

EARTH DAY 2012
Public Service Announcement
:60

Kitchen – check.

Bedrooms – check.

Garage – check.

Looks like you've been busy spring cleaning. Ever wondered who works to clean our planet?

America's farmers and ranchers play an important role in keeping the earth clean through the Farm Service Agency's Conservation Reserve Program.

CRP conserves soil, improves water and air quality and creates better wildlife habitat.

Farmers and ranchers not only spend their lives working the land, they work to let the land live on.

So this Earth Day, April 22nd, thank the farmers and ranchers, the original conservationists and stewards of the Earth.

Mobilize the Earth! Let it live on!!

*This public service announcement was brought to you
by USDA's Farm Service Agency.*
