

Summary Report of Occurrences Reviewed From July 26 – 30, 2010

Summary: 39 occurrences at 16 sites reviewed during this period.

Occurrences of Significant Interest (1)

Injury – 1 occurrence at 1 site

- ***SC –Lawrence Berkeley National Laboratory (Significance Category 3).*** On July 20, a LBNL contract security guard was injured by the vehicle that he was driving while making routine checks at an off-site building used by Lab personnel. A University of California Berkeley (UCB) graduate student found the security guard trapped under a vehicle tire in the UCB parking lot adjacent to the Donner building on campus. The security guard had exited his GSA Ford Explorer Sports Trac truck when the truck backed into him, knocking him to the ground and trapping his left leg under the left front tire, with his right foot still in the vehicle. The graduate student called 911 immediately; UCB police and Berkeley Fire Department personnel arrived at the scene. The police freed the security guard from the vehicle and fire department personnel transported him to Alta Bates Hospital in Berkeley where he was later transferred to Highland Hospital in Oakland for treatment. The security guard remains hospitalized. LBNL is coordinating with Landmark Protection and the UCB Police Department to investigate the incident.

Other Occurrences (38). See Table (Note: The Table includes the occurrences listed above).
