

<u>Table</u>	<u>Page</u>
2-1 Sample sizes and population estimates for youth subpopulations	DT-1
2-2 Sample sizes and population estimates for parent subpopulations	DT-3
2-3 Sample sizes and population estimates for dyads	DT-4
3-1 Percent of youth recalling having seen youth-targeted Campaign TV ads at least once per week, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-6
3-2 Summary of recall among youth for all eligible Campaign TV ads.....	DT-7
3-3 Summary of recall of TV ads among youth for the "Negative Consequences" strategic platform ads.....	DT-8
3-4 Summary of recall of TV ads among youth for the "Normative Positive Consequences" strategic platform ads	DT-9
3-5 Summary of recall of TV ads among youth for the "Resistance Skills" strategic platform ads	DT-10
3-6 Percent of parents recalling having seen parent-targeted Campaign TV ads at least once per week, by parent characteristics	DT-11
3-7 Summary of recall among parents for all eligible Campaign TV ads.....	DT-12
3-8 Summary of recall of TV ads among parents for the "Parenting Skills/Personal Efficacy/Monitoring" strategic platform ads	DT-13
3-9 Summary of recall of TV ads among parents for the "Your Child at Risk" strategic platform ads.....	DT-14
3-10 Summary of recall of TV ads among parents for the "Perceptions of Harm" strategic platform ads.....	DT-15
3-11 Summary of recall of TV ads among parents on the topic of inhalants	DT-16
3-12 Overall evaluation of TV ads by youth by age, gender, race/ethnicity, risk score, sensation seeking, and marijuana use	DT-17
3-13 Overall evaluation of TV ads by youth by age, gender, race/ethnicity, risk score, sensation seeking, and marijuana use	DT-18
3-14 Overall evaluation of TV ads by parents by gender, race/ethnicity, and education	DT-19

<u>Table</u>	<u>Page</u>
3-15 Overall evaluation of TV ads by parents by gender, race/ethnicity, and education	DT-20
3-16 Percent of youth recalling having heard all radio ads at least once per week, averaged over aired ads, by age, gender, race/ethnicity, risk score, sensation seeking, and marijuana use	DT-21
3-17 Summary of recall among youth for all eligible Campaign radio ads.....	DT-22
3-18 Summary of recall of radio ads among youth for the "Negative Consequences" strategic platform ads.....	DT-23
3-19 Summary of recall of radio ads among youth for the "Normative Positive Consequences" strategic platform ads	DT-24
3-20 Summary of recall of radio ads among youth for the "Resistance Skills" strategic platform ads	DT-25
3-21 Percent of parents recalling having heard parent-targeted Campaign radio ads at least once per week, averaged over aired ads, by gender, race/ethnicity, and education	DT-26
3-22 Summary of recall of radio ads among parents overall for all strategic platforms	DT-27
3-23 Summary of recall of radio ads among parents for the "Parenting Skills/Personal Efficacy/Monitoring" strategic platform ads	DT-28
3-24 Summary of recall of radio ads among parents for the "Your Child at Risk" strategic platform ads	DT-29
3-25 Summary of recall of radio ads among parents for the "Perceptions of Harm" strategic platform ads.....	DT-30
3-26 Summary of recall of radio ads among parents on the topic of inhalants	DT-31
3-27 Recall of general anti-drug advertising among youth.....	DT-32
3-28 Recall of general TV and radio advertising, by youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-33
3-29 Recall of newspaper and magazine advertising, by youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-34
3-30 Recall of movie theater and video rental advertising, by youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-35

<u>Table</u>	<u>Page</u>
3-31 Recall of billboard and other public posting advertising, by youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-36
3-32 Summary of recall of general anti-drug advertising among parents.....	DT-37
3-33 Recall of general TV and radio advertising, by parents' gender, race/ethnicity, and education.....	DT-38
3-34 Recall of newspaper and magazine advertising, by parents' gender, race/ethnicity, and education	DT-39
3-35 Recall of movie theater and video rental advertising, by parents' gender, race/ethnicity, and education	DT-40
3-36 Recall of billboard and other public posting advertising, by parents' gender, race/ethnicity, and education	DT-41
3-37 Percent of youth using the Internet, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-42
3-38 Percent of youth visiting anti-drug Internet sites, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-43
3-39 Percent of youth visiting pro-drug Internet sites, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-44
3-40 Percent of parents using the Internet, by gender, race/ethnicity, and education.....	DT-45
3-41 Percent of parents visiting anti-drug Internet sites, by gender, race/ethnicity, and education.....	DT-46
3-42 Percent of parents visiting parenting skill Internet sites, by gender, race/ethnicity, and education.....	DT-47
3-43 In-school drug education experience of youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-48
3-44 Out-of-school drug education experience of youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-49
3-45 Recent in-school drug education experience of youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-50
3-46 Recent out-of-school drug education experience of youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-51

<u>Table</u>	<u>Page</u>
3-47 Youth conversations with friends about drugs, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-52
3-48 Young people's conversations with friends about drugs, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-53
3-49 Types of conversations among youth with friends about drugs, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-54
3-50 Types of conversations among youth with friends about drugs, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-55
3-51 Types of conversations among youth with friends about drugs, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-56
3-52 Young people's conversations with parents about drugs, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-57
3-53 Young people's conversations with parents about drugs, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-58
3-54 Young people's conversations with parents or friends about drugs, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-59
3-55 Young people's conversations about anti-drug ads, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-60
3-56 Young people's conversations about anti-drug ads, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-61
3-57 Recall of stories on TV news or radio news about drugs among youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-62
3-58 Recall of stories in TV movies, sitcoms, or dramas about drugs among youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-63
3-59 Recall of stories on TV talk shows about drugs among youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-64
3-60 Recall of stories in movies (theater/rental) about drugs among youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-65
3-61 Recall of stories in magazines about drugs among youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-66

<u>Table</u>	<u>Page</u>
3-62 Weekly recall of drug themes in at least one media outlet among youth by age, gender, race/ethnicity, risk score, and sensation seeking	DT-67
3-63 Parents' recall of TV or radio news programs with drug themes in recent months, by gender, race/ethnicity, and education	DT-68
3-64 Parents' recall of TV movies, sitcoms, or dramas with drug themes in recent months, by gender, race/ethnicity, and education	DT-69
3-65 Parents' recall of TV talk shows or TV news magazine programs with drug themes in recent months, by gender, race/ethnicity, and education	DT-70
3-66 Parents' recall of non-news radio programs with drug themes in recent months, by gender, race/ethnicity, and education	DT-71
3-67 Parents' recall of movies seen in theaters or rental videos with drug themes in recent months, by gender, race/ethnicity, and education	DT-72
3-68 Parents' recall of magazine articles with drug themes in recent months, by gender, race/ethnicity, and education	DT-73
3-69 Parents' recall of newspaper articles with drug themes in recent months, by gender, race/ethnicity, and education	DT-74
3-70 Weekly recall of drug themes in at least one media outlet among parents', by gender, race/ethnicity, and education	DT-75
3-71 Parents' awareness of drug activities/controversies in their community in the past 12 months, by gender, race/ethnicity, and education	DT-76
3-72 Parents' awareness of drug activities/controversies in their community in the past 12 months, by gender, race/ethnicity, and education	DT-77
3-73 Parents' awareness of drug activities/controversies in their community in the past 12 months, by gender, race/ethnicity, and education	DT-78
3-74 Parents' awareness of drug activities/controversies in their community in the past 12 months, by gender, race/ethnicity, and education	DT-79
3-75 Parents' awareness of drug activities/controversies in their community in the past 12 months, by gender, race/ethnicity, and education	DT-80
3-76 Parental attendance at drug abuse prevention programs, by age, gender, and race/ethnicity of child(ren)	DT-81

<u>Table</u>	<u>Page</u>
3-77 Parental attendance at parent effectiveness programs, by age, gender, and race/ethnicity of child(ren)	DT-82
4-1 Youth reporting ever having used marijuana, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-83
4-2 Youth reporting using marijuana in the past year, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-85
4-3 Youth reporting using marijuana in the past month, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-87
4-4 Youth reporting regular marijuana use, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-89
4-5 This table has been intentionally deleted.....	DT-90
4-6 Youth never receiving offers of marijuana, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-91
4-7 Youth receiving offers of marijuana one or more times in the past 30 days, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-93
4-8 Youth reporting ever having used inhalants, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-95
4-9 Youth reporting using inhalant in the past year, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-97
4-10 Youth reporting using inhalants in the past month, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-99
4-11 Youth reporting regular inhalant use, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-101
5-1 Nonusers' intentions to use marijuana even once or twice in the next 12 months, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-102
5-2 Nonusers' personal beliefs about outcomes and attitudes toward marijuana use, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-103
5-3 Nonusers' perceptions of social norms regarding marijuana use, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-104
5-4 Nonusers' self-efficacy to refuse marijuana, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-105

<u>Table</u>	<u>Page</u>
5-5 This has been intentionally deleted.....	DT-106
5-6 Beliefs about possible outcomes of using marijuana even once or twice among nonusing youth aged 12 to 18, by age.....	DT-107
5-7 Nonusers' perceptions of friends' use of marijuana even once or twice in the past 12 months, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-109
5-8 Nonusers' perceptions of others' use of marijuana even once or twice in the past 12 months, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-110
5-9 Nonusers' attitudes toward trial marijuana use, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-111
5-10 Nonusers' beliefs about outcomes of trial marijuana use, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-112
5-11 Nonusers' perceived parental expectations about trial marijuana use, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-113
5-12 Nonusers' perceived social expectations about trial marijuana use, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-114
5-13 Beliefs about possible outcomes of regular marijuana use by 12- to 13-year-old nonusers	DT-115
5-14 Beliefs about possible outcomes of regular marijuana use by 14- to 18-year-old nonusers and past-year users	DT-116
5-15 Nonusers' and past-year users' regular marijuana use intentions, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-117
5-16 Nonusers' and past-year users' perceptions of friends' regular use of marijuana in the past 12 months, by age, gender, race/ethnicity, risk, and sensation seeking.....	DT-118
5-17 Nonusers' and past-year users' perceptions of others' regular use of marijuana in the past 12 months, by age, gender, race/ethnicity, risk score, and sensation seeking.....	DT-119
5-18 Nonusers' and past-year users' attitudes regarding regular marijuana use, by age, gender, race/ethnicity, risk score, and sensation seeking	DT-120
5-19 Nonusers' and past-year users' beliefs about outcomes regarding regular marijuana use, by age, gender, race/ethnicity, risk score, and sensation seeking.....	DT-121

6-71 The relationship between parental exposure to general anti-drug advertising (at earlier round) and parents' monitoring behavior(at later round)by both youth and parent characteristics, and by longitudinal round(s).....	DT-251
6-72 The relationship between parental exposure to specific anti-drug advertising (at earlier round) and parents' monitoring behavior (at later round) by both youth and parent characteristics, and by longitudinal round(s)	DT-253
6-73 The relationship between parental exposure to general anti-drug advertising (at earlier round) and parents' talking behavior (at later round) by both youth and parent characteristics, and by longitudinal round(s).....	DT-255

<u>Table</u>	<u>Page</u>
6-74 The relationship between parental exposure to specific anti-drug advertising (at earlier round) and parents' talking behavior (at later round) by both youth and parent characteristics, and by longitudinal round(s).....	DT-257
6-75 The relationship between parental exposure to general anti-drug advertising (at earlier round) and parents' reports of fun activities (at later round) by both youth and parent characteristics, and by longitudinal round(s)	DT-259
6-76 The relationship between parental exposure to specific anti-drug advertising (at earlier round) and parents' reports of fun activities (at later round) by both youth and parent characteristics, and by longitudinal round(s)	DT-261
6-77 The relationship between parental exposure to general anti-drug advertising and youth use of marijuana in the past 12 months, by age, gender, race/ethnicity, risk score, sensation seeking, and by year of interview.....	DT-263
6-78 The relationship between parental exposure to specific anti-drug advertising and youth use of marijuana in past 12 months, by age, gender, race/ethnicity, risk score, sensation seeking, and by year of interview	DT-265
6-79 The relationship between parental exposure to general anti-drug advertising and nonusing youths' intentions to not use marijuana, by age, gender, race/ethnicity, risk score, sensation seeking, and by year of interview.....	DT-267
6-80 The relationship between parental exposure to specific anti-drug advertising and nonusing youths' intentions to not use marijuana, by age, gender, race/ethnicity, risk score, sensation seeking, and by year of interview.....	DT-269
6-81 The relationship between parental exposure to general anti-drug advertising and nonusing youths' personal anti-marijuana beliefs and attitudes, by age, gender, race/ethnicity, risk score, sensation seeking, and by year of interview.....	DT-271
6-82 The relationship between parental exposure to specific anti-drug advertising and nonusing youths' personal anti-marijuana beliefs and attitudes, by age, gender, race/ethnicity, risk score, sensation seeking, and by year of interview.....	DT-273
6-83 The relationship between parental exposure to general anti-drug advertising and perceived anti-marijuana social norms among nonusing youth, by age, gender, race/ethnicity, risk score, sensation seeking, and by year of interview.....	DT-275
6-84 The relationship between parental exposure to specific anti-drug advertising and perceived anti-marijuana social norms among nonusing youth, by age, gender, race/ethnicity, risk score, sensation seeking, and by year of interview.....	DT-277

<u>Table</u>	<u>Page</u>
6-85 The relationship between parental exposure to general anti-drug advertising and self-efficacy to refuse marijuana among nonusing youth, by age, gender, race/ethnicity, risk score, sensation seeking, and by year of interview.....	DT-279
6-86 The relationship between parental exposure to specific anti-drug advertising and self-efficacy to refuse marijuana among nonusing youth, by age, gender, race/ethnicity, risk score, sensation seeking, and by year of interview.....	DT-281
6-87 The relationship between parental exposure to general anti-drug advertising (at earlier round) and subsequent youth initiation of marijuana use (by later round) by both youth and parent characteristics, and by longitudinal round(s)	DT-283
6-88 The relationship between parental exposure to specific anti-drug advertising (at earlier round) and subsequent youth initiation of marijuana use (by later round) by both youth and parent characteristics, and by longitudinal round(s)	DT-285
6-89 The relationship between parental exposure to general anti-drug advertising (at earlier round) and nonusing youths' intentions to not use marijuana (at later round), by age, gender, race/ethnicity, risk score, sensation seeking, and by longitudinal round(s)	DT-287
6-90 The relationship between parental exposure to specific anti-drug advertising (at later round) and nonusing youths' intentions to not use marijuana (at later round), by age, gender, race/ethnicity, risk score, sensation seeking, and by longitudinal round(s)	DT-289
6-91 The relationship between parental exposure to general anti-drug advertising (at earlier round) and nonusing youths' personal anti-marijuana beliefs and attitudes (at later round), by age, gender, race/ethnicity, risk score, sensation seeking, and by longitudinal round(s)	DT-291
6-92 The relationship between parental exposure to specific anti-drug advertising (at earlier round) and nonusing youths' personal anti-marijuana beliefs and attitudes (at later round), by age, gender, race/ethnicity, risk score, sensation seeking, and by longitudinal round(s)	DT-293
6-93 The relationship between parental exposure to general anti-drug advertising (at earlier round) and perceived anti-marijuana social norms among nonusing youth (at later round), by age, gender, race/ethnicity, risk score, sensation seeking, and by longitudinal round(s)	DT-295
6-94 The relationship between parental exposure to specific anti-drug advertising (at earlier round) and perceived anti-marijuana social norms among nonusing youth (at later round), by age, gender, race/ethnicity, risk score, sensation seeking, and by longitudinal round(s)	DT-297

<u>Table</u>	<u>Page</u>
6-95 The relationship between parental exposure to general anti-drug advertising (at earlier round) and self-efficacy to refuse marijuana among nonusing youth (at later round), by age, gender, race/ethnicity, risk score, sensation seeking, and by longitudinal round(s)	DT-299
6-96 The relationship between parental exposure to specific anti-drug advertising (at earlier round) and self-efficacy to refuse marijuana among nonusing youth (at later round), by age, gender, race/ethnicity, risk score, sensation seeking, and by longitudinal round(s)	DT-301
6-97 The relationship between parental exposure to general anti-drug advertising and nonusing youths reports of parent monitoring behavior, by age, gender, race/ethnicity, risk score, sensation seeking, and year of interview	DT-303
6-98 The relationship between parental exposure to specific anti-drug advertising and nonusing youths' reports of parent monitoring behavior, by age, gender, race/ethnicity, risk score, sensation seeking, and year of interview	DT-305
6-99 The relationship between parental exposure to general anti-drug advertising and nonusing youths' reports of parent talking behavior, by age, gender, race/ethnicity, risk score, sensation seeking, and year of interview	DT-307
6-100 The relationship between parental exposure to specific anti-drug advertising and nonusing youths' reports of parent talking behavior, by age, gender, race/ethnicity, risk score, sensation seeking, and year of interview	DT-309
6-101 The relationship between parental exposure to general anti-drug advertising and nonusing youths' reports of fun activities, by age, gender, race/ethnicity, risk score, sensation seeking, and year of interview	DT-311
6-102 The relationship between parental exposure to specific anti-drug advertising and nonusing youths' reports of fun activities, by age, gender, race/ethnicity, risk score, sensation seeking, and year of interview	DT-313
6-103 The relationship between parental exposure to general anti-drug advertising (at earlier round) and nonusing youths' reports of parent monitoring behavior (at later round) by age, gender, race/ethnicity, risk score, sensation seeking, and by longitudinal round.....	DT-315
6-104 The relationship between parental exposure to specific anti-drug advertising (at earlier round) and nonusing youths' reports of parent monitoring behavior (at later round) by age, gender, race/ethnicity, risk score, sensation seeking, and by longitudinal round.....	DT-317

<u>Table</u>	<u>Page</u>
6-105 The relationship between parental exposure to general anti-drug advertising (at earlier round) and nonusing youths' reports of parent talking behavior (at later round) by age, gender, race/ethnicity, risk score, sensation seeking and by longitudinal round.....	DT-319
6-106 The relationship between parental exposure to specific anti-drug advertising (at earlier round) and nonusing youths' reports of parent talking behavior (at later round) by age, gender, race/ethnicity, risk score, sensation seeking, and by longitudinal round.....	DT-321
6-107 The relationship between parental exposure to general anti-drug advertising (at earlier round) and nonusing youths' reports of fun activities (at later round) by age, gender, race/ethnicity, risk score, sensation seeking and by longitudinal wave.....	DT-323
6-108 The relationship between parental exposure to specific anti-drug advertising (at earlier round) and nonusing youths' reports of fun activities (at later round) by age, gender, race/ethnicity, risk score, sensation seeking, and by longitudinal wave.....	DT-325
