RE: Kingston Fossil Plant Ash Disposal Area (IDL 73-0094) Resample Results
Monitoring Well 6A

Dear Mr. Park:

The Division concurs with the re-sampling report dated March 2, 2006. There have been no detections of silver in the waste or from leachate samples collected in situ at the site. If turbidity continues to be an issue at well 6A, you may consider re-working the well. The site shall remain in detection monitoring.

If you should have any questions about my review, please feel free to call me at (865) 594-5464.

Respectfully,

A handwritten signature in black ink, appearing to read "David Fugate".
