Digest:

81.2 – Clarifies I-Suite Standard Component Cost (default rate table) for State and cooperator (county) equipment and personnel.

83.2 – Adds a link to an automated spreadsheet for RM/GB geographic area rates.

83.3 – Standard costs of resources for the RM/GB geographic areas are displayed in Section 88, Exhibit 01 supplement.

88 – Exhibits – Updates Exhibit 01 with 2011 rates for the RM/GB areas.

CHAPTER 80 – COST ACCOUNTING AND REPORTING**

81.2 – Standard component costs included in the I-Suite database (default standard rate table) include equipment category rates for State and County (cooperator) resources out of range for the RM/GB geographic areas. Specifically Engines Type 4-6 and water tenders (WAT, WTS) are represented as a higher default hourly rate in I-Suite. The estimated cost can be underrepresented after posting operator time without calculating an adjusted equipment rate. Review the rates in section 88, exhibit 01, **or** apply the current Cooperator Rate Agreements and Annual Operating Plans to adjust equipment rates as needed for State and Cooperator equipment.

Recent 2011 I-Suite adjustments to State and County personnel rates will eliminate the need to copy and attach a separate RM/GB database when starting a new incident in I-Suite.

83.2 – The RM/GB has developed an automated spreadsheet using standard geographic rates for 2011. The spreadsheet can be used when I-Suite is not available or to generate an initial cost estimate. The spreadsheet is posted on the Rocky Basin GACC sites.

83.3 – Resource costs can be tracked on a daily basis as displayed in section 88, exhibit 01.
