

# Corbin Training Center

Corbin, Virginia

## NOAA's National Geodetic Survey (NGS)

has established a new training center in Corbin, Virginia. **The Corbin Training Center (CTC)** supports the NGS mission to provide access to the National Spatial Reference System and to be a leader in geospatial activities. The CTC provides high-quality training to improve the geodetic positioning and remote sensing capabilities of NGS and its partners and to increase the knowledge and skills of NGS employees.

The CTC has various classes scheduled, and more classes are being added to the calendar. Requests for class topics are welcome for consideration.

The CTC has a classroom with 14 computer work-stations and a large room for lectures, discussion, and break-out groups. Corbin is located near Fredericksburg, Virginia, between Washington, D.C. and Richmond, Virginia. Detailed directions and lodging information are provided on the website.

## Classes offered include:

- Digital Leveling
- GPS Data Collection and CORS/OPUS/RTK
- GPS Software and Processing

## For more information, contact NGS:
