

**State Clean Energy/Environment Technical Forum  
May 16, 2006**

**Fr: Jon Wellingshoff, Attorney, Beckley Law**  
**RE: Nevada's EE performance targets**

Below are the links to three sites that contain documentation regarding the Nevada Renewable Portfolio Standard (RPS). The first link is the statute (AB 3) that was enacted in June 2005 that incorporated energy efficiency into the Nevada RPS. The second link is the docket in which the Nevada Public Utilities Commission (PUCN) initiated a rulemaking proceeding to implement the statute. The third link is the final regulation that was enacted by the PUCN to implement the statute. My presentation will present the policy considerations behind the statute's enactment, discuss the language of the statute and consideration in drafting and passage, and then conclude with a discussion of the regulations and issues related to statutory implementation. I will also provide some information as to impacts of the statute on utility DSM Programs.
