Sampled February 2001

**DATA PACKAGE CONTENTS**

This data package includes the following information:

- | <u>Item No.</u> | <u>Description of Contents</u>   |
|-----------------|--|
| 1.              | <b>Site Hydrologist Summary</b>  |
| 2.              | <b>Data Package Assessment</b> , which includes the following: <ul style="list-style-type: none"><li>a. Field procedures verification checklist</li><li>b. Confirmation that chain-of-custody was maintained.</li><li>c. Confirmation that holding time requirements were met.</li><li>d. Evaluation of the adequacy of the QC sample results.</li></ul>                               |
| 3.              | <b>Data Assessment Summary</b> , which describes problems identified in the data validation process and summarizes the validator's findings.   |
| 4.              | <b>Anomalous Data Review Checksheets</b> which list the subset of data that merits explanation or follow-up action. The "Disposition" column of this report describes the evaluator's judgments on the listed anomalies.   |
| 5.              | <b>UMTRA Database Printouts</b> of analytical data organized as follows: <ul style="list-style-type: none"><li>a. Ground Water Quality Data (included on disk)</li><li>b. Surface Water Quality Data (included on disk)</li><li>c. Equipment Blank Data (included on disk)</li><li>d. Time Versus Concentration Graphs</li><li>e. Static Ground Water Level Measurement Data</li></ul> |
| 6.              | <b>Sampling and Analysis Work Order and Trip Reports.</b>  |

**Site:** Shiprock

**Sampling Period:** February 5 - 22, 2001

**SUMMARY CRITERIA**

- 1. Did concentrations in water from any domestic wells sampled exceed a ground water standard, a primary drinking water standard, or health advisory?**

Selenium concentration from well 847 (0.0542 mg/l) exceeded the UMTRA ground water standard. The nitrate (973 mg/l) and selenium (1.990 mg/l) concentrations from well 848 exceeded UMTRA ground water and primary drinking water standards, and the uranium concentration (0.0623 mg/l) in well 848 exceeded the UMTRA groundwater standard. Well 848 was installed for irrigation purposes and currently is inactive, and well 847 is being used for irrigation only; both wells are located on the Shiprock High School property. Graphs that show nitrate, selenium, and uranium concentrations versus time for wells 847 and 848 are included in this report. These plots show consistently elevated concentrations of selenium in well 847 and elevated nitrate, selenium, and uranium in well 848.

- 2. Were standards exceeded at any point-of-compliance wells?**

There are no point-of-compliance wells established at the Shiprock site.

- 3. As a result of this sampling round, is there any indication of unexpected contaminated ground water movement?**

The distribution and rate of movement of contaminated ground water at the site was assessed in the Final Site Observational Work Plan (SOWP) issued in November 2000. Ground water sampling data from this sampling round did not indicate any unexpected movement of contaminated ground water outside of what was portrayed in the SOWP. Wells with sample concentrations that exceeded UMTRA ground water standards are listed in Table 1. Graphs that show nitrate and uranium concentrations versus time for selected wells are included in this report.

- 4. Is there statistical evidence that UMTRA Project related contaminants were detected in a surface body of water in greater concentrations than upstream ambient water quality?**

No statistical evidence presently exists. Until there are adequate paired sampling events to provide a statistically valid comparison, the following analysis is provided for comparison to benchmark values. Surface water concentrations were compared to benchmark values derived from sample data from locations 888 and 898, which are on the San Juan River upstream from the site. The benchmark value shown in Table 2 used for comparison of each analyte is the maximum concentration from these locations since they were first sampled in December 1998. At locations 887 and 939, which are both on a distributary channel of the San Juan River, values of nitrate, selenium, and uranium exceeded

benchmark values (Table 2). Benchmark values for nitrate, selenium, and uranium were exceeded at location 894, and the benchmark value for uranium was exceeded at location 940. Both 894 and 940 are on the San Juan River. The other locations (655, 657, and 658) that had exceedances are all on the floodplain and not on the river. San Juan River water flows through the distributary channel when the river stage is high; however, at the time of this sampling, the river stage was low and no river water was entering the channel. Therefore, the exceedances at 887 and 939 reflect contaminated ground water emerging in seeps from the terrace system to the south. The draft SOWP indicated no unacceptable human health risks are associated with exposure to surface water in washes and seeps. The interim action further reduced potential risks in these areas. The sample concentration of uranium (0.0055 mg/l) from location 940 barely exceeded the benchmark value. This location is on the San Juan River adjacent to the floodplain ground water contamination plume and was conducted during a low flow period of the river (approximately 1000 cubic feet per second). Historically, this location has had concentrations of uranium that exceed the benchmark during periods of low river flow. In February 2000 at a slightly lower flow in the river, the uranium concentration at this location was 0.0469 mg/l (about an order of magnitude higher than the present value). Concentrations of uranium exceeding benchmark values are diluted rapidly downstream of location of 940, as demonstrated by the very low uranium concentrations at locations 895 and 956. Therefore, withdrawal of water from the intake structure on the north side of the river, and its use as a backup drinking water supply, will not adversely affect human health.

Sample concentrations from location 894 exceed the respective benchmark values for nitrate, selenium, and uranium (Table 2). This location is on the San Juan River where the floodplain drainage channel discharges into the river. During the low river flow, water sampled at this location is indicative of drainage channel water quality. Sample concentrations of nitrate, selenium, and uranium from location 894 are similar to location 655 (Table 2), which is on the drainage channel upstream of location 894. During high river flow, sample concentrations from location 894 are lower and are indicative of river water quality.

Benchmark values are exceeded at additional surface water locations listed in Table 2. These locations receive discharge from contaminated alluvial or terrace aquifers and elevated concentrations are expected.

REVIEWER COMMENTS: ① No holding time established for Rn-222 ② The following set "U" flags for blank contamination problems: Ca 273737 (939), 273838 (1022); Mn 273838 (1022), K 273838 (1022), 274086 (6310), 274087 (8530), 273737 (1101), 273838 (1022), 274086 (6310), 274087 (8530), Sr 273838 (1022), 274087 (8530), U 273737 (1101), ~~273747 (648)~~, 273750 (1102); U-234-273750 (Equip Blk), 273969 (638), 273998 (602), 274079 (106), 274080 (860), 274084 (732), and 274085 (631); Cl - 273737 (Equipment Blk), 273838 (Equipment Blk) ③ J flag the following results: ITEMS REQUIRING ATTENTION: because the serial dilution did not meet criteria: K results 273736-273750, 273817-273821, 274079-274104, 273995-274002; and U results 274218 and 274216.

## UGW Water Sampling Field Activities Verification Checklist

Project Drip Rock  
 Date(s) of Verification 5/2 → 3/01

Date(s) of Water Sampling 2/5 - 22/01  
 Name of Verifier JEFF PRICE

Response Comments  
 (Yes, No, N/A)

1. Is the SAP the primary document directing field procedures?  
 List other documents, SOP's, instructions.

Y~~E~~S  
 Work Order

2. Were the sampling locations specified in the planning documents sampled?

Y~~E~~S

Except for dry or insufficient volume for locations:

3. Was field equipment calibrated as specified in the above named documents?

Y~~E~~S

Not bracketed properly on locations: 836, 843, 846, 844,

Were the number and types (alkalinity, temperature, EC, pH, turbidity, DO, ORP) of field measurements taken as specified?

Y~~E~~S

Insufficient water volume for some wells.

- Were the standard solutions used for the calibration and operational checks of the field instruments brought to within 10 degrees C of the temperature of the water to be sampled?

Y~~E~~S

Except for location 834.

4. Was depth to water measured before purging?

Y~~E~~S

Was this information used to calculate purge volume?

Y~~E~~S

- Was this information used to calculate purge volume?

Y~~E~~S

5. If conventional purging was used, were the wells purged until parameters stabilized and 3 casing volumes were removed, until the well was purged dry, or until 10 casing volumes were removed?

Y~~E~~S

6. If low-flow purging was used, was the purge rate less than 0.125 gal/min, and was the drawdown less than 0.3 ft?

N/A

7. Were duplicates taken at a frequency of one per 20 samples? Yes
8. Were equipment blanks taken at a frequency of one per 20 samples that were collected with nondedicated equipment? No
- Five were taken, should have taken 6.
9. Were trip blanks prepared and included with each shipment of VOC samples? NA
10. Were QC samples assigned a fictitious site identification number? Yes
- Was the true identity of the samples recorded in the field notes? Yes
11. Were samples collected in the containers specified? Yes
- Were certified pre-cleaned containers used for the sampling? Yes
12. Were samples filtered and preserved as specified? Yes
13. Were the number and types of samples collected as specified? Yes
14. Were chain of custody records completed and was sample custody maintained? Yes
15. Were sample ticket book numbers recorded on field data forms and on the chain of custody? Yes
16. Are field data sheets signed and dated by the team leader? Yes
17. Was all other pertinent information documented on the field data sheets? Yes
18. Was the presence or absence of ice in the cooler documented at every sample location? Yes
19. Were water levels measured at the locations specified in the planning documents? Yes

**SHIPROCK, NEW MEXICO**  
**FEBRUARY 2001 SAMPLING**  
**DATA ASSESSMENT SUMMARY**

The DOE-GJO Analytical Laboratory analyzed samples and reported results for this sampling event under requisition number 17302 for the UMTRA ground water project.

**RADIOCHEMICAL ANALYSIS**

Radon-222 was determined using liquid scintillation counting in accordance with RC-17.

Radiological results that were less than the minimum detectable activity (MDA) and/or the 3-sigma counting statistic range were qualified with a "U" flag (non-detect) in the database, as reflected on the database printouts.

**METALS AND MAJOR CATIONS ANALYSIS**

The determination of calcium, copper, iron, magnesium, manganese, potassium, sodium, strontium, vanadium, and zinc were performed by inductively coupled plasma-atomic emission spectrometry (ICP-AES). Antimony, cadmium, molybdenum, uranium-234, uranium-238 and total uranium were analyzed by inductively coupled plasma-mass spectrometry (ICP-MS). Arsenic and selenium were determined by hydride generation atomic absorption spectroscopy ( $\text{NaBH}_4$ ).

Because of blank contamination problems, the following samples were qualified with "U" flags: calcium samples 273737 (939), 273838 (1022); magnesium sample 273838 (1022); potassium samples 273838 (1022), 274086 (6310), 274087 (8530), 273737 (1101); sodium samples 273838 (1022), 274086 (6310), 274087 (8530); strontium samples 273838 (1022), 274087 (8530); uranium samples 273737 (1101), 273747 (648), 273750 (1102); and uranium-234 samples 273750 (1102), 273969 (628), 273998 (603), 274079 (1062), 274080 (860), 274084 (732), 274085 (631). The following samples were given "J" flags because they failed the serial dilution criteria: potassium results 273736 (841), 273737 (1101), 273738 (835), 273739 (813), 273740 (812), 273741 (814), 273742 (728), 273743 (815), 273744 (839), 273745 (604), 273746 (818), 273747 (648), 273748 (816), 273749 (727), 273750 (1102), 273817 (947), 273818 (933), 273819 (1210), 273820 (935), 273821 (936), 274079 (1062), 274080 (860), 274081 (1001), 274082 (773), 274083 (7731), 274084 (732), 274085 (631), 274086 (6310), 274087 (8530), 274088 (1002), 274089 (620), 274090 (775), 274091 (619), 274092 (768), 274093 (827), 274094 (820), 274095 (725), 274096 (1058), 274097 (1059), 274098 (730), 274099 (600), 274100 (1001), 274101 (824), 274102 (823), 274103 (1004), 274104 (1003), 273995 (602), 273996 (826), 273997 (828), 273998 (603), 273999 (830), 274000 (1007), 274001 (1057), 274002 (726); and uranium samples 274215 (862) and 274216 (DM-7).

**INORGANIC ANALYSIS**

Chloride, fluoride, nitrate, and sulfate were determined by ion chromatography (IC). TDS was determined gravimetrically, and ammonium was determined by spectrophotometry

(colorimetry). Because of blank contamination problems, the following samples were qualified with "U" flags: chloride samples 273737 (1101) and 273838 (1022).

## FIELD ANALYSIS/ACTIVITIES

There were no wells with a measured pH greater than 9; therefore, "G" flags indicating potential grout contamination were not required. Five equipment blanks were collected and analyzed for the same constituents as the Shiprock environmental samples. There were no UMTRA related contaminants detected in the equipment blanks in concentrations above the CRDL or the MDA/3-sigma; therefore, equipment blank results are considered acceptable. Six field duplicates were collected during the sampling event. Although there is no established regulatory criteria for the evaluation of field duplicates, the EPA guidance for *laboratory* duplicates was used. With the exception of one manganese result, duplicate sample results met these criteria and should be considered acceptable. The following wells were purged dry prior to removing three casing volumes and therefore should be given "L" flags: 600, 604, 610, 727, 730, 734, 775, 812, 819, 820, 823, 824, 826, 839, 854, and 862.

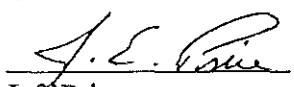

## SAR

Because of technical constraints, a SAR could not be generated. Instead, data from this sampling event were compared to historical minimum and maximum values. Results that were greater than 150 percent of the historical maximum value or less than 50 percent of the historical minimum value (excluding results with less than 5 historical data points) are listed on the Anomalous Data Review Checksheets.

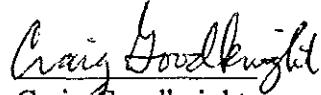

## SUMMARY

All analytical quality control criteria were met except as qualified on the Ground Water Quality Data by Parameter, Surface Water Quality by Parameter, or equipment blank/trip blank database printouts. The meaning of data qualifiers is as defined on the UMTRA database printout or as defined in the USEPA Contract Laboratory Program Statement of Work for Inorganic Analysis, Multi-Media Multi-Concentration, Document Number ILMO2.0, 1991. All data in this package are considered validated and may be treated as final results.

A disk copy of the ground water, surface water, and equipment blank database printouts with the qualifiers incorporated are included in this package.

GROUND WATER QUALITY DATA BY PARAMETER (USEE200) FOR SITE SHP01, SHIPROCK  
 REPORT DATE: 5/17/2001 1:19 p

| PARAMETER | UNITS | LOCATION ID | SAMPLE: DATE | SAMPLE: ID | ZONE COMPL | FLOW REL. | RESULT | QUALIFIERS: LAB | DETECTION LIMIT | UN-CERTAINTY |
|-----------|-------|-------------|--------------|------------|------------|-----------|--------|-----------------|-----------------|--------------|
|-----------|-------|-------------|--------------|------------|------------|-----------|--------|-----------------|-----------------|--------------|

RECORDS: SELECTED FROM USEE200 WHERE site\_code='SHP01' AND quality\_assurance = TRUE AND (NOT (data\_validation\_qualifiers LIKE "R" OR data\_validation\_qualifiers LIKE "X") OR IsNull(data\_validation\_qualifiers)) AND DATE\_SAMPLED between #2/1/2001# and #3/31/2001#

SAMPLE ID CODES: 000X = Filtered sample (0.45 µm). N00X = Unfiltered sample. X = replicate number.

LAB QUALIFIERS:

- \* Replicate analysis not within control limits.
- + Correlation coefficient for MSA < 0.995.
- A TIC is a suspected aldol-condensation product.
- B Inorganic: Result is between the IDL and CRDL. Organic: Analyte also found in method blank.
- E Inorganic: Estimate value because of interference, see case narrative. Organic: Analyte exceeded calibration range of the GC-MS.
- Z Laboratory defined (USEPA CLP organic) qualifier, see case narrative.
- H Holding time expired, value suspect.
- I Increased detection limit due to required dilution.
- C Pesticide result confirmed by GC-MS.
- M GFAA duplicate injection precision not met.
- N Inorganic or radiochemical: Spike sample recovery not within control limits. Organic: Tentatively identified compound (TIC).
- S Result determined by method of standard addition (MSA).
- U Analytical result below detection limit.
- W Post-digestion spike outside control limits while sample absorbance < 50% of analytical spike absorbance.
- D Analyte determined in diluted sample.
- P > 25% difference in detected pesticide or Arochlor concentrations between 2 columns.
- X Laboratory defined (USEPA CLP organic) qualifier, see case narrative.
- Y Laboratory defined (USEPA CLP organic) qualifier, see case narrative.
- > Result above upper detection limit.
- J Estimated

DATA QUALIFIERS:

- |  |                                  |   |
|--|----------------------------------|---|
| J Estimated value.                                   | F Low flow sampling method used. | G Possible grout contamination, pH > 9. |
| L Less than 3 bore volumes purged prior to sampling. | R Unusable result.               | X Location is undefined.                |
| U Parameter analyzed for but was not detected.       |                                  |   |

QA QUALIFIER: # = validated according to Quality Assurance guidelines.

GROUND WATER QUALITY DATA BY PARAMETER (USEE200) FOR SITE SHP02, SHIPROCK (TAILINGS AREA)  
 REPORT DATE: 5/17/2001 1:21 p

| PARAMETER | UNITS | LOCATION ID | SAMPLE DATE | SAMPLE ID | ZONE COMPL | FLOW REL. | RESULT | QUALIFIERS: LAB | DETECTION DATA | UN-LIMIT QA | CERTAINTY |
|-----------|-------|-------------|-------------|-----------|------------|-----------|--------|-----------------|----------------|-------------|-----------|
|-----------|-------|-------------|-------------|-----------|------------|-----------|--------|-----------------|----------------|-------------|-----------|

RECORDS: SELECTED FROM USEE200 WHERE site\_code='SHP02' AND quality\_assurance = TRUE AND (NOT (data\_validation\_qualifiers LIKE "R" OR data\_validation\_qualifiers LIKE "X") OR IsNull(data\_validation\_qualifiers)) AND DATE\_SAMPLED between #2/1/2001# and #3/31/2001#

SAMPLE ID CODES: 000X = Filtered sample (0.45 µm). N00X = Unfiltered sample. X = replicate number.

LAB QUALIFIERS:

- Replicate analysis not within control limits.
- + Correlation coefficient for MSA < 0.995.
- A TIC is a suspected aldon-condensation product.
- B Inorganic: Result is between the IDL and CRDL. Organic: Analyte also found in method blank.
- E Inorganic: Estimate value because of interference, see case narrative. Organic: Analyte exceeded calibration range of the GC-MS.
- Z Laboratory defined (USEPA CLP organic) qualifier, see case narrative.
- H Holding time expired, value suspect.
- I Increased detection limit due to required dilution.
- C Pesticide result confirmed by GC-MS.
- M GFAA duplicate injection precision not met.
- N Inorganic or radiochemical: Spike sample recovery not within control limits. Organic: Tentatively identified compound (TIC).
- S Result determined by method of standard addition (MSA).
- U Analytical result below detection limit.
- W Post-digestion spike outside control limits while sample absorbance < 50% of analytical spike absorbance.
- D Analyte determined in diluted sample.
- P > 25% difference in detected pesticide or Arochlor concentrations between 2 columns.
- X Laboratory defined (USEPA CLP organic) qualifier, see case narrative.
- Y Laboratory defined (USEPA CLP organic) qualifier, see case narrative.
- > Result above upper detection limit.
- J Estimated

DATA QUALIFIERS:

- |  |                                  |   |
|--|----------------------------------|---|
| J Estimated value.                                   | F Low flow sampling method used. | G Possible grout contamination, pH > 9. |
| L Less than 3 bore volumes purged prior to sampling. | R Unusable result.               | X Location is undefined.                |
| U Parameter analyzed for but was not detected.       |                                  |   |

QA QUALIFIER: # = validated according to Quality Assurance guidelines.

SURFACE WATER QUALITY DATA BY PARAMETER (USEE800) FOR SITE SHP01, SHIPROCK  
 REPORT DATE: 5/17/2001 1:22 pm

| PARAMETER | UNITS | LOCATION ID | SAMPLE DATE | SAMPLE ID | RESULT | QUALIFIERS: LAB | DETECTION DATA | UN-LIMIT QA | CERTAINTY |
|-----------|-------|-------------|-------------|-----------|--------|-----------------|----------------|-------------|-----------|
|-----------|-------|-------------|-------------|-----------|--------|-----------------|----------------|-------------|-----------|

RECORDS: SELECTED FROM USEE800 WHERE site\_code='SHP01' AND quality\_assurance = TRUE AND (NOT (data\_validation\_qualifiers LIKE "%R%" OR data\_validation\_qualifiers LIKE "%X%" ) OR IsNull(data\_validation\_qualifiers)) AND DATE\_SAMPLED between #2/1/2001# and #3/31/2001#

SAMPLE ID CODES: 000X = Filtered sample (0.45 µm). N00X = Unfiltered sample. X = replicate number.

LAB QUALIFIERS:

- \* Replicate analysis not within control limits.
- + Correlation coefficient for MSA < 0.995.
- A TIC is a suspected aldol-condensation product.
- B Inorganic: Result is between the IDL and CRDL. Organic: Analyte also found in method blank.
- E Inorganic: Estimate value because of interference, see case narrative. Organic: Analyte exceeded calibration range of the GC-MS.
- Z Laboratory defined (USEPA CLP organic) qualifier, see case narrative.
- H Holding time expired, value suspect.
- I Increased detection limit due to required dilution.
- C Pesticide result confirmed by GC-MS.
- M GFAA duplicate injection precision not met.
- N Inorganic or radiochemical: Spike sample recovery not within control limits. Organic: Tentatively identified compound (TIC).
- S Result determined by method of standard addition (MSA).
- U Analytical result below detection limit.
- W Post-digestion spike outside control limits while sample absorbance < 50% of analytical spike absorbance.
- D Analyte determined in diluted sample.
- P > 25% difference in detected pesticide or Arochlor concentrations between 2 columns.
- X Laboratory defined (USEPA CLP organic) qualifier, see case narrative.
- Y Laboratory defined (USEPA CLP organic) qualifier, see case narrative.
- > Result above upper detection limit.
- J Estimated

DATA QUALIFIERS:

- |  |  |
|--|--|
| J Estimated value.                             | F Low flow sampling method used.                     |
| G Possible grout contamination, pH > 9.        | L Less than 3 bore volumes purged prior to sampling. |
| R Unusable result.                             | X Location is undefined.                             |
| U Parameter analyzed for but was not detected. |  |

QA QUALIFIER: # = validated according to Quality Assurance guidelines.

RECORDS: SELECTED FROM USEE800 WHERE site\_code='SHP02' AND quality\_assurance = TRUE AND (NOT (data\_validation\_qualifiers LIKE ''R'' OR data\_validation\_qualifiers LIKE ''X'') OR IsNull(data\_validation\_qualifiers)) AND DATE\_SAMPLED between #2/1/2001# and #3/31/2001#

SAMPLE ID CODES: 000X = Filtered sample (0.45 µm). N00X = Unfiltered sample. X = replicate number.

LAB QUALIFIERS:

- \* Replicate analysis not within control limits.
- + Correlation coefficient for MSA < 0.995.
- A TIC is a suspected aldon-condensation product.
- B Inorganic: Result is between the IDL and CRDL. Organic: Analyte also found in method blank.
- E Inorganic: Estimate value because of interference, see case narrative. Organic: Analyte exceeded calibration range of the GC-MS.
- Z Laboratory defined (USEPA CLP organic) qualifier, see case narrative.
- H Holding time expired, value suspect.
- I Increased detection limit due to required dilution.
- C Pesticide result confirmed by GC-MS.
- M GFAA duplicate injection precision not met.
- N Inorganic or radiochemical: Spike sample recovery not within control limits. Organic: Tentatively identified compound (TIC).
- S Result determined by method of standard addition (MSA).
- U Analytical result below detection limit.
- W Post-digestion spike outside control limits while sample absorbance < 50% of analytical spike absorbance.
- D Analyte determined in diluted sample.
- P > 25% difference in detected pesticide or Arochlor concentrations between 2 columns.
- X Laboratory defined (USEPA CLP organic) qualifier, see case narrative.
- Y Laboratory defined (USEPA CLP organic) qualifier, see case narrative.
- > Result above upper detection limit.
- J Estimated

DATA QUALIFIERS:

- |   |  |   |   |
|---|--|---|---|
| J | Estimated value.                             | F | Low flow sampling method used.                    |
| G | Possible grout contamination, pH > 9.        | L | Less than 3 bore volumes purged prior to sampling |
| R | Unusable result.                             | X | Location is undefined.                            |
| U | Parameter analyzed for but was not detected. |   |   |

QA QUALIFIER: # = validated according to Quality Assurance guidelines.

## Blanks Data for Shiprock 02/2001 Sampling Event

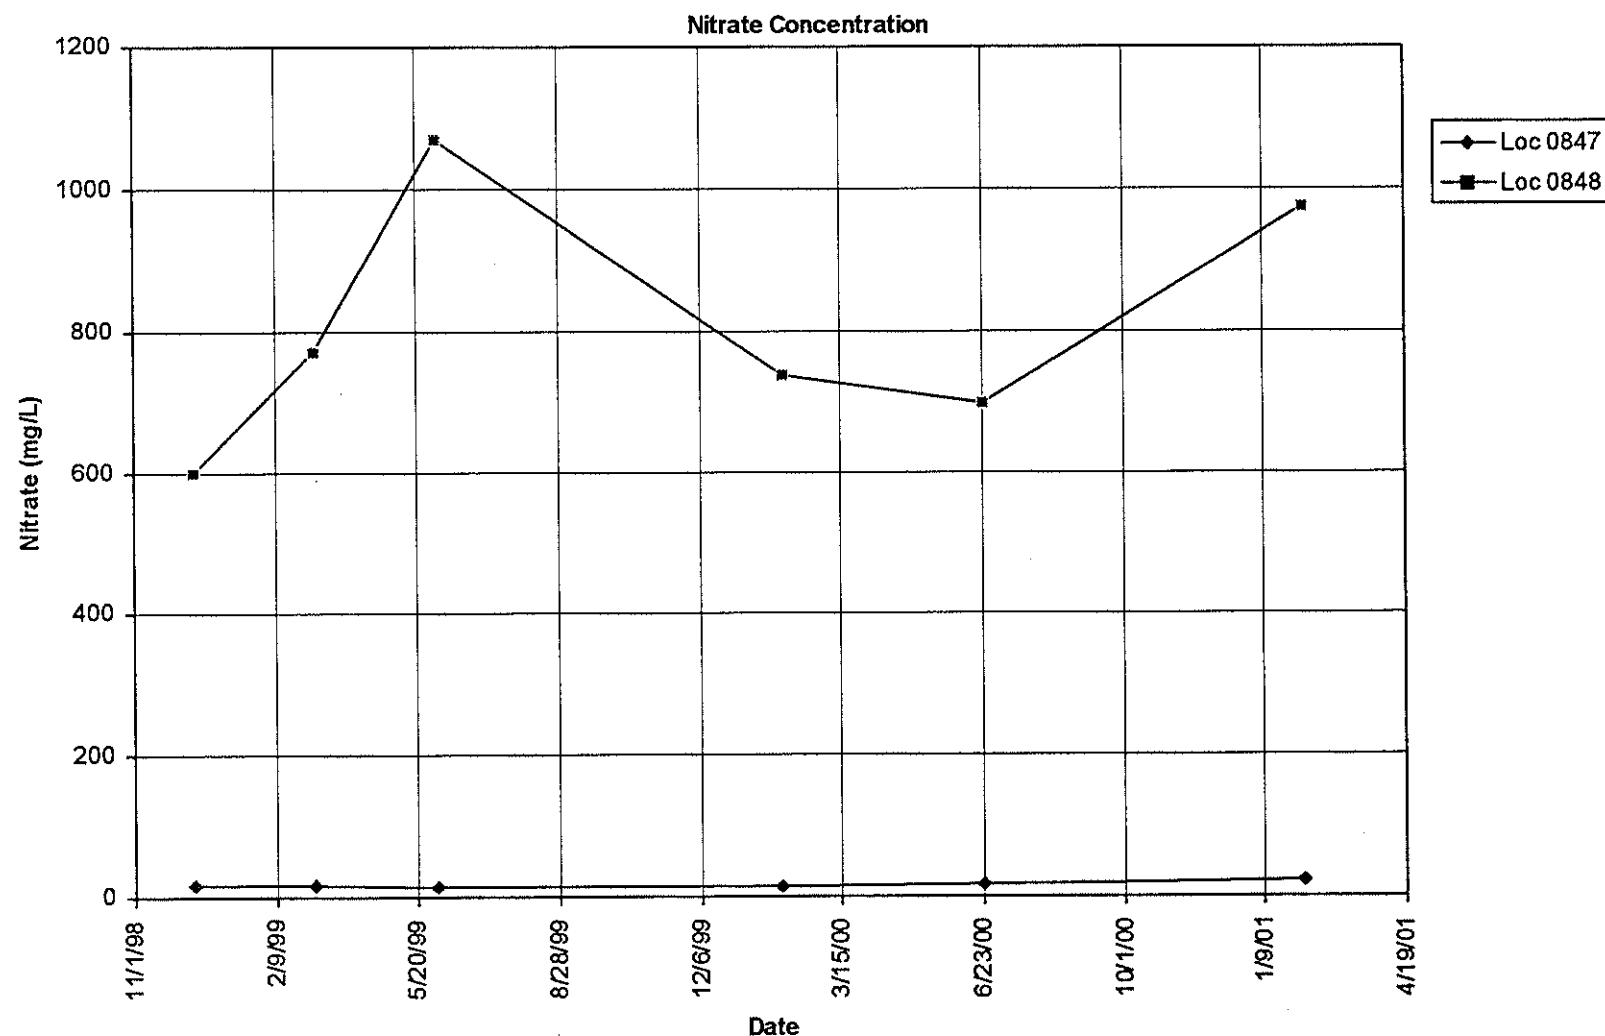

05/17/2001

UMTRA Ground Water Project Manager  
Department of Energy  
Grand Junction Office  
2597 B3/4 Road  
Grand Junction, CO 81503  
ATTN: Donald Metzler

SUBJECT: Contract No. DE-AC13-96GJ87335—February 2001 UMTRA Ground Water Sampling at Shiprock, New Mexico

Dear Mr. Metzler:

Attached are the map and tables specifying the sampling locations and analytes for routine monitoring at the Shiprock, New Mexico, UMTRA site. Water quality data will be collected from monitor wells and surface locations at this site as part of the routine UMTRA Ground Water sampling which is scheduled to begin the week of February 5, 2001.

The following lists show the Ground Water Project monitor well and surface water locations that will be sampled during this sampling event.

**Ground Water Project Monitor Wells (filtered)\***

Note: All samples are considered filtered unless stated otherwise. All private well samples are to be unfiltered. The total number of analytes does not include field parameters.

CONTRACT NO.: DE-AC13-96GJ87335  
 TASK ORDER NO.: MAC01-05  
 CONTROL NO.: 3100-N/A

MEMO TO: Sam Marutzky  
 FROM: Robert Lucero *MU*  
 DATE: March 19, 2001  
 SUBJECT: UMTRA Ground Water Trip Report

Site: Shiprock, NM

Dates of Sampling Event: February 5 through February *9*, 2001

Team Members: Dave Traub, Tom Nett, Jeff Price, Robert Lucero, Tony Franzone, and Dan Sellers.

**Number of Locations Sampled:** 115 locations were scheduled for sampling. This included wells, surface locations, and seeps. A few of the wells and surface locations were dry. Table 2 lists relevant information about each location (i.e., requested sample to collect, any field variances or other comments). A total of 113 locations were sampled. Samples also were collected for the NABIR project (see Table 2).

**Locations Not Sampled:** See Table 2.

**Location Specific Information:** See Table 2. A few locations (wells or surface location) could not be sampled for the entire analyte list because they were dry or had an insufficient amount of water after being purged and did not recover. Data loggers were down loaded at the following wells: 602, 617, 730, 731, 826, 827, 830, 835, 836, 837, 841, 843, 848, 857, 899. Data loggers for two wells were not downloaded. Well 728 did not have the proper connectors, and the battery was dead for downloading at well 846.

**Quality Control Sample Cross Reference:** Following are the false identifications assigned to the quality control samples submitted to the GJO analytical laboratory:

Table 1

| False Location ID | True Location Number | Ticket Number | Sample Type  |

Control No.: 3100-N/A

**Requisition Numbers:** The requisition number for the samples is 17302.

**Water Level Measurements:** Water level measurements were completed on all wells scheduled for sampling.

**Well Inspection Summary:** Well inspections were made on all wells scheduled for sampling.

**Equipment:** None

**Regulatory Issues:** None

**Site Issues:** NABIR samples were collected at the following locations:

**Wells:**

**Yellow water:**

SHP 01: 608, 610, 614, 615, 616, 618, 619, 620, 621, 622, 623, 624, 625, 626, 628, 736, 768, 775, 853, 854, 857, 860.

SHP 02: 602, 603, 648, 728, 813, 819, 826, 828, 830,

**Tritium and Anion (T & A)**

SHP 01: 615, 616, 618, 620, 621, 622, 623, 625, 768, 775, 860,

**Radon 222**

SHP 01: 608, 614, 854,

SHP 02: 813, 819, 826,

**Surface Water:**

**Yellow water**

SHP 01: 1205

SHP 02: 425, 426,

**Tritium and Anion (T & A)**

SHP 01: 1205
