RE: KIF Interim Drainage Plan

Tom,

You are correct. The tress along Dike C will not be disturbed per the areal sent on the first revision. I will get the latest narrative corrected and resent.

Thank you,

Subject: Re: KIF Interim Drainage Plan

Cynthia, I had an opportunity this weekend to look closely at this revisions to the plan and found that the photo Figure 1 showing potential tree clearing still shows the island adjacent to Dike C in the circle depicting tree removal. I want to remind you and other at TVA that EPA still does not agree with clearing of trees in the area of Dike C at the island. As we discussed in our meeting on 3/11/09, the trees on this island are presently being used by great blue herons for nesting

and should be avoided and that if any clearing of riparian area is necessary along Dike C it will be limited to the face of the dike. The remainder of the plan is in compliance with our discussions and agreements on 3/11/09. Let me know if you have any questions. Thanks.

KIF Interim Drainage Plan

Good Morning,

Attached is the updated narrative for the Interim Drainage Plan. Minor edits to the narrative have been made based on design changes incorporated in the drawings and calculations submitted March 25, 2009. Please let me know if there are any questions concerning the revised narrative. Could you please let me know the status of approval of the Interim Drainage Plan by TDEC and EPA?

Thank you,

Cynthia M. Anderson
