

# INFRARED Inspection

## For System Maintenance and Energy Audits

**March 20-21, 2013**  
**8:00 a.m. to 5:00 p.m.**

**Heartland Consumers Power District**  
**432 SE 12th Street**  
**Madison, S.D.**

This two-day workshop for energy auditors and systems maintenance professionals features hands-on instruction in using infrared thermographic imaging equipment.

- Get to know your camera or explore different makes, models and software.
- Discover techniques for getting the most information from IR inspections.
- Sharpen your audit skills in a real-world setting.

Members of Building Performance Institute and InterNACHI will receive certified education units for attending this training.

The Snell Group, thermography training experts with decades of industry experience, will conduct the class.
