¹ The incidence rates represent the number of injuries and illnesses per 100 full-time workers and were calculated as: (N/EH) X 200,000 where,

N = number of injuries and illnesses,
 EH = total hours worked by all employees during the calendar year,
 200,000 = base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

² Standard Industrial Classification Manual, 1987 Edition.

³ Excludes farms with fewer than 11 employees.

⁴ Data conforming to OSHA definitions for mining operators in coal, metal, and nonmetal mining and for employers in railroad transportation are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor; and the Federal Railroad Administration, U.S. Department of Transportation. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries.

⁵ Incidence rate less than 0.05.

NOTE: Totals for divisions and 2- and 3-digit SIC codes include data for industries not shown separately. Dashes '-' indicate quartile data are not available for industries with less than 25 observations. n.e.c. = not elsewhere classified.
