Key to Database Fields Used

The following NTIS database fields are used in this short listing of recently acquired technical reports.

- NTIS Order Number
- Title
- Source
- Report Year, Page Count
- Report Number/ISBN13 (if available)
- Related Categories/Sub-categories (where the document is also indexed)
- Keywords

RSS Feeds are available in your choice of NTIS Subject Category. For information use the RSS link on the NTIS Homepage and look for the Category RSS Feeds button.

FEDERAL LABORATORY CONSORTIUM FOR TECHNOLOGY TRANSFER

FLC *advancing federal research and technology*

The Federal Laboratory Consortium for Technology Transfer (FLC) and the National Technical Information Service (NTIS) continuously collaborate on the process of Federal Technology Transfer.

The FLC is the nationwide network of federal laboratories that provides the forum to develop strategies and opportunities for linking laboratory mission technologies and expertise with the marketplace. The FLC consists of more than 250 federal laboratories.

As an agency of the U.S. Department of Commerce, the NTIS mission is to provide for the acquisition, archiving and dissemination of technological, scientific, and engineering information. Much of this permanent repository of information is the result of research conducted by federal laboratories that are members of the FLC. The collaborative effort of the FLC and NTIS ensures the perpetual availability of this vital research to American businesses and industries.

“NTRL provides an affordable way to provide our patrons with direct desktop access to the kinds of technical reports our patrons need in pdf format, with an easy to use interface and a simple IP address authentication. We also appreciate the fact that NTIS provides us with usage statistics that show what reports are being downloaded and in what quantity. That helps us justify our investment in NTRL to upper management.”

- Ken Winter, MLIS, Director of Library and Information Services, VDOT Research Library

Keywords: Mexico Gulf, Commercial fishing, Red grouper.

Subject Category Codes/Classification

NTIS classifies citations into 39 subject categories. Each of these subject categories is divided into subcategories. This method provides sorting categories for both hard and soft sciences. All subject categories consist of three character codes: two numerics and one alpha character. The numeric codes represent entire categories the alpha codes are used to designate subcategories within these broad categories. The number of NTIS subcategories posted to an information product average from three to five, although there are some reports with more.

PB2009100905

Fish and Invertebrate Bycatch Estimates for the California Drift Gillnet Fishery Targeting Swordfish and Thresher Shark, 1990-2006.

National Marine Fisheries Service, La Jolla, CA. Southwest Fisheries Science Center.

2008, 58p

NOAA-TM-NMFS-SWFSC-426

Related Categories/Sub-Categories:

47D (Biological Oceanography)

57H (Ecology)

98F (Fisheries & Aquaculture)

Keywords: Bycatches, Swordfish, Sharks.

PB2009104667

Description of the Allocation Procedure Applied to the 1994 to 2007 Commercial Landings Data.

National Marine Fisheries Service, Woods Hole, MA.

2008, 72p

Related Categories/Sub-Categories:

47D (Biological Oceanography)

The National Technical Reports Library (NTRL)

enhances accessibility to the NTIS technical reports collection. It provides access to:

- **Bibliographic records of more than 2,000,000 technical reports**
- **Downloadable full text of 600,000 of these reports in PDF format**
- **Subscription rates are based on institutional FTE levels.**

The NTRL operates on a system interface that allows users to do queries on the large NTIS bibliographic database. The intent is to broadly expand and improve access to over 2 million bibliographic records (pre-1960 to present) and 600k full-text documents in PDF format that are directly linked to that bibliographic database.

For more information, go to:

<http://www.ntis.gov/products/ntrl.aspx>

The Nation's Source for Scientific Information

The National Technical Information Service (NTIS), is the nation's largest and most comprehensive source of Government-funded scientific, technical, engineering and business-related information.

For more than 60 years, we have served as an innovative resource to Federal agencies, businesses and universities looking for high-caliber information. Our mission is straightforward: to support the nation's economic growth by providing access to information that stimulates innovation and discovery.

While you can find information on virtually any subject on the Web, there's no guarantee that the information is accurate — or that it has been published by a legitimate source. NTIS undergoes a rigorous process to ensure that all the information we offer is authentic and credible. This integrity, along with the breadth and depth of our collection, is why NTIS is regarded as the nation's preeminent source of Government information.

PB91160846

Seasonal Distribution Patterns of Commercial Landings of 45 Species off the Northeastern United States during 1977-88.

National Marine Fisheries Service, Woods Hole, MA. Northeast Fisheries Center.

1990, 138p

NOAA-TM-NMFS-F/NEC-78

Just Revised: the NTIS Database Search Guide

Gain an in-depth understanding of the NTIS database structure with this new guide:

- Comprehensive list of NTIS Categories
- Helpful information and search hints
- Reference Guide to online commercial services and the NTRL
- Great Reference Manual & Teaching Tool

Free Download: <http://www.ntis.gov/pdf/dbguide.pdf>

Any of the technical reports listed in this newsletter can be ordered directly from the National Technical Information Service, simply click on the title to go to the product detail page on NTIS.GOV.

If your organization is a subscriber to the National Technical Reports Library, most of the reports listed can be downloaded free there. For information on how to subscribe to NTRL, go to <http://www.ntis.gov/products/ntrl.aspx>.

Title Index - For NTRL Users

The following is a list of the titles included in this month's issue, without links to the NTIS Web site. The list is in alphabetical order.

NTIS number	Category	Title
PB2010106474	47	2009 Observer Sampling Manual. Science, Service, Stewardship.
PB2007105784	48	Assessment of the Pacific Sardine ('Sardinops sagax caerulea') Population for U.S. Management in 2007.
PB2008109389	48	Assessment of the Pacific Sardine Resource in 2007 For U.S. Management in 2008.
PB2011113404	72	Atlantis Model Development for the Northern Gulf of California.
PB2008113764	57	Biological Recovery Criteria for the Oregon Coast Coho Salmon Evolutionarily Significant Unit.
PB2011113591	57	Bluefish Specifications, Environmental Assessment, Regulatory Impact Review, and Initial Regulatory Flexibility Analysis, 2010.
PB2011113599	57	Capture, Transportation and Reintroduction of Lower Columbia River Fall Chinook Salmon into the Upper White Salmon River.
DE2009962411	48	Columbia River Hatchery Reform System-Wide Report.
PB2011112880	57	Deep-Sea Red Crab 2010 Fishing Year Specifications (March 1, 2010-February 28, 2011) and Stock Assessment and Fishery Evaluation (SAFE Report) Including the Environmental Assessment (EA), Regulatory Impact Review (RIR) and Initial Regulatory Flexibility Analysis (IRFA).
PB2009104667	57	Description of the Allocation Procedure Applied to the 1994 to 2007 Commercial Landings Data.
PB2008112503	96	Economic Analysis of Bottomfish Fishing Vessels Operating in the Northwestern Hawaiian Islands in 2003.
PB2007112885	47	Emerging Technologies for Reef Fisheries Research and Management.
PB2010113213	47	Estimates of Sustainable Yield for 50 Data-Poor Stocks in the Pacific Coast Groundfish Fishery Management Plan.
PB2009102035	47	Final Economic Analysis of Critical Habitat Designation for the Oregon Coast coho ESU. Final Report.
PB2009100905	47	Fish and Invertebrate Bycatch Estimates for the California Drift Gillnet Fishery Targeting Swordfish and Thresher Shark, 1990-2006.
PB2006112007	57	Fish Production Review of the Leavenworth National Fish Hatchery Complex, 2005.
PB2006106682	70	Fisheries Management: Core Principles and a Strategic Approach Would Enhance Stakeholder Participation in Developing Quota-Based Programs.
PB2011112052	48	"Fishery Management Plan for U.S. West Coast Fisheries for Highly Migratory Species. As Amended by Amendment 1. "
PB2011102429	98	International Pacific Halibut Commission: Annual Report 2009.
PB2008112636	70	Mid-Atlantic Fishery Management Council's Report to Congress on Council Management Coordination.
PB2010102079	98	Pacific Coast Groundfish Fishery Management Plan for the California, Oregon, and Washington Groundfish Fishery as Amended Through Amendment 19 Including Amendment 15.
PB2009100133	98	Pacific Coastal Salmon Recovery Fund Report to Congress, 2008 (FY 2000-2007).
PB2008113185	47	Regulatory Impact Analysis for Pelagic Fishery Management in Hawaii: A Spatially Disaggregated Nonlinear Programming Model.
PB2008110699	98	Report of the Fraser River Panel to the Pacific Salmon Commission on the 2004 Fraser River Sockeye and Pink Salmon Fishing Season.
PB91160846	98	Seasonal Distribution Patterns of Commercial Landings of 45 Species off the Northeastern United States during 1977-88.
PB2008107946	47	Seasonal Foods, Gonadal Maturation, and Length-Weight Relationships for Nine Fishes Commonly Captured by Shrimp Trawl on the Northwest Gulf of Mexico Continental Shelf.
PB2010110849	47	SEFSC Pelagic Observer Program Data Summary for 2005 and 2006.
PB2011112846	98	Status of Stocks: Report on the Status of U.S. Fisheries, 2010.
PB2006114947	98	Status of the Pacific Coast, Coastal Pelagic Species Fishery and Recommended Acceptable Biological Catches: Stock Assessment and Fishery Evaluation 2006.
PB2011110976	57	Status of the U.S. West Coast Fisheries for Highly Migratory Species Through 2006. Stock Assessment and Fishery Evaluation.

The Federal Science Repository Service (FSRS): Supporting Access to Agency Collections

Don Hagen, National Technical Information Service
June Crowe and Annette Olson, Information International Associates

Existing knowledge

Grey literature and other documents, images, videos, and more represent the mission and work of an agency, but preserving and creating access to these resources can pose challenges in funding, design, and maintenance.

Increased Access through the FSRS

The mission of the National Technical Information Service (NTIS) is to promote progress by serving as the U.S. Federal Government's central means of making scientific and cutting-edge information perpetually and widely available.

To help agencies preserve and increase access to their resources, NTIS has formed a Joint Venture with Information International Associates (IIA) to develop the Federal Science Repository Service (FSRS).

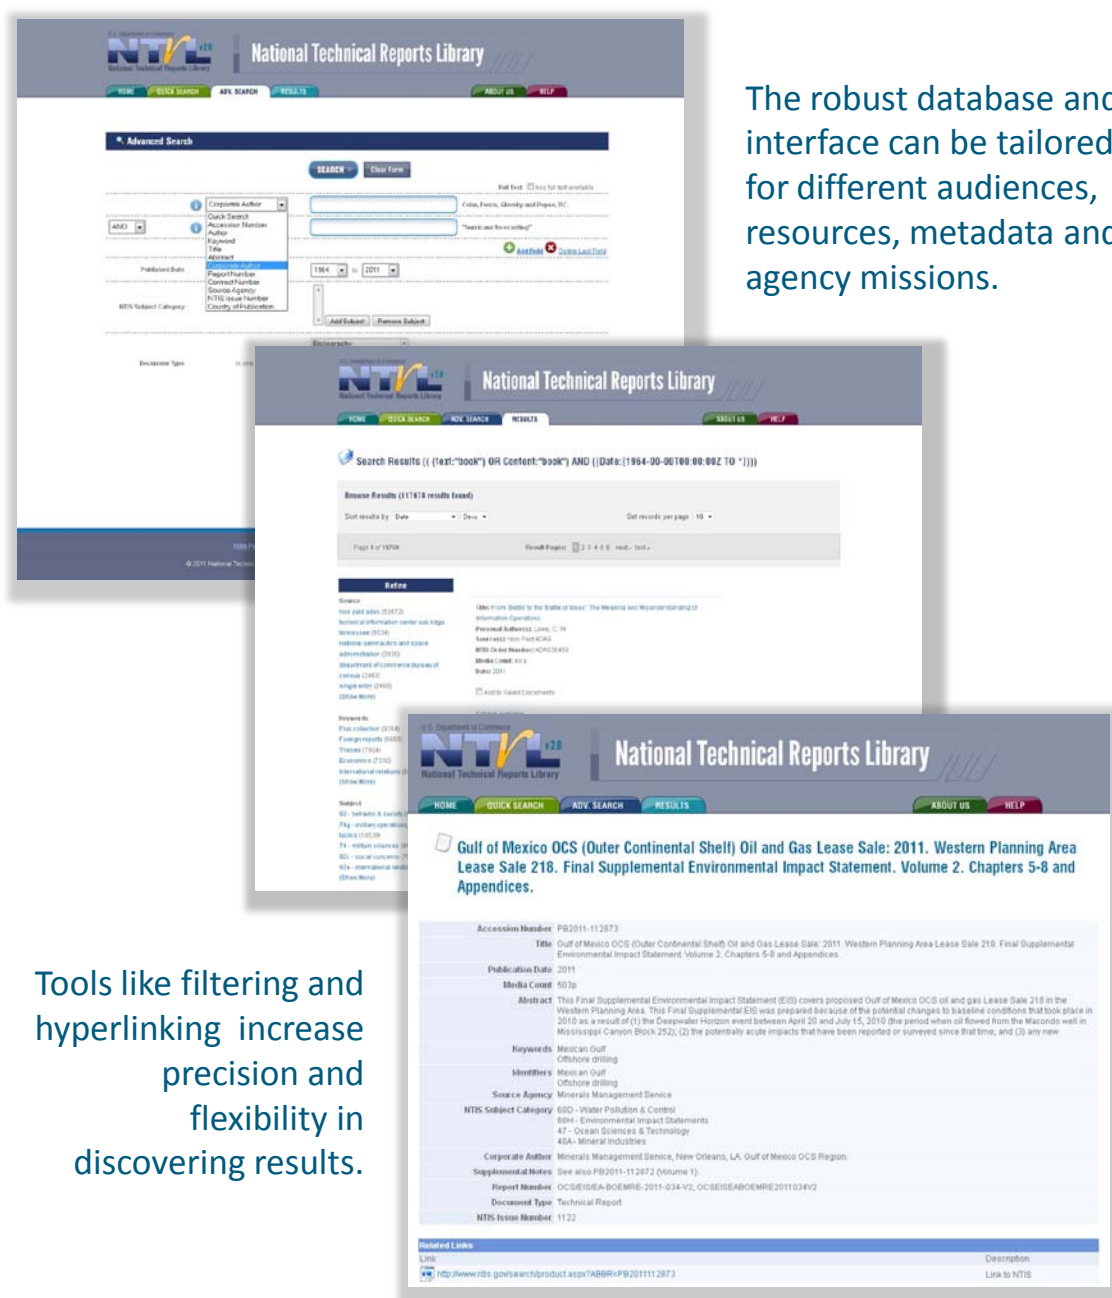

The FSRS develops user-friendly resource repositories that:

- Are durable against technology changes, yet flexible
- Are based on standards
- Promote interoperability
- Promote further use of an agency's content
- Support open government initiatives
- Support preservation and long-term access
- Can be tailored to an agency's needs

Federal Science Repository Service

Repository Development

The first two FSRS repositories will come online by early 2012, including the latest version of the **National Technical Reports Library (NTRL)**, consisting of 2+ million metadata records for federally funded technical reports and almost 700,000 objects.

The robust database and interface can be tailored for different audiences, resources, metadata and agency missions.

Tools like filtering and hyperlinking increase precision and flexibility in discovering results.

The FSRS enhances resources by supporting links to related resources – inside or outside the repository.

More tools like RSS feeds and geospatial search are being added.

With multiple agencies participating in the FSRS, development costs of new, common tools and services can be shared.

Special Collections

The FSRS allows agencies to create Special Collections across repositories.

- » An "FSRS Core" metadata schema, mapped to the agency's metadata, supports interoperability.
- » Flexible access control mechanisms allow agencies to designate resources as open access, internal use only, or to be shared with other repositories or agencies.
- » Agencies can partner to showcase overarching collections within specially designed interfaces.

Example - the NOAA Deepwater Horizon Repository

The National Oceanic & Atmospheric Administration (NOAA) is utilizing the FSRS to create the Deepwater Horizon Repository – a collection of documents, images, videos, maps, and other resources from multiple NOAA programs and other agencies.

New Frontiers

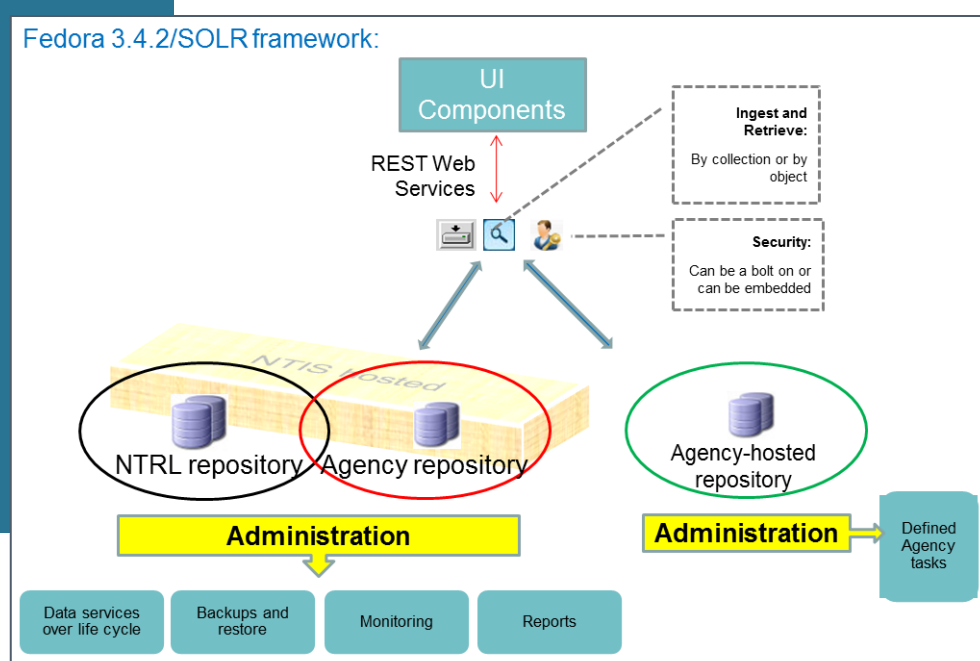

The FSRS design allows communities to preserve, enhance, and share their resources. Each repository and special collection provides new ways to discover and explore Federal science data and information.

For questions about the **Federal Science Repository Service** contact:

National Technical Information Service
Bill McGahey, Communications Contact Center
Phone: 703-605-6588
bmcahey@ntis.gov

The common, underlying infrastructure allows hosting and preservation of resources via NTIS, or access to resources housed at agencies.

The FSRS provides a variety of data models and of security, access control and other components, offering flexibility in design.
