Coal Combustion Byproduct Disposal Facility
Kingston Fossil Plant
RFP-20071022
CTI Proposal No. CP7096

Dear Ms. Thomas:

Enclosed are materials documenting our qualifications to perform the services described in RFP 20071022, dated October 31, 2007. In response to your RFP, Tab A contains introductory information and signed certifications.

Tab B includes lists of relevant experience indicating the successful completion of projects involving solid waste facilities, storm water ponds, pumping systems, site work, and access roadways. Our performance on these projects can be verified by the references listed in this section.

CTI's proposed project manager, Mr. Taylor Stein, P.E., has managed hundreds of acres of landfill projects. Almost all of CTI's landfill experience is in southeast Tennessee and northwest Georgia, which have geologic conditions similar to those found at Kingston. Storm water ponds and access roads are an integral part of the vast majority of these jobs. Project team member Amos Smith, P.G., worked in FPG Environmental Affairs at TVA for over 5 years before returning to CTI.

Finally, Tab C contains the requested information on pricing, financial strength, and subcontracting.

We feel confident that we can provide unparalleled service on this project because of our team's expertise with solid waste, storm water, and site projects; our proximity to TVA; and our knowledge of TVA's processes and procedures. We welcome the opportunity to meet with you concerning the project. Please contact us if additional information is needed.

Sincerely,

Gary M. Cosby, P.E.
President
