

**National Science Foundation FY 2012  
Service Contract Inventory Planned Analysis Report**

December 26, 2012

## NSF FY 2012 Service Contract Inventory Planned Analysis Report

This National Science Foundation (NSF) report responds to the Office of Management and Budget's Office of Federal Procurement Policy (OFPP) request to submit to OFPP a planned analysis identifying which special interest functions in its FY 2012 inventory will be evaluated for analysis. This submission provides the list of PSCs, dollars obligated for those PSCs in FY 2012, and a brief description of the rationale for selection.

NSF plans to analyze the functions under PSC R707 and D307. NSF Obligations in FY 2012 under PSC R707 totaled \$316,405 and D307 totaled \$214,459. These functions are being chosen since they are the remaining special interest items with obligations that have not been analyzed yet.
