

Public Notice Submission

Provider Name: Sprint Nextel Corporation

Summary: Sprint Nextel has invested billions of dollars nationwide – and hundreds of millions of dollars throughout the San Francisco Bay Area census blocks – to provide a full range of broadband services, including wireless high speed internet services. Sprint Nextel is widely recognized for developing, engineering and deploying innovative technologies, including two wireless networks serving nearly 49 million customers at the end of the first quarter of 2009, industry-leading mobile data services, and a global Tier 1 Internet backbone. Throughout each of the census blocks associated with this submission, Sprint Nextel offers wireless broadband data access using CDMA EVDO Rev A. technology, which features peak download speeds of up to 3.1 Mbps and peak upload speeds of 1.8 Mbps. Including data roaming, the Sprint Nextel mobile broadband data network reaches more than 273 million people, 18,652 cities and 1,838 airports throughout the United States. The information provided in this response includes: (1) a comprehensive list of the census tracts covered by Sprint Nextel’s San Francisco Bay area broadband network; (2) the number of households served by Sprint Nextel’s San Francisco Bay area broadband network; and (3) the broadband services that Sprint Nextel offers.
