Env. Document Type: Solid Waste Correspondence

November 29, 2005

Mr. Larry Cook, Manager
Environmental Assistance Center
Division of Solid Waste Management
Tennessee Department of Environment
and Conservation
2700 Middlebrook Pike, Suite 220
Knoxville, Tennessee 37921-5602

SUBMITTAL OF HYDROGEOLOGIC REPORT – KINGSTON FOSSIL PLANT (KIF) –
PENINSULA SITE

Dear Mr. Cook:

Please find enclosed three copies of the Hydrogeologic Evaluation Report for the KIF –
Peninsula Site. It is anticipated that the completed Part II Application Package will be
submitted in Spring 2006.

Please contact Mr. Amos L. Smith at (423) 751-3522 in Chattanooga, Tennessee, if you
have questions concerning this correspondence.

Sincerely,

Gordon G. Park
Manager of Environmental Affairs

Subject: Proposal - rev 1

Hi Ron:

Please find attached revision 1 of our proposal incorporating the modifications we discussed this morning. In summary, we will include a discussion of rim ditch operations in the 10 Percent Design meeting; and we will assume the use of imported stone as a drainage media in place of bottom ash.

We really appreciate this opportunity Ron and look forward to working with you. Please let me know if there is anything else we can do to help. I also have our M&E group working up a proposal for you for the detailed design of piping, pumps and electrical design for the stormwater piping as discussed in the December 9 meeting. I should have this to you on Monday for review.

Thanks
Neil
