**What if YOUR client information was stolen?
Personnel records are breached...bank accounts are
accessed by a cybercriminal...you could be sued.**

Can you afford that?

Protect your business...attend this free workshop presented by the
National Institute of Standards and Technology (NIST) with the
support of the FBI and the SBA and learn:

- How to define information security
- Best practices to protect your data

You will hear about:

- Common types of threats
- Current technologies
- Free resources available to protect your business

Presented by Richard Kissel of the NIST

- Writes information security guidelines for federal agencies
- Nationally recognized expert in computer security for more than 20 years
- Senior Information Security Analyst for the National Institute of Standards and Technology (NIST) in Gaithersburg, MD
- Worked as an Information Security Analyst in the Computer Security Office at the Small Business Administration
- B.S. and M.A. in Mathematics from Austin Peay State University
- Security certifications include: Certified Information Systems Security Professional (CISSP), Certified Information Security Manager (CISM) and the National Security Agency certification in Infosec Assessment Methodology (IAM)
- Plans and conducts information security workshops for small business owners/operators across the country for past six years

The support given by SBA, NIST, FBI's Infragard and SCORE to this activity does not constitute an express or implied endorsement of any co-sponsor's or participants opinions, products or services. All SBA, NIST, FBI and SCORE programs are extended to the public on a nondiscriminatory basis. Reasonable arrangements for persons with disabilities will be made if requested at least two weeks in advance. Contact SCORE at www.tulsascore.org for assistance. SBA Co-Sponsorship No. 11-7630-127
