

MILITARY SEALIFT COMMAND SAFETY & OCCUPATIONAL HEALTH POLICY

Safety is for all hands, and ensuring the safety of our shipmates and shoreside personnel is the responsibility of the entire Military Sealift Command Team.

Our comprehensive Safety Program provides safeguards for the protection of our people and material assets. It is designed to be customer-oriented, technically proficient and cost effective. It supports operational readiness by maintaining safe and healthy working conditions.

The Safety Program promotes safety awareness, hazard reporting, and operational risk management. It ensures high quality safety and occupational health training, well designed and maintained equipment and approved operating procedures.

Mishaps and occupational illnesses are avoidable and a waste of human and material resources. Our goal is to achieve a near-term target of ZERO Class A Mishaps with an ultimate target of no mishaps or occupational injuries or illnesses.

SAFETY IS A WAY OF LIFE AND HOW WE DO BUSINESS AT MSC.

G. S. HOLDER

Rear Admiral, U.S. Navy
