NRC ANNOUNCES OPPORTUNITY TO REQUEST A HEARING ON LICENSE RENEWAL APPLICATION FOR WOLF CREEK NUCLEAR POWER PLANT

The Nuclear Regulatory Commission is announcing the opportunity to request a hearing on an application to renew the operating license for the Wolf Creek nuclear power plant for an additional 20 years.

The Wolf Creek Generating Station is a pressurized water reactor located approximately three miles northeast of Burlington, Kan. The current operating license expires March 11, 2025. The applicant, Wolf Creek Nuclear Operating Corp., submitted the renewal application Oct. 4. The application is available on the NRC Web site at this address:

<http://www.nrc.gov/reactors/operating/licensing/renewal/applications.html> .

The NRC staff has determined that the application contains sufficient information for the agency to formally “docket,” or file, the application and begin its technical review. Docketing the application does not preclude requesting additional information as the review proceeds; nor does it indicate whether the Commission will grant the application.

A notice of opportunity to request a hearing will be published soon in the *Federal Register*. The deadline for requesting a hearing is 60 days following publication. Petitions may be filed by anyone whose interest may be affected by the license renewal and who wishes to participate as a party in the proceeding.

NRC staff will conduct two public meetings Dec. 19 in the vicinity of the plant to discuss the license renewal process and the scope of the agency’s environmental review for the license renewal application. More information about that meeting is contained in the *Federal Register* notice, and an additional announcement will be made closer to the date.

A request for hearing and a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001, Attention: Rulemaking and Adjudications Staff. Requests may also be submitted by facsimile to (301) 415-1101 or e-mail to HEARINGDOCKET@nrc.gov . A copy should also be submitted to the NRC Office of General Counsel, by facsimile to (301) 415-3725 or e-mail to OGCMailCenter@nrc.gov .

Information about the license renewal process can be found on the NRC Web site at <http://www.nrc.gov/reactors/operating/licensing/renewal.html> . An NRC review schedule for the Wolf

Creek nuclear plant will also be posted on the NRC Web site which will identify the deadline for requesting a hearing.
