America Invents Act

Goals of Patent Reform Legislation

- Encourage innovation and job creation
- Support USPTO's efforts to improve patent quality and reduce backlog
- Establish secure funding mechanism
- Provide greater certainty for patent rights
- Provide less costly, time-limited administrative alternatives to litigation

Leahy-Smith America Invents Act Implementation

President Barack Obama signs the America Invents Act September 16, 2011, at Thomas Jefferson High School for Science and Technology in Alexandria, Va.

Message from Director David Kappos

On September 16, 2011, President Barack Obama signed into law the Leahy-Smith America Invents Act, which will foster innovation and spur job creation in the United States. This Act sets into motion the most comprehensive overhaul to our nation's patent system since 1836.

The new law will afford more certainty for patent applicants and owners, and provide the USPTO the resources needed to operate efficiently and issue high-quality patents. Implementation of the new law will occur over a period of months, and our USPTO team will seek input and provide updates along the way. I strongly encourage you to use this site to regularly track progress pertaining to the agency's implementation efforts.

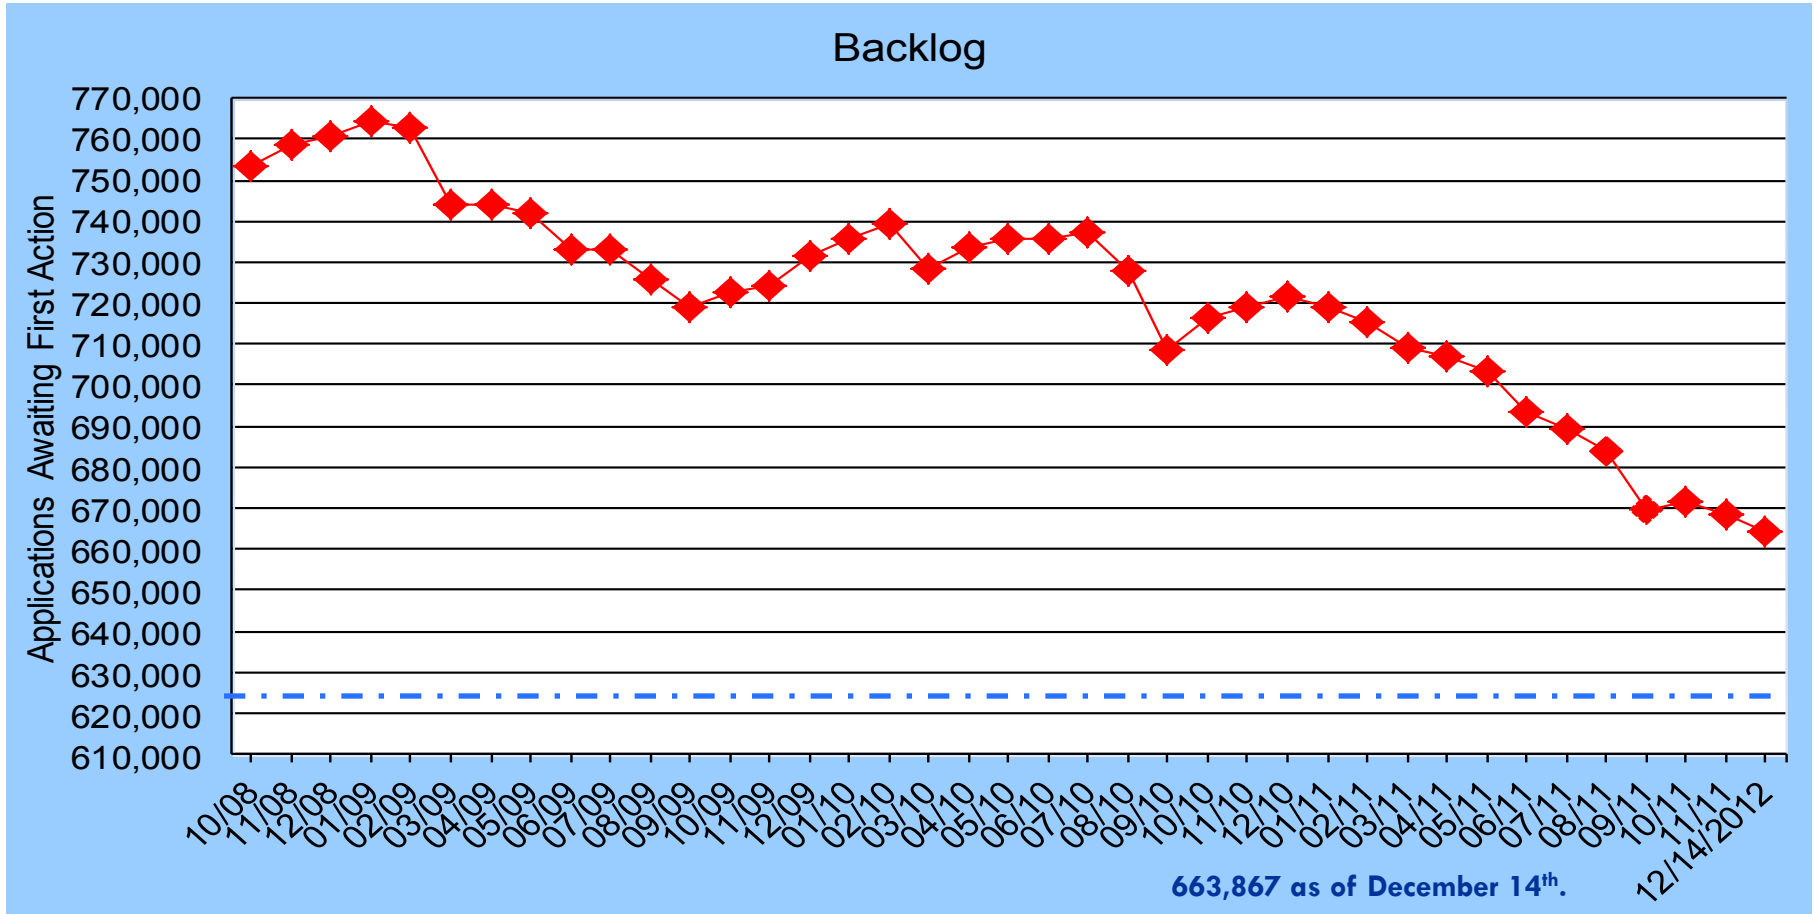

All of us at USPTO look forward to working together with the innovation community to tackle the exciting challenges of rolling-out this historic law. Here are a few documents to get started:

Definitions	<p>The Final Rejection and Allowance (Final Disposition) compliance rate focuses on the correctness of the examiners' overall determination of the patentability of the claims in the decision to finally reject or allow an application. Metric determined by 12-month % Compliance as determined by OPQA random-sample-review of Allowances and Final Office Actions.</p>	<p>The In-Process compliance rate focuses on the quality of examination early in prosecution, rather than on the end-product. Metric determined by 12-month % Compliance as determined by OPQA random-sample-review of Non-Final Office Actions.</p>	<p>The First Action On The Merits (FAOM) Search Review and Complete FAOM Review provide comprehensive assessments of the degree to which the search conducted prior to the first office action, and the first action on the merits, respectively, conform with best practices. Metric determined by OPQA random-sample, points-based-review of examiner work product. Score=Points earned/available points.</p>	<p>12-month average of 5 Quality Index Reporting metrics being tracked for quality performance. Items are converted to "% desired behavior" for inclusion in Composite. Items tracked include: Actions per Disposal; RCEs as % of Total Disposals; Reopenings After Final; 2nd+ Action NonFinals; and Restrictions After First Action.</p>	<p>The External Quality Survey provides a measure of the degree to which the experience of patent applicants and practitioners reveal trends and issues indicative of quality concerns. The survey is conducted semi-annually and solicits input from stakeholders who are frequent customers of the USPTO on their perceptions of examination quality over the preceding three month period. The metric is reported as the ratio of positive to negative responses regarding satisfaction with overall examination quality.</p>	<p>The Internal Quality Survey measures the degree to which the experience of patent examiners reveals trends and issues indicative of quality concerns. The survey is conducted semi-annually and ascertains examiner perceptions of their experiences with the various tools and inputs that are required to conduct a high quality examination. The metric is reported as the ratio of positive to negative responses to a question regarding overall satisfaction with examination quality.</p>	<p>The Quality Composite Score is composed of the seven individual metrics shown here. The composite metric determines progress in each component metric towards the desired five-year goal, applying a weighting factor to each metric and summing the weighted progress in each component metric to determine the overall progress towards the composite quality goal. A composite score of 0 represents the statistical achievement in the base year used for comparison. A composite score of 100 represents attainment of a superior level of performance identified as the stretch goal.</p>

Discuss the Manual of Patent Examining Procedure (MPEP)

Welcome to the MPEP discussion tool! We have received many thoughtful ideas on Chapters 500 and 600 of the MPEP as well as on how to improve the discussion site. Each and every idea submitted by you, the participants in this conversation, has been carefully reviewed by the Office, and many of these ideas will be implemented in the next revision of the MPEP. We would like to thank everyone for participating in the discussion of the MPEP.

We have some great news! Chapters 100 through 400 of the MPEP are now available for discussion. Please submit any ideas and comments you may have on these chapters. Also, don't forget to vote on ideas and comments submitted by other users. As before, our editorial staff will periodically be posting proposed new material for you to respond to, and in some cases will post responses to some of the submitted ideas and comments.

Recently, we have received several comments concerning the Leahy-Smith America Invents Act (AIA). Please note that comments regarding the implementation of the AIA should be submitted to the USPTO via email at aia_implementation@uspto.gov or via postal mail, as indicated at [the America Invents Act Website](#). Additional information regarding the AIA is available at www.uspto.gov/americainventsact.

We really appreciate your thinking and recommendations!

Getting Started:

MPEP sections can be viewed by clicking on the boxed plus sign next to each chapter name on the left. You must register on the site to contribute ideas, comments, and votes.

- ✦ **View and Comment on Other Peoples' Ideas** See all of the ideas below, or select a Chapter to see the ideas associated with it.
- ✦ **Add Your Idea** Click on the "Submit New Idea" button.
- ✦ **Vote, Vote, Vote!** Your votes are critical to ensuring that the best ideas "bubble up" to the top.
- ✦ **Spread the Word!** E-mail, tweet, or post this URL (uspto-mpep.ideascale.com) to your networks, and invite them to get involved.
- ✦ **Review our [Terms of Participation and Privacy Policy](#).**
- ✦ **Go mobile!** Submission of ideas and voting can now be done using your smartphone; this discussion tool is available in a completely mobile version that will render optimally on any smart-phone with a Web browser. Of course, you can also still use the Web interface as before.

1902 International Application Originating From the United States

 Discuss this Section 

This section covers international applications and registrations *originating from* the United States, i.e., international registrations based on an application pending in the USPTO and/or a registration issued by the USPTO. See [TMEP §§1904 et seq.](#) for information about requests for extension of protection *to* the United States by the holder of an international registration originating in another country. International applications originating from the United States are processed by the USPTO's Madrid Processing Unit ("MPU").

1902.01 Who Can File

 Discuss this Section 

Under 15 U.S.C. §1141a and Article 2(1), a qualified owner of a basic application pending in the USPTO or a qualified owner of a basic registration issued by the USPTO may file an application for international registration through the USPTO. To qualify, the international applicant must:

- (1) Be a national of the United States;
- (2) Be domiciled in the United States; or
- (3) Have a real and effective industrial or commercial establishment in the United States.

If joint applicants file, each applicant must meet at least one of these requirements. Common Reg. 8(2).

1902.02 Minimum Requirements for Date of Receipt of International Application in USPTO

 Discuss this Section 

The minimum requirements for accordance of a date of receipt of an international application in the USPTO are set forth in 37 C.F.R.
