These are the locations of piezometers that we will have to get surveyed in Phase IB of the KIF Gypsum Stacking project (along with a field survey of the tree covered areas) located within the peninsula area.

Cherie,

Here are the locations of the piezos. A bit grainy but should work to get oriented in the field.

Thanks!

Amos

Subject: KIF Oil Containment construction estimate.doc

Ted-

This is the scope of the construction estimate for L.E. Myers. We have it split in several parts due to ownership of electrical equipment (TPS and FPG) and we also foresee that we may have to split construction of this project into two fiscal years due to budget constraints. We asked to have the estimate back by 3/21.

Also, note from the drawings that procurement is by TPS except for purchase of mobile spill containment (by FPG) and we will have to coordinate with the TVA Recovery Group to have the insulating oil tanks retired. Those will not be included in L.E. Myers scope.

Cherie

Subject: Some additional changes to KIF Gypsum Stack proposal - Parsons PR-0637

Based on verbal authorization from Lynn, we are working on the 2 concepts for the gypsum stack at the ash disposal area. We've noticed that there are some slight differences in the shape of the base of the ash stack versus design (certainly not unexpected). We are massaging the design contours slightly to match existing, in order to establish a baseline for the ash stack for use in determining the volume for the gypsum in the second concept (gypsum piled against the ash stack). I've revised the draft SOW for that and a couple of other things. Its not in edit mode, but I manually highlighted in red some changes (one item was just moved), and struck out a sentence somewhere else.

Attached is the revised text. Please take a minute to review this morning if possible and let me know if this is ok. If so, I will try to get the formal proposal over to you late today or Monday. I plan on being at Kemper Mon-Wed next week. If you need to reach me today, I'm in Oak Ridge at 865.220.4528.

Thanks

Ted-

FYI....This is in relation to the KIF Gypsum Stack project. I will update you on this project this afternoon.

Thanks,
Cherie
