

AFSC/ABL: Ugashik sockeye salmon scale time series

Theme keywords: Biota, 002, Sockeye salmon, *Oncorhynchus nerka*, age, growth, scale

Abstract: A time series of scale samples (1956 – 2002) collected from adult sockeye salmon returning to Ugashik River were retrieved from the Alaska Department of Fish and Game. These scales were digitized, revealing growth information for the freshwater and marine life history stages of sockeye salmon. The growth information will be related to time series of sockeye salmon production to Bristol Bay and oceanographic conditions within the Bering Sea and North Pacific Ocean.

Description:**Abstract:**

A time series of scale samples (1956 – 2002) collected from adult sockeye salmon returning to Ugashik River were retrieved from the Alaska Department of Fish and Game. These scales were digitized, revealing growth information for the freshwater and marine life history stages of sockeye salmon. The growth information will be related to time series of sockeye salmon production to Bristol Bay and oceanographic conditions within the Bering Sea and North Pacific Ocean.

Purpose:

This dataset contains data on sockeye salmon growth derived from scale analysis.

Time period of content:**Time period information:****Range of dates/times:**

Beginning date: 1956

Ending date: 2002

Currentness reference:

ground condition

Status:

Progress: Complete

Maintenance and update frequency: Not planned

Spatial domain:**Description of geographic extent:**

Ugashik River system in Bristol Bay, Alaska

Bounding coordinates:

West bounding coordinate: -157.738283

East bounding coordinate: -157.00945

North bounding coordinate: 57.659567

South bounding coordinate: 57.303217

Applicable common names: sockeye

salmon

Access constraints: Contact the Point of Contact for access constraints if none are provided.

Use constraints:

User must read and fully comprehend the metadata prior to use. User must acknowledge the Originator when using the data set as a source. User must share data products developed using the source data set with the Originator. Data should not be used beyond the limits of the source scale.
