Stealing Elections : How Voter Fraud Threatens Our Democracy. Fund, John. Encounter Books, 2008

Books, 2008

In *Stealing Elections*, John Fund takes the reader on a national tour of voter fraud scandals ranging from rural states like Texas and Mississippi to big cities such as Philadelphia and Milwaukee. He explores dark episodes such as the way "vote brokers" stole a mayoral election in Miami in 1998 by tampering with 4700 absentee bal-

lots. He shows how, in the aftermath of the Motor Voter Law of 1993, Californians used mail-in forms to get absentee ballots for fictitious people and pets, while in St. Louis it was discovered that voter rolls included 13,000 more names than the U.S. Census listed as the total number of adults in the city. Additionally, Fund shows that the computerized voting machines with which election officials are trying to reassure voters come even greater concerns for security and accuracy.

Marketplace of Democracy : Electoral Competition and American Politics.

McDonald, Michael, P. Samples, John. Brookings Institution Press, 2006.

Since 1998, U.S. House incumbents have won a staggering 98 percent of their reelection races.

Electoral competition has also declined in some state and primary elections. The market place for democracy combines the resources of two eminent research organi-

zations —Brookings and the Cato Institute —to address several important questions about our democratic system. How pervasive is the lack of competition in arenas only previously speculated on, such as state legislative contests and congressional primaries? What have previous reform efforts, such as direct primaries and term limits, had on electoral competition? What are the effects of redistricting and campaign finance regulation? What role do third parties play? In sum, what does all this tell us about what might be done to increase electoral competition? The authors, including a number of today's most important scholars in American politics, consider the historical development, legal background, and political aspects of a system that is supposed to be responsive and accountable yet for many is becoming stagnant, self-perpetuating, and tone-deaf. How did we get to this point, and what —if anything — should be done about it? Elections are the vehicles through which Americans choose who governs them, and the power of the ballot is still the best lever ordinary citizens have in keeping public officials accountable. The Marketplace of Democracy considers different policy options for increasing the competition needed to keep American politics vibrant, responsive, and democratic.

Presidency and the Challenge of Democracy.

Genovese, Michael A.

Han, Lori Cox. Palgrave Macmillan, 2006

It is clear that the tectonic plates of the American political system are gravitating towards a model of presidential government not envisioned and, in fact, precluded by the constitutional design of the framers of the United States Constitution. As the presidency eclipses Congress and the courts in power, and public/media attention, the balance of powers has tilted. In this accessible book, leading scholars explore the reasons for and implications of the rising power of the presidency.

Get Out the Vote : How to Increase Voter Turnout. Green, Donald P. Gerber, Alan S. Brookings

Institution Press, 2008

Get Out the Vote! broke ground by introducing a new scientific approach to the challenge of voter mobilization and profoundly influenced how campaigns operate. In this expanded and updated edition, the authors incorporate data from more

than one hundred new studies, which shed new light on the cost-effectiveness and efficiency of various campaign tactics, including door-to-door canvassing, e-mail, direct mail, and telephone calls. Two new chapters focus on the effectiveness of mass media campaigns and events such as candidate forums and Election Day festivals. Available in time for the core of the 2008 presidential campaign, this practical guide on voter mobilization is sure to be an important resource for consultants, candidates, and grassroots organizations.

Encyclopedia of Disaster Relief/ Penuel, K. Bradley Bradley Statler, Matt . SAGE Publications, 2010.

This encyclopedia covers the response to disasters, from governments to NGOs, from charities to politics, from refugees to health, and from economics to international relations. Entries cover issues in both historical and contemporary context, with information on disaster relief around the world. The volumes include information relevant to students of sociology, national security, economics, health sciences, political science, emergency preparedness, history, agriculture, and many other subjects.
