakers can use the information on planned changes in existing confinement space as a ready source of data when reporting their current and future needs to funding authorities. Researchers can analyze differences in local jails based on facility size, age, detention authority, geographic area, and other characteristics.

This publication presents detailed findings of individual jails in the Northeast pertaining to capacity; court orders and consent decrees; detention status of inmates; average daily population; facility size; race/ethnicity of inmates; inmates held for other authorities; annual inmate movements; inmate deaths; jail detention authority; confinement unit space; facility age and planned changes; staff characteristics; expenditures; work release, weekend sentence, and alternative programs; and medical facilities.

Detailed findings of the 1988 Census of Local Jails are presented in five volumes, available separately or together:

Census of Local Jails, 1988: Volume I. Selected Findings, Methodology, and Summary Tables (NCJ-127992)

Census of Local Jails, 1988: Volume II. Data for Individual Jails in the Northeast (NCJ-130759)

Census of Local Jails, 1988: Volume IV. Data for Individual Jails in the South (NCJ-130761)

Census of Local Jails, 1988: Volume V. Data for Individual Jails in the West (NCJ-130762)

Each of the preceding volumes is available in machine-readable format from the National Archive of Criminal Justice Data at the University of Michigan. The complete data set is archived as the National Jail Census, 1988 (ICPSR 9256). Contact the archive at P.O. Box 1248, Ann Arbor, MI 48106; 1-800-999-0960.

Methodology

The 1988 Census of Local Jails was the fifth enumeration of local confinement facilities since 1970. Prior censuses were conducted in 1970, 1972, 1978, and 1983. The U.S. Bureau of the Census has conducted all the mail canvasses for BJS.

The 1988 census included all locally administered jails that held inmates beyond arraignment (usually more than 48 hours) and that were staffed by municipal or county employees. Eight jails that were privately operated under contract for local governments were also included.

Excluded from the census were physically separate drunk tanks, lockups, and other holding facilities that did not hold persons after they had been formally charged, as well as all Federal and State facilities, including the combined jail-prison systems in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont. Five locally operated jails in Alaska were included.

The facility universe was derived from the National Justice Agency List, maintained by the Bureau of the Census for BJS. The 1988 census form was mailed to 3,448 facilities during the week of August 1, 1988. Forty-four jails were added to the initial mailing, and 176 were deleted, leaving a final count of 3,316 facilities. Extensive followup by the Bureau of the Census staff and State statistical analysis center directors resulted in a 100% response.

A number of items were incompletely reported. Where the number of inmates convicted and awaiting sentence was not available, estimates were accepted. In some cases data for inmates convicted and awaiting sentence may have been reported as awaiting arraignment/trial or being tried. The race of Hispanic inmates and Hispanic staff was incompletely reported. Respondents estimated approximately 20% of the data on time spent in jail prior to discharge.

The census results are not subject to sampling error. Other types of errors, such as respondent misinterpretation and mistakes in processing and data presentation, were kept to a minimum through repeated manual and computer edit checks.
