

Public Notice Submission

Provider Name: BEK Communications Cooperative

Summary: We believe a vast majority of our territory is appropriately served with fiber to the home and DSL. The remaining non-fiber portion is planned for construction with fiber in the next 3 years with any outlying institutions covered in a joint BTOP application with DCN. XO Communications has applied for a grant to serve areas which are currently served by fiber or are intended to be served with fiber in the next 3 years. The DCN-BEK application targets only those institutions which cannot be economically served by fiber without a grant.
