Appendix B.

Finances of Individual City-County Governments Having 25,000 Population or More Classified as Municipalities: 1996-97

Appendix B contains a summary of financial data in governments of 25,000 population or more where there has been a merger of the municipal and county government activities.

A number of municipalities differ from the overwhelming majority in that they operate, either specifically by law or in effect, as composite city-county governments. This group includes New York City, Philadelphia, and several other of the most populous cities in the Nation. One of

these cities—Washington, DC—is unique in that it has no overlying state government and thus provides certain services commonly provided by states, as well as various county-type services. The 40 governments of this type with 25,000 population or more accounted for about 32 percent of the total revenue and expenditure, and 23 percent of the total indebtedness of all municipalities in the Nation in fiscal 1996-97.
