January	February 17	April	May 13

## CONSUMER PRICE MOVEMENTS OCTOBER 2010

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.2 percent in October on a seasonally adjusted basis, the U.S. Bureau of Labor Statistics reported today. Over the last 12 months, the all items index increased 1.2 percent before seasonal adjustment.

As has frequently been the case in recent months, an increase in the energy index was the major factor in the all items seasonally adjusted increase. The gasoline index rose for the fourth month in a row and accounted for almost 90 percent of the all items increase; the household energy index rose as well. The food index rose slightly in October with the food at home index unchanged.

The index for all items less food and energy was unchanged in October, the third month in a row with no change. The indexes for shelter and medical care rose, but these increases were offset by declines in an array of indexes including new vehicles, used cars and trucks, apparel, recreation, and tobacco.

Over the last 12 months, the index for all items less food and energy has risen 0.6 percent, the smallest 12-month increase in the history of the index, which dates to 1957. The energy index has risen 5.9 percent over that span with the gasoline index up 9.5 percent. The food index has risen 1.4 percent, with both the food at home index and food away from home index rising the same 1.4 percent.

### Consumer Price Index Data for October 2010

#### Food

The food index rose 0.1 percent in October after a 0.3 percent increase in September. The index for food away from home rose 0.1 percent while the food at home index was unchanged. Among the six major grocery store food groups that comprise the food at home index, the index for dairy and related products posted the largest increase, rising 1.1 percent. This was its fifth increase in the last six months and its largest since January. The index for meats, poultry, fish, and eggs also rose, increasing 0.6 percent as increases in the indexes for beef, poultry, and pork offset a decline in the eggs index. These increases offset declines in the remaining food at home groups. The fruits and vegetables group posted the largest decline, falling 0.7 percent, while the index for nonalcoholic beverages fell 0.5 percent. The indexes for cereals and bakery products and for other food at home both fell 0.2 percent. Over the past

year, the indexes for cereals and bakery products and for nonalcoholic beverages have declined, while the index for other food at home was unchanged and the indexes for the remaining three groups have risen.

## Energy

The energy index rose 2.6 percent in October, its fourth consecutive monthly increase. The gasoline index rose 4.6 percent in October after rising 1.6 percent in September. (Before seasonal adjustment, gasoline prices rose 3.3 percent in October.) The household energy index, which declined in September, rose in October, increasing 0.4 percent. The natural gas index fell 0.4 percent, but this decline was more than offset by a 0.4 percent increase in the electricity index and a 4.7 percent rise in the index for fuel oil. The indexes of all the major energy components have risen over the last 12 months.

## All items less food and energy

The index for all items less food and energy was unchanged in October for the third month in a row. After being unchanged the previous two months, the shelter index rose 0.1 percent in October. The indexes for rent and owners' equivalent rent both increased 0.1 percent while the index for lodging away from home declined 1.0 percent. The medical care index, which rose 0.6 percent in September, rose 0.1 percent in October, with the medical care commodities index rising 0.1 percent and the index for medical care services increasing 0.2 percent. Within the medical care services component, the index for physicians' services fell 0.1 percent but the hospital services index increased 0.7 percent. Offsetting these increases were declines in several indexes. The index for used cars and trucks fell 0.9 percent in October, its second straight decline after a long series of increases. The index for new vehicles fell as well, declining 0.2 percent. The apparel index fell 0.3 percent in October, its third straight decline. The recreation index fell for the fourth month in a row, decreasing 0.1 percent, and the index for tobacco fell for the first time since February, declining 0.3 percent.

The index for all items less food and energy increased 0.6 percent over the last 12 months. Several transportation indexes have increased; the index for used cars and trucks has risen 8.6 percent, while the new vehicles index has edged up 0.4 percent and the index for airline fares has risen 4.4 percent. The medical care index has also increased, rising 3.4 percent. Indexes that have declined over the past year include shelter, which has fallen 0.3 percent, household furnishings and operations (down 2.5 percent), apparel (down 1.2 percent), and recreation (down 1.0 percent).

## Not seasonally adjusted CPI measures

The Consumer Price Index for All Urban Consumers (CPI-U) increased 1.2 percent over the last 12 months to an index level of 218.711 (1982-84=100). For the month, the index rose 0.1 percent prior to seasonal adjustment.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) increased 1.5 percent over the last 12 months to an index level of 214.623 (1982-84=100). For the month, the index rose 0.1 percent prior to seasonal adjustment.

The Chained Consumer Price Index for All Urban Consumers (C-CPI-U) increased 1.0 percent over the last 12 months. For the month, the index rose 0.2 percent on a not seasonally adjusted basis. Please note that the indexes for the post-2008 period are subject to revision.

## The Consumer Price Index for November 2010 is scheduled to be released on Wednesday, December 15, 2010, at 8:30 a.m. (EST).

In January 2011, the following series will be re-titled:

- Recreation services will become Other recreation services
- Gas (piped) and electricity will become Energy services
- Canned fish and seafood will become Shelf stable fish and seafood

The Recreation services index does not include all services under the major group Recreation, specifically video and audio related services, pet services, and photography and film services are excluded. The new title, Other recreation services, will reflect these exclusions.

Gas (piped) and electricity has been presented as Energy services in Table A of the CPI News Release since August 2009. At that time, the format text of the News Release was updated to focus on Food, Energy, and All items less food and energy instead of the major groups (Food, Housing, Apparel, Transportation, Medical care, Education and communication, Recreation, and Other goods and services). The title will be changed in the remainder of the publication tables in January 2011 to improve consistency.

The title for Canned fish and seafood will change to Shelf stable fish and seafood to better reflect current packaging methods.

### CPI-U 12-Month Changes, 2000 to Present

## Current Price Topics: The Use of the CPI in Social Security Cost-of-Living Adjustments (COLAs)

More than 50 million people currently receive Social Security benefits.<sup>1</sup> In 1972, Congress passed legislation tying Social Security cost-of-living adjustments (COLAs) to changes in the Consumer Price Index. Specifically, these COLAs are based on the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W), All Items, from the third quarter of one year to the third quarter of the next year.

*COLA effective for 2009.* The third quarter average 2007 CPI-W, All Items index stood at 203.596. The CPI-W average for the third quarter of 2008 was 215.495, an increase of 5.8 percent. (See table 1.) This 5.8-percent cost-of-living increase, which became effective in 2009, was the highest COLA in more than 25 years. The steep rise was due to both sharply higher gasoline prices, which climbed 35.2 percent from the third quarter of 2007 to the third quarter of 2008, and higher prices for food, which increased 6.2 percent over the same period.

Table 1. CPI-W, All Items, third-quarter averages, 2007-10

Year	July	August	September	Third-quarter average	Percent change from previous third quarter	Cost-of-living adjustment (percent)
2007	203.700	203.199	203.889	203.596		
2008	216.304	215.247	214.935	215.495	5.8	5.8
2009	210.526	211.156	211.322	211.001	-2.1	0.0
2010	213.898	214.205	214.306	214.136	1.5	0.0

*COLA effective for 2010.* From the third quarter of 2008 to the third quarter of 2009, the CPI-W actually *fell* 2.1 percent, due in large part to gasoline prices, which dropped 32.5 percent over that period. This was the first time the CPI-W, All Items index had fallen since Social Security COLAs were tied to the CPI. When the CPI-W falls, Social Security benefits do not fall. Instead, they remain unchanged.<sup>2</sup> For this reason, there was no COLA for 2010.

*COLA effective for 2011.* In the third quarter of 2010, the CPI-W stood at 214.136. Although this was higher than the 2009 third-quarter CPI-W average of 211.001, Social Security recipients will not receive a COLA in 2011. This is because, by legislation, the CPI-W must exceed its previous third-quarter peak, recorded in 2008, in order for there to be a positive COLA the next year. Put another way, because the third-quarter 2010 CPI-W level of 214.136 did not exceed its previous peak of 215.495 in 2008, there will be no automatic COLA in 2011.<sup>3</sup>

## Current Price Trends: Rise in Energy Prices Drives Third-Quarter Retail Inflation Picture

### All Items

The Consumer Price Index for All Urban Consumers (CPI-U), All Items, increased at a 2.7-percent seasonally adjusted annual rate (SAAR) during the third quarter of 2010. For the first 9 months of 2010, the index has increased at a 0.7-percent SAAR, compared with a rise of 2.7 percent in 2009.

A turnaround in the energy index was the main cause of the third quarter upturn in the all-items index. The energy index increased at a 24.5-percent annual rate in the third quarter, after falling sharply in the second quarter. The index, which rose significantly in 2009, continued to climb in the first 9 months of 2010, but at a more modest pace. Inflation for the index for all items less food and energy continued to decelerate, with the increase for 2010 rising at one-third the rate posted in 2009. In contrast, the food index has risen modestly in 2010 after declining in 2009.

### Energy

Energy remained the most volatile major CPI component. After climbing at a 9.2-percent SAAR in the first quarter of 2010 and declining at a 25.7-percent SAAR in the second quarter, the energy index jumped 24.5 percent in the third quarter. (See chart 1.) For the first 9 months of 2010, the energy index has risen at a 0.4-percent SAAR, after increasing 18.2 percent in all of 2009.

Within the energy component, the gasoline index increased at a 48.8-percent SAAR in the third quarter of 2010, after falling at a 38.9-percent SAAR in the second quarter. This trend continues the sharp changes seen in gasoline prices over the past few years. From July 2007 to July 2008, gasoline prices rose 37.9 percent. After crude oil prices peaked in July 2008 at more than \$134 a barrel, they plummeted during the last 5 months of that year, to under \$32 a barrel. At the retail level, gasoline prices fell by more than 50 percent.

Chart 1. CPI-U percent changes: All Items, food, energy, and all Items less food and energy for 2009, first, second and third quarters, 2010.

Percent change

In 2009, pump prices turned sharply higher again, increasing more than 50 percent, with crude oil prices increasing to around \$70 a barrel by the end of 2009.

The household energy index rose at a 1.9-percent SAAR in the third quarter of 2010, after falling 10.1 percent in the second quarter. All the major components of household energy rose in the third quarter. The natural gas index rose at a 1.8-percent SAAR in the third quarter, after declining at a 17.7-percent SAAR in the second quarter. For the first three quarters of 2010, the natural gas index increased at a 2.9-percent annual rate, after falling 18.1 percent in 2009. The electricity index rose 2.0 percent in the third quarter of 2010, identical to its first-quarter performance, but was down 7.1 percent in the second quarter. Electricity prices had declined 0.5 percent in 2009. The fuel oil index increased 0.1 percent in the third quarter of 2010, after falling at an 8.9-percent rate in the second quarter.

## Food

Food prices rose at a 1.6-percent SAAR in the third quarter of 2010, after rising 0.6 percent in the second quarter. The food index has increased 1.5 percent so far in 2010, after slipping 0.5 percent in 2009. Grocery store food prices rose at a 1.2-percent SAAR in the third quarter, after a flat second quarter and an increase of 3.7 percent in the first quarter. Of the six major grocery store food

groups, the meats, poultry, fish, and eggs group increased the most in the third quarter, 3.2 percent. Prices for a variety of breakfast items climbed significantly in the third quarter, with coffee and egg prices up at SAARs of 13.0 percent and 32.8 percent, respectively. In addition, prices for bacon and breakfast sausage rose 29.6 percent. Most of the other food at home groups posted modest increases in the third quarter of 2010. Cereals and bakery products rose 2.3 percent, dairy products increased 2.2 percent, nonalcoholic beverages were up 2.1 percent, and other food at home increased 1.8 percent. In contrast, fruits and vegetables fell at a 5.7-percent SAAR in the third quarter, with fresh fruits falling 10.7 percent. Within fresh fruits, apple prices were down 21.2 percent and oranges fell 21.3 percent. These decreases more than offset an 8.6-percent increase in the banana index. The index for fresh vegetables decreased at a 2.5-percent SAAR in the third quarter, with lettuce falling 13.5 percent.

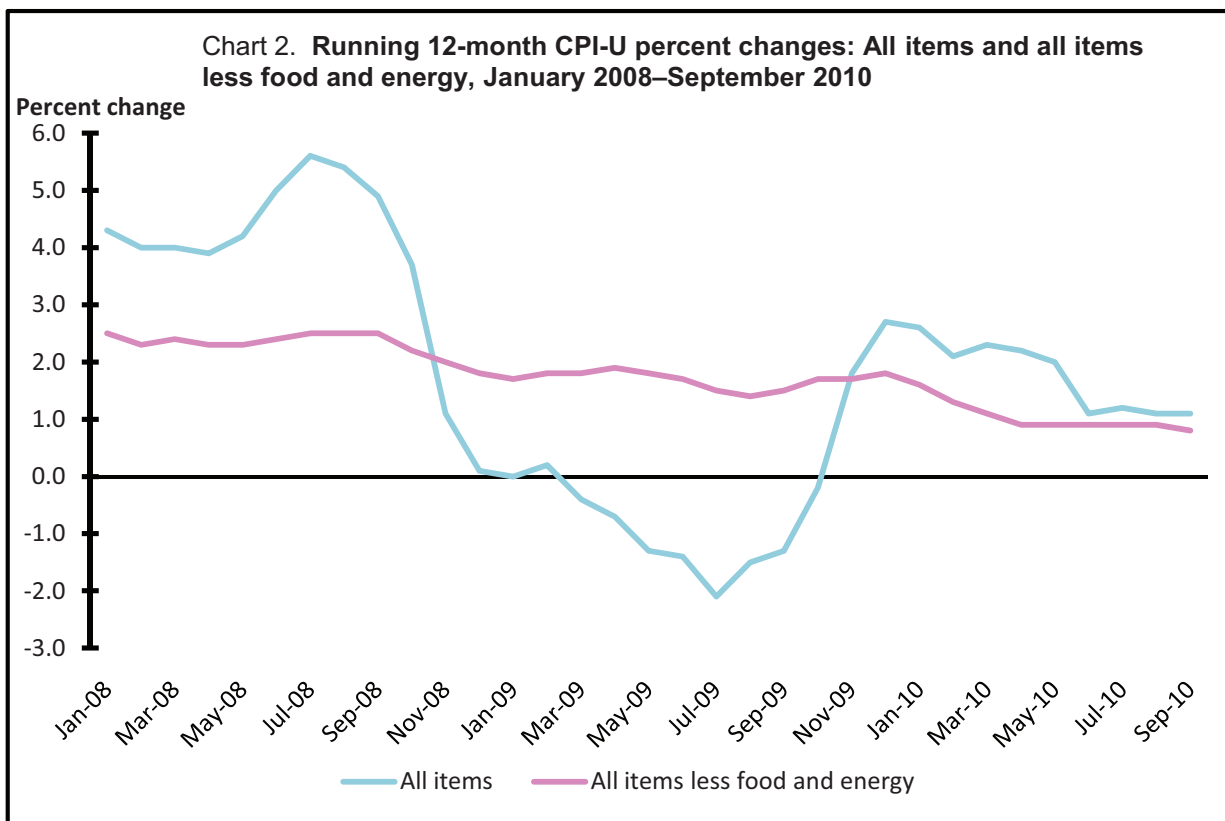

Prices for food away from home rose at a 2.3-percent SAAR in the third quarter, after rising at a 1.4-percent rate in the second quarter. Food at employee sites and schools jumped 9.2 percent in the third quarter of 2010, after more modest increases earlier in the year.

Both grocery store prices and the index for food away from home were up 1.4 percent over the past 12 months.

### All items less food and energy

The index for all items less food and energy rose at a 0.7-percent SAAR in the third quarter of 2010, nearly half the 1.3-percent rate of increase recorded in the second quarter. This index had fallen at a 0.2-percent annual rate in the first quarter. The shelter index decelerated as well, increasing 0.4 percent in the third quarter after a 0.9-percent increase in the second quarter. Shelter prices had fallen 2.2 percent in the first quarter of 2010. Within shelter, owner’s equivalent rent and rent of primary residence each rose at a 0.5-percent SAAR in the third quarter. Lodging away from home declined 5.1 percent in the third quarter, after a 23.1-percent spike in the second quarter.

The index for other goods and services rose at a 3.6-percent SAAR in the third quarter of 2010. Other significant components with increases included the medical care index, which grew 3.2 percent, and the index for new and used motor vehicles, which rose 1.8 percent. By contrast, declines in the third quarter were noted in apparel, which fell 0.9 percent, and recreation, which fell 2.3 percent. For the first time in many years, educational books and supplies fell; the drop in the third-quarter, 2010, SAAR was 3.8 percent. The index had increased 6.2 percent in the second quarter.

Household furnishings and operations declined 1.5 percent in the third quarter of 2010, compared with a 3.7-percent rate of increase in each of the previous two quarters. The index for airline fares reversed in the third quarter, falling 4.6 percent after a 14.3-

percent increase in the second quarter. The communication index was unchanged in the third quarter, after falling at a 1.3-percent rate in the second quarter.

The annual rate of inflation for all items less food and energy continued its deceleration in 2010. (See chart 2.) The 12-month percent change ending September 2010 was 0.8 percent, the smallest increase since March 1961. For the 5-year period from September 2004 to September 2009, this index had increased at a 2.2-percent annual rate.

The shelter index also has decelerated in recent years. The 12-month percent changes in shelter ending September 2006, 2007, 2008, and 2009 were 4.2 percent, 3.5 percent, 2.4 percent, and 0.7 percent, respectively. In 2010, shelter continues to pull down the index for all items less food and energy, with the current 12-month percent change for shelter standing at -0.4 percent. Other indexes contributing downward pressure on the annual index for all items less food and energy included household furnishings and operations, apparel, recreation, and communication. In contrast to prices for shelter, prices for used cars and trucks have increased 12.9 percent over the past 12 months.

*Price movements described in this text reflect data released on October 15, 2010. Except as noted, all 12-month-and-longer percent changes reflect data that were not seasonally adjusted. Percent changes covering less than a year are based on seasonally adjusted annual rates, unless otherwise noted. CPI seasonally adjusted indexes and percent changes are subject to annual revision.*

---

<sup>1</sup> See *Press Office Fact Sheet: Social Security Basic Facts* (U.S. Social Security Administration, Aug. 10, 2010), on the Internet at <http://www.ssa.gov/pressoffice/basicfact.htm> (visited November 1, 2010).

<sup>2</sup> That said, changes in Social Security benefits are potentially affected by factors other than COLAs, such as changes in Medicare premiums.

<sup>3</sup> More information on how the Social Security Administration uses the CPI to adjust benefits can be found in *Automatic Increases: Latest Cost-of-Living Adjustments* (U.S. Social Security Administration, Oct. 15, 2010), on the Internet at <http://www.ssa.gov/OACT/COLA/latestCOLA.html> (visited November 1, 2010).

<sup>1</sup> Not seasonally adjusted.

<sup>2</sup> Indexes on a December 1997=100 base.

<sup>3</sup> This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

<sup>4</sup> Indexes on a December 1982=100 base.

<sup>5</sup> In January, 2011, this series will be re-titled Energy services.

<sup>6</sup> Indexes on a December 1988=100 base.

<sup>7</sup> Indexes on a December 2007=100 base.

NOTE: Index applies to a month as a whole, not to any specific date.

**Table 3. Consumer Price Index for all Urban Consumers (CPI-U): U.S. city average, detailed expenditure categories**

<sup>1</sup> Not seasonally adjusted.

<sup>2</sup> Indexes on a December 1997=100 base.

<sup>3</sup> This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

<sup>4</sup> Indexes on a December 1984=100 base

<sup>5</sup> In January, 2011, this series will be re-titled Energy services.

<sup>6</sup> Indexes on a December 1988=100 base.

<sup>7</sup> Indexes on a December 2007=100 base.

NOTE: Index applies to a month as a whole, not to any specific date.

<sup>1</sup> Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

<sup>2</sup> Regions defined as the four Census regions. See map in technical notes.

<sup>3</sup> Indexes on a December 1996=100 base.

<sup>4</sup> Indexes on a December 1986=100 base.

<sup>5</sup> In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ;

Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

<sup>6</sup> Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

<sup>1</sup> Regions defined as the four Census regions. See map in technical notes.

<sup>2</sup> This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

<sup>3</sup> Indexes on a December 1982=100 base.

<sup>4</sup> In January, 2011, this series will be re-titled Energy services.

<sup>5</sup> Indexes on a December 1997=100 base.

<sup>6</sup> Special index based on a substantially smaller sample.

<sup>7</sup> Indexes on a December 1993=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

1 See region and area size on Table 10 for information about cross classifications.  
 2 Indexes on a December 1997=100 base.  
 3 The 'All items' index size B/C is on a December 1996=100 base.  
 4 This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.  
 5 Indexes on a December 1982=100 base.

6 In January, 2011, this series will be re-titled Energy services.  
 7 Special index based on a substantially smaller sample.  
 8 Indexes on a December 1993=100 base.  
 - Data not available.  
 NOTE: Index applies to a month as a whole, not to any specific date.

<sup>1</sup> Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

<sup>2</sup> Regions defined as the four Census regions. See map in technical notes.

<sup>3</sup> Indexes on a December 1997=100 base.

<sup>4</sup> Indexes on a December 1986=100 base.

<sup>5</sup> In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

NOTE: Index applies to a month as a whole, not to any specific date.

<sup>1</sup> This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

<sup>2</sup> Indexes on a December 1982=100 base.

<sup>3</sup> In January, 2011, this series will be re-titled Energy services.

<sup>4</sup> Special index based on a substantially smaller sample.

<sup>5</sup> Indexes on a December 1993=100 base.

<sup>6</sup> Indexes on a December 1997=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

<sup>1</sup> Areas on pricing schedule 1 (see Table 10) will appear next month.

<sup>2</sup> Index on a November 1977=100 base in Miami.

<sup>3</sup> This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

<sup>4</sup> Indexes on a December 1982=100 base.

<sup>5</sup> In January, 2011, this series will be re-titled Energy services.

<sup>6</sup> Special index based on a substantially smaller sample.

<sup>7</sup> Indexes on a December 1993=100 base.

<sup>8</sup> Indexes on a December 1997=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

<sup>1</sup> Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

- M - Every month.
- 1 - January, March, May, July, September, and November.
- 2 - February, April, June, August, October, and December.

<sup>2</sup> Regions defined as the four Census regions. See map in technical notes.

<sup>3</sup> Indexes on a December 1996=100 base.

<sup>4</sup> Indexes on a December 1986=100 base.

<sup>5</sup> In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ;

Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

- <sup>6</sup> Indexes on a November 1996=100 base.
- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

<sup>1</sup> See region and area size on Table 10 for information about population size classes.

<sup>2</sup> Indexes on a December 1986=100 base.

<sup>3</sup> Indexes on a December 1997=100 base.

<sup>4</sup> The 'All items' index size B/C is on a December 1996=100 base.

<sup>5</sup> This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

<sup>6</sup> Indexes on a December 1984=100 base

<sup>7</sup> In January, 2011, this series will be re-titled Energy services.

<sup>8</sup> Special index based on a substantially smaller sample.

<sup>9</sup> Indexes on a December 1993=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

<sup>1</sup> This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

<sup>2</sup> Indexes on a December 1984=100 base

<sup>3</sup> In January, 2011, this series will be re-titled Energy services.

<sup>4</sup> Special index based on a substantially smaller sample.

<sup>5</sup> Indexes on a December 1993=100 base.

<sup>6</sup> Indexes on a December 1997=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

<sup>1</sup> Areas on pricing schedule 1 (see Table 10) will appear next month.

<sup>2</sup> Index on a November 1977=100 base in Miami.

<sup>3</sup> This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

<sup>4</sup> Indexes on a December 1984=100 base

<sup>5</sup> In January, 2011, this series will be re-titled Energy services.

<sup>6</sup> Special index based on a substantially smaller sample.

<sup>7</sup> Indexes on a December 1993=100 base.

<sup>8</sup> Indexes on a December 1997=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

1 Indexes on a December 1997=100 base.  
 2 This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.  
 3 Indexes on a December 1984=100 base  
 4 Indexes on a December 1986=100 base.  
 5 In January, 2011, this series will be re-titled Energy services.  
 6 Indexes on a December 1983=100 base.  
 7 Indexes on a December 1990=100 base.  
 8 Indexes on a December 2001=100 base.  
 9 Special index based on a substantially smaller sample.

10 Indexes on a December 1993=100 base.  
 11 Indexes on a December 2009=100 base.  
 12 Indexes on a December 1996=100 base.  
 13 Indexes on a December 2005=100 base.  
 14 In January, 2011, this series will be re-titled Other recreation services.  
 15 Indexes on a December 1988=100 base.  
 16 Indexes on a December 2007=100 base.

Utilities and public transportation .....	1.4	3.2	3.2	9.0	.9	3.3	5.1	-1.0	1.2

<sup>1</sup> This index series was calculated using a Laspeyres estimator.  
All other item stratum index series were calculated using a geometric means estimator.

<sup>2</sup> In January, 2011, this series will be re-titled Energy services.

<sup>3</sup> Special index based on a substantially smaller sample.

<sup>4</sup> Indexes on a December 2009=100 base.

<sup>5</sup> Indexes on a December 2005=100 base.

<sup>6</sup> In January, 2011, this series will be re-titled Other recreation services.

<sup>7</sup> Indexes on a December 2007=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

**Table P1. Average residential prices for utility (piped) gas, electricity, and fuel oil, U.S. city average and selected areas**

Area, region and population size class	Utility (piped) gas				Electricity		Fuel oil #2	
	per 40 therms		per 100 therms		per 500 KWH		per gallon (3.785 liters)

NOTE: Index applies to a month as a whole, not to any specific date.

# Technical Notes

## Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time of goods and services purchased by households. The U.S. Bureau of Labor Statistics (BLS) publishes CPIs for two population groups: (1) The CPI for Urban Wage Earners and Clerical Workers (CPI-W), which covers households of wage earners and clerical workers that comprise approximately 32 percent of the total population and (2) the CPI for All Urban Consumers (CPI-U) and the Chained CPI for All Urban Consumers (C-CPI-U), which cover approximately 87 percent of the total population and include, in addition to wage earner and clerical worker households, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPIs are based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected in 87 urban areas across the country from about 50,000 housing units and approximately 23,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected every month in the three largest geographic areas and every other month in other areas. Prices of most goods and services are obtained through personal visits or telephone calls by BLS trained representatives.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. For the CPI-U and CPI-W, separate indexes also are published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 27 local areas. Area indexes do not measure differences in the level of prices among cities; they measure only the average change in prices for each area since the base period. For the C-CPI-U, data are issued only at the national level. It is important to note that the CPI-U and CPI-W are considered final when released, but the C-CPI-U is issued in preliminary form and is subject to two annual revisions.

The index measures price change from a designated reference date. For the CPI-U and the CPI-W, the reference base is 1982–84 = 100.0. The reference base for the C-CPI-U is December 1999=100.0. An increase of 16.5 percent from the reference base, for example, is shown as 116.5. This change also can be expressed in dollars as follows: the price of a base-period market basket of goods and services in the CPI has risen from \$10 in 1982–84 to \$11.65.

For further details, visit the CPI homepage on the Internet at <http://www.bls.gov/cpi> or contact our CPI Information and Analysis Section at (202) 691-7000.

### Calculating index changes

Movements of the indexes from one month to another usually are expressed as percent changes, rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, whereas percent changes are not. The example shown in the box on this page illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

#### *Index point change*

CPI	202.416
Less previous index	201.800
Equals index point change	.616

#### *Percent change*

Index point difference	.616
Divided by the previous index	201.800
Equals	0.003
Results multiplied by one hundred	0.003 x 100
Equals percent change	0.3

## Regions defined

The states in the four regions are listed below.

The Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New York, New Jersey, Pennsylvania, Rhode Island, and Vermont.

The Midwest--Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

The South--Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia, and the District of Columbia.

The West--Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

## Energy prices

Prices usually are available for the U.S. city average, 13 large metropolitan areas, the 4 census regions, 3 size classifications, and 10 areas reflecting the 4 census regions cross-classified by the 3 population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA appears. This designation also appears if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices are collected monthly by BLS representatives in the urban areas priced for the CPI. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

*Natural gas and electricity.* Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P2 are the upper and lower limits of the bill sizes priced for the CPI. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI not only are for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.* The average prices for 40 and 100 therms of natural gas, and for 500 kilowatt hours of electricity (shown in table P1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Because heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised CPI.

*Fuel oil.* Only #2 fuel oil (home heating oil) is priced. (See table P1.) Prices are collected, in most cases, for quantities greater than 1 gallon. These prices are converted to a gallon price for this program. Fuel oil prices reflect discounts for quantity or quick payment.

*Gasoline and automotive diesel fuel.* Gasoline and diesel prices, shown in table P3, are collected at the pump from a sample of full service, miniservice, and self-service gas stations. Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTUs (U.S. Department of Energy)

1 kwh = 3,412 BTUs (Edison Electric Institute)

1 gallon #2 fuel oil = 140,000 BTUs (U.S. Department of Energy)

## Food and beverage prices

Actual weighted average prices for food and beverages are calculated each month at the national level and for the four census geographic regions, as shown in table P4. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot, in general, be produced. It is hoped, however, that regional average prices will help to satisfy the need for local area data. It should be noted that the average prices for food in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary

disruptions in supplies. Where no average prices are available, the designation NA appears. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. For cases in which the proportion of estimated prices used to calculate the average is considered too high, the average price is not published, and NA appears for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. Detailed specifications are available from BLS information offices or from the Washington office, upon request.

### **Seasonally adjusted and unadjusted data**

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year--such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index before adjustment for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. Seasonally adjusted indexes and seasonal factors are computed annually. Each year, the last 5 years of seasonally adjusted data are revised. Data from January 2005 through December 2009 were replaced in January 2010. Exceptions to the usual revision schedule were: the updated seasonal data at the end of 1977 replaced data from 1967 through 1977; and, in January 2002, dependently seasonally adjusted series were revised for January 1987-December 2001 as a result of a change in the aggregation weights for dependently adjusted series. For further information, please see "Aggregation of Dependently Adjusted Seasonally Adjusted Series," in the October 2001 issue of the [CPI Detailed Report](#).

The seasonal movement of all items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 73 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used in the aggregation of the dependent series for the last 5 years, but the seasonally adjusted indexes will be used before that period. Note: 46 of the 73 components are seasonally adjusted for 2010.

Seasonally adjusted data, including the all items index levels, are subject to revision for up to five years after their original release. For this reason, BLS advises against the use of these data in escalation agreements.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced seasonal adjustment procedure called Intervention Analysis Seasonal Adjustment for some CPI series. Intervention Analysis Seasonal Adjustment allows for better estimates of seasonally adjusted data. Extreme values and/or sharp movements which might distort the seasonal pattern are estimated and removed from the data prior to calculation of seasonal factors. Beginning with the calculation of seasonal factors for 1996, X-12-ARIMA software was used for Intervention Analysis Seasonal Adjustment.

For the seasonal factors introduced in January 2010, BLS adjusted 30 series using Intervention Analysis Seasonal Adjustment, including selected food and beverage items, motor fuels, electricity and vehicles. For example, this procedure was used for the Motor fuel series to offset the effects of events such as damage to oil refineries from Hurricane Katrina.

For a complete list of Intervention Analysis Seasonal Adjustment series and explanations, please refer to the article "Intervention Analysis Seasonal Adjustment", located on our website at <http://www.bls.gov/cpi/cpisapage.htm>.

For additional information on seasonal adjustment in the CPI, please write to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212 or contact David Levin at (202) 691-6968, or by e-mail at [Levin.David@bls.gov](mailto:Levin.David@bls.gov). If you have general questions about the CPI, please call our information staff at (202) 691-7000.

## Metropolitan areas

BLS publishes price indexes for three major metropolitan areas monthly:

Chicago-Gary-Kenosha, IL-IN-WI  
Los Angeles-Riverside-Orange County, CA  
New York-Northern New Jersey-Long Island,  
NY-NJ-CT-PA

Data for an additional 11 metropolitan areas are published every other month [on an odd- (January, March, etc.) or even- (February, April, and so forth) month schedule] for the following areas:

Atlanta, GA	-even
Boston-Brockton-Nashua, MA- NH -ME-CT	-odd
Cleveland-Akron, OH	-odd
Dallas-Fort Worth, TX	-odd
Detroit-Ann Arbor-Flint, MI	-even
Houston-Galveston-Brazoria, TX	-even
Miami-Fort Lauderdale, FL	-even
Philadelphia-Wilmington -Atlantic City, PA-NJ-DE-MD	-even
San Francisco-Oakland -San Jose, CA	-even
Seattle-Tacoma-Bremerton, WA	-even
Washington-Baltimore, DC-MD-VA-WV	-odd

(Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released 2 to 3 weeks into the following month.)

Data are published for another group of 13 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for

Anchorage, AK  
Cincinnati-Hamilton, OH-KY-IN  
Denver-Boulder-Greeley, CO  
Honolulu, HI  
Kansas City, MO-KS  
Milwaukee-Racine, WI  
Minneapolis-St. Paul, MN-WI  
Phoenix-Mesa, AZ  
Pittsburgh, PA  
Portland-Salem, OR-WA  
San Diego, CA  
St. Louis, MO-IL  
Tampa-St. Petersburg-Clearwater, FL

## How to Obtain Consumer Price Index Information

CPI information is available from BLS electronically, through publication subscriptions, and via telephone and fax through automated recordings. Information specialists also are available in the national and information offices to provide help and to respond to questions.

### Electronic access to CPI data

*BLS on the Internet.* Through the Internet, BLS provides free, continuous access to published CPI data and press releases. The most recent month's CPI is made available immediately at the time of release. Additionally, a database called LABSTAT, containing current and historical data for the CPI, is accessible.

*World Wide Web.* BLS maintains a Web site at <http://www.bls.gov> on the Internet. This BLS homepage provides access to LABSTAT, as well as links to program-specific homepages. The CPI homepage <http://www.bls.gov/cpi/> provides other CPI information, as well as indexes. This includes a brief explanation of methodology, frequently asked questions and answers, contacts for further information, and explanations of how the CPI program handles special items, such as medical care and housing. In addition, CPI press releases and historical data for metropolitan areas can be accessed by linking to the regional office home pages from the main BLS Web site listed above.

### Recorded CPI data

Summary CPI data are provided on 24-hour recorded messages. Detailed CPI information may be obtained by calling (202) 691-5200. A touch-tone telephone is recommended, as this system allows the user to select specific indexes from lists of available data.

Recorded summaries of CPI data also may be obtained by calling any one of the metropolitan area CPI hotlines listed next. These hotline summaries typically include data for the U.S. city average, as well as for the specified area. The recordings are approximately 3 minutes in length, do not require a touch-tone telephone, and are available 24 hours a day, 7 days a week.

<i>Area</i>	<i>Hotline number</i>
Anchorage	(907) 271-2770
Atlanta	(404) 893-4222
Baltimore	(410) 962-4898
Boston	(617) 565-2327
Chicago	(312) 353-1880
Cincinnati	(513) 684-2349
Cleveland	(216) 522-3852
Dallas	(214) 767-6970
Denver	(816) 285-7000

San Francisco	(415) 625-2270
Washington, DC	(202) 691-7000

*Historical tables.* These include all published indexes for each of the detailed CPI components. These tables may be obtained via the Internet, by calling (202) 691-7000 in the national office, or by contacting any of the information offices just listed.

*Descriptive publications.* These publications describe the CPI and ways in which to use it. They include simple factsheets discussing specific topics about the CPI, a broader, non-technical overview of the CPI in a question-and-answer format, and a technical and thorough description of the CPI and its methodology. These publications may be obtained by calling (202) 691-7000, and many are included on the CPI homepage on the Internet.

*Special publications.* Also available are various special publications, such as *Relative Importance of Components in the Consumer Price Index* and materials describing the annual revisions of seasonally adjusted CPI data. For more information, call (202) 691-7000.

*Further information* can be obtained by writing the Office of Prices and Living Conditions, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 3615, Washington, DC 20212-0001, or by calling any of the information offices listed earlier.
