

Summary Report of Occurrences Reviewed From June 27 – July 1, 2011

Summary: 29 occurrences at 19 sites reviewed during this period.

Occurrences of Significant Interest (1)

Fire Protection – 1 occurrence at 1 site

- **NA –Los Alamos National Laboratory (Significance Category OE).** On June 27, Los Alamos National Laboratory declared an Operational Emergency, Health and Safety Event, when the Las Conchas wild land fire crossed over into Laboratory property in Technical Area 49. The fire crossed over into an area that had been previously mitigated for fire protection purposes, which is helping to keep the fire low to the ground and thus aiding fire fighters in containing the fire. At the time of the declaration, all radioactive and hazardous material was appropriately accounted for and protected. Laboratory staff is coordinating the onsite response and supporting the county and federal fire response. Laboratory operations have been suspended until the conditions of the emergency have been mitigated. At the time of this notification report, the Las Conchas fire had consumed approximately 50,000 total acres, nearly all of which is on National Forest and Park Service land. All appropriate Department of Energy, National Nuclear Security Administration, New Mexico Federal Congressional Delegation, and NM State Government authorities have been notified and are actively engaged in event response.

Other Occurrences (28). See Table (Note: The Table includes the occurrences listed above).
