

## Summary Report of Occurrences Reviewed

*From December 1 – 8, 2006*

**Summary:** 22 occurrences at 13 sites reviewed during this period.

### Significant Occurrences (1)

#### **Injuries – 1 occurrence at 1 site**

- ***Sandia National Laboratory (Significance Category 3).*** On November 29, 2006, a subcontract skid-steer loader operator fractured the right fibula when the operator's leg became pinned between the boom and the body of the loader. Operator error caused the boom to lower and pin the right leg. A laborer raised the boom off the operator's leg. The operator was treated at a local hospital.

**Other Occurrences (21).** See Table (Note: The Table includes the occurrences listed above).
