

# Prisoners in 2010

Paul Guerino, Paige M. Harrison, and William J. Sabol, *BJS Statisticians*

On December 31, 2010, state and federal correctional authorities had jurisdiction over 1,612,395 prisoners, a decrease of 5,575 prisoners from yearend 2009 (figure 1). The combined U.S. prison population decreased 0.3% in 2010, the first decline since 1972. The 2010 imprisonment rate for the nation was 500 sentenced prisoners per 100,000 U.S. residents, which is 1 in 200 residents.

The statistics in this report are drawn from the Bureau of Justice Statistics' (BJS) National Prisoner Statistics (NPS) series, which annually collects data on prisoner counts and characteristics, as well as admissions, releases, and capacity, from the 50 states and the Federal Bureau of Prisons. The 2010 NPS collection is the 85th in a series begun in 1925.

**FIGURE 1**  
Prisoners under state and federal jurisdiction at yearend, 2000–2010

Note: *Jurisdiction* refers to the legal authority of state or federal correctional officials over a prisoner regardless of where the prisoner is held.

## HIGHLIGHTS

- The overall U.S. prison population declined in 2010 for the first time since 1972. State and federal prisoners numbered 1,612,395 at yearend 2010, a decrease of 0.3% (5,575 prisoners) from yearend 2009.
- The federal prison population increased by 0.8% (1,653 prisoners), while the number of prisoners under state authority declined by 0.5% (7,228 prisoners).
- Half of state departments of corrections (25) reported decreases in their prison populations during 2010. California (down 6,213) reported the largest decline in absolute numbers, while Rhode Island (down 8.6%) reported the largest percentage decrease.
- During 2010, prison releases (708,677) exceeded prison admissions (703,798) for the first time since BJS began collecting jurisdictional data in 1977.
- The stability in prison release rates and expected time to be served indicates that the change in the state prison population between 2009 and 2010 was the result of a decrease in state prison admissions.
- The imprisonment rate was 500 inmates per 100,000 U.S. residents in 2010, continuing the decline since imprisonment rates peaked at 506 per 100,000 in 2007.
- In 2009, the most recent data available, 53% of state prison inmates were serving time for violent offenses, 19% for property, 18% for drug, and 9% for public-order offenses.
- About half (51%) of federal inmates in 2010 were serving time for drug offenses, 35% for public-order offenses (largely weapons and immigration), and less than 10% each for violent and property offenses.
- States held 2,295 inmates under age 18 in custody at midyear 2010, down from 2,779 at midyear 2009. A reported 95,977 non citizens were held in state custody at midyear 2010, down from 97,133 at midyear 2009.

State correctional authorities had jurisdiction over 1,402,624 prisoners at yearend 2010, down slightly (0.8% or 10,881 prisoners) from yearend 2009 (table 1, figure 2). The federal prison population reached 209,771 prisoners at yearend 2010, up 0.8% (1,653 prisoners) from 2009. This is the smallest percentage growth in the federal prison

population since 1980, when the federal population actually decreased 7.6%. (Not shown in the table.)

Half of state departments of corrections (25) reported decreases in their prison populations during 2010 (appendix table 1). California (down 6,213) reported the largest decline in absolute

numbers, followed by New York (down 2,031) and Michigan (down 1,365). The decline in these states (9,609) was partly offset by increases in other states. Illinois (up 3,257) reported the largest increase in absolute numbers, followed by Texas (up 2,400) and Arkansas (up 996).

Source: BJS, National Prisoner Statistics Program.

Among state prisons, Rhode Island (down 8.6%) reported the largest percentage decrease in the size of the prisoner population during 2010, followed by Vermont (down 6.4%) and Kentucky (down 5.1%).<sup>1</sup> The 2010 decline in these states contrasts with their average annual change between 2000 and 2009, when Rhode Island had an average annual prison population growth of 1.2%, Vermont averaged 3.0% growth, and Kentucky averaged 4.2%.

During 2010, Iowa reported the largest percentage increase (7.3%) in its state prison population, followed by Illinois (up 7.2%), and Arkansas (up 6.5%). The population increases in these states are substantially higher than their average annual growth between 2000 and 2009, when Iowa had an average annual population growth of 1.1%, the Illinois population remained stable, and Arkansas averaged 2.7% growth (figure 3).

<sup>1</sup>In Rhode Island and Vermont prisons and jails form one integrated system. Data include jail and prison populations.

**The imprisonment rate declined in 2010**

The nation's imprisonment rate in 2010 was 500 sentenced prisoners per 100,000 U.S. residents, or 1 in 200 residents (not shown in a figure). This was down from the 2009 rate of 504 prisoners per 100,000 or 1 in 198 residents. About 27% of the decrease in the imprisonment rate was due to the decline in the number of sentenced prisoners, and the remaining 73% was due to the increase in the U.S. resident population. Since 2007, the imprisonment rate has declined each year, after reaching a peak of 506 per 100,000.

Between 2009 and 2010, the imprisonment rate for federal prisoners remained at 61 per 100,000 U.S. residents, while the state imprisonment rate declined from 444 to 439 per 100,000 (figures 4 and 5; appendix table 9). Compared to the 1990s when the state imprisonment rate increased 60%, from 272 inmates per 100,000 U.S. residents in 1990 to 434 per 100,000 in 1999, the state imprisonment rate has been relatively consistent during the 2000s, fluctuating around 430.

Imprisonment rates decreased in 34 states during 2010, stayed the same in the federal system, and increased in 16 states (not shown in table or figure). Wisconsin (down 27 prisoners per 100,000 state residents) reported the largest imprisonment rate decline, followed by Kentucky (down 20), and California (down 19). Arkansas (up 30 prisoners per 100,000 state residents) reported the largest increase in imprisonment rate, followed by Illinois (up 24) and Iowa and West Virginia (each up 17).

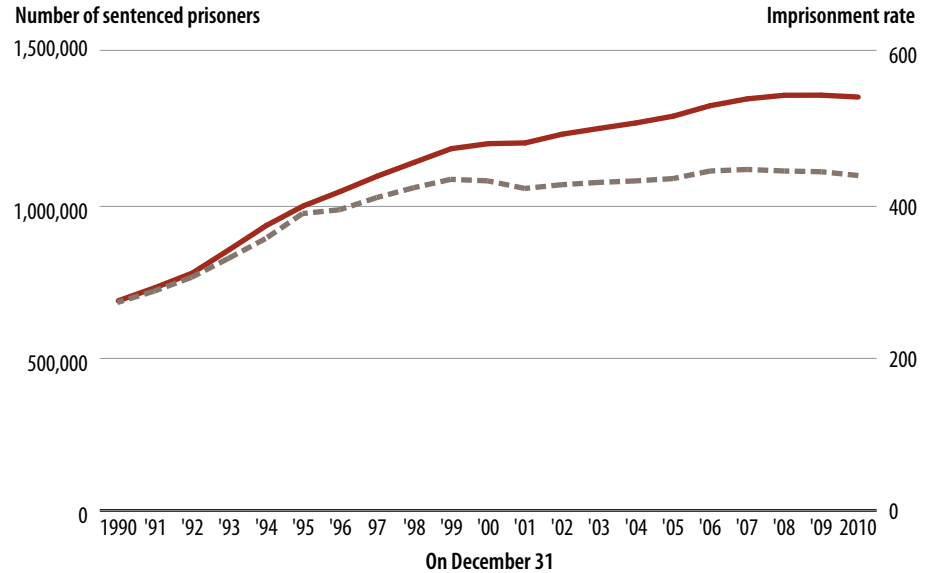

At yearend 2010, the male imprisonment rate for the nation was 943 per 100,000 male residents (down from 952 at yearend 2009). The female imprisonment rate was unchanged at 67 per 100,000 female residents (appendix table 9).

**Releases from prison exceeded admissions; however, both declined during 2010**

In 2010, both admissions to and releases from prison decreased. Admissions were down 3.8% and releases were down 2.9% (figure 6). For the first time since BJS began collecting jurisdictional data in 1977, releases from prison (708,677) exceeded admissions to prison (703,798), resulting in an overall decline in the prisoner population (table 2).

State prison admissions decreased 3.8% (down 25,746 admissions) during 2010. Among the 31 states with fewer admissions in 2010, several large states led the trend. California had the greatest decline in the number of admissions (down 10,762 admissions or 8.3%), followed by Florida (down 5,264 or 13.8%), Illinois (down 3,402 or 9.0%), and Ohio (down 2,265 or 8.4%) (appendix table 10a). However, the overall decline in admissions was partly offset by increases in several states,

including Texas (up 2,476 admissions or 3.5%) and Louisiana (up 2,251 or 15.1%).

Releases from state prison decreased by 22,839 (down 3.4%), led by some of the same states that experienced a decline in admissions. Illinois released 6,979 fewer prisoners (down 18.3%), California 6,951 fewer (down 5.4%), and Florida 4,518 fewer (down 12.2%). Louisiana had the largest increase in the number of prisoners released during the year (up 2,338 or 15.7%), followed by Pennsylvania (up 2,151 or 14.7%) and Kentucky (up 1,824 or 12.9%).

Federal prison admissions decreased 3.6% in 2010, while releases increased 3.5%. There were 1,767 more sentenced federal prisoners released in 2010 than in 2009.

### Decline in state prison admissions was led by a decrease in parole violators admitted in California

Most offenders enter prison in one of two ways. About two-thirds are admitted as new court commitments. New court commitments include admissions into prison of offenders convicted and sentenced by a court, usually to a term of more than 1 year, including probation violators and persons with a split sentence to incarceration followed by court-ordered probation or parole. About a third of new court commitments were admitted because they violated a condition of supervised release. Parole violators include all conditional release violators returned to prison for either violation of conditions of release or for new crimes. Both types of admissions declined in 2010.

New court commitments to state prison totaled 408,845 in 2010, a 3.5% decrease (14,628 fewer admissions) from 2009. The decrease in new court commitments accounted for more than half of the total decline in the number of state prison admissions in 2010 (table 3). Florida (down 5,165 from 2009), Illinois (down 4,593), and California (down 3,405) accounted for nearly 90% of the decrease in new court commitments among state prison systems (not shown).

In addition to new court commitments, 227,311 parole violators returned to state prison. This number represents a decrease of 10,408 (4.4%) from 2009 and accounts for about 40% of the total decline in the number of state prison admissions during 2010 (table 3). California admitted 7,357 fewer parole violators in 2010, accounting for about three-quarters (71%) of the total decrease in such admissions among states (not shown).

### The decrease in releases from state prisons was divided between conditional and unconditional releases

Most offenders are released in one of two ways. About three-quarters are released conditionally (i.e., released to parole or another form of supervised release). About a quarter are released unconditionally (e.g. expiration of sentence or commutation). The 3.4% overall decrease in state prisoner releases during 2010 (down 22,839 prisoners), was due partly to fewer conditional releases (down 10,738 or 2.1%) and partly to fewer unconditional releases (down 10,727 or 6.6%). (See

type of releases in *Definition of Terms*.) Despite this decrease in releases, the greater decrease in admissions resulted in a decline in the overall prison population (table 4).

Illinois (down 7,922 conditional releases) and California (down 6,900) had the largest declines in conditional releases, partially offset by increases in Virginia (up 8,278). The decrease in unconditional releases during 2010 is largely attributable to Virginia (down 8,301—due in part to a change in reporting methods) and Florida (down 2,818) (not shown).

**Decline in admissions accounted for decrease in state prison population, as time served by state prisoners remained relatively unchanged**

The mean expected time to be served in state prisons from arrival to release was constant between 2009 and 2010. The stability in expected time to serve in prison cannot account for the decline in the number of prisoners under state correctional authorities (table 5).

Nationwide state prisoners could expect to serve about 2 years from arrival to release in 2010, as mean expected time to be served has been relatively constant from 2000 through 2010. This measure of time served does not account for differences in expected time served between the two types of admissions (new court commitments versus parole violator).

Given the stability in release rates and expected time to be served, the change in the state prison population between 2009 and 2010 must be the result of the decrease in the number admitted into state prisons. Within admission types, the decline in new court commitments accounted for more than half of the overall decline in admissions, and fewer admissions from the courts indicates either a decrease in the probability of a

prison sentence, given conviction, or a decrease in the number of convictions. Data on these two measures are not yet available for 2010.

**Other selected findings—**

- The sentenced male prison population decreased by 2,716, or 0.2% (appendix table 6); the sentenced female population decreased by 727, or 0.7% (appendix table 8).
- Males had an imprisonment rate of 943 per 100,000 male U. S. residents, 14 times higher than the rate for females (67 per 100,000 female U.S. residents) (appendix table 9).
- At yearend 2010, black non-Hispanic males had an imprisonment rate (3,074 per 100,000 U.S. black male residents) that was nearly 7 times higher than white non-Hispanic males (459 per 100,000) (appendix table 14).
- Black non-Hispanic females (133 per 100,000 U.S. black female residents) had an imprisonment rate nearly 3 times that of white non-Hispanic females (47 per 100,000) (appendix table 14).
- An estimated 7.3% of black males ages 30-34 were in state or federal prison (appendix table 15).
- At yearend 2009 (the most recent data available), males sentenced to more than 1 year incarcerated in state prison for violent offenses (54%), followed by property (18%), and drug offenses (17%) (appendix table 17b).
- More than a third (36%) of females sentenced to more than 1 year were incarcerated for violent offenses. Property offenses (30%) and drug offenses (26%) were the next most prevalent offenses (appendix table 17b).
- Private facilities housed 128,195 prisoners at yearend 2010, down slightly from 129,333 at yearend 2009 (appendix table 19).

- About 16% of federal prisoners (33,830) and nearly 7% of state prisoners (94,365) were housed in private facilities on December 31, 2010 (appendix table 20).
- The number of prisoners under state or federal jurisdiction held in local facilities declined by 2,920. About 5.3% of all state or federal prisoners were held in local facilities at yearend 2010, down from 5.4% in 2009 (appendix table 21).
- Overall, in 2010 state systems were operating between 1% under their highest capacity and 9% over their lowest capacity, compared to being exactly at high capacity and 15% over low capacity in 2000 (appendix table 23). (See capacity in *Definitions of Terms*).
- Nineteen state systems were operating above their highest capacity, with seven states at least 25% over their highest capacity at yearend 2010, led by Alabama at 196% and Illinois at 144% (appendix table 23).
- Twenty-eight state systems were operating at or below their highest capacity.<sup>2</sup> Mississippi was operating at 46% of its highest capacity, followed by New Mexico (53%) and Utah and Wyoming (each at 79%).
- The Federal Bureau of Prisons operated at 36% above reported capacity at yearend 2010.
- States held 2,295 inmates under age 18 in custody at midyear 2010 (most recent data available), down from 2,779 in 2009 and 3,896 in 2000 (appendix table 24).
- A reported 95,977 noncitizens were held in custody at midyear 2010, down from 97,133 at midyear 2009 (see appendix table 25 for state-level definitions of noncitizen).

**TABLE 5**  
**Estimated mean expected time to be served, in years, 2000–2010**

Year	Reciprocal of release rate	Growth-adjusted release rate*
2000	2.1 yr.	2.1 yr.
2001	2.0	2.1
2002	2.1	2.1
2003	2.0	2.1
2004	2.0	2.1
2005	2.0	2.0

<sup>2</sup>Connecticut, Nevada, and Oregon did not report 2010 capacity data.

## Methodology

### National Prisoner Statistics

Begun in 1926 under a mandate from Congress, the National Prisoner Statistics (NPS) program collects annual statistics on prisoners at yearend. The Bureau of Justice Statistics (BJS) sponsors the survey, and the U.S. Census Bureau serves as the data collection agent. BJS depends entirely on the voluntary participation of state departments of corrections and the Federal Bureau of Prisons for NPS data.

The NPS distinguishes between prisoners in custody and prisoners under jurisdiction. To have custody of a prisoner, a state or federal prison must hold that inmate in one of its facilities. Jurisdiction over a prisoner means state or federal officials have legal authority over that prisoner regardless of where the prisoner is incarcerated or supervised. Some states are unable to provide counts that distinguish between custody and jurisdiction. (See *Jurisdiction Notes* to determine which states did not distinguish between custody and jurisdiction counts.)

The NPS jurisdiction counts include persons held in prisons, penitentiaries, correctional facilities, halfway houses, boot camps, farms, training or treatment centers, and hospitals. Counts also include prisoners who are—

- temporarily absent (less than 30 days), out to court, or on work release;
- housed in privately operated facilities, local jails, other state or federal facilities; and/or serving concurrent sentences for more than one correctional authority.

The NPS custody counts include all inmates held within a state's facilities, including inmates housed for other states. The custody counts exclude inmates held in local jails and in other jurisdictions. With a few exceptions, the final custody counts reported by BJS include inmates held in privately operated facilities.

The NPS has historically included counts of inmates in the combined jail-prison systems of Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont. The District of Columbia (D.C.) has not operated a prison system since yearend 2001. Felons sentenced under the D.C. criminal code are housed in federal facilities. Jail inmates in D.C. are included in the Annual Survey of Jails. Some previously published prisoner counts and the percentage change in population include D.C. jail inmates for 2001, the last year of collection.

Admissions include new court commitments, parole violator returns, and other conditional release violator returns; transfers from other jurisdictions; returns of prisoners absent without leave (AWOL), with or without a new sentence; escape returns, with or without a new sentence; returns from appeal or bond, and other admissions. For reporting purposes, BJS admission counts exclude transfers from other jurisdictions, AWOL returns, and escape returns.

Releases include unconditional releases (i.e., expirations of sentence, commutations, and other conditional releases), conditional releases (i.e., probations, supervised mandatory releases, discretionary paroles, and other conditional releases), deaths, AWOLs, escapes from confinement, transfers to other jurisdictions, releases to appeal or bond, and other releases. For reporting purposes, BJS release counts exclude AWOLs, escapes, and transfers to other jurisdictions.

BJS allows respondents to update data they previously submitted. This report includes the most recently reported data for 2009 and 2010. Additional information about the NPS, including the data collection instrument, is available on the BJS website at [www.bjs.gov](http://www.bjs.gov).

### Estimating imprisonment rates by age, sex, and race/Hispanic origin

Estimates of the total number of sentenced prisoners on December 31, 2010, by age, sex, race, and Hispanic

origin were generated by creating separate totals for federal and state prisons and then combining them.

Federal prisoner data used to calculate age, race, and offense distributions are obtained from the BJS Federal Justice Statistics Program (FJSP). The FJSP obtains prisoner data from the Federal Bureau of Prisons. These data include individual-level records of prisoners in federal facilities as of September 30. Specifically, the FJSP provides counts of sentenced federal inmates by age, sex, race, Hispanic origin, and offense.

Federal prisoner estimates were generated by calculating ratios of FJSP race counts within each sex to the FJSP sex count (e.g., FJSP white male total divided by FJSP male total). This ratio was then multiplied by the NPS counts of sentenced federal prisoners within the appropriate sex (e.g., NPS male total), resulting in FJSP-adjusted NPS count for each sex-race combination (e.g., NPS white males, adjusted to match the ratio of whites in the male FJSP population).

Each sex-race count was then multiplied by the ratio of FJSP age category count within the sex-race combination to the FJSP total count within the sex-race combination (e.g., FJSP 18-19 year-old white males divided by FJSP white males). The resulting product yielded the FJSP-adjusted NPS counts for each sex-race combination by age group (e.g., 18-19 year-old white male prisoners in the federal prison system).

Estimated state prisoner counts were generated by calculating the ratio of the various NPS jurisdiction race totals within each sex to the NPS jurisdiction sex total (e.g., NPS black female total jurisdiction divided by NPS female total jurisdiction) and multiplying the result by the NPS sentenced prisoner count for the sex (e.g., NPS sentenced female total). Once this was completed for each sex-race combination, a ratio adjustment was applied to the resulting totals so they summed to the proper sentenced jurisdictional total (e.g., estimated sentenced prisoner counts for white females, black females, and other females summed to the NPS sentenced

female prisoner count). A similar ratio adjustment was applied to the NPS jurisdiction counts to create sentenced prisoner counts by race. Once these totals were created, a method similar to the one used with federal prisoners was employed, adjusting National Corrections Reporting Program (NCRP) data by age, sex, race, and Hispanic origin to match the estimated NPS sentenced prisoner counts for each sex-race combination.<sup>3</sup>

The resulting totals were finally ratio-adjusted so the totals within each sex-race category matched the NPS sentenced prisoner counts, adjusted for the difference between administrative race data and the self-reported race data from the 2008-2009 National Inmate Survey.<sup>4</sup> As described above, the resulting totals were combined with the federal prisoner counts to create estimates of the total number of sentenced prisoners on December 31, 2010, by age, sex, race, and Hispanic origin.

Age-specific imprisonment rates for each age-sex-race group were calculated by dividing the estimated number of sentenced prisoners within each age group by the estimated number of U.S. residents in each age group on January 1, 2011. The result was multiplied by 100,000 and rounded to the nearest whole number. Totals by sex include all prisoners and U.S. residents regardless of race or Hispanic origin. Detailed race and Hispanic origin imprisonment rates exclude persons identifying as two or more races.

<sup>3</sup>The NCRP data used in 2010 are improved from prior years in their completeness and timeliness. Use caution when comparing totals and imprisonment rates by age, sex, and race/Hispanic origin over time.

<sup>4</sup>Prior year administrative data were adjusted to the 2004 Survey of Inmates in State and Local Correctional Facilities.

### Calculating release rates and mean time served

Mean expected time to be served was estimated using two methods that take into account growth in the prison population (table 5). The measure of expected time to be served is an estimate of mean time to be served by persons entering prison. This measure differs from other estimates that are based on the actual time served by persons released from prison. Research has shown that estimates of time served for exiting cohorts are biased estimates of time served for persons entering prison, especially when prison population size is changing or the number of admissions is changing. (For example, see Patterson, E.J. and S.H. Preston (2008). "Estimating Mean Length of Stay in Prisons: Methods and Applications," *Journal of Quantitative Criminology*, 24, 33-49.)

The adjustment for growth in the prison population reduces bias in estimates of time served based only on exits. The two adjusted measures of expected time served were a growth-adjusted release rate measure and a growth-adjusted entry rate measure. The growth-adjusted exit rate measure applies the mean rate of growth in the prison population to the reciprocal of the release rate, or—

$$\text{Mean expected time served} = (P_t - P_{t-1}) / r / R_t$$

Where:

$t$  = year

$P$  = the number of sentenced prisoners

$r$  = mean growth rate, calculated as

$$\ln(P_t / P_{t-1})$$

$R$  = number of releases

The entry rate estimate of mean time to be served, corrected for growth, was estimated as follows.

$$1 / [(P_t / A_t) * (1 - r A_p)]$$

Where  $t$ ,  $P$ , and  $r$  are as above, and  $A_t$  = the number of sentenced admissions, and  $A_p$  equals the mean duration of the prison population, that is mean time served from admission until yearend. Estimates of mean duration of the prison population came from NCRP data.

### Prison capacities

State and federal correctional authorities provide three measures of their facilities' capacity: design capacity, operational capacity, and rated capacity. Estimates of the prison populations as a percentage of capacity are based on a state or federal custody population. In general, state capacity and custody counts exclude inmates held in private facilities, although six states include prisoners held in private facilities as part of the capacity of their prison systems: Georgia, Idaho, Louisiana, Mississippi, Oklahoma, and New Mexico. For these states, prison population as a percent of capacity includes private facilities.

## NPS jurisdiction notes

**Alabama**—Operational capacity represents physical capacity to hold inmates, but is not based on staffing, programs, and services.

**Alaska**—Prisons and jails form one integrated system. Data include jail and prison populations unless otherwise specified. Jurisdiction totals include individuals in electronic and special monitoring programs. Noncitizen data include only offenders known to be noncitizens and do not include offenders of unknown citizenship.

The Alaska Department of Corrections was unable to provide admissions and releases by type. These counts were imputed using a ratio adjustment based on the 2009 admission and release data reported by the state. Capacity counts were not provided in 2010; the 2009 capacity counts were imputed by BJS at the state's request.

**Arizona**—Population counts are based on custody data and inmates in contracted beds. The Arizona Department of Corrections added about 4,000 state beds rated as operational capacity and some inmates previously housed out of state or in private facilities were transferred to state beds. This transfer is reflected in the change between 2009 and 2010 in the private and noncitizen counts.

**California**—Jurisdiction counts include felons who are temporarily absent (i.e., housed in local jails, out to court, or in hospitals) and include offenders in the California Civil Addict Program (CAP) who are temporarily absent and typically returned to prison within 30 days. The CAP is a drug abuse treatment program offering treatment both onsite and offsite.

**Colorado**—Population counts for prisoners with a sentence of more than 1 year include an undetermined number of prisoners with sentences of 1 year or less. Counts include 259 male and 11 female inmates in the Youthful Offender System, which was established primarily for violent juvenile offenders. Mandatory releases have increased due to a legislative revision that went into effect July 2009. Operational and design capacity do not include privately run facilities. Noncitizen is defined as foreign born.

**Connecticut**—Prisons and jails form one integrated system. Data include jail and prison populations unless otherwise specified. Legislation in July 1995 abolished the capacity law. The capacity of a facility is a fluid number based upon the needs of the department. The needs are dictated by security issues, populations, court decrees, legal mandates, staffing, and physical plant areas or facilities that are serving other purposes or have been decommissioned. The actual capacity of a facility is subject to change.

**Delaware**—Prisons and jails form one integrated system. Data include jail and prison populations unless otherwise specified. Capacity counts include halfway houses under the Department of Corrections.

**Federal Bureau of Prisons**—Counts include inmates housed in secure facilities through private contracts and subcontracts. They also included 8,629 inmates held in nonsecure privately operated community corrections centers and 2,548 offenders on home confinement. Expirations of sentence include good conduct releases that usually have a separate and distinct term of supervision. The Federal Bureau of Prisons does not house inmates under age 18 in federal facilities; 142 such inmates were housed in contract facilities.

**Florida**—Noncitizen counts includes both confirmed and suspected alien inmates.

**Georgia**—Population counts exclude an undetermined number of inmates housed in local jails, awaiting transfer to prison. Counts may not compare to previous years due to a data system conversion.

The Georgia Department of Corrections (GDC) was unable to provide jurisdiction counts of admissions by type or releases by type. Jurisdiction counts by race, type of admission, and type of release were imputed using ratio adjustments based on counts reported by GDC in 2009.

The GDC total admissions and releases for 2010 are reported, but the breakdown by type has been suppressed at their request. These breakouts are included in national totals. All imputations were reviewed and approved by GDC staff.

**Hawaii**—Prisons and jails form one integrated system. Data include jail and prison populations unless otherwise specified. Noncitizen data are self reported.

**Illinois**—Population counts for prisoners with a sentence of more than 1 year include an undetermined number of prisoners with sentences of 1 year. Noncitizen count is estimated.

**Idaho**—Capacity is defined as 100% of maximum capacity and operational capacity as 95% of maximum capacity. Design capacity is based on original facility occupancy.

**Iowa**—Population counts for prisoners with a sentence of more than 1 year include an undetermined number of prisoners with sentences of 1 year or less. In 2009, Iowa began including offenders on work release, operating while under the influence continuum status, and Iowa inmates housed in prisons out of state per BJS counting rules. Previously, counts were based on custody data.

## NPS jurisdiction notes (continued)

**Kansas**—Population counts for prisoners with a sentence of more than 1 year include an undetermined number of prisoners with sentences of 1 year or less. Noncitizen count is estimated.

**Maine**—Maine does not use the term parole. Parole releases and parole violator admissions are reported as inmates on post-sentence probation.

**Massachusetts**—Jurisdiction count excludes approximately 3,271 inmates in local jails and houses of corrections serving a sentence of more than 1 year. By law, offenders in Massachusetts may be sentenced to terms of up to 30 months in locally operated jails and correctional institutions. Noncitizen data are self-reported.

**Michigan**—Operational capacity includes the net operating capacities of institutions, as well as the population of community programs.

**Missouri**—Operational capacity is the number of available beds, including those temporarily offline. Noncitizen is defined as foreign born.

**Mississippi**—Citizenship data were not collected.

**Nebraska**—Operational capacity is defined as stress capacity, which is 125% of design capacity for designated facilities. This capacity is ordered by the governor, but set by the Department of Corrections.

**Nevada**—Noncitizen data are not available.

**New Jersey**—Jurisdiction counts for prisoners with sentences of more than 1 year include prisoners with sentences of 1 year. Noncitizen data were not collected on every inmate.

**New York**—Noncitizen is defined as foreign born.

**North Carolina**—Prison inmates held in local jails are not counted in the prison population until admission to prison.

**North Dakota**—Capacity accounts for double-bunking in the state penitentiary.

**Ohio**—Population counts for prisoners with a sentence of more than 1 year include an undetermined number of prisoners with sentences of 1 year or less. Reporting methods for admissions and releases and for private facilities have been revised and are not comparable to previous years.

**Oklahoma**—Population counts for inmates with sentences of less than 1 year consist mainly of offenders ordered by the court to the Delayed Sentencing Program for Young Adults pursuant to 22 O.S. 996 through 996.3. Oklahoma has only one type of capacity, which includes state prisons, private prisons, and contract jails. Noncitizen is defined as a person with Immigration and Customs Enforcement detainees.

**Oregon**—Population counts for prisoners with a sentence of more than 1 year include an undetermined number of prisoners with sentences of 1 year or less. County authorities retain jurisdiction over the majority of these types of inmates. The operational capacity reported is planned capacity.”

**Rhode Island**—Prisons and jails form one integrated system. Data include jail and prison populations unless otherwise specified. Capacity counts reflect the opening of a new women’s facility in 2010.

**South Carolina**—Noncitizen data are self-reported.

**South Dakota**—Operational capacity reported is planned capacity.

**Tennessee**—Noncitizen is defined as foreign born.

**Texas**—Jurisdiction count includes offenders in custody as well as those held in privately operated prisons, substance abuse felony punishment facilities, halfway houses, offenders temporarily released to a county jail for less than 30 days, and offenders awaiting paperwork for transfer to state-funded custody.

**Vermont**—Prisons and jails form one integrated system. Data include jail and prison populations unless otherwise specified.

**Virginia**—Virginia Department of Corrections maintains a count of beds which most closely fits the definition for rated capacity. Number of beds assigned by rating officials takes into account the number of inmates who can be accommodated based on staff, programs, services, and design. Noncitizen is defined as foreign born.

**Wisconsin**—Counts include 698 temporary probation and parole placements. Capacity includes two adult state prison facilities, one juvenile facility under the jurisdiction of Wisconsin Department of Corrections (DOC), and one nonDOC facility. Local jails and other federal, state, and private facilities are excluded from capacity.

**Wyoming**—A new male correctional facility was opened in January 2010.

## Definition of Terms

**Average annual change**—average (mean) annual change across a specific period.

**Capacity, design**—the number of inmates that planners or architects intended for a facility.

**Capacity, highest**—the maximum number of beds reported across the three capacity measures: design capacity, operational capacity, and rated capacity.

**Capacity, lowest**—the minimum number of beds across three capacity measures: design capacity, operational capacity, and rated capacity.

**Capacity, operational**—the number of inmates that can be accommodated based on a facility's staff, existing programs, and services.

**Capacity, rated**—the number of beds or inmates assigned by a rating official to institutions within a jurisdiction.

**Conditional releases**—includes discretionary parole, mandatory parole, post-custody probation, and other unspecified conditional releases.

**Conditional release violators**—re-admission to prison of persons released to discretionary parole, mandatory parole, post-custody probation, and other unspecified conditional releases.

**Custody**—prisoners held in the physical custody of state or federal prisons or local jails, regardless of sentence length or authority having jurisdiction.

**Imprisonment rate**—the number of prisoners under state or federal jurisdiction sentenced to more than 1 year per 100,000 U.S. residents.

**Inmate**—person incarcerated in a local jail, state or federal prison, or private facility under contract to federal, state or local authorities.

**Jail**—confinement facility usually administered by a local law enforcement agency; intended for adults, but sometimes holding juveniles; for confinement before and after adjudication. Such facilities include jails and city/county correctional centers, special jail facilities such as medical treatment or release centers, halfway houses, work farms, and temporary holding or lockup facilities that are part of the jail's combined function. Inmates sentenced to jail facilities usually have a sentence of 1 year or less. Connecticut, Rhode Island, Vermont, Delaware, Alaska, and Hawaii operate integrated systems, which combine prisons and jails.

**Jurisdiction**—the legal authority of state or federal correctional officials over a prisoner regardless of where the prisoner is held.

**New court commitments**—admissions into prison of offenders convicted and sentenced by a court, usually to a term of more than 1 year, including probation violators and persons with a split sentence to incarceration followed by court-

ordered probation or parole.

**Parole violators**—all conditional release violators returned to prison for either violation of conditions of release or for new crimes.

**Prisons**—long-term confinement facilities run by a state or the federal government that typically hold felons and offenders with sentences of more than 1 year. However, sentence length may vary by state. Connecticut, Rhode Island, Vermont, Delaware, Alaska, and Hawaii operate integrated systems, which combine prisons and jails.

**Prisoners**—individuals confined in correctional facilities under the legal authority (jurisdiction) of state and federal correctional officials.

**Sentenced prisoner**—a prisoner sentenced to more than 1 year.

**Supervised mandatory releases**—conditional release with post-custody supervision generally occurring in jurisdictions using determinate sentencing statutes.

**Unconditional release**—expirations of sentences, commutations, and other unspecified unconditional releases.

## List of appendix tables

**Appendix table 1.** Prisoners under the jurisdiction of state or federal correctional authorities, by jurisdiction, December 31, 2000, 2009, and 2010

**Appendix table 2.** Male prisoners under the jurisdiction of state and federal correctional authorities, by jurisdiction, December 31, 2000, 2009, and 2010

**Appendix table 3.** Female prisoners under the jurisdiction of state and federal correctional authorities, by jurisdiction, December 31, 2000, 2009, and 2010

**Appendix table 4.** Sentenced prisoners under the jurisdiction of state and federal correctional authorities, by jurisdiction, December 31, 2000, 2009, and 2010

**Appendix table 5.** Sentenced male prisoners under the jurisdiction of state and federal correctional authorities, December 31, 2000-2010

**Appendix table 6.** Sentenced male prisoners under the jurisdiction of state and federal correctional authorities, by jurisdiction, December 31, 2000, 2009, and 2010

**Appendix table 7.** Sentenced female prisoners under the jurisdiction of state and federal correctional authorities, December 31, 2000-2010

**Appendix table 8.** Sentenced female prisoners under the jurisdiction of state and federal correctional authorities, by jurisdiction, December 31, 2000, 2009, and 2010

**Appendix table 9.** Imprisonment rates of sentenced prisoners under jurisdiction of state and federal correctional authorities, by sex and jurisdiction, December 31, 2009 and 2010

**Appendix table 10a.** Sentenced prisoners admitted to state or federal jurisdiction, by jurisdiction, December 31, 2000, 2009, and 2010

**Appendix table 10b.** Sentenced prisoners released from state or federal jurisdiction, by jurisdiction, December 31, 2000, 2009, and 2010

**Appendix table 11.** Sentenced prisoners admitted to and released from state and federal jurisdiction, by type, December 31, 2010

**Appendix table 12.** Estimated number of sentenced prisoners under state and federal jurisdiction, by sex, race, and Hispanic origin, December 31, 2000-2010

**Appendix table 13.** Estimated number of sentenced prisoners under state and federal jurisdiction, by sex, race, Hispanic origin, and age, December 31, 2010

**Appendix table 14.** Estimated rate of sentenced prisoners under state and federal jurisdiction, per 100,000 U.S. residents, by sex, race, and Hispanic origin, December 31, 2000-2010

**Appendix table 15.** Estimated number of sentenced prisoners under state and federal jurisdiction per 100,000 U.S. residents, by sex, race, Hispanic origin, and age, December 31, 2010

**Appendix table 16a.** Estimated number of sentenced prisoners under state jurisdiction, by offense, sex, race, and Hispanic origin, December 31, 2008

**Appendix table 16b.** Estimated number of sentenced prisoners under state jurisdiction, by offense, sex, race, and Hispanic origin, December 31, 2009

**Appendix table 17a.** Estimated percent of sentenced prisoners under state jurisdiction, by offense, sex, race, and Hispanic origin, December 31, 2008

**Appendix table 17b.** Estimated percent of sentenced prisoners under state jurisdiction, by offense, sex, race, and Hispanic origin, December 31, 2009

**Appendix table 18.** Sentenced prisoners under federal jurisdiction, by most serious offense, 2000, 2009, and 2010

**Appendix table 19.** State and federal prisoners in private facilities, December 31, 2000-2010

**Appendix table 20.** State and federal prisoners in private facilities, by jurisdiction, December 31, 2000, 2009, and 2010

**Appendix table 21.** State and federal prisoners in local facilities, December 31, 2000-2010

**Appendix table 22.** State and federal prisoners in local facilities, by jurisdiction, December 31, 2000

**Appendix table 23.** Reported state and federal prison capacities, December 31, 2010

**Appendix table 24.** Reported number of inmates under age 18 held in custody in state or federal prisons, by sex, region, and jurisdiction, June 30, 2009 and 2010

**Appendix table 25.** Reported number of inmates under age 18 held in custody in state or federal prisons, by sex, region, and jurisdiction, June 30, 2009 and 2010

**APPENDIX TABLE 1****Prisoners under the jurisdiction of state and federal correctional authorities, by jurisdiction, December 31, 2000, 2009, and 2010**

Region and jurisdiction	Number of prisoners			Average annual change, 2000-2009	Percent change, 2009-2010
	2000	2009	2010		
<b>U.S. total</b>	1,391,261	1,617,970	1,612,395	1.7%	-0.3%

...Data not available.

/Not reported.

<sup>a</sup>Population counts are based on the number of inmates held in facilities operated by the jurisdiction. Excludes inmates held in local jails, in other states, or in private facilities.<sup>b</sup>Connecticut no longer reports capacity because of a law passed in 1995.<sup>c</sup>Capacity definition differs from BJS definition, see NPS *Jurisdiction Notes*.<sup>d</sup>Excludes capacity of county facilities and inmates housed in them.<sup>e</sup>Includes capacity of private and contract facilities and inmates housed in them.

/Not reported.

<sup>a</sup>Prisons and jails form one integrated system. Data include total jail and prison populations.

<sup>b</sup>Number of U.S. citizens based only on inmates who reported their citizenship.

<sup>c</sup>Noncitizens defined as foreign born.

<sup>d</sup>Estimated.

<sup>e</sup>Includes both confirmed and suspected alien inmates.

<sup>f</sup>May not be comparable to prior-year data due to a change in reporting system.

<sup>g</sup>Noncitizens defined as inmates held by Immigrations and Customs Enforcement (ICE).
