

Summary Report of Occurrences Reviewed From June 30 – July 4, 2008

Summary: 20 occurrences at 10 sites reviewed during this period.

Significant Occurrences (1)

Radiological Control – 1 occurrence at 1 site

- **NA – Los Alamos National Laboratory (Significance Category 2).** On July 1, TA-55 PMT-4 employees were characterizing the contents of a Hagan container which held plutonium coupons, when one employee punctured a glovebox glove and a tryonic anti-contamination glove with a screwdriver. Additionally, the employee contaminated the cotton liner glove with 15,000 dpm of radiation. The cotton liner glove is not considered personal protective equipment. There was no detectable activity on the skin of the employee and the employee did not receive either a wound or an abrasion due to the event.

Other Occurrences (19). See Table (Note: The Table includes the occurrences listed above).
