KINGSTON FOSSIL PLANT - COAL YARD RAINFALL RUNOFF PUMP/POND STUDY

As agreed in the September 15 meeting, Darrell Howard contacted plant personnel concerning further discussions on the subject study. After considering the merits of both a conference call and a face-to-face meeting, they requested that we meet again at the plant to further discuss design and cost aspects of the project.

The meeting is scheduled for Monday, September 26, at 9:00 a.m. at the plant. Please send representatives from Fossil Engineering and Cost Estimating who are familiar with details of the proposed study package and cost estimates.

If you have any questions, please call me at 751-4446 or Kevin Casey at 8626.
