100. SUBMISSION INSTRUCTIONS

101. HOW TO SUBMIT

Each case must have at least one person level form with INJURY SEVERITY coded as “4.”

2006 Data

Enter data directly from coded FARS forms, using procedures described in the FARS MICROCOMPUTER DATA ENTRY MANUAL.

2007 Data

Enter data directly from coded FARS forms (Exhibit 100-A), using procedures described in the FARS Microcomputer Data Entry Manual (MDE Manual).

102. WHEN TO SUBMIT

Make submissions at anytime during the week via the Microcomputer.

103. DATA SOURCES

1. Use the ANSI *D16.1 Manual* on Classification of Motor Vehicle Traffic Accident for definitions in coding the FARS forms.
2. Obtain information from death certificates for persons who die as a result of injuries sustained in a motor vehicle accident.
3. Use the State Driver Licensing Files, Vehicle Registration Files, Highway Department Files, Accident Reports, and Vital Statistics Reports.
4. See the FARS MDE manual for instructions on obtaining data and responding to requests for data on vehicles and drivers not registered or licensed in your state.
5. The message system should be used to obtain data on involved Out-of-State drivers and vehicles.

200. FORM CODING INSTRUCTIONS

201. GENERAL INSTRUCTIONS

- .1 Codes
- .11 All codes are numeric except TRAFFICWAY IDENTIFIER, ADDITIONAL STATE INFORMATION, RAIL GRADE CROSSING IDENTIFIER, VEHICLE IDENTIFICATION NUMBER and MOTOR CARRIER IDENTIFICATION NUMBER.
- .12 All codes are on the form except: NATIONAL HIGHWAY SYSTEM, GLOBAL POSITION, SPECIAL JURISDICTION, FIRST HARMFUL EVENT, TRAFFIC CONTROL DEVICE, RAIL GRADE CROSSING IDENTIFIER, RELATED FACTORS, VEHICLE MAKE, VEHICLE MODEL, BODY TYPE, MOTOR CARRIER IDENTIFICATION NUMBER, NUMBER OF AXLES, SEQUENCE OF EVENTS, MOST HARMFUL EVENT, VIOLATIONS CHARGED, DEATH CERTIFICATE NUMBER, FATAL INJURY AT WORK and RACE/HISPANIC ORIGIN. See the appropriate data element pages for these codes.
- .13 Code for “Unknown” is always nine. “Unknown” should only be used when all sources for obtaining information on an element have been searched and the information is missing or stated unknown.
- .14 The code for “Not Applicable” or its equivalent is always zero.
- .15 The code for “None” is always zero except for Alcohol Test Result.
- .2 Coding Forms
- .21 Blanks are used only in fields to be later updated with four exceptions:
 - .211 If DRIVER PRESENCE is coded “2,” “4” or “9” all other driver information except RELATED FACTORS-DRIVER LEVEL must be blank.
 - .212 If VIN is less than seventeen characters, do not zero-fill, leave remaining characters blank. If a State is not allowed to code the entire VIN, code the partial VIN and zero-fill the characters that cannot be completed.

- .213 If TRAFFICWAY IDENTIFIER is less than 20 characters, do not zero-fill or 9-fill. Leave remaining characters blank.
- .214 If MOTOR CARRIER IDENTIFICATION NUMBER is less than 9 characters, do not zero-fill or 9-fill. Leave remaining characters blank.
- .22 All codes are right-justified except VIN, TRAFFICWAY IDENTIFIER and MOTOR CARRIER IDENTIFICATION NUMBER.
- .3 Vehicle, Driver and Person Level Forms. These forms are automatically numbered by the system.
- .31 Vehicles are numbered consecutively beginning with "01."
- .32 For each vehicle, persons are numbered consecutively beginning with "01." Order is not important. The driver does not have to be "01."
- .33 The vehicle number for persons not in motor vehicles is "00."
- .34 Persons not in motor vehicles are numbered consecutively beginning with "01." Order is not important.
- .4 Miscellaneous
- .41 The number of changes per case is not limited.
- .42 Request of other States for information should always follow the format of the MDE systems Out-Of-State Data Request whether the MDE System itself or the mail is used.
- .43 Refer all coding questions through the FARS CODING ASSISTANCE PROGRAM.
- .44 Copies of all cases or other actions submitted must be retained for 3 years after the data collection year.
- .45 If a State will not allow transmittal of complete VIN, send a memorandum to the RCOTR informing him of this fact.
- .5 Special Case - Coding Fatal Traffic Accidents for which there is only a death certificate.
- .51 Be sure the death occurred within thirty (30) days of the accident. If you don't know, do not submit the case. If it occurred after 30 days, do not submit.

- .52 For the cases you do submit, you must complete Forms HS-214, HS-214A, HS-214B, HS-214C unless you have been granted an exemption.
- .6 Code the required elements as follows:
The following elements must be coded. If any of these elements are left blank or if an edit check is violated which involves the coding of one of these elements, you will not have a usable FARS case.

Accident Level (Form HS-214)

Date -	Appropriate Day, Month and Year
Accident Time -	Appropriate hour and minute if known, 9999 if not known
Number of Forms Submitted for Persons Not In Motor Vehicles -	01-99
Number of Vehicle Forms Submitted -	01-99
Number of Person Forms Submitted -	01-99
First Harmful Event -	Appropriate code if known, 99 if not known

Vehicle Level (Form HS-214A)

Vehicle Number -	01-99
Number of Occupants -	01-97 if known, 99 if unknown
Unit Type -	1-4

Driver Level (Forms HS-214B)

Vehicle Number -	01-99
Driver Presence -	Appropriate code if known, 9 if unknown

Person Level (Form HS-214C)

Vehicle Number -	00 if not a motor vehicle occupant, 01-99 if occupant
Person Number -	01-99
Person Type -	01, 02, 03 or 09 for occupants 04-08, 10 for persons not in motor vehicles

.61 Code all other elements with the proper code if information is known. If no information is known, code the items "Unknown." There are three exceptions to this, Rollover, Emergency Use and Fire Occurrence should all be coded "0" ("No Rollover" "No" and "No Fire," respectively).

202. DELETION INSTRUCTIONS

See FARS Microcomputer Data Entry Manual for instructions on how to delete a case.

203. REQUEST FOR CASE LISTING INSTRUCTIONS

See FARS Microcomputer Data Entry Manual for instructions on how to list a case.

300. DATA ELEMENT CODING INSTRUCTIONS

301. SECTION ORGANIZATION

- .1 For each element on the FARS forms, an instruction page follows in the order of the elements on the forms.
- .11 The letters in the upper right hand corner refer to the forms:
- 'A' - Accident Level Form
 - 'V' - Vehicle Level Form
 - 'D' - Driver Level Form
 - 'P' - Person Level Form
- .12 The Format section gives the type element and whether it must be coded for an original case or whether it can be changed.
- .13 The Element Value section lists the values for the element and their associated codes.
- .14 The Remarks section contains coding instructions, special instructions, etc., for the element.
- .15 The Consistency Checks section lists all inter-element checks for the element.
1. To the left of the error description is a 4-character reference number. The first 3 characters are unique sequence numbers for each edit check. The 4th character indicates the severity of the error as follows:
- Symbol**
- 0-** The elements involved will be noted as questionable or unlikely and the status of the case will not be affected.
- P-** Non-mandatory data are inconsistent and the status of the case will be made Pending until action is taken to correct the inconsistency.
- F-** Data elements including at least one "logical" mandatory element are inconsistent and the status of the case will be made Flawed until action is taken to correct the inconsistency.
- S-** Data elements including at least one "structural" mandatory element are inconsistent and corrective action must be taken before proceeding to enter case data.
- .16 The Special Processing Rules section lists all checks made between forms to determine consistencies.

<h2 style="margin: 0;">NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES</h2>

Format: 2 numeric

| Must be coded for an original submission, before moving to any other level.

Element Values:

| 01-99

Remarks:

This count will match exactly the persons counted in the case structure field “Number of Persons Not in Motor Vehicles” (formerly called “Number of Non-Motorist Forms Submitted”). Occupants of any motor vehicle in-transport, parked/stopped off roadway motor vehicles, working motor vehicles, or motor vehicles in motion outside the trafficway will not be counted in this field.

The count for this field includes:

1. Occupants of a Non-Motor Vehicle Transport Device (persons riding in an animal-drawn conveyance, on an animal, injured occupants of railway trains) - Person Type code “04.”
2. Pedestrians, Bicyclists and Other Cyclists - Person Type codes: “05, 06 and 07.”
3. Other Persons on Personal Conveyances (i.e., skaters, wheel chair occupants) - Person Type code “08.”
4. Any injured persons outside the trafficway that are not in a motor vehicle (in buildings) - Person Type code “10.”

Consistency Checks:

	IF	THEN
(5Y0F) 1.	FIRST HARMFUL EVENT equals 08-09, 15,	NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES must not equal 00.

Case Structure Integrity Rules:

- (040F) 1. The NUMBER OF PERSON FORMS SUBMITTED given on the Accident Form is not equal to the total of NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES and VEHICLE OCCUPANTS.

- (CSI4) 2. NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES must equal the actual number of persons not in motor vehicles in this case.

NUMBER OF VEHICLE FORMS SUBMITTED

Format: 2 numeric

| Must be coded for an original submission, before moving to any other level.

Element Values:

| 01-99

Remarks:

This element records all motor vehicles which the officer has reported on the PAR as a unit involved in the accident, regardless of whether the motor vehicle was a hit-and-run vehicle, an involved motor vehicle that had left the scene of the accident, etc. Refer to the instructions under Hit-And-Run (A33). Included are: in-transport vehicles, not in-transport vehicles (parked/stopped off roadway/working motor vehicles), or vehicles located outside the trafficway boundaries.

Remember all vehicles that are part of the unstabilized situation are part of the accident. Therefore, when recording the number of vehicles involved, the vehicles need not make contact with one another. They need only have a harmful event as part of the unstabilized situation. For example, two vehicles are traveling through an intersection when a pedestrian steps into the roadway. The first vehicle strikes the pedestrian and the second vehicle swerves to avoid the first, loses control and overturns. Both vehicles in this situation are “contact” vehicles; therefore, this is a two vehicle accident.

IMPORTANT:

Remember, you must have at least one motor vehicle “In-Transport” involved in the accident for this to be a reportable FARS case.

Consistency Checks:

| (CSI1) | 1. NUMBER OF VEHICLE FORMS SUBMITTED must equal the actual number of Vehicle Level forms for this case. |
| (CSI2) | 2. There must be exactly one Driver Level form corresponding to each Vehicle Level form. |

NUMBER OF PERSON FORMS SUBMITTED

Format: 2 numeric

| Must be coded for an original submission, before moving to any other level.

Element Values:

| 01-99

Remarks:

A Person Level form must be submitted for all persons involved in the accident, except for:

- 1) uninjured bus passengers (excluding van-based bus passengers); and
- 2) uninjured railway train occupants.

Always submit a person level form for the bus driver regardless of injury and any injured passengers as well as any injured railway train occupants.

Before 2003, the policy was not to submit a Person Level form for uninjured occupants of van-based buses. This policy has changed beginning in 2003. Always submit a Person Level form for all occupants of van-based vehicles, including van-based buses.

Submit a Person Level form for persons in a hit-and-run vehicle. If no information is known, code all elements as "Unknown." Refer to the instructions under Hit-And-Run (A33).

Consistency Checks:

- (040F) 1. The NUMBER OF PERSON FORMS SUBMITTED given on the ACCIDENT FORM is not equal to the total of NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES and VEHICLE OCCUPANTS.
-

Case Structure Integrity Rules:

- (CSI3) 1. NUMBER OF PERSON FORMS SUBMITTED must equal the actual number of Person Level forms for this case.

COUNTY / CITY

Format: one set 3 numeric, one set 4 numeric

Element Values:

Use GSA Geographical Location Codes

County:

Blanks	
000	Not Applicable
001-996	GSA Codes
997	Other
999	Unknown

City:

Blanks	
0000	Not Applicable
0001-9996	GSA Codes
9997	Other
9999	Unknown

Remarks:

The accident location refers to the location of the unstabilized event.

COUNTY and CITY are considered one field. Both must be submitted at the same time.

If COUNTY only is known CITY may be unknown.

Code CITY as "0000" if the accident does not occur within city limits.

Code CITY as "9997" if CITY is other than those given by the GSA Codes.

Code CITY as "9999" if accident location is unknown.

Code COUNTY as "997" if COUNTY is other than those given by the GSA Codes.

Code COUNTY as "999" if location is unknown.

In general, "Not Applicable" should be used when there is no GSA code for the accident location. "Other" should be used when the Analyst knows there is a GSA code for the location, but the code does not appear on the master GSA code list provided by Headquarters. Both situations should be reported to Headquarters.

Consistency Checks:

	IF	THEN
(200P) 1.	CITY is greater than 0000 and less than 9997, and COUNTY is greater than 000 and less than 997,	COUNTY and CITY must be valid codes for the STATE.

ACCIDENT TIME

Format: 4 numeric

| Must be coded for an original submission, before moving to any other level.

Element Values:

0001-2400	Valid military time (Code midnight as “2400”)
0099-2399	Known hours but unknown minutes
9999	Unknown

Remarks:

Code midnight as “2400.” If unknown minutes, code the actual hour and “99” for the minutes. One minute after midnight is coded “0001.”

If the day of the accident and the day of EMS Notification do not have the same date, then be sure to use code “18” in Related Factors-Accident Level (A39).

How to Code Midnight:

In general, code midnight as “2400.” However, there may be confusion over which day midnight falls into. It is key to remember that in FARS, midnight or 2400 is taken to be the beginning of a new day, and never the end of a day. This may not be the practice followed in your sources. Therefore, you have to determine which part of the day is being considered in your sources.

End of Day

If your data sources give you an Accident Date and are consistent in talking about the end of that day, when they give the time of the accident as “midnight,” “12:00-midnight,” “24:00” or “00:00,” then you should code Accident Time as “2359.”

Beginning of Day

If your sources give an Accident Date and are consistent in referring to the beginning or early moments of that day when they give an accident time, code midnight as “2400.”

See remarks-Notification/Arrival Time EMS, EMS Arrival At Hospital (A36-A38).

Remarks:

NON-JUNCTION ACCIDENTS

Assign the accident to the trafficway on which the First Harmful Event occurred. If the First Harmful Event occurred on private property, assign the accident to trafficway on which the vehicle was traveling when the Unstabilized Situation began.

INTERSECTION ACCIDENTS (Not Within an Interchange)

In an at intersection accident, assign the accident to the highest function class of trafficway at the intersection.

If the vehicles are traveling on different roadways of equal class, assign the accident to the roadway on which the motor vehicle precipitating the accident is traveling.

INTERSECTION ACCIDENTS (Within an Interchange)

Interchange accidents that occur in an intersection of a ramp that connects a higher and a lower class trafficway should be assigned to the highest-class trafficway. For example: vehicle #1 strikes vehicle #2 in the intersection of the I-270 ramp and US-10. Code Roadway Function Class as “01” or “11” (Principal Arterial – Interstate).

Ramps are part of the highest class of trafficway to which they connect. Therefore, if an accident occurs on a ramp, including in the merge/diverge lanes, and it is not an Intersection accident, it is assigned to the highest class of trafficway to which the ramp connects. Example: vehicle #1 overturns on the ramp of I-270 and US-10. Code Roadway Function Class “01” or “11” (Principal Arterial – Interstate). This includes intersection-related and entrance/exit ramp related accidents for Relation to Junction.

NOTE: Beginning in 2004, the roadway characteristics of the lower class trafficway in an interchange may be coded (See remarks in “A13 – Trafficway Identifier” and “A19 – Relation to Junction.”)

OTHER ACCIDENTS (Within An Interchange)

For other accidents that occur within an interchange, other than intersection accidents, code Roadway Function class for the trafficway on which the vehicles were traveling. Example, vehicle #1 strikes vehicle #2 on US-10 bridge within the I-270 interchange (not in the intersection of any ramp, or on any ramp). Code Roadway Function Class for US-10 and not I-270.

QUESTIONABLE CASES

In any questionable case, the higher function class takes precedence.

Federal Highway Administration classification obtainable from the State Highway Department must be used. No other classification source is acceptable. Refer problems in obtaining the F.H.W.A. classification to Regional State Assignee.

Remarks:

Before coding this element, be certain of which trafficway is to be coded. If there is any question, refer to the remarks section of A11 – Roadway Function Class for a hierarchy for selecting the appropriate trafficway to be coded. Code ALL highway elements with regard to this same trafficway.

CODING FRONTAGE ROADS

If the accident occurs on a frontage road which is part of a larger, higher order trafficway (such as Interstate, U.S. Highway, or State Route), use the following guideline to code the highway elements:

- Code Trafficway Identifier and Roadway Function Class for the Interstate, US Highway or State Route
- Code Route Signing “7 – Frontage Road”
- Code the highway characteristics (Trafficway Flow, Number of Lanes, Speed Limit, Traffic Controls) for the Frontage Road

Make sure to include the highway designation in Trafficway Identifier when using Code “7.” See Trafficway Identifier (A13).

If the Frontage Road is a separate trafficway, code all highway elements for that trafficway. Code “7” is not used.

Code 8 (Other) includes ‘Other Limited Access’ and ‘Other Major Artery.’

Federal Highway Administration classification obtainable from the State Highway Department must be used. No other classification source is acceptable. Refer problems in obtaining the F.H.W.A. classification to Regional State Assignee.

TRAFFICWAY IDENTIFIER

Format: 2 sets, 20 alphanumeric

Element Values:

Blanks
 Actual Posted Number, Assigned Number, or Common Name (if no posted or assigned number) except:
 99999999999999999999 Unknown

Remarks:

Beginning in 2004, a second trafficway identifier was added to accommodate intersection and intersection-related accidents where the officer provides the identifier for the second trafficway. (See diagram below).

For Non-Junction Accidents:

Code the trafficway identifier from the police report or highway department in the top row. Leave the bottom row blank.

For Intersection Accidents (Not Within an Interchange Area):

Code the trafficway identifier for the trafficway with the highest function class in the top row. Code the second trafficway identifier at the intersection, if provided by the police, in the bottom row.

For Intersection-Related Accidents (Not Within an Interchange Area):

Code the trafficway identifier for the trafficway provided by the police in the top row. This does not necessarily have to be the highest functional class. In all cases, this will be the trafficway where the First Harmful Event occurred or the Unstabilized Situation began. Code the second trafficway identifier at the intersection, if provided by the police, in the bottom row.

For Intersection Accidents Within an Interchange Area:

If the First Harmful Event occurs within the intersection of a ramp and the surface roadway:

- Code the trafficway identifier provided on the police report or highway log in the top row (this does not necessarily have to be the highest function class).
- Code Route Signing for the trafficway in the top row.
- Code the highway characteristics coded for the trafficway in the top row (Route Signing, Trafficway Flow, Number of Travel Lanes, Speed Limit, Roadway Alignment, Roadway Profile, Roadway Surface Type, Roadway Surface Condition, and Traffic Control Device/Functioning).
- It is important to code the Roadway Function Class and National Highway System for the highest class of trafficway at this intersection. (See A11 - Roadway Function Class).
- Use the bottom row to record the second trafficway identifier provided by the police for this intersection.

For Intersection-Related Accidents Within an Interchange Area:

Code the trafficway identifier for the trafficway provided by the police in the top row. In many cases, this will be the trafficway where the First Harmful Event occurred or the Unstabilized Situation began. Code the second trafficway identifier at the intersection, if provided by the police, in the bottom row.

For Ramp Accidents:

If the accident occurs on the ramp or is related to the ramp, include the word “RAMP” and/or the ramp ID number after the trafficway’s identifier (e.g., I-10 RAMP).

- Beginning in 2004, code the characteristics of the ramp, when provided by the police or the highway department, instead of the characteristics of the highest class of trafficway to which the ramp is attached. (Example: one travel lane, curved alignment, Trafficway Flow equal to Entrance/Exit Ramp, speed limit of the ramp, and appropriate traffic controls on the ramp, etc.).

General Guidelines for Coding Trafficway Identifier:

Enter all alphabetic characters with CAPITAL LETTERS. If less than 20 characters, left-justify and do not zero-fill.

Obtained from the State Highway Department, or if same as that used by the State Highway Department, from the police accident report.

If Route Signing is 1 (Interstate), you must enter “I-” in the first two spaces of Trafficway Identifier

If Route Signing is 2 (US Highway), you must enter “US-” in the first three spaces of Trafficway Identifier

If Route Signing is 3 (State Highway), you must enter “SR-” in the first three spaces of Trafficway Identifier

If Route Signing is other than “1, 2 or 3,” enter only the route name or identifier (and left-justify). (Example: County Route 10 would be just “10,” and “Front Street” would be “Front Street.”) (See FARShelf for common street abbreviations.)

Immediately after the route designation (I-, US- or SR-), you should enter the corresponding highway number. For example, Interstate 70 should be coded as “I-70” and US 66 should be coded as “US-66.” You must use a dash in the highway designation between the capital letters and the number.

If one trafficway is both, a State Highway and an Interstate Highway, Route Signing must always be coded “1-Interstate.” You should always try to obtain the route number and milepoint that correspond to the Route Signing (Interstate).

(a) If the Trafficway Identifier and Milepoint are available for only the State Highway then code Route Signing as “1-Interstate,” enter “I-” in the first two spaces of Trafficway Identifier followed by the full State Highway Identifier as normal (including any letters.) Code the State Highway Milepoint.
E.g.; If California business loop (CA215) is also Interstate 15, then code “I-SR215” or “I-CA215.”

(b) If the Trafficway Identifier and Milepoint are available for both the State Highway and the Interstate Highway, enter “I-” in the first two spaces of Trafficway Identifier followed by the Interstate number. You may then also enter the State Highway Identifier anywhere after the Interstate route number. Code the Interstate Milepoint.
E.g.; “I-15” (SR215) or “I-15” (CA215)

Similarly, if a State Highway is also a US Highway, Route Signing must always be coded “2-US Highway.” You should always try to obtain the route number and milepoint that correspond to the Route Signing (US Highway).

(a) If the Trafficway Identifier and Milepoint are available only for the State Highway, then code Route Signing as “2-US Highway,” enter “US-” in the first three spaces of Trafficway Identifier followed by the full State Highway Identifier as normal (including any letters). Code the State Highway Milepoint.
E.g.; If Florida Route 25 is also US Route 27, then code “US-SR25” or “US-FL25.”

(b) If the Trafficway Identifier and Milepoint are available for both the US Highway and the State Highway, enter “US-” in the first three spaces of Trafficway Identifier followed by the US route number.

You may then also enter the State Highway Identifier anywhere after the US route number. Code the US Route Milepoint.
E.g.; “US-27” (SR25) or “US-27” (FL25).

Consistency Checks:

	IF	THEN
(340P)	1. ROUTE SIGNING equals 1,	the first position of TRAFFICWAY IDENTIFIER #1 must be "I" and the second position must be "-".
(350P)	2. ROUTE SIGNING equals 2,	the first two positions of TRAFFICWAY IDENTIFIER #1 must be "US" and the third position must be "-".
(360P)	3. ROUTE SIGNING equals 3,	the first two positions of TRAFFICWAY IDENTIFIER #1 must be "SR" and the third position must be "-".
(AC0A)	4. RELATION TO JUNCTION equals 02-03, 10-11,	the second TRAFFICWAY IDENTIFIER should not be all blank.

MILEPOINT

Format: 5 alphanumeric

Element Values:

Blanks	
00000	None
Actual to Nearest .1 mile (Assumed decimal, e.g., 12345=1234.5)	
99999	Unknown

Remarks:

Refer to the remarks section under Roadway Function Class (A11) for the hierarchy of selecting the trafficway to be coded.

Code the Milepoint for the respective Trafficway Identifier (A13).

Obtained from the police accident report or from the State Highway Department.

Code the actual Milepoint to the nearest .1-mile with decimal assumed. Right-justify to assumed decimal place if less than 5 digits. For example, if Milepoint is 10, you must code "00100."

OTHER EXAMPLES:

Milepoint	You Must Code
39.89	00399
404	04040
73.1	00731

If the Highway Performance Monitoring System (HPMS) number is known, code it on Accident Level "Additional State Information" and also code the Trafficway Identifier (A13) and the Milepoint (A14) according to the above guidelines.

GLOBAL POSITION

Format: 8 numeric, 10 numeric

Element Values:

Latitude: dd mm ss.ss (Degrees/Minutes/Seconds)

Where <u>dd</u> are Degrees:	blank	
	17-71	Actual Value
	88	Not Available (if state exempt)
	99	Unknown
Where <u>mm</u> are Minutes:	blank	
	00-59	Actual Value
	88	Not Available (if state exempt)
	99	Unknown
Where <u>ss.ss</u> are Seconds:	blank	
	00.00-59.99	Actual Values
	88.88	Not Available (if state exempt)
	99.99	Unknown

For "Unknown" code ALL 99 99 99.99

For "Not Available" code 88 88 88.88 (If exempt from entering this data)

Longitude: ddd mm ss.ss (Degrees/Minutes/Seconds)

Where <u>ddd</u> are Degrees:	blank	
	065-178	Actual Value
	888	Not Available (if state exempt)
	999	Unknown
Where <u>mm</u> are Minutes:	blank	
	00-59	Actual Value
	88	Not Available (if state exempt)
	99	Unknown
Where <u>ss.ss</u> are Seconds:	blank	
	00.00-59.99	Actual Value
	88.88	Not Available (if state exempt)
	99.99	Unknown

For "Unknown" code ALL 999 99 99.99

For "Not Available" code 888 88 88.88 (If exempt from entering this data)

Remarks:

“Global Position” refers to the geographic location of the accident. It is expressed in Degrees, Minutes and Seconds of Latitude; and Degrees, Minutes and Seconds of Longitude:

Latitude: dd mm ss.ss (Degrees/Minutes/Seconds)
 Longitude: ddd mm ss.ss (Degrees/Minutes/Seconds)

In some instances your source documents may display Longitude as a negative (-) number. You may disregard the minus (-) sign.

The state PAR may include the geographic location in a format compatible with this element, or the State Highway Department may be able to provide it from a state Geographic Information System (GIS) or Global Positioning System (GPS).

A Geo-locator tool is available on the FARS microcomputer to assist generating latitude and longitude when they are not available through state sources.

If data is not available and your state is determined to be exempt from entering this data, code all “8’s.” For example, if you are in a state that does not collect or record geographic location coordinates and your state will not be required to use the FARS Geo-locator tool, the data is considered “not available.”

If data is unknown, code all “9’s.” For example, if you are in a state that does record geographic location coordinates, but you don’t have those coordinates, and the Geo-locator tool cannot provide the coordinates, the data is unknown.

Code the complete valid Latitude and Longitude, if available, if not blank and if not unknown. You must code valid Latitude or Longitude minutes and seconds when coding a valid value for Latitude or Longitude degrees. (For example: Latitude- 38 99 99.99 is invalid.)

Right-Justify Degrees and Minutes:

Note that Longitude Degrees can be up to three digits. Code Degrees less than three digits in the right-most positions and “0’s” to the left. Code Latitude or Longitude Minutes less than two digits in the right-most position with “0’s” to the left. Examples: Longitude “77 degrees - 7 minutes - no seconds” is coded 077 07 00.00; Longitude “80 degrees - no minutes - no seconds” is coded 080 00 00.00; Latitude “30 degrees - one minute - 30 seconds” is coded 30 01 30.00.

Latitude and Longitude Seconds:

Code the value of Latitude or Longitude Seconds to two significant places after the decimal. If the Latitude or Longitude Seconds precision is less than two decimal positions, enter “0’s” in the right-most positions of Seconds. Always right-justify any data before the decimal point with added “0’s” to the left (e.g., 5.1 seconds is 05.10 with no spaces before the decimal point).

Consistency Checks:

Remarks:

Definition: The first property damage (including to vehicles) or injury-producing event.

In accidents involving harmful events caused by objects set-in-motion by a Motor Vehicle in-transport, remember that a vehicle's load is considered part of the vehicle.

EXAMPLES:

- 1) If cargo falls from a truck (in-transport) and strikes another vehicle in-transport, this is treated as a two-vehicle accident. Therefore, the proper First Harmful Event code is “54 – Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport.” Remember, when this happens, to also use Sequence of Events code “54 – Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport” in the sequence on both vehicles.
- 2) If cargo falls from a truck (in-transport) and strikes another vehicle NOT in-transport, this is also treated as a two-vehicle accident; therefore, the proper First Harmful Event code will be one of the “Collision Involving Motor Vehicles NOT In-Transport” codes “14, 45 or 55.”
- 3) If cargo falls from a truck (in-transport) and strikes a pedestrian, the First Harmful Event would be code “08 – Pedestrian.” Also, be sure to use Related Factors-Accident Level code “15 – Non-Occupant Struck by Falling Cargo, or Something That Came Loose From or Something that was Set-in-Motion by a Vehicle.”

Note: For examples 1 and 2 above, be sure to use Related Factors-Accident Level code “14 – Motor Vehicle Struck by Falling Cargo or Something That Came Loose From, or Something That Was Set-in-Motion by a Vehicle.”

Code 01 (Overturn/Rollover) is used when a vehicle rotates 90° or more, side-to-side or end-to-end, producing the first damage or injury. For motorcycles, laying the motorcycle down on its side is sufficient to code overturn as a harmful event if damage or injury is produced, even though element “V19 – Rollover” is not applicable to motorcycles.

Code 04 (Gas Inhalation) includes injury or death from carbon monoxide fumes leaking from a motor vehicle in-transport.

Code 05 (Fell/Jumped from Vehicle) is used when falling or jumping (not suicide) from the vehicle is the first event causing damage or injury. For example, a passenger of a motor vehicle in-transport leans against the car door, it opens and the passenger falls out and is injured by the fall or a person riding on a vehicle’s exterior (hood, roof, running board, etc.) falls or jumps.

Code 06 (Injured in Vehicle, Other than Cargo/Equipment Loss or Shift). Use where an occupant is injured during an unstabilized situation without a collision. Examples: Driver slams on brake, causing an unrestrained passenger to be injured. Driver makes a sharp turn causing driver to strike head on side window, knocking driver unconscious.

Code 07 (Other Non-Collision). Examples: driving off a cliff where damage is not the result of an overturn or collision with an object; a vehicle being towed by a chain, slides forward striking the towing vehicle causing injury or damage.

Code 11 (Live Animal) is used for collisions with live animals (domesticated or wild) that are not themselves being used as transportation or to draw a wagon, cart or other transport device (see ANSI D16.1). See code “49” for ridden animals and animals drawing transport devices. See Related Factors-Driver Level (D22) “83 – Live Animal in Road” to determine if it applies. See code “18 – Other Object Not Fixed” for an animal carcass lying in the roadway.

Code 12 (Motor Vehicle In-Transport on Same Roadway). Use this code when one motor vehicle in-transport collides with another motor vehicle in-transport on an undivided highway or the same side of a divided highway.

Code 13 (Motor Vehicle In-Transport on Different Roadway) differs from Code “12” in that it applies to events where a motor vehicle in-transport leaves one roadway and enters a different roadway, having a collision with a motor vehicle in-transport on that roadway. Example: one motor vehicle in-transport travels across the median of a divided highway, enters oncoming traffic and is struck; or, a motor vehicle in-transport traveling on an overpass leaves the trafficway and strikes or is struck by a motor vehicle in-transport traveling on a trafficway below. Choose code “13,” over code “12” when a motor vehicle crosses over onto the other *roadway* striking another motor vehicle.

Code “13” should NOT be used in an at intersection accident (where the First Harmful Event occurs in the intersection).

Code 14 (Parked Motor Vehicle or Motor Vehicle Stopped Off the Roadway) refers to a collision with a parked/stopped off roadway motor vehicle (“not in-transport”). “Parked” motor vehicles are those vehicles parked in designated parking areas (curbside where parking is allowed, marked parking spaces in parking lots, private driveways, and other private property). Motor vehicles “Stopped off the Roadway” are those stopped on the shoulder, median or roadside and outside the trafficway.

Code 15 (Non-Motorist on Personal Conveyance). A personal conveyance is (1) a human-powered, non-motorized device not propelled by pedaling, (2) such devices even when motorized. Includes rideable toys (roller skates, inline skates, skateboards, skates, baby carriages, scooters, toy wagons), motorized rideable toys (motorized skateboard, motorized scooter, motorized toy car), devices for personal mobility assistance (Segway-style devices, motorized and non-motorized wheelchairs, handicapped scooters).

Exclusions: Golf cart, low-speed vehicle (LSV), go-cart, mini-bike are excluded because they are motor vehicles (see Collision with Motor Vehicle Codes).

Code 16 (Thrown or Falling Object) is a non-collision event and, unless there is another collision during the accident, IMPACT POINTS (V21) for the vehicle involved must be coded “00.” Examples: Falling tree/rock, dropping/throwing something off bridge, throwing a snowball. However, it does not have to come from above. Excludes Cataclysms.

Code 17 (Boulder) is a rock of sufficient mass that when struck by a motor vehicle moves very little and remains basically intact. It may be considered as a fixed object.

Code 18 (Other Object [Not Fixed]) e.g., dead body, animal carcass or fallen tree already laying in roadway, prior to the unstabilized situation in this accident; construction cones or barrels on road (temporary).

See Code “45 – Working Motor Vehicle (Construction, Maintenance or Utility Vehicle Only)” for transport devices used as equipment (i.e., cherry picker at work, paint striper at work, etc.).

Code 20 (Impact Attenuator) is a device for controlling the absorption of energy released during vehicle collision (“crash cushions”). Its most common application involves the protection of fixed roadside objects such as bridge piers, elevated gores at exit ramps, etc. Examples include barrels filled with water or sand, and plastic collapsible structures.

Code 21 (Bridge Pier or Abutment) refers to support structures; most likely to be struck by vehicles passing under bridges (see code “50 – Bridge Overhead Structure” for vehicles striking the bottom of a bridge while traveling on a trafficway underneath it). If the vehicle first strikes a concrete barrier protecting a bridge pier or abutment, use code “25 – Concrete Traffic Barrier.”

- **Bridge Pier** - a square or round column of stone, concrete, brick, steel or wood for supporting a bridge between abutments.
- **Bridge Abutment** - wall supporting the ends of a bridge generally retaining or supporting the embankment under bridge ends and composed of stone, concrete, brick or wood. (Includes wing-walls.)

Code 22 (Bridge Parapet End) and **Code 23 (Bridge Rail)** are components of the upper portion of bridges.

Code 22 (Bridge Parapet End) the end of a low wall which runs along the outer most edge of the roadway or sidewalk on the bridge and usually composed of brick, stone, or concrete. Balustrade is often used synonymously with parapet.

Code 23 (Bridge Rail) a wooden, brick, stone, concrete or metal fence-like wall which runs along the outermost edge of the roadway or sidewalk on the bridge or a rail constructed along the top of a parapet.

- a) Bridges do not need to support another roadway. It may be an overpass for a train or even for a viaduct (water conduit).
- b) See bridge components diagram on next page for bridge codes “21, 22 and 23.”
- c) Barriers as in codes “24, 25 and 26” refer to a physical structure such as a guardrail, a concrete safety barrier or a rock wall which has the primary function of preventing cross-median travel by deflecting and redirecting vehicles along the roadway on which they were traveling. Therefore, trees, curbing, rumble strips and drain depressions are not barriers.

BRIDGE COMPONENTS

Code 50 (Bridge Overhead Structure) is used when striking the bottom of a bridge while traveling on a trafficway underneath it.

Code 24 (Guardrail Face) is a low barrier running along the edge of a road shoulder either on the right or the left and which has the primary longitudinal structure composed of metal (plates, cable, mesh, box beam, etc.).

A guardrail is differentiated from Code “25 – Concrete Traffic Barrier” by the material making up the greatest part of the longitudinal portion of the structure. In the case of guardrails, this is metal whereas in concrete barriers this is concrete (including concrete rails).

Guardrails, which serve as bridge rails, should be coded “23 – Bridge Rail.”

Code 52 (Guardrail End) is coded if a vehicle strikes the end of a guardrail. Guardrails can have a separate flat or rounded piece of metal attached to the end of an expanse of guardrail face.

Code 25 (Concrete Traffic Barrier). Refers to the longitudinal traffic barriers constructed of concrete and located on the outside of the road surface, in a median, or in gore areas. This includes all temporary concrete barriers regardless of location (i.e., temporary Jersey Barrier on a bridge being used to control traffic during bridge repair/construction). Concrete walls (vertical side surfaces) do not apply here; see code “39 – Wall.”

When a vehicle is traveling under a bridge and strikes a concrete barrier used to protect the bridge pier or abutment use code “25.”

Code 26 (Other Traffic Barriers) is used for all other longitudinal barriers such as wood or rock and unknown barrier composition types.

Code 27 (Highway/Traffic Sign Post/Sign) is used when the post supporting a traffic sign, or the sign itself, is hit by a motor vehicle in-transport. Includes mile markers. (See Code “46” for traffic signal supports.)

Code 28 (Overhead Sign Support/Sign) is used when the sign supported is above the highway. The difference between codes “27” and “28” is the location of the sign (overhead or the side of the road).

Code 29 (Luminarie/Light Support) refers to supports for highway lighting systems, not including other private lighting systems (e.g., parking lot lights). Support does not include other fixed objects to which lighting is affixed (e.g., telephone poles).

Code 30 (Utility Pole) Electrical, Telephone, Cable and other utility pole-type supports.

Code 31 (Other Post, Other Pole, or Other Supports) is used for posts other than highway signs. (E.g., reflectors on poles along side of roadway, parking meters, flag poles, etc.). For mail box posts, use code “53 – Mail Box.”

Code 32 (Culvert) is any structure entirely under the roadway (driveway or entranceway) and less than 20 feet in span measured along the center line of the roadway.

Code 33 (Curb) is a concrete or asphalt structure up to 12 inches in height which borders the roadway. It provides drainage control and pavement edge delineation. The face of the curb may be sloped or vertical. Be careful that the PAR provides some indication that damage has occurred when a vehicle strikes a curb.

Codes 35-37 (Embankments) are raised structures to hold back water, to carry a roadway, or the result of excavation or washout (including erosion) that may be faced with earth (Code “35”) or rock (sometimes called a berm), stone or concrete (code “36”). An embankment can usually be differentiated from a wall by its incline, whereas a wall is usually vertical. However, there are exceptions; such as a retaining wall which may be inclined or a vertical embankment caused by a natural event such as a washout.

In accidents involving a field approach or crossing, if in doubt about when to use codes “32, 34” (Culvert/Ditch) or codes “35-37” (Embankment), use this criteria:

- a) Use code “32, 34” if the driver would not have been able to recover from the ditch even if there had been no field approach (crossing).
- b) Use code “35, 36, 37” if the driver would have been able to recover from the ditch, but struck the field approach (crossing) prior to doing so.
- c) Use code “35, 36, 37” if it is not known whether or not the driver would have been able to recover from the ditch and a field approach (crossing) is involved.

Code 38 (Fence) includes the fence posts. A fence can be made of wood, chain link, stone, etc. (not shrub hedges serving as containment for property).

Code 39 (Wall) is a primarily vertical (+ 15° from vertical) structure composed of concrete, metal, timber, or stone which is not part of a building or a fence but typically is used for retaining earth, abating noise, and separating areas but not for containment as in the primary function of a fence). Also not included as walls are wing-walls, which are attached to ends of bridge abutments and extend back at an angle from the roadway. Wing-walls should be coded as code “21.”

Code 42 (Tree [Standing Tree Only]) is used when a vehicle strikes a standing tree. If a vehicle strikes a tree lying in the roadway, use code “18 – Other Object (Not Fixed).” If a tree falls on a vehicle as it is passing by, use code “16 – Thrown or Falling Object.”

Code 43 (Other Fixed Object). This is used when the object is fixed (considered a permanent structure) and is not described by any of the other fixed object codes. Includes utility wires and “guy” wires attached to utility poles.

Code 45 (Working Motor Vehicle [Construction, Maintenance or Utility Vehicle Only]). Use this code when the first injury- or damage-producing event of the accident involves a collision with a construction, maintenance or utility vehicle in the process of working and not “in-transport.” Examples: cherry picker working on the telephone lines, a paint striper painting lines on the road, a tractor mowing grass on trafficway, a county/state snow plow plowing snow, a highway dump truck dumping asphalt for a new travel lane, etc.

NOTE: Before 2004, this code was called “Transport Device Used as Equipment.” It included other working activities in addition to construction, maintenance and utility work on trafficways. From 2004 forward, code “45” excludes working activities other than highway construction, maintenance or utility vehicles (e.g., garbage truck picking up trash, mail/delivery trucks while making deliveries, personal vehicles plowing snow, police vehicles at a construction work site, etc. These are considered motor vehicles “in-transport”). Use Related Factors-Vehicle Level code “42 – Other Working Vehicle (Not Construction, Maintenance, Utility, Police, Fire, or EMS Vehicle)” to identify these vehicles.

A question may arise when a police, fire or emergency medical vehicle is struck on the roadway while at the scene of an accident, at a traffic stop, as traffic control, or at a construction/ maintenance site. The question becomes, “has its function changed from being a motor vehicle in-transport to a working vehicle?” The answer is “no.” Treat these situations as a motor vehicle in-transport striking another motor vehicle in-transport (Use codes “12” or “13”.) Use Related Factors -Vehicle Level code “41 – Police, Fire, or EMS Vehicle Working at the Scene of an Emergency or Performing Other Traffic Control Activities” to identify that this vehicle was struck while performing these work activities.

Taxis/limousines and commercial buses, etc., are always considered to be “in-transport” because their primary work function is to transport persons from one place to another. (See codes “12,” “13” or “14”).

Code 47 (Vehicle Occupant Struck or Run Over by Own Vehicle). Use when occupant falls or comes out of vehicle and is struck or run over by that vehicle. Does not apply to occupants ejected during overturns.

Code 48 (Snow Bank). Used when snow fall and/or road plowing creates essentially fixed barriers of snow/ice which are not snow-covered earth or rock embankments.

Code 49 (Ridden Animal or Animal-Drawn Conveyances) is used for collisions with animals being used as transportation. This includes ridden animals and animals (or teams of animals) drawing a transport device (e.g., a horse drawing a sleigh, a team of horses drawing a stage coach, etc.).

Code 51 (Jackknife [Causing Injury or Damage]) applies to a condition that occurs to an articulated vehicle, (any vehicle with a trailing unit(s) connected by a hitch; e.g., truck tractor or single-unit truck with one or more trailers, articulated bus, car pulling a boat on a trailer, etc.) while in motion. The condition reflects a loss of control of the vehicle by the driver in which the trailer(s) yaws from its normal straight-line path behind the power unit, striking the power unit, causing damage to the power unit or trailer.

Code 54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport) is used when the first injury- or damage-producing event of the accident is two motor vehicles in-transport making contact by something set-in-motion by one of the vehicles. Beginning in 2005, in these circumstances, both vehicles should have code “54” in their Sequence of Events.

Code 55 (Other Not In-Transport Motor Vehicle) is used when the first injury- or damage-producing event of the accident involves a motor vehicle in motion outside the trafficway (not in-transport).

Code 60 (Cargo/Equipment Loss or Shift [Causing Injury or Damage]) refers specifically to the loss or shift of items carried on or in a motor vehicle or its trailing unit, and not to the vehicle or trailing unit, itself. Code “60” is only used when the first injury- or damage-producing event in the accident is the loss or shift of cargo in/on a vehicle causing damage to that vehicle, its cargo, or injury to its occupants. Code “60” should never be used to refer to a “collision” event.

EXAMPLE:

A pickup truck brakes rapidly to avoid a collision. This causes a piece of lumber in the pickup bed to smash through the rear window, causing the driver to lose control and run off the road, striking a tree.

Code 99 (Unknown). This is used when it is not known what the First Harmful Event is. For example, if a series of harmful events occurred, and it’s unclear which event was first.

*** This value is an unlikely occurrence and will raise an error flag.**

Remarks:

Refers only to accidents in which the First Harmful Event is a collision between two motor vehicles (codes “12, 13, 14, 45, 54 or 55”). In cases where the First Harmful Event involves vehicles that make contact by objects set-in-motion (code “54”), see Manner Of Collision code “11 – Other (End-Swipes and Others).”

Use the diagrams below to help determine Manner of Collision codes “01-05, 07-08”.

Beginning in 2002, this element will be based on the impact location (i.e., front, side or rear) and vehicle orientation (i.e., facing in the same or opposite directions) of the contact vehicles in the First Harmful Event. The use of “direction of force” will no longer be used in determining this element. Prior to 2002, the “direction of force” immediately preceding the collision was allowed to be considered, especially in “head-on” collisions.

Code 00 (Not a Collision with a Motor Vehicle)

This code is used when the First Harmful Event is a non-collision, or a collision with a non-fixed object or fixed object.

Code 01 (Front-to-Rear)

A rear-end collision is one in which the front end of one vehicle collides with the back of another vehicle, while the two vehicles are traveling in the same direction. Use code “01” for all “rear-end” crashes and all crashes in which the front of one vehicle comes in contact with the rear of another in the First Harmful Event, regardless of the original direction of travel.

An important question to ask is: “Did any portion of the front bumper, grill or headlights of one vehicle (Clockpoint “12”) make contact with any portion of the rear bumper, taillights or rear of the other vehicle (Clockpoint “06”) in the First Harmful Event?”

Code 02 (Front-to-Front)

A “head-on” collision is one in which the front end of one vehicle collides with the front end of another vehicle, while the two vehicles are traveling in opposite directions.

Use code “02” for all “head-on” crashes and all crashes in which the front of both vehicles make contact in the First Harmful Event, regardless of the original direction of travel. Direction of force will not be used in determining head-on collisions.

Code 03 (Front-to-Side, Same Direction) is used for angle accidents where the front of one vehicle makes contact with any point along the side of another in the First Harmful Event and the orientation of the vehicles at impact is in the same direction. This does not include right angles or broadside crashes (See code “05”).

Code 04 (Front-to-Side, Opposite Direction) is used for angle accidents where the front of one vehicle makes contact with any point along the side of another in the First Harmful Event and the orientation of the vehicles at impact is in the opposite direction. This does not include right angles or broadside crashes (See code “05”).

Code 05 (Front-to-Side, Right Angle) is used for “broadside” or “T-bone” crashes in which front-to-side contact is made, and the vehicles are at a right-angle position. The front of one vehicle can make contact anywhere along the side of the other, not just Clockpoints “03” or “09.”

Code 06 (Front-to-Side/Angle - Direction Not Specified) is used when the police indicate that it is an “angle” crash without providing enough detail in the narrative and diagram to determine the orientation of the vehicles in the First Harmful Event.

Sideswipe, codes “07 or 08,” may be applied if the following are true for both vehicles involved in the First Harmful Event.

1. The initial engagement does not overlap the corner of either vehicle by more than four inches, so that there is no significant involvement of the front or rear surface areas.
2. There is no pocketing of the impact in the suspension areas. The impact then swipes along the surface of the vehicle parallel to the direction of travel.
3. There is low retardation of the force along the surface of the vehicle.
4. Again, these must be true for both vehicles involved in the collision (with each other), which is the first harmful event.
5. End-swipes are coded as code “11 – Other.”

If unclear if the collision was an angle or a sideswipe, code it as Angle (codes “03-04”).

Code 09 (Rear-to-Side) is used for crashes where the “rear” of a vehicle, and not the front, makes contact with the side of another. This can happen when a vehicle backs up into the side of another vehicle.

Code 11 (Other) should be used for collisions where one vehicle’s “end” swipes (end-swipe) another vehicle instead of their “sides” swiping. Also, this code should be used for any collision between two motor vehicles where the collision is not described by codes “01-10,” including set-in-motion situations.

Examples include:

- An example is when one vehicle is airborne and makes contact with its front to the other vehicle’s hood or top.
- Cargo or other load on one motor vehicle in-transport shifts and lands or is thrown into/onto another vehicle.
- The tire of one motor vehicle in-transport throws a stone through the windshield of another vehicle.
- A vehicle occupant or motorcyclist falls or is thrown from a vehicle striking or is struck by another vehicle.
- A pedestrian is struck by a vehicle and is knocked into the path of a second striking vehicle.

Refer to the following definitions in the current ANSI D16.1 Manual:

- | | |
|--------|-------------------------------|
| 2.5.10 | Intersection |
| 2.5.11 | Junction |
| 2.7.5 | Intersection-Related Accident |
| 2.5.16 | Interchange |

2.5.17	Ramp
2.5.19	Gore
2.7.7	Interchange Accident
3.8.3.3	Intersections or Interchanges
3.8.3.4	Ramps or Frontage Roads

Be sure to review all of the appropriate diagrams with these definitions.

Codes 02 and 10 (Intersection):

An at-intersection accident is a traffic accident in which the First Harmful Event occurs within the limits of an intersection. (See ANSI D16.1 definitions 2.7.3 At Intersection Accident and 2.5.10 Intersection.)

Code 10 (Intersection): (Within Interchange Area): if the First Harmful Event occurs within the intersection of a ramp and the surface roadway:

- It is important to always code A10 – National Highway System and A11 – Roadway Function Class for the highest class of trafficway at this intersection.
- However, beginning in 2004, code the highway characteristics for the trafficway which was coded in the top row of A13 – Trafficway Identifier (i.e., Route Signing, Trafficway Flow, Number of Travel Lanes, Speed Limit, Roadway Alignment, Roadway Profile, Roadway Surface Type, Roadway Surface Condition, and Traffic Control Device/Functioning).

Codes 03 and 11 (Intersection Related):

An intersection-related accident is a traffic accident in which the First Harmful Event (1) occurs on an approach to or exit from an intersection and (2) results from an activity, behavior or control related to the movement of traffic units through the intersection. (See ANSI D16.1 definitions 2.7.5 and 2.5.10.)

Codes 05 or 13 (Entrance/Exit Ramp Related Accidents):

Beginning in 2004, code the characteristics of the ramp, when provided by the police or the highway department, instead of the characteristics of the highest class of trafficway to which the ramp is attached. (Example: one travel lane, curved alignment, Trafficway Flow equal to Entrance/Exit Ramp, speed limit of the ramp, and appropriate traffic controls on the ramp, etc.).

An entrance/exit ramp may exist outside an interchange area (i.e. rest area).

Location of First Harmful Event	A19	A20	A21	Code A22 through A30 with respect to:
a. anywhere along ramp including off roadway (not related to an intersection)	13	01-04 06-08, 10	6	ramp
b. in intersection with surface street within interchange	10	01	1-5	trafficway provided by police or highway dept.
c. in intersection with surface street not within interchange	02	01	1-5	highest class trafficway
d. along ramp and related to an intersection at surface street (within interchange)	11	01-04 06-08, 10	6	ramp
e. along ramp and related to an intersection at surface street (not within interchange)	03	01-04 06-08, 10	1-5	trafficway provided by police or highway dept.

Codes 07 and 14 (Crossover-Related) refers to a turn lane located in the median designated for crossing over from one roadway to another. This only applies to trafficways with separate roadways and a median. At least one vehicle has to be physically in the crossover and the accident has to be related to the use of the crossover.

Code 08 (Driveway Access Related) – refers to an accident that:

- (1) occurs on the trafficway,
- (2) does not occur on a driveway access (Code “04”), but
- (3) results from an activity, behavior or control related to the movement of traffic units to or from the driveway access (See ANSI D16.1 Manual 2.5.9).

For examples:

A vehicle attempting to turn left into a driveway from the eastbound lanes is struck broadside by another vehicle traveling in the westbound lanes, or

A vehicle that has just entered the trafficway from a driveway is struck in the rear before it can gain speed.

Use code 15 (Other Location in Interchange), when the First Harmful Event occurs in an area other than those listed in codes “10 - 14.” This will include on-roadway locations within an interchange.

INTERCHANGE ACCIDENTS
Accidents which occur within the shaded area
are interchange accidents

06	Off Roadway – Location Unknown
07	In Parking Lane/ <i>Zone</i>
08	Gore
10	Separator
11	Two-way Continuous Left-Turn Lane
99	Unknown

Remarks:

This element is coded as to the location of the First Harmful Event.

See ANSI D16.1 Manual for examples, inclusions and exclusions of Trafficway components.

Code 01 (On Roadway) - The Roadway is that part of a trafficway designed, improved and ordinarily used for motor vehicle travel or, where various classes of motor vehicles are segregated, that part of a trafficway used by a particular class. Separate roadways may be provided for northbound and southbound traffic or for trucks and automobiles. The roadway and any shoulder alongside the roadway together make up the road.

Code 02 (Shoulder) is that part of a trafficway contiguous with the roadway for emergency use, for accommodation of stopped vehicles and for lateral support of the roadway structure. A shoulder is a design feature of a road and may or may not be paved. Areas off the roadway not designed or improved to accommodate vehicles are considered roadside.

Code 03 (Median) is defined as that area of a divided trafficway between parallel roads separating the travel in opposite directions. The principal functions of a median are to provide the desired freedom from interference of opposing traffic, to provide a recovery area for out-of-control vehicles, to provide a stopping area in case of emergencies, to provide for speed change and storage of left-turning and U-turning vehicles, and to minimize headlight glare. Medians may be depressed, raised or flush. Flush medians can be as little as 4-feet wide between roadway edgelines. Painted roadway edgelines four (4) or more feet wide denote medians. Medians of lesser width must have a barrier to be considered a median. Medians do not include “shoulders” and “separators.”

Continuous left-turn lanes are **NOT** considered painted medians.

Code 04 (Roadside) refers to a location off the roadway, but inside the trafficway boundaries/right-of-way. It is the outermost part of the trafficway, which lay between the outer property line or other barrier and the edge of the first road encountered in the trafficway.

Code 05 (Outside Trafficway/Outside Right-of-Way) is used for areas not open to the public as a matter of right or custom for moving persons or property. This includes property beyond the roadside outside the boundaries of the trafficway. The trafficway (right-of-way) boundaries are generally considered to run from property line to property line. Also, a portion of the trafficway closed for construction is not a trafficway and would be coded “05;” however, that part of the trafficway open to traffic, while the remainder is closed, is a trafficway and would **NOT** be coded “05.”

Code 06 (Off Roadway – Location Unknown) refers to a location off the roadway, but its relationship to the trafficway boundaries/right-of-way is not known.

Code 07 (In Parking Lane/Zone) refers to a strip of road located on the roadway, or next to the roadway, on which parking is permitted *in marked or unmarked spaces*. This includes curb-side and edge-of-roadway parking (for example, legal residential parking, city street parking, etc.). Sometimes a strip of roadway can be designated for parking at certain hours of the day (parking lane) and for regular travel at other hours (travel lane). This code should not be used during hours when parking is NOT permitted.

Code 08 (Gore) is an area of land where two roadways diverge or converge. The area is bounded on two sides by the edges of the roadways, which join at the point of divergence or convergence. The direction of traffic must be the same on both of these roadways. The area includes **SHOULDERS** or marked pavement if any, between the roadways. The third side is 60 meters (approximately 200 feet) from the point of divergence or convergence or, if any other road is within 70 meters (230 feet) of that point, a line 10 meters (33 feet) from the nearest edge of such road.

Gore Inclusions:

- Areas at rest area entry or exit ramps.
- Areas at truck weight station entry or exit ramps.
- Areas where two main roadways diverge or converge.
- Areas where a ramp and another roadway, or two ramps, diverge or converge.
- Areas where a frontage road and another roadway or two frontage roads, diverge or converge.
- And others.

Gore Exclusions:

- Islands for channelization of vehicle movements.
- Islands for pedestrian refuge.
- And others.

Code 10 (Separator) is the area of a trafficway between parallel roads separating travel in the same direction or separating a frontage road from other roads (see Trafficway Diagram in this section). A Separator may be a physical barrier or a depressed, raised, flush or vegetated area between roads.

Code 11 (Two-Way Continuous Left-Turn Lane) is for left-turning vehicles in both directions of travel. Vehicles stopped or in motion within a continuous left-turn lane are considered to be in-transport, and should be included.

TRAFFICWAY FLOW

Format: 1 numeric

Element Values:

- Blank
- 1 Not Physically Divided (Two-Way Trafficway)
- 5 Not Physically Divided (With Two-way Continuous Left-Turn Lane)
- 2 Divided Highway, Median Strip (Without Traffic Barrier)
- 3 Divided Highway, Median Strip (With Traffic Barrier)
- 4 One-Way Trafficway
- 6 Entrance/Exit Ramp
- 9 Unknown

Remarks:

This variable should be coded in accordance with the roadway selected as discussed in the remarks section under Roadway Function Class (A11).

A trafficway may include several roadways if it is a physically divided highway. Trafficways are not physically divided unless the divider is a median, barrier, or other constructed device. Pavement markings do qualify. Refer to the definition of a median under Relation To *Trafficway*.

All traffic barriers are constructed on a median strip; therefore, if a traffic barrier exists on a divided highway, code “3” must be used. If it is not known whether or not a barrier exists, assume one does not and use code “2” (that is, if a median is known to exist).

Traffic Barrier: refers to a physical structure such as a guardrail, a concrete safety barrier or a rock wall which has the primary function of preventing cross-median travel by deflecting and redirecting vehicles along the roadway on which they were traveling. Therefore, trees, curbing, rumble strips and drain depressions are not barriers.

Blank	
1	One lane
2	Two lanes
3	Three lanes
4	Four lanes
5	Five lanes
6	Six lanes
7	Seven or more lanes
9	Unknown

Remarks:

Refer to the Remarks section under Roadway Function Class (A11).

A roadway (the travel lanes) is one part of a divided trafficway or, if undivided, the same as the travel lanes of the trafficway.

Only lanes open for travel should be counted. Turn lanes are therefore excluded.

This also excludes Continuous Left-Turn Lanes (which are considered “turn lanes”).

SPEED LIMIT

Format: 2 numeric

Element Values:

Blanks	Actual Posted or Statutory Miles Per Hour* Except:
00	No Statutory Limit
99	Unknown

Remarks:

Refers to the highway speed limit that is operational at the time and place of the accident whether physically displayed or not.

Disregard advisory or other speed signs since they do not indicate the legal speed limit.

Acceptable speed limits are in 5 mph increments.

Accurate coding of Speed Limit is extremely important. Do not rely solely on the Police Accident Report. Check with the State Highway Department as well.

Code 00 (No Statutory Limit) - Use this code when there is no posted speed limit and no law that governs the maximum speed you can drive (dirt roads, private roads open to the public).

When coding Speed Limit for roadways with two different speed limits (for north and south-bound lanes), use the speed limit for the direction of travel where the unstabilized situation begins.

When a roadway has a different speed limit for different types of vehicles, code SPEED LIMIT the speed limit that is applicable to passenger cars.

EXAMPLE:

A rural Interstate highway has a speed limit of 65 MPH for passenger cars, but the same road has a 55 MPH speed limit for heavy trucks/buses.

Circumstance 1: A single vehicle (passenger car) accident.
Speed Limit (A23) = 65 MPH

Circumstance 2: A single vehicle (heavy truck/bus) accident.
Speed Limit (A23) = 65 MPH

Circumstance 3: A two-vehicle accident, (passenger car and heavy truck/bus) accident.
Speed Limit (A23) = 65 MPH

Logic:

Our statisticians feel that it would be more representative to code the Speed Limit of the majority of the traffic, namely the passenger car. In addition, they feel that by identifying the car speed limit of 65 MPH, they can then determine the truck speed limit by reviewing the state's speed limit law. (The reverse is not necessarily true.)

When coding Speed Limit on On-Off Ramps (i.e., when the First Harmful Event occurs on the ramp), consider the following:

- A. When a ramp has a posted Speed Limit - a regulatory (black on white) sign, not an advisory (black on yellow) one - the posted speed should be coded.
- B. When there is an advisory speed limit or no sign at all, you should:
 - 1. Check with your State Highway Department to see if there is an implicit speed limit for all unmarked ramps. If there is, code speed limit.
 - 2. If there is not; code the speed limit of the controlled access highway.

*** Values less than 15 mph are unlikely occurrences and will raise an error flag.**

Consistency Checks:

	IF	THEN
(1T0P) 1.	SPEED LIMIT is greater than 55, and not equal to 99,	ROADWAY FUNCTION CLASS <i>should</i> not equal 15-16.
(A220) 2.	ROADWAY FUNCTION CLASS equals 01, 11, and RELATION TO JUNCTION does not equal 10-11, 13,	SPEED LIMIT should not equal 05-40.
(A320) 3.	ROUTE SIGNING equals 1, and RELATION TO JUNCTION does not equal 11, 13,	SPEED LIMIT should not equal 05-40.

	IF	THEN
(A700)	4. SPEED LIMIT is greater than 65,	ROUTE SIGNING should equal 1-4.
(A830)	5. FIRST HARMFUL EVENT equals 46,	SPEED LIMIT should be less than 55.
(A900)	6. SPEED LIMIT equals 60, 65,	ROADWAY FUNCTION CLASS should not equal 05-06, 14-16.

9 Unknown

Remarks:

This element is coded in reference to the commencement of the unstabilized event.

Should be obtained from the accident report or the State Highway Department.

A dip on the road is not the same as a sag. A sag is a design feature whereas a dip is a flaw. The minimum length of a sag is 100 feet.

| 9 | Unknown |

Remarks:

Should be obtained from the accident report or the State Highway Department.

If the PAR lists more than one type, choose the type with the lowest number. For example, if the PAR indicates Dirt/Gravel, then use code "4."

Consistency Checks:

| 7 | <i>Oil</i> |
| 8 | Other |
| 9 | Unknown |

Remarks:

Those conditions noted by the investigation officer. May be present without having contributed to the accident.

Code 2 (Wet) describes a roadway surface that is covered with water from rain or melted snow.

Code 3 (Snow or Slush) Snow - describes a roadway surface that is covered with snow. Slush - describes a roadway surface that is covered with melting snow.

Code 4 (Ice/Frost) includes a roadway covered with ice from freezing rain.

Code 5 (Sand, Dirt, Mud, Gravel) Sand - includes sand on the roadway as a result of sand blown by wind or sand discharged on the roadway by highway trucks.

Dirt, Mud, Gravel indicates these substances presence on the surface of the roadway at the crash location, not the surface type of the roadway by design.

Code 6 (Water [standing or moving]) describes a roadway surface that is covered with an excessive amount of water usually attributed to flooding and typically localized.

Code 7 (Oil) includes fuel spilled on the roadway.

Consistency Checks:

CONSTRUCTION/MAINTENANCE ZONE

Format: 1 numeric

Element Values:

Blank	
0	None
1	Construction
2	Maintenance
3	Utility
4	Work Zone, Type Unknown

Remarks:

See 7th Edition of ANSI D16.1 for definition of “Work Zone” and “Work Zone Accident.”

To use codes “1-3,” the duration of the work must be considered. If the work is short-term (i.e., takes less than one period of daylight and is not performed during hours of darkness), use codes “2 or 3” as applicable. If the maintenance or utility work is long-term, code “1” must be used.

Code 0 (None). Use this code when it is reasonably certain that codes “1-4” do not apply.

Code 1 (Construction). This code indicates that the accident occurred in the vicinity of highway construction activity or within an area marked by signs, barricades or other devices as a highway construction zone. Highway construction includes construction of appurtenances such as guardrails or ditches, surveying activity, installation of utilities within the right-of-way, etc. The use of this code does not imply that the accident was caused by the construction activity or zone.

Code 2 (Maintenance). This code indicates that the accident occurred in the vicinity of highway maintenance activity or within an area marked by signs, barricades or other devices as a highway maintenance zone. Highway maintenance includes pavement marking, painting guardrail, cleaning ditches, mowing grass, etc.

Code 3 (Utility). This code indicates that the accident occurred in the vicinity of utility work such as electrical work within the right-of-way. The utility company must perform the work.

Code 4 (Work Zone, Type Unknown). Use this code when there is insufficient information to distinguish between construction, maintenance and utility.

Consistency Checks:

	IF	THEN
(AL2P) 1.	SEQUENCE OF EVENTS equals 45,	CONSTRUCTION/ MAINTENANCE ZONE should equal 1-4.

Miscellaneous Devices at Railroad Crossing

80 Grade crossing controlled, type unknown

Whether or not at Railroad Grade Crossing

98 Other
 99 Unknown

Remarks:

Code this element whether the device was functioning or not. If more than one device is present, code the highest device (lowest number on list) most related to the accident.

There are two exceptions:

1. One exception is code "50." Code "50" takes precedence over the entire list.
2. The other exception is a Regulatory Speed Limit Sign. You may have a Regulatory Speed Limit Sign along with another Traffic Control Device (for example, a Warning Sign for a dangerous condition in which the Warning Sign is more relevant in the accident). In this case, the Warning Sign is more appropriate to code.

Pavement markings are not considered as traffic control devices.

Code 05 (Flashing Beacon) has a single head and flashes as opposed to the rest of codes “01-09” which have several heads, as in red-yellow-green on colors signal.

If a flashing red beacon appears with a stop sign, the proper code is “05.”

Code 08 (Other Highway Traffic Signal) should be coded when a School Bus uses flashing lights to control traffic around the bus, regardless of any additional signs the school bus uses. For example, a school bus uses flashing lights and a stop sign on an arm to stop traffic around the school bus.

Codes “30-39” should only be used if the accident **occurred during the time the sign was in effect.**

Regulatory Signs – Codes “20-29”

Regulatory signs inform highway users of traffic laws or regulations and indicate the applicability of legal requirements that would not otherwise be apparent.

Examples of Regulatory Signs other than Stop Sign (20) or Yield Sign (21) are: Speed Limit signs, Turn Prohibition signs, Do Not Pass and Do Not Enter signs, Wrong-way and One-way signs, Road Closed signs and Hazardous Cargo signs.

Warning Signs – Codes “40-41”

Warning signs are used when it is deemed necessary to warn traffic of existing or potentially hazardous conditions on or adjacent to a highway or street.

Code “40” is used for Advisory speed signs

Examples of Advisory Signs are: Changes in Horizontal Alignment signs (Hill, Curve, etc.), Road Narrows, Divided Road/Divided Road Ends, Low Clearance, Road Surface Condition signs (Bump, Slippery When Wet, etc.), Traffic Flow signs (Merge, Two-way Traffic, No Passing Zone etc.).

Code “41 – Electronic Warning Sign” includes: temporary warning or advisory signs attached to a vehicle or other portable, stationary devices (e.g., “Lane Closed” yellow flashing arrows due to maintenance activities).

Use Code “07” for permanent lane control electronic devices (i.e., overhead lights or “X” indicating lane open or closed on bridges or at tollbooths).

If there is a question as to which type a sign is, consult the Manual of Uniform Traffic Control Devices (MUTCD). Generally, the appropriate code should be used if a party to the accident failed to heed the sign, was in a position to be controlled by the sign, or the sign has some relationship to the accident. For example, code “20 – Stop Sign” for an accident at a four-legged, two-way stop intersection where a driver fails to stop at the stop sign and collides with another vehicle. Conversely, at the same intersection, a driver on an approach not controlled by a stop sign loses control and strikes a utility pole. In this case, code “20” would not be appropriate. Code “40 – Warning Sign” would be appropriate for a vehicle that fails to negotiate a curve that is posted with a warning sign. Also use code “40” for the flashing lights on an approaching train.

Another set of questions arises from the issue of proximity of the device to the accident. Analysts' judgment must be applied in these situations. Typical signs which create such problems are speed limit signs where a party to the accident may be speeding; "Do Not Pass" signs where a no passing zone extends for miles but is only marked at the beginning of the zone; Pedestrians, etc. Prohibited signs at entrances to freeways but a pedestrian accident occurs on the freeway between interchanges; and other such signs which may pertain to a significant length of road. In these instances, if the accident occurs within reasonably close proximity of the sign and the sign type is relevant to the accident then it may be appropriate to code the sign.

TRAFFIC CONTROL DEVICE FUNCTIONING

Format: 1 numeric

Element Values:

- Blank
- 0 No Controls
- 1 Device Not Functioning
- 2 Device Functioning – Functioning Improperly
- 3 Device Functioning Properly
- 9 Unknown

Remarks:

Coded with respect to Traffic Control Device (A29).

Code 1 (Device Not Functioning) is used when the device is not functioning at all (e.g., signal out, sign knocked down).

Code 2 (Device Functioning – Functioning Improperly) is used when the device was functioning to an extent but not as intended (e.g., red signal lamp burned out, sign twisted or obscured by vegetation).

Unless specifically noted and Traffic Control Device (A29) is not equal to “0,” assume that the device was functioning properly (Code “3”).

Code 9 (Unknown) is used if the police accident report notes that it is unknown whether the device was functioning or not.

Consistency Checks:

4 *Snow or Blowing Snow*

5 *Fog, Smog, Smoke*

6 *Severe Crosswinds*

7 *Blowing Sand, Soil, Dirt*

8 *Other*

9 *Unknown*

Remarks:

Starting 2007, this element is divided into Subfield 1 and Subfield 2. They share the same attributes for recording up to two applicable atmospheric conditions.

Refer to those conditions noted by the investigating officer. May be present without being a RELATED FACTOR.

Code 0 (No Additional Atmospheric Conditions) should only be used for the second Atmospheric Condition subfield, when there is no second Atmospheric Condition listed on your case documentation.

Code 1 (Clear/Cloudy – [No Adverse Conditions]) includes partial cloudiness if sunlight is not diminished. Cloudy - usually "overcast" but may include partial cloudiness if light is diminished.

Code 2 (Rain) - Mist should be coded "2."

Code 3 (Sleet/Hail) this attribute would apply to conditions where precipitation is falling as ice (sleet/hail) or when it is falling as liquid (rain) and then freezing on the roadway.

Code 4 (Snow or Blowing Snow) Snow - is used when precipitation is falling as snow at the time of the crash. Blowing Snow - applies to snow that is falling and/or to snow that has fallen to the ground and is set aloft by wind.

Code 5 (Fog, Smog, Smoke) natural or man-made condition that causes reduced visibility.

Consistency Checks:

HIT-AND-RUN

Format: 1 numeric

Element Values:

- Blank
- 0 No Hit-and-Run
- 1 Driver Left Scene After Collision With Motor Vehicle In-Transport
- 2 Driver Left Scene After Collision With Person Not In a Motor Vehicle
- 3 Driver Left Scene After Collision With Parked/Stopped Off Roadway/Working/In Motion Outside Trafficway Motor Vehicle or Object
- 4 Driver Left Scene After Non-Collision Accident
- 5 Hit-and-Run – Other Involved Person Left Scene

Remarks:

This element refers to cases where a vehicle is a contact vehicle in the accident and does not stop to render aid (this can include drivers who flee the scene on foot). In many states, the investigating officer will note this in the narrative or check the appropriate box on the PAR or, in some cases, cite the driver for failing to render assistance. Check the police accident report carefully for references to hit-and-run or failure to render aid.

Multiple Hit-and-Run Events

In situations where multiple Hit-and-Run codes apply, choose the code based on the Most Harmful Event, or the event for which the officer indicates that the accident was a “hit-and-run.”

For example, a vehicle sideswipes a parked motor vehicle (Hit-and-Run code “3”), and then strikes a motor vehicle in-transport (Hit-and-Run code “1”) killing an occupant. You would use Hit-and-Run code “1.”

Code 0 (No Hit-and-Run) is used if there is no reason to believe a hit-and-run occurred. Use this code in cases where the hit-and-run driver is not one of the major involved parties to the accident. For example, in a five-car accident, the fifth car barely hits the fourth vehicle and causes little or no damage to either vehicle, and leaves the scene. If this is the only vehicle of the five that leaves the scene, then no hit-and-run occurred.

Code 1 (Driver Left Scene After Collision With Motor Vehicle In-Transport) is used if the hit-and-run vehicle hit a motor vehicle in-transport.

Code 2 (Driver Left Scene After Collision With Person Not In a Motor Vehicle) is used if the hit-and-run vehicle struck a pedestrian, other type of non-motorist (pedal cyclist, person on a personal conveyance [skateboard riders, roller skaters, people in wheel chairs, motorized or non-motorized] or occupant of a non-motor vehicle transport device [horse-drawn carriage, train, etc.]). See Hit-and-Run code “3” for occupants of parked/stopped off roadway, and working motor vehicles.

Code 3 (Driver Left Scene After Collision With Parked/Stopped Off Roadway/ Working/In Motion Outside Trafficway Motor Vehicle or Object) is used if the hit-and-run vehicle struck a parked/stopped off roadway motor vehicle or a motor vehicle in motion outside the trafficway (with or without occupants). This also applies to vehicles that hit objects other than motor vehicles in-transport, including working vehicles.

Code 4 (Driver Left Scene After Non-Collision Accident) is used if police state the driver leaves the scene when an occupant of his/her vehicle is injured in a non-collision accident. For example, overturning, fire, person fell or is struck by own vehicle.

Code 5 (Hit-and-Run – Other Involved Person Left Scene) includes situations where any other involved person (passenger, non-motorist, witness) fails to render aid or do their duty and the accident is therefore deemed a “Hit-and-Run” by Police.

- Examples:

1. A vehicle strikes a fixed object, the driver is the fatality, and the passenger flees the scene on foot.
2. A bicyclist is clipped by a vehicle that runs off the road and overturns, ejecting and killing the driver. The bicyclist leaves the scene.
3. ***Driver of a non-contact vehicle that flees the scene is determined to be at-fault and is charged with a hit-and-run violation.***

- For Hit-and-Run Code “5” – Use new Related Factors-Person Level code “56 – Non-Driver Flees Scene” to flag the person who left the scene if a person form is completed for that person.

Vehicle, Driver and Person Level forms must be submitted for all vehicles, drivers, and occupants involved in the accident regardless of the fact that it was a hit-and-run. In addition, Related Factors-Vehicle Level code “31” for the vehicle and Related Factors-Driver Level code “90” for the driver must be used for the hit-and-run vehicle and driver (Hit-and-Run codes “1-4”).

If no information is known about the vehicle and/or driver, code all the elements on the Vehicle and Person Level forms (except for related factors as stated above) as Unknown. On the Driver Level form, code Driver Presence as “1” or “9”. If coded “9,” leave the rest of that record blank except for Related Factors-Driver Level where all applicable codes should be entered. If coded 1, then nine fill that record except for Related Factors-Driver Level where all applicable codes should be entered.

Otherwise, if some information is known about the vehicle and/or the driver, fill out all the elements for which information exists and leave the rest as Unknown (or blank on the

Driver Level form as stated in the preceding paragraph, that is, Driver Presence was coded "9").

SCHOOL BUS RELATED

Format: 1 numeric

Element Values:

Blank	
0	No
1	Yes*

Remarks:

School Bus – refers to a motor vehicle which satisfies the following criteria:

- externally identifiable to other traffic units as a school/pupil transport vehicle;
- operated or owned by a public or private school-type institution;
- where the institution’s students may range from pre-school through high school;
- whose occupants, if any, are associated with the institution; and,
- the vehicle is in operations at the time of the accident to and from the school or on a school-sponsored activity or trip.

Code 1 (Yes)

This code applies to accidents in which a school bus or a **vehicle functioning as a school bus** was directly or indirectly involved.

Vehicles functioning as a school bus may not be externally identifiable as a school/pupil transport vehicle, but do meet all of the other criteria above and, therefore, qualify as vehicles used as school buses.

Examples:

1. A transit bus at the time of the accident, used exclusively (no other passengers except students) to transport students to/from school or school-related activity.
2. Vans or station wagons used by schools to pick up/drop off students only (does not include a parent picking up/dropping off students in private vehicles).

The “school bus” does not have to be a traffic unit in the accident, but it must have been involved in some school-related activity (e.g., children boarding or alighting from the bus; bus stopping at or pulling from a location of such activity; etc.).

Code 0 (No)

Use this code if it cannot be determined that a school bus or a vehicle functioning as a school bus was involved.

Also use this code if the “school bus” was merely a “phantom” vehicle in the accident and was not engaged in activity or movement related to boarding or discharging passengers (e.g., a motorist claims the school bus ran him off the road but made no contact; a school bus in the left lane blocks the view of a motorist making a right-turn-on-red; etc.)

*** This value is an unlikely occurrence and will raise an error flag.**

Consistency Checks:

	IF	THEN
(3D0P)	1. SPECIAL USE for any vehicle equals 2,	SCHOOL BUS RELATED must equal 1.
(V330)	2. SCHOOL BUS RELATED equals 1,	BODY TYPE of at least one of the involved vehicles should equal 50 (School Bus) or SPECIAL USE for at least one involved vehicle should equal 2 – Vehicle Used as School Bus, and BUS USE for at least one vehicle should equal 1-3.
(V440)	3. BODY TYPE equals 50,	SCHOOL BUS RELATED should equal 1.

Special Processing Rules:

(U180) 1. UNLIKELY: SCHOOL BUS RELATED equals 1.

RAIL GRADE CROSSING IDENTIFIER

9999999	Unknown

Remarks:

Code complete identifier.

Identifiers are obtainable from computer printout supplied by NHTSA or from your Federal Railroad Administration representative.

Code as not applicable, accidents that do not involve a rail grade crossing.

Code when any part of the accident occurs at a rail grade crossing. Include accidents in which a vehicle is waiting at a rail grade crossing but does not necessarily travel over the tracks.

Inform your RCOTRs if you have any problems obtaining identifiers.

Consistency Checks:

0001-2400	Valid Military Times
0099-2399	Known Hours but Unknown Minutes
9998	Unknown if Notified
9999	Unknown EMS Notification Time

Remarks:

Notification Time EMS is the time Emergency Medical Service was notified. Every effort should be made to determine the Notification Time EMS, Arrival Time EMS and EMS Time At Hospital.

Code the official EMS times as received. **Do not alter the times because of discrepancies with the accident time.**

If the day of the accident and the day of EMS Notification have different dates, then be sure to use code "18" in Related Factors - Accident Level. Code Notification Time EMS and Arrival Time EMS no matter how much time has elapsed since the Accident Time.

Code 0000 (Not Valid)

Enter this code only if EMS was never notified. **DO NOT** use this code if the EMS was officially canceled. Cancellation is coded under Arrival Time EMS and EMS Time At Hospital. If the EMS was notified then canceled, code the actual notification time.

Codes 0001 - 2400 (Valid Military Times), 0099 - 2399 (Known Hours but Unknown Minutes)

Code Notification Time of the first EMS unit to arrive on the scene. If unknown minutes, code the actual hour and "99" for the minutes. Code midnight as "2400." One minute after midnight is coded "0001." See remarks "How to Code Midnight" under Accident Time (A9).

Code 9998 (Unknown if Notified)

Enter this code if you cannot determine whether or not any EMS was ever notified.

Code 9999 (Unknown EMS Notification Time)

Enter this code if EMS was notified but the time of notification is unknown.

Helicopters that transport victims to treatment facilities are coded as EMS units, but not police who may be trained to render emergency aid. This guidance is not meant to exclude helicopters that are used to transport victims for treatment that may be owned by police departments.

0099-2399	Known Hours but Unknown Minutes
9997	Officially Canceled
9998	Unknown if Arrived
9999	Unknown EMS Scene Arrival Time

Remarks:

ARRIVAL TIME EMS is the time Emergency Medical Service arrived on the accident scene.

Every effort should be made to determine the Notification Time EMS, Arrival Time EMS and EMS Time At Hospital.

Code the official EMS times as received. **Do not alter the times because of discrepancies with the accident time.**

Code Notification Time EMS and Arrival Time EMS no matter how much time has elapsed since the Accident Time.

Code 0000 (Not Notified)

Enter this code only if EMS was never notified. **DO NOT** use this code if the EMS was notified then canceled.

Codes 0001 - 2400 (Valid Military Times), 0099 - 2399 (Known Hours but Unknown Minutes)

Code the arrival time of the first EMS unit to arrive on the scene. If unknown minutes, code the actual hour and "99" for the minutes. Code midnight as "2400." One minute after midnight is coded "0001." See remarks "How to Code Midnight" under Accident Time (A9).

Code 9997 (Officially Canceled)

Enter this code if EMS was officially canceled.

Code 9998 (Unknown if Arrived)

Enter this code if there is no indication of official cancellation, but there is uncertainty or doubt that EMS ever arrived on the scene or not.

EMS TIME AT HOSPITAL

Format: 4 numeric

Element Values:

Blanks	
0000	Not Transported
0001-2400	Valid Military Times
0099-2399	Known Hours but Unknown Minutes
9997	Officially Canceled
9998	Unknown if Transported
9999	Unknown EMS Hospital Arrival Time

Remarks:

EMS Time At Hospital is the time Emergency Medical Service arrived at the treatment facility to which it was transporting victims of the accident.

Every effort should be made to determine the Notification Time EMS, Arrival Time EMS and EMS Time At Hospital.

Code the official EMS times as received. **Do not alter the times because of discrepancies with the accident time.**

Questions arise when there is more than one EMS unit or when there is more than one injured person. Code EMS Time At Hospital according to the following guidelines:

Code 0000 (Not Transported)

Use this code if all the injuries are on-scene fatalities (no one is transported for treatment.) Also use this code if there are live victims, but no one is transported to a treatment facility by EMS.

Codes 0001 - 2400 (Valid Military Time), 0099 - 2399 (Known Hours but Unknown Minutes)

Code the EMS time at hospital of the unit transporting the most severely injured victim. The most severely injured victim includes (and usually is) the victim who dies en route to the treatment facility or later, but not the one who dies on-scene.

If unknown minutes, code the actual hour and "99" for the minutes. Code mid-night as "2400." One minute after midnight is coded "0001." See remarks. "How to Code Midnight" under Accident Time (A9).

Code 9997 (Officially Canceled)

Enter this code if EMS was officially canceled before on scene.

Code 9998 (Unknown if Transported)

Enter this code if there is no indication of official cancellation, but there is uncertainty or doubt that any victims were transported for treatment or not.

Code 9999 (Unknown EMS Hospital Arrival Time)

Enter this code if EMS transported victims for treatment, but the time of arrival at the hospital or treatment facility is unknown.

00	None
01	Inadequate Warning of Exits, Lanes Narrowing, Traffic Controls, etc.
02	Shoulder Design or Condition
03	Other Construction-Created Condition
04	No or Obscured Pavement Marking

	Includes “inadequate warning” of any type; takes precedence over “06 – Inadequate Design” and “03 – Other Construction-Created Condition.”	Inadequate warning due to obscured signs. Inadequate warning due to signs temporarily down, lack of necessary sign for merge, diverge. Not a construction site situation.
	Takes precedence over “06 – Inadequate Design” and “03 – Other Construction-Created Condition.”	Includes only situations pertaining to actual design or condition of the shoulder. Soft shoulder or shoulder collapsing. Inadequate shoulder width. Shoulder at different level from the roadway (drop-off, lifted, not flat).
	Includes “inadequate maintenance” conditions, (i.e., potholes, ruts in roadway) moving/changing signs. Addition of barricades. Change in traffic patterns, merging of lane.	Excludes shoulder-related situations, and situations with inadequate warning of traffic controls, etc.
	Takes precedence over “06 – Inadequate Design” and “03 – Other Construction-Created Condition.”	Includes any pavement marking situations. New asphalt has covered old pavement markings. Pavement marking or surface has worn off. Ice/snow/mud obscuring pavement markings. NOTE: Care should be used to distinguish from “01 – Traffic Controls.”

Related Factors	Environmental/Roadway Conditions Noted
05 Surface Under Water	Takes precedence over “06 – Inadequate Design” and “03 – Other Construction-Created Condition.” Includes any surface under water. Permanently under water, i.e., fords. Temporarily under water, i.e., flooded areas.
06 Inadequate Construction or Poor Design of Roadway, Bridge, etc.	Pertains to original design of trafficway (i.e., roadway bridges, medians, guardrails, traffic barriers). Blind intersections due to highway design, not due to visual obstructions (i.e., shrubbery) etc. Improper banking, lack of a lane for merging. Inadequate road surface (dirt, gravel surfaces, etc.); however, this must not be inferred; must be explicitly stated in police report as a “factor.” Excludes shoulder-related situations, pavement marking situations, situations with inadequate warnings, and surfaces under water.
07 Surface Washed Out (caved-in, road slippage)	Only environmentally caused situations. Destruction of a section of roadway by water (flooding, heavy rains) or other cataclysms (earthquakes, etc.).
13 <u>SPECIAL CIRCUMSTANCES</u> Aggressive Driving / Road Rage by Non-Contact Vehicle Driver	This factor is only used for situations where the investigating officer indicates that a non-contact vehicle (“phantom vehicle”) was being operated aggressively. Officer must use the term “Aggressive” in describing a driver’s behavior. This can be indicated in the report under related/contributing factors or in the narrative. You may encounter the term “Road Rage” used to describe aggressive driving behavior. Be cautious with this term as the two terms are not technically interchangeable. For contact vehicles, see Driver Level - Related Factor code “08 – Aggressive Driving/Road Rage.”

<p>14 Motor Vehicle Struck by Falling Cargo, or Something That Came Loose From, Or Something That was Set-in-Motion by a Vehicle.</p>	<p>“Something set-in-motion” includes persons and vehicles in-transport, parked/stopped off roadway and working motor vehicles, as well as motor vehicles in motion outside the trafficway.</p> <p>“Something set in-motion” denotes that a vehicle “has control of” or “is attached/connected” to the object. An example of “control of” is a vehicle determining the direction of a driverless vehicle. An example of “attached to” is a vehicle overriding another vehicle.</p> <p>“Set-in-Motion” generally applies to non-fixed objects (including pedestrians set-in-motion), and extends to vehicles parked and “in-transport.”</p>
<p>15 Non-Occupant Struck by Falling Cargo, or Something That Came Loose From, or Something that was Set-in-Motion by a Vehicle.</p>	<p>Non-occupant denotes pedestrians, pedal cyclists, and persons on personal conveyances (skate-board riders, roller skaters, non-motorized wheelchairs, baby carriages, scooters).</p>
<p>16 Non-Occupant Struck Vehicle</p>	<p>Pedestrian or bicycle rider entering roadway runs into vehicle, usually the side or back of the vehicle, not in the vehicle’s path.</p>
<p>17 Vehicle Set-in-Motion by Non-Driver</p>	<p>Passenger Shifting gears on vehicle. Passenger hitting accelerator. Passenger turning ignition key. NOTE: Different from Related Factors-Person Level “05 – Interfering With the Driver.”</p>

21 Within Designated School Zone	Areas signed or marked as “School Zone.” This may or may not be school-bus-related. “School Zones” are zones near or at a school, which exist during months and hours when zone signing is in effect.
22 Speed Limit is a Statutory Limit as Recorded or was Determined as This State’s “Basic Rule”	No posted speed limit, but state law sets maximum speed limit on a local road or street.
99 Unknown	

Remarks:

Code information provided in the narrative by the investigating officer. Boxes the officer checks on the PAR should be coded where appropriate. If the investigating officer states any related factors, they should be coded. If the officer states ‘the witness said,’ these should not be coded.

Care must be used in coding this element. The police accident report (PAR) should state that the environmental condition was a factor or existed at this location; cannot be inferred. Can be coded in conjunction with other elements; for example, if a traffic control is temporarily down, it can be coded under both “Traffic Control Device Functioning” and “Related Factors – code 01.” The rule is that “specific” takes precedence over “general” factors.

If no factors are noted, zero-fill all three fields. ‘None’ implies only that investigating officials stated no factors.

If the circumstances surrounding the accident are unknown and no factors are stated, nine-fill all three fields.

Codes 14 -22 - SPECIAL CIRCUMSTANCES, are exceptions to the above remarks. These are codes for unusual factors that occurred during the accident. If you can determine that any of these factors did happen, then these codes should be used.

Definition of Police Pursuit: A pursuit is an event that is initiated when a law enforcement officer, operating an authorized emergency vehicle, gives notice to stop (either through the use of visual or audible emergency signals or a combination of emergency devices) to a motorist who the officer is attempting to apprehend, and that motorist fails to comply with the signal by either maintaining his/her speed, increasing speed, or taking other evasive action to elude the officer’s continued attempts to stop the motorist. A pursuit is terminated when the motorist stops, or when the attempt to apprehend is discontinued by the officer or at the direction of a competent authority.

VEHICLE NUMBER

VEHICLE LEVEL

Format: 2 numeric

Must be coded on an original submission.

System Generated (MDE System Only)

Element Values:

| 00-99

Remarks:

Each motor vehicle in an accident must be assigned a unique number by the Analyst. Order is not important.

Code "00" for persons not in motor vehicles.

Numbers assigned to vehicles must be consecutive, starting with '01' with no missing numbers.

Consistency Checks:

(CSI5) 1.	VEHICLE NUMBER at the Person Level is greater than 00,	VEHICLE NUMBER at the Person Level must equal a VEHICLE NUMBER at the Vehicle Level.

NUMBER OF OCCUPANTS

Format: 2 numeric

Element Values:

Actual Value* if Total Known except:

- | | |
|----|-------------------------------|
| 96 | Ninety-Six or more |
| 97 | Unknown-Only Injured Reported |
| 99 | Unknown |

Remarks:

Must be coded for EACH VEHICLE involved in the accident. Should be coded with the total number of occupants in this motor vehicle.

In those states where data are collected ONLY on INJURED persons and drivers, BUT the actual number of motor vehicle occupants is known, code this element with the number of motor vehicle occupants and complete Person Level forms for ALL INVOLVED individuals.

Bus and railroad accidents are an exception. For bus accidents, the total number of occupants, including the driver, should be recorded, but Person Level forms should only be submitted for injured occupants and for the driver, whether injured or not.

NOTE: This does NOT apply to van-based buses. Before 2003, the policy was not to submit a Person Level form for uninjured occupants of van-based buses. This policy has changed beginning in 2003. Always submit a person level form for all occupants of van-based vehicles, including van-based buses.

Code 97 (Unknown-Only Injured Reported) should be used ONLY when the TOTAL number of occupants is unknown and the State ONLY reports information on drivers and INJURED passengers.

UNIT TYPE

Format: 1 numeric

Element Values:

Blank

- 1 Motor Vehicle In-Transport
- 2 Motor Vehicle Not In-Transport Within the Trafficway
- 3 Motor Vehicle Not In-Transport Outside the Trafficway
- 4 Working Motor Vehicle (highway construction, maintenance, utility only)

Remarks:

This element identifies the type of unit that applies to this motor vehicle at the time it became an involved vehicle in the accident and was reported as a unit on the PAR.

IMPORTANT:

Remember, you must have at least one motor vehicle “In-Transport” involved in the accident for this to be a reportable FARS case.

NOTE: For Unit Type codes “2-4,” you must submit selected elements on the Vehicle Level (V1-V15, V21-V24, V26-V32 and V34-V36). Also, all elements on the Driver level must be left blank, except Driver Presence and Related Factors-Driver Level. Related Factors-Driver Level must be coded all “00.”

Code 1 (Motor Vehicle In-Transport) is used to indicate that this is a motor vehicle in-transport. “In-Transport” means any part of the vehicle’s primary outline as defined by the four sides of the vehicle (excluding open doors or mirrors) is within the roadway (travel lanes) or in motion anywhere within the trafficway boundaries.

Examples:

1. Motor vehicle in traffic on the highway.
2. Motionless motor vehicle abandoned on the roadway.
3. Motor vehicle on roadway stopped at traffic signal.
4. Motor vehicle driving or in motion on the shoulder, median or roadside.

Code 2 (Motor Vehicle Not In-Transport Within the Trafficway) is used to indicate that this is a motor vehicle not in-transport located within the trafficway boundaries when it became an involved unit. The trafficway boundaries are from property line to property line.

Examples:

1. Motor vehicle parked in designated curbside parking lane.
2. Motor vehicle parked in designated curbside parking lane with an open door crossing into the travel lane.
3. Motor vehicle stopped completely on the shoulder, median or roadside.

Code 3 (Motor Vehicle Not In-Transport Outside the Trafficway) is used to indicate that this is a motor vehicle not in-transport located outside the trafficway boundaries when it became an involved unit by being struck by a motor vehicle in-transport.

Examples:

1. Motor vehicle parked in a private driveway, parking lot space, or other private property (outside the trafficway boundaries).
2. Motor vehicle in motion, outside the trafficway boundaries (e.g., vehicle pulling up to a pump in a gas station; vehicle driving down a private driveway, not within trafficway; vehicle in motion in a parking lot aisle; lawn tractor driving in a field adjacent to the trafficway; ATV driving on a dirt track next to trafficway; etc.).
3. Any vehicle used for private construction occurring outside the trafficway boundaries.

Code 4 (Working Motor Vehicle [highway construction, maintenance, utility only]) is used to indicate that this is a motor vehicle that was in the act of performing highway construction, maintenance or utility work when it became an involved unit. This “work” may be located within or outside the trafficway boundaries, including portions of the highway closed for construction. This code does not include private construction/maintenance vehicles, or vehicles such as garbage trucks, delivery trucks, taxis, emergency vehicles, tow trucks, etc.

Examples:

1. Steam roller working in a highway construction zone.
2. State highway maintenance crew mowing grass on roadside.
3. Utility truck performing maintenance on the power lines along the roadway.
4. County snow plow plowing snow.

When not in the act of performing “work” and involved in the accident, these highway construction, maintenance or utility vehicles can be:

- (1) In-Transport when traveling from one construction site to the next (Unit Type code “1”).
- (2) Not In-Transport Within the Trafficway when stopped on the shoulder or within a highway work zone (Unit Type code “2”).
- (3) Not In-Transport Outside the Trafficway when refueling at a depot (Unit Type code “3”).

For combination vehicles, use the registration state of the power unit only.

Code 00 (Not Applicable) is used for vehicles which are exempt from registration.

Use state codes for all state registered vehicles, including state government vehicles. However, if your state does not register government-owned vehicles, use code "00".

Code 92 (No Registration) applies to vehicles that are required by state law to be registered and are NOT registered.

Code 93 (Multiple State Registration) is used for commercial vehicles that are registered in more than one state under a valid reciprocal agreement (such as the International Registration Plan (IRP)).

REGISTERED VEHICLE OWNER

Format: 1 numeric

Element Values:

Blank	
0	Not Applicable, Vehicle Not Registered
1	Driver (in this crash) Was Registered Owner
2	Driver (in this crash) Not Registered Owner (other private owner listed)
3	Vehicle Registered As Business/Company/Government Vehicle
4	Vehicle Registered As Rental Vehicle
5	Vehicle Was Stolen (reported by police)
6	Driverless/Motor Vehicle Parked/Stopped Off Roadway/In Motion Outside Trafficway
9	Unknown

Remarks:

This element is used to determine the type of registered owner of the vehicle.

The type of ownership, “loan vs. lease,” does not change the coding. An individual or company should be the Registered Vehicle Owner, regardless of the bank holding the loan or lease. Banks and leasing companies should be the Registered Vehicle Owner for their own fleets only.

Code 0 (Not Applicable) applies to vehicles that are not registered, both exempt from registration and illegally not registered. (See code “5” for stolen vehicles.)

Code 2 (Driver [in this crash] Not Registered Owner [other private owner listed]) is used for private owners other than the driver. Also, if the driver is a spouse of the owner but is not a co-owner.

Code 4 (Vehicle Registered As Rental Vehicle) applies for rental vehicles, such as: Hertz, Ryder trucks, etc.

Code 5 (Vehicle Was Stolen [reported by police]) takes precedence over codes “0, 2, 3, 4, 6,” when multiple conditions exist.

Code 6 (Driverless/Motor Vehicle Parked/Stopped Off Roadway/In Motion Outside Trafficway). This code is used for both in-transport and not in-transport motor vehicles. This code should always be used if Unit Type is coded as “2” or “3,” even if other applicable conditions exist. This code is also used to indicate that this is a

“driverless” motor vehicle in-transport (i.e., driverless vehicle stopped in a travel lane). If indicating this is *a* “driverless” motor vehicle in-transport, this code does not take precedence over codes “0, 3, 4, 5,” when multiple conditions exist.

Code 9 (Unknown) is used when information on the registered owner is unknown or unclear; and in certain cases when the driver cannot be determined, but the registered owner is known.

Consistency Checks:

	IF	THEN
(9A2P) 1.	UNIT TYPE equals 2-3,	REGISTERED VEHICLE OWNER must equal 6.
(AP0P) 2.	REGISTERED VEHICLE OWNER equals 0,	REGISTRATION STATE must equal 00, 92.
(AQ0P) 3.	REGISTRATION STATE equals 00, 92,	REGISTERED VEHICLE OWNER must equal 0, 5-6.
(AR0P) 4.	SPECIAL USE equals 4,	REGISTERED VEHICLE OWNER must not equal 0, 1-2, 4.
(AS0P) 5.	RELATED FACTORS-VEHICLE LEVEL equals 32,	REGISTERED VEHICLE OWNER must not equal 0.
(AV0P) 6.	REGISTERED VEHICLE OWNER equals 3-4,	REGISTRATION STATE must not equal 99.
(CB0P) 7.	REGISTERED VEHICLE OWNER equals 6,	DRIVER PRESENCE must equal 2, 4.
(D330) 8.	DRIVER PRESENCE equals 2, 4, and REGISTRATION STATE is not equal to 00, 92, 99,	REGISTERED VEHICLE OWNER should equal 3-6.
(V550) 9.	REGISTRATION STATE equals 93, 95-96,	REGISTERED VEHICLE OWNER should equal 3-4.
(V560) 10.	SPECIAL USE equals 4,	REGISTERED VEHICLE OWNER should equal 3, and REGISTRATION STATE should equal 96.

	IF	THEN
(V570)	11. <i>HMI</i> equals 2,	REGISTERED VEHICLE OWNER should not equal 0, 1-2, 4.
(V580)	12. <i>HMI</i> equals 2,	REGISTERED VEHICLE OWNER should equal 3.
(V590)	13. RELATED FACTORS-VEHICLE LEVEL equals 32,	REGISTERED VEHICLE OWNER should equal 1-3.
(V593)	14. RELATED FACTORS-VEHICLE LEVEL equals 37,	REGISTRATION VEHICLE OWNER should not equal 0.
(V600)	15. REGISTERED VEHICLE OWNER equals 9,	REGISTRATION STATE should equal 99.
(V630)	16. REGISTRATION STATE equals 00, 92,	REGISTERED VEHICLE OWNER should not equal 5.
(V670)	17. REGISTERED VEHICLE OWNER equals 1-2,	REGISTRATION STATE should NOT equal 99.

- 99 Unknown body type

Remarks:

Code 09 is used when specific styles are not known (convertible, hatchback, station wagon, coupe); however, the PAR in combination with the registration data may give sufficient data to use Codes “02” and “04.”

Example #1: You know that it is a 2-door and you know it is NOT a convertible, (and your choices are Codes “01,” “02” and “09”) then you use Code “02.”

Example #2: You know that it is a 4-door and the PAR eliminates the possibility of a hatchback or station wagon, then use Code “04.”

SEE REMARKS UNDER VEHICLE IDENTIFICATION NUMBER – V12

VEHICLE MODEL YEAR

Format: 4 numeric

Element Values:

Blanks
Code Actual Model Year
9999 Unknown

Remarks:

Code all four digits of the model year for which the vehicle was manufactured.

A vehicle manufactured as a 1985 model is to be coded as "1985."

SEE REMARKS UNDER VEHICLE IDENTIFICATION NUMBER – V12

VEHICLE IDENTIFICATION NUMBER

Format: 17 alphanumeric

Element Values:

Blanks

000000000000000000 – Not Applicable/Registration Not Required

Any Alphanumeric Characters – Actual VIN number

999999999999999999 – VIN Unknown

Remarks:

The standard VIN (1981 and later) is 17-characters long. Older VINs may be shorter. Code the complete VIN. VIN is always left-justified.

If the VIN is less than 17-characters long (pre-1981 VIN), leave the remaining characters blank. Do not zero-fill. If the state will not allow transmittal of a complete standard VIN, code the right-most four characters as numeric zeroes.

Code as not applicable (zeroes) the VIN of vehicles that do not require registration (farm tractors, go-carts, etc.).

Remarks (V8 through V12):

VEHICLE MAKE, VEHICLE MODEL, VEHICLE BODY TYPE, MODEL YEAR as shown on accident reports must be verified with registration data. In the case of inconsistencies, registration data takes precedence over accident report data. Note that vehicle information should be gathered only from state records. Do not use any other sources to determine any of these elements, that is; you should not use sources such as the NATB Passenger Vehicle Identification Manual.

VEHICLE MAKE codes are organized into general groups. These groups are:

01-28	Domestic Passenger Car
29	Other Domestic Passenger Car
30-64	Import Passenger Car
69	Other Import Passenger Car
70-76	Motored Cycle/Moped
80-89	Truck/Bus
90-94	Bus
98	Other Make (where MAKE "29" or "69" are not applicable)
99	Unknown Make

VEHICLE MODEL refers to the series of vehicles for a make, e.g., Pintos, Galaxies, Mustangs are Models of Ford. It does not refer to the various styles within a model unless they are listed in the codes for VEHICLE MODEL.

The MODEL codes are organized into general groups. These groups are:

001-399	Passenger Car (automobile)
400-499	Light Trucks (including truck based utility vehicles, light duty pickup trucks, standard pickup trucks, vans, mini vans, van-based station wagons, van-based buses, van derivatives, and truck-based station wagons).
700-739	Motored Cycles (including motorcycles, mini-bikes, motor scooters, dirt bikes, and mopeds).
850	Motor Home (truck based)
880-897	Trucks (including all trucks over 10,000 lbs. GVWR except those pickup type trucks mentioned under BODY TYPE code "30-31" (Pickup)).
898-899	Other, Unknown, truck over 10,000 lbs. GVWR.
980-996	All buses except those that are van-based.
988	Other bus over 10,000 lbs. GVWR.
998	Other Vehicle
999	Unknown Vehicle

Note that for both MAKE and MODEL the use of the terms “other” and “unknown” have very specific meanings. “Other” refers to a MAKE or MODEL that is known but is not explicitly listed. “Unknown” refers to the situation where no specific named MAKE or MODEL is known. Selection of the proper “other” or “unknown” code can only be made with consideration of the vehicle BODY TYPE in accordance with the following table (Table A) of applicable BODY TYPE for given combinations of “other” and/or “unknown” MAKE and MODEL.

4WD, FWD, or Four-Wheel Drive does not automatically imply on/off road vehicle (Utility Vehicles), body types “14” and “15.”

Reconstructed Vehicles: In cases where someone builds a “home made” vehicle from drastically mixed parts, there may be no clear MAKE or MODEL. In addition, the state may issue an Identification Number in place of the Standard VIN. In such cases, code the VIN as all “0’s”; code MAKE, MODEL, and MODEL YEAR as “9’s.” Code BODY TYPE as appropriate. Be sure to use RELATED FACTORS-VEHICLE LEVEL code “35.”

In reconstructed vehicles where the modifications are less drastic and you can determine the MAKE, MODEL and VIN, code these elements appropriately and be sure to use Related Factors-Vehicle Level code “35.”

Consistency Checks:

	IF	THEN
(1C0P) 1.	ACCIDENT MONTH is between June and December,	the vehicle MODEL YEAR must NOT be greater than ACCIDENT YEAR plus ONE.
(1D0P) 2.	SPECIAL USE equals 1,	BODY TYPE must equal 02-09, 12, 14-21, 28-29, 99.
(1Q0F) 3.	PERSON TYPE equals 01, and BODY TYPE equals 80-83, 88-89,	SEATING POSITION must not equal 00, 12-55, 99.
(1R0P) 4.	SEATING POSITION equals 51, and BODY TYPE equals 50-52, 58-59,	INJURY SEVERITY must not equal 0, 9.

BUS USE

Format: 1 numeric

Element Values:

Blank

- 0 Not Used as a Bus
- 1 Used as a Public School Bus
- 2 Used as a Private School Bus
- 3 Used as a School Bus, Public or Private Unknown
- 4 Used as Scheduled Service Bus
- 5 Used as a Tour Bus
- 6 Used as a Commuter Bus
- 7 Used as a Shuttle Bus
- 8 Modified for Personal/Private Use
- 9 Unknown Bus Use

Remarks:

This element describes if a vehicle is being used for common forms of bus service (i.e., public school bus, scheduled service bus, tour bus, etc.) The vehicle body type does not have to be a bus to be coded “1-7, 9” for this element.

Code 0 (Not Used as a Bus) is used for vehicles that do not have a bus body type AND are not being used as a bus in the accident. It is also used for vehicles with bus body types that are not in service at the time of the accident. For example, a school bus or intercity bus without occupants en route to a bus service facility that is involved in a fatal event.

Codes 1-3 (Used as a School Bus) are for vehicles used to transport groups of school children (up to the 12th grade) to/from school or any other school function or activity. These can include school-sponsored chartered tours and trips to school athletic events in school or chartered buses. This can involve school-sponsored Head Start Programs (also see Related Factors – Vehicle Level code “37-Head Start/Day Care”).

Code 4 (Used as Scheduled Service Bus) is used for regular municipal transit service and cross-country or intercity scheduled service. For example, scheduled Greyhound bus service between major cities. It also includes scheduled inner-city mass transit bus service.

Code 5 (Used as a Tour Bus) should be coded for any tour for sightseeing, pleasure trips, etc. These tours are typically in large chartered buses, but can be in van-based buses as well. This does not include school-sponsored functions or activities (see codes “1-3”).

Code 6 (Used as a Commuter Bus) should be coded for:

- Commuting between home and work or school (beyond 12th grade; e.g., college commute).
- Direct point-to-point service (e.g., parking lot or pick-up location near home to drop-off location near work).

These commuter buses can be large chartered buses and van-based buses.

Code 7 (Used as a Shuttle Bus) should be coded when it is indicated that the vehicle is being used to shuttle people other than for commuting (code “6”), school (codes “1-3”), tours (code “5”), or scheduled interstate/intercity/intra-city travel (code “4”). Examples are shuttles from airport, hotels, churches, community-sponsored Head Start/day care, rental cars, to/from parking lots at sporting events, business facility-to-facility, prison or military and other governmental shuttling, etc. (For community-sponsored Head Start/day care, also see Related Factors – Vehicle Level, code “37-Transporting Children to/from Head Start/Day Care.”)

Code 8 (Modified for Personal/Private Use) should be coded when a bus body type has been modified for personal or private use. For example, a bus with seats removed and exterior altered to allow for personal/private hauling of cargo (instead of passengers). Also includes musical groups in cross-country bus with interior remodeled with home-like conveniences.

Consistency Checks:

	IF	THEN
(AH1P) 1.	BUS USE equals 8,	BODY TYPE must equal 50-59.
(V051) 2.	BUS USE equals 1-3,	BODY TYPE should equal 20-21, 29, 50-59.
(V052) 3.	BUS USE equals 4,	BODY TYPE should equal 29, 51-52, 58-59.
(V053) 4.	BUS USE equals 5,	BODY TYPE should equal 20-21, 29, 50-59.
(V054) 5.	BUS USE equals 6-7,	BODY TYPE should equal 20-21, 29, 51-59.

	IF	THEN
(V055)	6. BUS USE equals 0,	BODY TYPE should not equal 50-59, and SPECIAL USE should not equal 2-3.
(V056)	7. SPECIAL USE equals 2,	BUS USE must equal 1-3.
(V057)	8. SPECIAL USE equals 3,	BUS USE must equal 4-7, 9.
(V330)	9. SCHOOL BUS RELATED equals 1,	BODY TYPE of at least one of the involved vehicles should equal 50 (School Bus) or SPECIAL USE for at least one involved vehicle should equal 2 – Vehicle Used as School Bus, and BUS USE for at least one vehicle should equal 1-3.
(V531)	10. BUS USE equals 1-7,	VEHICLE CONFIGURATION should equal 20-21, and CARGO BODY TYPE should equal 20-21.

SPECIAL USE

Format: 1 numeric

Element Values:

	Blank
0	No Special Use
1	Taxi
2	Vehicle Used as School Bus*
3	Vehicle Used as Other Bus*
4	Military*
5	Police
6	Ambulance*
7	Fire truck
9	Unknown

Remarks:

Refers to a motor vehicle that is being used for a function other than the primary function for that type vehicle. In other words, this element is coded "1-9" in those cases where Body Type does not reflect how the vehicle was being used. For example, if a vehicle is coded Body Type "50-School Bus," Special Use is coded "0" since Body Type already indicates the vehicle's use, and it would be redundant to code this element "2." On the other hand, if a Minivan ("20") or Large Van ("21") is being used as a school bus, this element would be coded "2" because the coding of Body Type does not indicate the fact that the van is actually being used as a school bus.

Code 1 (Taxi) refers to vehicles used during this trip (at the time of the accident) on a fee-for-hire basis to transport persons. Most of these vehicles will be marked and formally registered as taxis; however, vehicles that are used as taxis, even though they are not registered (e.g., Gypsy Cabs), are included here. Taxis and drivers who are off-duty at the time of the accident are coded "0."

This code also applies for limousines on a fee-for-hire basis.

*** These values are unlikely occurrences and will raise an error flag.**

Code 2 (Vehicle Used as School Bus*) refers to a motor vehicle which satisfies the following criteria:

- externally identifiable to other traffic units as a school/pupil transport vehicle;
- operated or owned by a public or private school-type institution;

- where the institution's students may range from pre-school through high school;
- whose occupants, if any, are associated with the institution; and,
- the vehicle is in operation at the time of the accident to and from the school or on a school-sponsored activity or trip.

In addition, vehicles which are not externally identifiable as a school/pupil transport vehicle, but do meet all of the other criteria above are vehicles used as school buses. (E.g., a transit bus, at the time of the accident, used exclusively (no other passengers except students) to transport students to/from the school or school-related activity.

Code 3 (Vehicle Used as Other Bus*) refers to a motor vehicle which is designed for transporting more than ten persons and does not satisfy the above criteria of a school bus.

For codes 4 (Military*), 5 (Police) and 6 (Ambulance*), Special Use means "in use" and not necessarily "emergency use." External identification to the normal driving public is the criterion.

Code 4 (Military*) refers to a vehicle which is owned by any of the Armed Forces. These vehicles are presumed to be in special military use at all times.

Code 5 (Police) refers to a readily identifiable (lights or markings) vehicle which is owned by any local, county, state or federal police agency. The vehicles are presumed to be in special police use at all times. Personal vehicles (not owned by the agency) that are used by officers or agents (e.g., undercover) are excluded.

Military police vehicles are coded "4-Military."

Code 6 (Ambulance*) refers to those readily identifiable (lights or markings) vehicles: (1) whose sole purpose is to provide ambulance service and which is always presumed to be in special ambulance use at all times, or (2) vehicles serving dual purposes such as a hearse used for both funeral and emergency purposes, which is only coded when used for the latter purpose.

Military ambulances are coded "4-Military."

*** These values are unlikely occurrences and will raise an error flag.**

Special Processing Rules:

(U050) 1. UNLIKELY: SPECIAL USE equals 2-4, 6.

EMERGENCY USE

Format: 1 numeric

Element Values:

Blank
0 No
1 Yes

Remarks:

Emergency use refers to a vehicle that is traveling with physical emergency signals in use; such as red light blinking, siren sounding, etc.

Code 1 (Yes) only if the vehicle was being used as an emergency vehicle at the time of the accident.

If it cannot be determined that the vehicle was in use as an emergency vehicle at the time of the accident, code "0 – No."

TRAVEL SPEED

Format: 2 numeric

Element Values:

Blanks
 Actual Miles Per Hour Except:
 00 Stopped Motor Vehicle In-Transport
 97 Ninety-Seven MPH or Greater
 98 Not Reported
 99 Unknown

Remarks:

This element refers to the speed the vehicle was traveling prior to the occurrence of the accident. If your police department calculates a reconstructed speed, please be aware that this may represent impact speed and not travel speed.

Code the Traveling Speed as indicated by the investigating officer. Do not use estimates by drivers or witnesses.

If the officer gives a range, code the median speed and round up to the next higher whole number. If the officer gives a minimum speed (e.g., 'at least 55 mph' or 'in excess of 60 mph', then use that speed (e.g., 55 and 60 respectively).

Code 98 (Not Reported) is used when the officer did not mention Travel Speed or did not indicate it with a checkbox on the PAR.

Code 99 (Unknown) is used when the officer says that Travel Speed is unknown.

NOTE: This element is not coded for Parked/Stopped Off Roadway/Working/In Motion Outside Trafficway Motor Vehicles.

Consistency Checks:

	IF	THEN
(3B0P) 1.	JACKKNIFE equals 2-3,	TRAVEL SPEED must not equal 00.

- 16 Changing Lanes or Merging
- 17 Negotiating a Curve

- 98 Other
- 99 Unknown

*RTOR mean 'Right Turn on Red.'

Remarks:

This element captures the driver's action, or intended action, prior to commencement of unstabilized event as indicated on the accident report. This is the police officer's determination on the PAR.

Code 07 (Parked) applies when the driver's intended action was to be parked. For example: a driver intends to park his vehicle in a designated parking space against the curb, fails to set the hand brake, driver exits vehicle, and is run over by that vehicle.

Code 09 (Controlled Maneuver to Avoid) refers to a controlled action around an animal, pedestrian, object, vehicle, etc., before the unstabilized situation begins. Most of the time, the vehicle will not strike what it is maneuvering to avoid because it is a

controlled maneuver. However, the vehicle can take a controlled maneuver around an object and still strike it. This is separate and distinct from Crash Avoidance Maneuvers.

Codes 10-13 (Turning) refer to the action of turning from one trafficway onto another.

Code 17 (Negotiating a Curve) refers to the action necessary to follow the same roadway around a curve.

CRASH AVOIDANCE MANEUVER

Format: 1 numeric

Element Values:

Blank

- 0 No Avoidance Maneuver Reported
- 1 Braking (skid marks evident)
- 2 Braking (no skid marks; driver stated)
- 3 Braking (other reported evidence)
- 4 Steering (evidence or stated)
- 5 Steering and Braking (evidence or stated)
- 6 Other Avoidance Maneuver
- 8 Not Reported/Inconclusive (by police)

Remarks:

This element is collected to indicate if an avoidance maneuver was taken by the driver to avoid the crash. The “Crash Avoidance Maneuver” is separate and distinct from the “Vehicle Maneuver” (prior to the unstabilized event). Only count maneuvers to avoid the crash up to the first injury or damage-producing event for this vehicle. Witness statements may be used to identify crash avoidance maneuvers or the lack of maneuvers. Vehicle occupants and pedestrians may provide information when police sources are unavailable.

Code 0 (No Avoidance Maneuver Reported) is used if the police indicate that the driver took no avoidance maneuver. The officer may describe through the narrative and diagram such a scenario without actually using the words “no avoidance maneuver.” If the PAR (narrative and diagram) indicates the driver could not take a crash avoidance maneuver, use Code “0.” Examples of these could be: “asleep at the wheel,” “vision totally obscured,” “driverless,” “not in position to observe impact,” etc.

Codes “1, 2, 3” are used if the driver was braking to avoid the crash, with a Code “1” used if skid marks are evident from braking and a “2” based on a driver’s statement. Be careful not to confuse “yaw marks” with braking skid marks. To use Code “1-Braking (skid marks evident),” the marks should be consistent with a braking action. Code “3” is used when there is evidence of braking other than skid marks or a driver’s statement (e.g., other police determination or witness statement).

NOTE: Braking and/or steering take precedence over other avoidance maneuvers when multiple maneuvers are present.

If the officer uses words such as “overcorrecting,” “bringing the vehicle back on the road,” “veered,” etc., a steering code (“4 or 5”) should be used.

Code 6 (Other Avoidance Maneuver) is used for backing, accelerating or downshifting gears without braking.

Code 8 (Not Reported/Inconclusive [by police]) is used when the police are silent on the issue or the information reported is not conclusive.

When you know you have a Crash Avoidance Maneuver, but the officer records a travel speed of “00” because the vehicles came to rest prior to impact, code the appropriate Crash Avoidance Maneuver (not “0”). Also, obtain the actual travel speed prior to the unstabilized situation or code “99” if unknown.

Consistency Checks:

	IF	THEN
(9A8P) 1.	CRASH AVOIDANCE MANEUVER equals 0-6, 8,	UNIT TYPE must equal 1.

ROLLOVER

Format: 1 numeric

Element Values:

Blank	
0	No Rollover
1	First Event
2	Subsequent Event

Remarks:

Rollover refers to vehicles overturning during the accident.

Rollover is defined as any vehicle rotation of 90 degrees or more, about any true longitudinal or lateral axis. Rollover can occur at any time during the unstabilized situation.

Rollover does not apply to motorcycles for this element (Rollover code "0"). However, in First Harmful Event, Most Harmful Event and Sequence of Events you may use code "01 – Overturn/Rollover" to record that this vehicle (motorcycle) "overturned."

A rollover can be coded for ATVs (3- or 4-wheel), snowmobiles, and go-karts.

Code 2 (Subsequent Event) refers to a rollover that occurs after the first harmful event.

If it cannot be determined that a rollover has occurred, then use code "0 – No Rollover."

Consistency Checks:

	IF	THEN
(1Z0P) 1.	SEQUENCE OF EVENTS equals 01,	ROLLOVER must not equal 0 for this vehicle, unless BODY TYPE equals 80-83, 88-89, or blank for this vehicle.

(AL4P) 2.	MOST HARMFUL EVENT equals 01, and BODY TYPE does not equal 80-83, 88-89,	at least one SEQUENCE OF EVENTS must equal 01, and ROLLOVER must equal 1-2.
(V74P) 3.	<i>ROLLOVER equals 1-2,</i>	<i>at least one SEQUENCE OF EVENTS should equal 01.</i>
(VH70) 4.	UNIT TYPE equals 2-4,	elements V16-V20, V25, V33 should all be left blank.

JACKKNIFE

Format: 1 numeric

Element Values:

Blank
0 Not an Articulated Vehicle
1 No
2 First Event
3 Subsequent Event

Remarks:

Jackknife applies to a condition that occurs to an articulated vehicle, (any vehicle with a trailing unit(s) connected by a hitch; e.g., truck tractor or single-unit truck with one or more trailers, articulated bus, car pulling a boat on a trailer, etc.) while in motion. The condition reflects a loss of control of the vehicle by the driver in which the trailer yaws more than 15 degrees (as best as can be determined by the analyst) from its normal straight-line path behind the power unit. If the final resting configuration of the vehicle is in the jackknife position, it does not necessarily mean that the vehicle has jackknifed (such as, an accident occurring while the vehicle is backing up or parking).

Subsequent Event refers to a jackknife which occurs after the first harmful event

Jackknife is not likely to be a 'harmful' event but may be part of an unstabilized condition just before the first harmful event.

Consistency Checks:

	IF	THEN
(2B0P) 1.	JACKKNIFE equals 1-3,	VEHICLE TRAILING must not equal 0, 9.
(3B0P) 2.	JACKKNIFE equals 2-3,	TRAVEL SPEED must not equal 00.

(CI0P) 9.	VEHICLE TRAILING equals 1-4,	JACKKNIFE must not equal 0.
(V530) 10.	JACKKNIFE equals 2-3,	CRASH AVOIDANCE MANEUVER should not equal 0, 8.

IMPACT POINT-INITIAL/PRINCIPAL

Format: 2 numeric, 2 numeric

Element Values:

Blanks

00 Non-Collision

01-12 Clock Points

13 Top

14 Undercarriage

Special Conditions

18 – This Vehicle Set Something In Motion Causing Injury or Damage (Not a Clock Point)

99 Unknown

Remarks:

IMPACT POINT-INITIAL: Code the point that identifies the area on this vehicle that produced the first instance of injury or property damage involving this vehicle. The event that produced the initial impact for this vehicle may or may not be the First Harmful Event for the crash.

IMPACT POINT-PRINCIPAL: Code the point that identifies the area on this vehicle that produced the most severe instance of injury or property damage involving this vehicle. If this vehicle only has collision events, then the event that produced the principal impact for this vehicle will be the Most Harmful Event for this vehicle.

If principal and initial impact points are the same, code both elements the same.

Codes “01-12” refer to the point on a clock. Refer to the diagram on the following page for examples of how to superimpose the clock point on several vehicle types.

It is important to note that impact point refers mainly to the area of the vehicle that sustained the impact and does not depend upon the attitude of the vehicle (e.g., damage to a grille is still damage at 12 o'clock even if it was caused by sliding sideways past a utility pole).

However, code “13 – Top” may raise questions. The front and rear windows of some vehicles may also be viewed from the top. It may also be difficult to code impacts to the hood and rear deck of a vehicle.

With code “13,” the direction of force sometimes has to be considered. The following are guidelines for using code “13 – Top.”

1. If the impact was received horizontally to an upright vehicle, use one of the codes “01 to 12.”
2. If the impact was received from a vertical direction above the upright vehicle, use code “13.”
3. If the impact received or direction of force was at an angle of less than 15 degrees above the horizontal, it is considered horizontal.
4. With a vehicle in other than upright attitudes, remember, it is the area of the vehicle which was impacted that is important.

1. If FIRST HARMFUL EVENT is coded “01-07, 16, 44, 47, 51, 60 ” and no impact to the vehicle occurs throughout the accident, then code Impact Point-Initial as “00,” Impact Point-Principal as “00,” and Vehicle Role as “0.”

2. If FIRST HARMFUL EVENT is coded “01-07, 16, 44, 47, 51, 60 ” (particularly code “01– Overturn/Rollover”) and impacts to the vehicle do occur, then code the appropriate Impact Point-Initial and Principal, and code Vehicle Role as appropriate.

*If the only event is a **non-collision event**, the impact points are coded “00.” If following a non-collision event, a vehicle has a collision event, Impact Point-Initial should be coded based on that collision event.*

Hitting the ground is not regarded as an ‘impact.’

Wheel impacts are coded “14 – Undercarriage.”

Code 18 (This Vehicle Set Something In Motion Causing Injury or Damage [Not a Clock Point])

A vehicle that propels part of its load or has set something in motion striking another vehicle, person or property causing injury or damage may not have a normal impact point; only the load has made contact with the person or other property. However, a value must be coded. Use Impact Point code “18” for these set-in-motion conditions.

Consistency Checks:

	IF	THEN
(1E0P) 1.	IMPACT POINT-INITIAL equals 00,	IMPACT POINT-PRINCIPAL must equal 00.

VEHICLE ROLE

Format: 1 numeric

Element Values:

Blank	
0	Non-Collision
1	Striking
2	Struck
3	Both
9	Unknown*

Remarks:

Code 0 (Non-Collision) is used when the **only** harmful event(s) for this vehicle is/are non-collisions.

If FIRST HARMFUL EVENT is coded “01-07, 16, 44, 47, 51, 60” and no impact to the vehicle occurs throughout the accident, then code Impact Point-Initial as “00;” Impact Point-Principal as “00;” and Vehicle Role as “0.”

If FIRST HARMFUL EVENT is coded “01-07, 16, 44, 47, 51, 60” (particularly code “01 – Overturn/Rollover”) and impacts to the vehicle do occur, then code the appropriate IMPACT POINT-INITIAL and PRINCIPAL, and code Vehicle Role as appropriate.

The officer’s description and diagram usually determines the striking and struck vehicles.

In a two-vehicle, front-to-front collision, it is possible for the Police Accident Report (PAR) to indicate that both vehicles “strike” simultaneously. When this occurs, code both vehicles as “1 – Striking.” If the PAR indicates that only one of the two vehicles is the striking vehicle, code that vehicle as “Striking” and the other vehicle as “Struck” (code “2”) or, if it applies, “Both” (code “3”).

A vehicle can strike (or be struck by) a pedestrian, bicyclist, skateboard rider and other non-motorists.

For Parked/Stopped Motor Vehicles, because they are not “in motion,” codes “0 – Non-Collision” and “1 – Striking” will not apply. These will most often be coded “2 – Struck.” However; code “3 – Both” can apply in situations where a parked vehicle is struck and then set-in-motion, striking something (i.e., motor vehicle, pedestrian, fixed object, etc.).

For motor vehicles in motion, outside the trafficway codes “1-3, 9” may apply.

For a vehicle to be coded “Both” striking and struck (code “3”), the event cannot be simultaneous at the same point on the vehicle. A vehicle cannot only have one impact and be both striking and struck.

*** This value is an unlikely occurrence and will raise a “U” flag.**

2 Underride, No Compartment Intrusion

3 Underride, Compartment Intrusion Unknown

Underriding a Motor Vehicle Not In-Transport

5 Underride, No Compartment Intrusion

6 Underride, Compartment Intrusion Unknown

7 Overriding a Motor Vehicle In-Transport

8 Overriding a Motor Vehicle Not In-Transport

9 Unknown if Underride or Override

Remarks:

Rationale: *Needed to identify the magnitude of crashes in which an underride or override occurs to support NHTSA rulemaking activities and motor vehicle bumper compatibility research.*

NOTE: *Prior to 2007, this element was limited to collisions involving a large vehicle (medium/heavy trucks) and a smaller body type (e.g., automobiles, utility vehicles, etc.). Beginning 2007, this element is open to all body types, excluding motorcycles, mopeds, ATVs and snowmobiles.*

NOTE: Prior to 1994, coding of vehicle underrides and overrides was not captured as a separate element. It was included under Impact Points (clockpoint codes “15” and “16” (Underride and Override)). This change improved both the capture and detail relating to these events.

For underrides and overrides, it is important to determine the vehicle performing the action. Two vehicles cannot be considered to underride and override simultaneously.

In cases in which two vehicles collide “head-on” and one vehicle ends up under the other, you must determine whether an Underride or Override has occurred.

An Underride refers to a vehicle sliding under another vehicle during an accident. The classic example is an automobile striking the rear end or the side of a tractor-trailer and coming to a stop under the trailer. In this example, the automobile is the underriding vehicle. We distinguish between those underriding vehicles with compartment intrusion versus those with no compartment intrusion.

Compartment intrusion indicates a breach of the passenger compartment of this underriding (striking) vehicle. For example, damage to the windshield or glass area.

No compartment intrusion means that the ***underridden vehicle (struck vehicle) did not directly enter the passenger compartment of this vehicle (for example, damage to the hood or front bumper).***

It is possible for an auto to completely underride the trailer without stopping. Underride is not applicable to motorcycles or snowmobiles.

UNDERRIDES AND VEHICLES UNDER OTHER VEHICLES

Codes “1-3” are used when ***this*** vehicle underrides a motor vehicle in-transport (***includes those in motion outside the trafficway.***)

Codes “4-6” are used when ***this*** vehicle underrides a motor vehicle that is Not In-Transport. This includes parked/stopped off roadway motor vehicles, working motor vehicles (i.e., cherry picker, paint-striping truck).

Compartment Intrusion Guidelines:

To use Codes “1 or 4,” the PAR should indicate that the passenger compartment of the underriding (striking) vehicle has been damaged. Sources of this information can be the PAR narrative and/or the vehicle damage scale. If the top of the vehicle is damaged, as noted by the vehicle damage scale, Codes “1 or 4” would apply.

Codes “2 and 5,” Underride, No Compartment Intrusion, are used when a portion of the vehicle is under another, and it is known that there is no passenger compartment intrusion. Codes “3 and 6” are used when it is unknown if there is passenger compartment intrusion.

OVERRIDES

An Override refers to a vehicle riding up over another (including a parked vehicle). A vehicle straddling a guardrail, for example, is not coded as an override.

Code 7 (Overriding a Motor Vehicle In-Transport), is used when ***this*** vehicle overrides a motor vehicle in-transport (***includes those in motion outside the trafficway.***)

Code 8 (Overriding a Motor Vehicle Not In-Transport), is used when *this* vehicle overrides a motor vehicle not in-transport. This includes parked/stopped off roadway motor vehicles, working motor vehicles (i.e., cherry picker, paint-stripping truck).

Consistency Checks:

Remarks:

See Definition: ANSI D16.1 Manual: 2.3.8 - 2.3.12

For those States using the Vehicle Damage Scale for Traffic Accident Investigators, use the following coding transformations:

FARS Extent of Deformation Code	Damage Rating
2	1, 2
4	3, 4, 5
6	6, 7

If the police report indicates that the vehicle was 'totaled' and the vehicle was towed away, code "6 – Disabling." If the report indicates that the vehicle was 'totaled,' but the vehicle was driven away, code "4 – Functional."

Consistency Checks:

MOTOR CARRIER IDENTIFICATION NUMBER

Format: 1 set 2 numeric, 1 set 9 *alpha/numeric*

Element Values:

Issuing Authority:

00	Not Applicable
01-56	FARS State Code
57	US DOT
58	<i>MC/MX (ICC)</i>
95	Canada
96	Mexico
88	None
99	Unknown

Identification Number:

Actual Number except:	
000000000	Not Applicable
888888888	None
999999999	Unknown

Remarks:

This information should be available on your PAR or Truck and Bus Supplement with other elements required by the Federal Motor Carrier Safety Administration (FMCSA) for commercial vehicles.

The Motor Carrier Identification Number is recorded on the Truck Supplement or PAR next to the appropriate Source (Issuing Authority.) If your state uses separate Truck Supplements, you should seek help to get routine access to them, just as with your state's PAR.

Your state's SAFETYNET representative may be able to provide a Motor Carrier Identification Number.

You *should expect to find motor carrier identification numbers* for the following commercial vehicles:

1. *Light trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 lbs.*

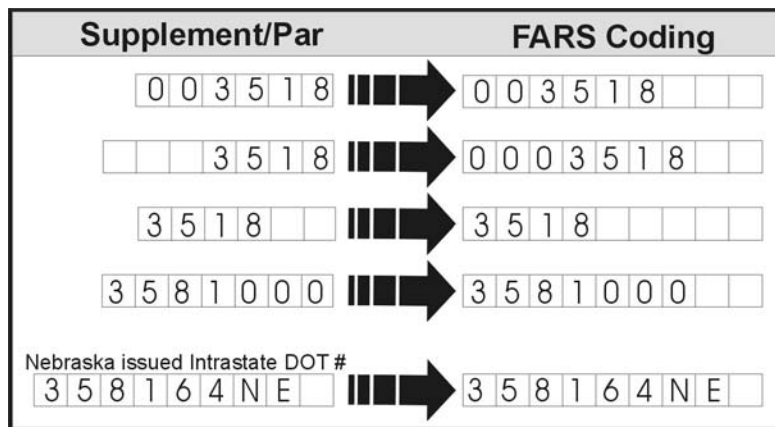

2. Medium/Heavy Trucks: vehicles with *GVWR* greater than 10,000 lbs.

3. Buses with 9 or more seats (including the driver).

4. Light Trucks, Vans and Passenger Vehicles displaying a hazardous materials placard.

Identification Number should be left justified. If less than 9 characters, left-justify and do not zero-fill.

Examples of Left-Justified Coding of Identification Number

Federal regulations require that almost all *commercial trucks/buses* operating across state lines *that meet the above criteria* (i.e., interstate) have Identification Numbers except those hauling “exempt” commodities (such as unprocessed agricultural products). This will be a US DOT or *MC/MX (ICC)* Number.

Many carriers will have a US DOT or *MC/MX (ICC)* Number plus a State Number.

US DOT NUMBERS: Use Code “57” in “Issuing Authority” if a US DOT Number or a State Number and US DOT Number are recorded on the PAR or Supplement. Enter the US DOT Number in “Identification Number.”

- *US DOT Numbers are in the process of being assigned to Intrastate motor carriers in a number of states. These should include the issuing state’s two-character abbreviation on the end; e.g., US DOT 123456XX (where “XX” is the State abbreviation). See example of proper coding in diagram above.*

MC/MX (ICC) NUMBERS: Use Code “58” in “Issuing Authority” if an *MC/MX (ICC)* Number or a State Number and an *MC/MX (ICC)* Number are recorded on the PAR or Supplement. Enter the *MC/MX (ICC)* Number in “Identification Number.”

STATE NUMBERS: If only a State Number is recorded on the PAR or Supplement, then code the appropriate FARS State Code in “Issuing Authority” and enter the State Number in “Identification Number.”

State Numbers are issued by a public utility commission, a public service commission, or some other state agency, to vehicles that operate either in interstate commerce or only within that state. However, some states do not regulate the motor carrier industry. Trucks and buses that operate strictly within such states (i.e., intrastate) may not have numbers.

CANADIAN/MEXICAN NUMBERS: Use Code “95” or “96” in “Issuing Authority” if a Canadian or Mexican authority (respectively) has issued the only Carrier Identification Number recorded on the PAR or Supplement.

HIERARCHY: When Identification Numbers are available from more than one Source (Issuing Authority), it is most important to code the US DOT number then the *MC/MX (ICC)* number if one is available. It is next most important to code the Mexican or Canadian issued number. Finally, State-issued numbers should be coded.

Code 0’s: Not Applicable - would apply when you would never expect this style of vehicle to have a Motor Carrier ID number (cars, motor homes, etc.). This vehicle would not appear on a truck supplement (supplemental truck elements on the PAR would be coded N/A).

Code 8’s: None - should be coded when:

- you could expect this type of vehicle to have an ID Number, but it is exempt because of its use or activity at the time of the crash;
- this type of vehicle often does have a number (but vehicle is operated strictly intrastate and activity not regulated); or
- the PAR/supplement states “No Number.”

Note: In some states, school buses are exempt from requiring a Motor Carrier ID Number

Code 9’s: Unknown - is used when you could expect this type of vehicle to have a Motor Carrier ID Number, however:

- the PAR or truck supplement leaves the field blank;
- you don’t have a supplement or a field on the PAR (no further information given); or
- you don’t know if the truck is a light, medium or heavy truck.

VEHICLE CONFIGURATION

Format: 2 numeric

Element Values:

	Blanks
00	Not Applicable, not a medium/heavy truck, bus or vehicle displaying a hazardous material placard
01	Single-Unit Truck (two axles, 6 tires)
02	Single-Unit Truck (three or more axles)

04	Truck/Trailer(s)
05	Truck Tractor (Bobtail)
06	Tractor/Semi-Trailer (one trailer)
07	Tractor/Doubles (two trailers)
08	Tractor/Triples (three trailers)
19	Medium/Heavy Truck, cannot classify
20	Bus (seats for 9-15 people, including driver)
21	Bus (seats for 16 or more people, including driver)
70	Light Truck (van, mini van, panel, pickup, sport utility vehicle displaying a hazardous material placard)
80	Passenger Car (only when displaying a hazardous materials placard)
99	Unknown if Light or Medium/Heavy Truck/Bus

Remarks:

This information should be available on your PAR or Truck and Bus Supplement with other elements required by the Federal Motor Carrier Safety Administration (FMCSA) for commercial vehicles.

In some states, the data element "Vehicle Configuration" or its attributes may appear under another title, such as: Unit Type, Vehicle Type, Type of Unit, etc.

In many states, Vehicle Configuration is recorded for all vehicles. However, in FARS, only code Vehicle Configurations for the following commercial vehicles:

1. *Light trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 lbs.*
2. *Medium/Heavy Trucks: vehicles with GVWR greater than 10,000 lbs.*
3. *Buses with 9 or more seats (including the driver).*
4. *Light Trucks, Vans and Passenger Vehicles displaying a hazardous materials placard.*

If Vehicle Configuration is coded “01-99,” Cargo Body Type should be coded “01-99.”

Code 00 (Not Applicable) should be used for automobiles, motorcycles, small buses (with less than 9 seats, including driver) and *single-unit* small trucks or vans (10,000 lbs. or less *GVWR*), not carrying hazardous cargo.

Code 01 (Single Unit Truck [two axles, 6 tires]) is used for two-axle, single-unit trucks with six tires. A single-unit truck carrying hazardous cargo with four tires is coded “70.”

Code 02 (Single Unit Truck (three or more axles)) When *counting axles on a single-unit truck, include raised axles.*

Code 03 (Single Unit Truck [unknown number of axles, tire]) is used for single-unit trucks over 10,000 lbs. when the number of axles or tires is unknown.

Code 04 (Truck/Trailer(s)) is used for single-unit trucks pulling a trailer.

Code 05 (Truck Tractor [Bobtail]) is used for cab-only vehicles.

Code 06 (Tractor/Semi-Trailer [one trailer]) is used for truck tractors with one trailer.

NOTE: This code was used for truck tractors with any number of trailers before 2001. This code should not be used for single-unit trucks pulling a trailer.

Use Code “07” for two trailers

Use Code “08” for three trailers

Code 19 (Medium/Heavy Truck, cannot classify) is used when you know the vehicle meets the definition of a medium/heavy truck, but you can’t select from codes 01-08. An example is a vehicle with one trailer, but it is unknown whether it is a tractor-trailer or a single-unit truck pulling a trailer.

Code 20 (Bus [seats for 9-15 people, including driver]). Smaller van-based buses qualify (less than 15 seats, including driver). E.g., commuter vans, van-based school buses.

Code 21 (Bus [seats for 16 or more people, including driver]). A van-based bus qualifies for this code if it is configured to include enough seats. A CDL is required for the driver of this bus.

Code 70 (Light Truck [van, mini van, panel, pickup, sport utility vehicle displaying a hazardous material placard]) is only used for trucks 10,000 lbs. or less, vans and sport utilities displaying hazardous materials placard. When vehicles in this category are not displaying a hazardous materials placard, use code “00 – Not Applicable.”

Code 80 (Passenger Car) is used for passenger cars displaying a hazardous material placard; otherwise, Code “00 – Not Applicable.”

Code 99 (Unknown if Light or Medium/Heavy Truck/Bus) is used when there is not enough information to determine if the vehicle meets the definition of a medium/heavy truck or bus but there is reason to suspect that it may qualify. This code differs from Code “19” in that Code “19” indicates that the vehicle is a medium/heavy truck, only the configuration is not known.

0	No
1	Yes, One Trailer
2	Yes, Two Trailers
3	Yes, Three or More Trailers
4	Yes, Number of Trailers Unknown
5	Vehicle Towing Another Motor Vehicle
9	Unknown

Remarks:

Trailing unit applies to any device connected to a motor vehicle by a hitch, including tractor-trailer combinations, a single-unit truck pulling a trailer (Truck Trailer), a boat trailer hitched onto a motor vehicle, etc.

A vehicle towing another “motor vehicle” is not considered to be a “trailer” but is considered to be a “towed vehicle” (see code “5”).

A Converter Dolly is a device used to hitch a trailer to another semi-trailer or straight truck and is not counted as a separate trailing unit. For combination vehicles (medium/heavy trucks), count only the cargo-carrying units.

Codes “1-4” should be used for vehicles pulling a trailer with a hitch. Examples are a tractor/trailer with a “fifth wheel” towing a trailer, a single-unit truck pulling a flatbed trailer with a “ball” hitch, a passenger vehicle pulling a camping trailer with a “bar” hitch, a dual-rear-wheel pickup truck with a “fifth wheel” hitch in the pickup bed with a horse trailer attached.

Code 5 (Vehicle Towing Another Motor Vehicle) should be used for a vehicle towing another “motor vehicle(s),” where the towed vehicle has to have two or more wheels on the ground. Use code “5” for saddle-mounted towed vehicles. An example of a saddle-mount unit would be a bobtail towing one or more other bobtails. Code “5” does not apply to vehicles “towed” by being loaded on a flatbed or auto transporter.

NOTE: For vehicles being towed by an illegal hitch (rope, chain, cable), be sure to code Related Factors-Driver Level code “22 – Towing or Pushing Improperly.”

(Number of Axles on Vehicle, Including Trailers)

00	Not Applicable, not a Medium/Heavy Truck or Bus
02-97	Number of Axles
98	Medium/Heavy Truck or Bus, Number of Axles Unknown
99	Unknown if Light or Medium/Heavy Truck or Bus

Remarks:

This information should be available on your PAR or Truck and Bus Supplement with other elements required by the Federal Motor Carrier Safety Administration (FMCSA) for commercial vehicles.

You should expect to find Number of Axles for the following commercial vehicles:

1. *Light trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 lbs.*
2. Medium/Heavy Trucks: vehicles with **GVWR** greater than 10,000 lbs.
3. Buses with 9 or more seats (including the driver).
4. Light Trucks, Vans and Passenger Vehicles displaying a hazardous materials placard.

Number of Axles counts the total number of axles on the vehicle (and converter dolly), including the trailing units. **Include raised axles.**

Code 00 (Not Applicable) should be used for automobiles, motorcycles, small buses (with less than 9 seats, including driver) and **single-unit** small trucks or vans (10,000 lbs. or less **GVWR**), not carrying hazardous cargo.

GROSS VEHICLE WEIGHT RATING (GVWR)/

GROSS COMBINATION WEIGHT RATING (GCWR)

Element Values:

Blank

- 0 Not Applicable
- 1 10,000 lbs. or less
- 2 10,001 lbs. – 26,000 lbs.
- 3 26,001 lbs. or more
- 9 Unknown

Remarks:

Prior to 2007, FARS only considered the power unit in recording the element Gross Vehicle Weight Rating (GVWR). Starting in 2007, the element was modified to allow Gross Combination Weight Rating (GCWR) to be recorded for combination vehicles to match the nationally accepted reporting criteria for this element (FMCSA's SAFETYNET and MMUCC).

Use of GCWR instead of GVWR will only impact these vehicles:

- 1. Light trucks, 10,000 lbs. or less, pulling trailers (truck/trailers)(greater than 10,000 lbs. GCWR)*
- 2. Single-unit trucks, less than 26,000 lbs., pulling trailers (truck/trailers) (greater than 26,000 lbs. GCWR)*

This information should be available on your PAR or Truck and Bus Supplement with other elements required by the Federal Motor Carrier Safety Administration (FMCSA) for commercial vehicles.

Record the applicable weight range for a single vehicle's Gross Vehicle Weight Rating (GVWR) or combination vehicle's Gross Combination Weight Rating (GCWR).

It may appear as a numeric value or as a range of values like those displayed above. For verification of the reported range, see the procedures outlined below.

Gross Vehicle Weight Rating (GVWR) is the value specified by the manufacturer as the recommended maximum loaded weight of a single motor vehicle.

Gross Combination Weight Rating (GCWR) is the value specified by the manufacturer(s) as the recommended maximum loaded weight of a combination (articulated) motor vehicle. This is for truck tractors and single-unit trucks pulling a trailer(s). GCWR is the sum of the gross vehicle weight ratings (GVWR) of all units, power unit and its trailer(s).

- ***For Truck/Trailer Combinations:*** If your state records the GVWR of the power unit and trailer(s) in separate fields, be sure to add together the GVWRs of all the units when recording this element.

Code 0 (Not Applicable) should be used for vehicles 10,000 lbs. or less, not displaying a hazardous materials placard, for buses less than 9 seats (including driver), and for all motor homes.

Code 1 (10,000 lbs. or less) should be used for passenger cars and light trucks with 10,000 lbs. *or less* GVWR/GCWR when displaying a hazardous materials placard or for buses with 9 or more seats (including driver) with 10,000 lbs. GVWR or less.

PROCEDURE FOR VERIFICATION OF GVWR/GCWR RANGE:

The MDE provides PCVINA codes for GVWR. Next to Vehicle Identification Number (VIN), click on check box, and then click on “Show Details” under the “R. L. Polk” column. Use the table below to translate the code for GVWR.

NOTE: PCVINA only provides the GVWR of a single vehicle or the GVWR of the power unit in a combination unit motor vehicle.

- ***For Truck / Trailer Combinations:***
 1. ***If the PCVINA VIN return fits within the range provided on the PAR or Truck and Bus supplement, use that value.***
 2. ***If the PCVINA VIN return falls below the range provided on the PAR or Truck and Bus Supplement, use the value provided on the crash report to account for the addition of the trailer’s GVWR.***
- ***If GVWR/GCWR information is unavailable or not reported on your PAR or Truck/Bus Supplement, utilize the information on the power unit provided by PCVINA to code this element.***
- ***If the GVWR/GCWR is available on your PAR or Truck/Bus Supplement, and PCVINA does not return a value, use the information provided on your crash report.***

Code 9 (Unknown) should be used when GVWR/GCWR information is unavailable on your PAR or Truck/Bus Supplement and PCVINA is unable to return a value.

See Comparison of PCVINA and FARS Codes for GVWR/GCWR on following page.

Remarks:

This information should be available on your PAR or Truck and Bus Supplement with other elements required by the Federal Motor Carrier Safety Administration (FMCSA) for commercial vehicles.

You should expect to find Cargo Body Types for the following commercial vehicles:

1. *Light trucks pulling a trailer with gross combination weight rating (GCWR) greater than 10,000 lbs.*
2. Medium/Heavy Trucks: vehicles with **GVWR** greater than 10,000 lbs.
3. Buses with 9 or more seats (including the driver).
4. Light Trucks, Vans and Passenger Vehicles displaying a hazardous materials placard.

If Vehicle Configuration is coded “01-99,” Cargo Body Type should be coded “01-99.”

Code 00 (Not Applicable) should be used for automobiles, motorcycles, small buses (with less than 9 seats, including driver) and *single-unit* small trucks or vans (10,000 lbs. or less *GVWR*), not carrying hazardous cargo.

Code 01 (Van/Enclosed Box) is used for all enclosed trailers and enclosed cargo vans. This is the most frequently used code for medium/heavy trucks.

Code 03 (Flatbed) is a cargo body without sides or roof, with or without readily removable stakes which may be tied together with chains/slats or panels. This includes “stake trucks.”

Code 04 (Dump) refers to a cargo body designed to be tilted to discharge its load by gravity.

Code 06 (Auto Transporter) is a unit capable of transporting multiple, fully assembled automobiles on an “auto transporter” trailer. Do not use code “06” for flatbeds transporting vehicles (e.g., flatbed tow truck, or flatbed semi-trailer carrying wrecked/salvaged automobiles).

Code 07 (Garbage/Refuse) includes recycle trucks.

Code 08 (Grain/Chips/Gravel) refers to trucks that discharge their loads by gravity from the bottom. (belly dump)

Code 09 (Pole) *is a cargo body type that consists of a trailer designed to be attached to a towing vehicle by a reach or pole or by being boomed and secured to the towing vehicle. These are ordinarily used to carry property of a long or irregular shape, such as telephone poles. The "pole" extends or retracts to accommodate varying lengths of cargo.*

Code 10 (Log) *is a cargo body type with a fixed middle beam and side support posts specifically designed for carrying logs. Includes single-unit log trucks.*

Note: These arrangements may be included on your state’s PAR under “Pole/Log.” If the trailer can “telescope” to carry different log lengths, then it should be considered a pole trailer (code 09).

Code 11 (Intermodal Chassis) *is a cargo body type used for a trailer specifically designed to have a rail or ship container mounted directly on the chassis. These should not be confused with van/enclosed box cargo body types. Intermodal containers may also be mounted on a flatbed trailer, in which case code “03 – Flatbed” is the cargo body type.*

Code 12 (Vehicle Towing Another Motor Vehicle) refers to vehicles that have no cargo carrying capability but are in the act of towing another motor vehicle where the towed vehicle has at least two wheels on the ground. These are often called "drive-away, tow-aways" and will be applicable to tow trucks and specially rigged truck tractors. Includes "saddlemount" configurations. Does not apply to vehicles "towed" by being loaded on a flatbed or auto transporter.

Note: Prior to 2007, these arrangements were recorded as code "96 – No Cargo Body."

Code 96 (No Cargo Body Type) is used for any medium heavy truck with no cargo carrying capability (bobtail); a truck chassis with a cab only (stripped chassis); and light trucks (Vehicle Configuration equals code "70") and passenger vehicles (Vehicle Configuration equals code "80") displaying a hazardous materials placard.

Code 97 (Medium/Heavy Truck or Bus, Other Cargo Body Type) is used when the cargo body type is other than the body types listed in codes "01-12, 20-21." *Includes 2-axle, 6 tire "pickups" greater than 10,000 lb without a trailer. Does not include a "pickup" pulling a trailer (truck/trailer). Use the Cargo Body Type of the attached trailer in these situations. Previously included "log trucks" which are now recorded under code "10 – Log".*

Code 98 (Medium/Heavy Truck or Bus, Unknown Cargo Body Type) is used when the cargo body type is not known or when there is not enough information to distinguish one cargo body type from another. An example would be contradictory data on whether the truck is a van/enclosed box or a flatbed.

Code 99 (Unknown if Light or Medium/Heavy Truck/Bus) is used when there is not enough information to determine if the vehicle meets the definition of a medium/heavy truck but there is reason to suspect that it may qualify.

NOTE: *For truck/trailer vehicle configurations where the power unit and trailer have different cargo body types, code the cargo body type of the power unit. For example: A dump truck pulling a flatbed trailer should be coded "04 – Dump."*

For truck/trailer vehicle configurations where the power unit's Cargo Body Type would be coded "96 – No Cargo Body" or "97 – Other," code the cargo body of the trailer. For example: a dual-rear-wheel pickup truck pulling a flatbed trailer should be coded "03 – Flatbed."

Remarks:

Beginning 2007, this element replaced the element Hazardous Cargo.

This element must be coded for all vehicles.

Placard and Hazardous Materials Released information should be available on your PAR or Truck and Bus Supplement with other elements required by the Federal Motor Carrier Safety Administration (FMCSA) for commercial vehicles.

Hazardous Material is a substance or material which has been designated by the U.S. Department of Transportation, or other authorizing entity, as capable of posing an unreasonable risk to health, safety and property when transported in commerce. Any motor vehicle transporting hazardous materials in quantities above the thresholds established by the U.S. Department of Transportation, or other authorized entity is required to display a hazardous materials placard.

Exclusions:

- *Fuel or oil carried by the vehicle for its own use.*

Hazardous Materials Placard: is a sign required to be affixed to any motor vehicle transporting hazardous materials in quantities above the thresholds established by the U.S. Department of Transportation, or other authorized entity. This placard identifies the 1-digit hazard class division number, 4-digit hazardous material identification number or name of the hazardous material being transported.

Vehicle transporting hazardous materials should have a diamond-shaped placard affixed indicating the material carried. (See list of examples *below*.)

HM1- Hazardous Materials Involvement

Code 1 (No) - No indication of hazardous materials for this vehicle in your case documentation.

If HM1 is "1 - No", HM2-HM5 will be coded "Not Applicable."

Code 2 (Yes) - Hazardous Material was indicated for this vehicle in your case documentation.

Examples for code "yes"

1. *The officer records any information about a placard, whether or not he indicates that the vehicle was carrying hazardous materials.*
2. *The officer does not record any information about a placard, however, you know that hazardous material was involved.*
3. *Information identifying hazardous material is blank, but you know that hazardous material was released.*

HM2 – Hazardous Materials Placard

Code 0 – Not Applicable - No indication of hazardous materials for this vehicle in your case documentation (HMI equals 1).

Code 1 (No) – Hazardous Materials involved, but the officer indicates there was no placard.

Code 2 (Yes) – Hazardous Materials involved, and the vehicle does have a placard.

Code 8 (Not Reported) – Hazardous Materials involved, but the crash report does not record any information about the presence of a placard.

HM3 – 4-Digit Hazardous Materials Identification Number

Code 0000 (Not Applicable) – No indication of hazardous materials for this vehicle in your case documentation (HMI equals 1).

Actual 4-digit Number – Record the 4-digit Hazardous Materials Identification Number reported in your case documentation.

Code 8888 (Not Reported) – Hazardous materials involved, but the 4-digit number was not recorded or this field is not available on your crash report. If you are provided the name of the hazardous material on your report but not the 4-digit number, use this code and be sure to record the 1-digit class number if it is provided.

HM4 – 1-Digit Hazardous Materials Class Number

Code 0 (Not Applicable) – No indication of hazardous materials for this vehicle in your case documentation (HMI equals 1).

Actual 1-digit Class Number – Record the 1-digit Hazardous Materials Class Number recorded on your crash report. If you are given a 2-digit number record only the first digit (e.g., “1.3” should be recorded as “1”).

Code 8 (Not Reported) – Hazardous Materials involved, but the 1-digit number was not recorded or this field is not available on your crash report.

HM5 – Release of Hazardous Materials from Cargo Compartment

Code 0 (Not Applicable) – No indication of hazardous materials for this vehicle in your case documentation (HMI equals 1).

Code 1 (No) – Hazardous Materials involved, and the officer indicates there was no release of the material(s) from the cargo compartment.

Code 2 (Yes) – Hazardous Materials involved, and the officer indicates there was a release of the material(s) from the cargo compartment.

Code 8 (Not Reported) – Hazardous Materials involved, and you can’t determine from the crash report whether or not hazardous material was released from the cargo

compartment.

For HM5, do not include fuel or oil carried by the vehicle for its own use which has been released..

Examples of Hazardous Materials are:

Any transport vehicle containing any quantity of the following classes of material must be placarded:

- | | |
|------------------------------|-------------|
| Explosives (1.1, 1.2, 1.3) | Poison |
| Poison Gas | Radioactive |
| Materials Dangerous When Wet | |

Any transport vehicle containing over 1,001 lbs. or more (gross weight) of the following classes of materials must be placarded:

- | | |
|--|--|
| Explosives (1.4, 1.5, 1.6) | Oxidizer/Organic Peroxide |
| Flammable and Non Flammable Gas | Poison |
| Flammable/Combustible Liquid
(gasoline, fuel oil) | Radioactive |
| Flammable Solid/Spontaneously
Combustible | Corrosive |
| | Other (A material which presents a hazard during transportation which is not included in any other hazard class) |

Remarks:

Definition: Events in sequence related to this motor vehicle, including both non-collisions as well as collision events, regardless of injury and/or property damage. Code each event for this vehicle in the order in which they occur, time wise (up to six events), from the PAR narrative and diagram. Jackknife, Cargo/Equipment Loss or Shift, Equipment Failure, Ran-off-Road, Cross Median/Center Line, Downhill Runaway, do not necessarily have to produce injury or damage.

Each coded vehicle must have at least one of the six Sequence of Events fields coded "01-55, 60-67 or 99".

Make sure that the Most Harmful Event for this vehicle is included in the sequence.

Make sure that the First Harmful Event is coded in the sequence for one of the vehicles in the accident.

Fire/Explosion must always be recorded in the Sequence of Events if present in the crash.

For crashes with more than six events in the sequence, omit the code(s) least relevant to describing the crash (example: A vehicle runs off road right, then crosses center line, then runs off the road left. You could omit the code "65 – "Cross Median/ Centerline" from the sequence because if you run off the road right and then run off the road left, you would have to cross the median/centerline).

Code 00 (No Event) is used to indicate the end of a sequence when less than six events are coded. Do not leave any sequence of events field blank, "00" fill if codes "01-55, 60-67, 99" do not apply to Sequence of Events fields 2-6.

Code 01 (Overturn/Rollover) is used when a vehicle rotates 90° or more, side-to-side or end-to-end, producing the damage or injury. Overturn/Rollover should be treated as a single event when a vehicle performs multiple rotations in a crash. For motorcycles, laying the motorcycle down on its side is sufficient to code overturn as an event if damage or injury is produced even though Element "V19 – Rollover" is not applicable to motorcycles.

Code 04 (Gas Inhalation*) includes injury or death from carbon monoxide fumes leaking from a motor vehicle in-transport.

Code 05 (Fell/Jumped from Vehicle) is used when a person falls or jumps (not suicide) from the vehicle. For example, a passenger of a motor vehicle in-transport leans against the car door, it opens and the passenger falls out or a person riding on a vehicle's exterior (hood, roof, running board, etc.) falls or jumps.

Code 06 (Injured in Vehicle [Other Than Cargo/Equipment Loss or Shift]) Use where an occupant is injured during an unstabilized situation without a collision.

Examples: Driver slams on brake, causing an unrestrained passenger to be injured. Driver makes a sharp turn causing driver to strike head on side window, knocking driver unconscious. A pickup truck stops short and its load crashes through passenger compartment injuring or killing driver; or a part of the engine comes loose and bounces back into its own vehicle injuring or killing passenger.

Code 07 (Other Non-Collision). Examples: driving off a cliff where damage is not the result of an overturn or collision with an object, a vehicle being towed by a chain, slides forward striking the towing vehicle causing injury or damage.

Code 11 (Live Animal) is used for collisions with live animals (domesticated or wild) that are not themselves being used as transportation or to draw a wagon, cart or other transport device (see ANSI D16.1). See code “49” for ridden animals and animals drawing transport devices. See Driver Level-Related Factors (D22) “83 – Live Animal in Road” to determine if it applies. See code “18 – Other Object (not fixed)” for an animal carcass lying in the roadway.

Code 12 (Motor Vehicle In-Transport on Same Roadway). Use this code when one motor vehicle in-transport collides with another motor vehicle in-transport on an undivided highway or the same side of a divided highway.

Code 13 (Motor Vehicle In-Transport on Different Roadway) differs from Code “12” in that it applies to events where this motor vehicle in-transport leaves one roadway and enters a different roadway, having a collision with a motor vehicle in-transport on that roadway. Example: one motor vehicle in-transport travels across the median of a divided highway, enters oncoming traffic and is struck; or, when a motor vehicle in-transport traveling on an overpass, leaves the trafficway and strikes or is struck by motor vehicle in-transport traveling on a trafficway below. Code 13, is only used for the motor vehicle crossing over onto the other trafficway.

Code “13” should **NOT** be used in an accident where the First Harmful Event occurs within the boundaries of an intersection.

Code 14 (Parked Motor Vehicle or Motor Vehicle Stopped Off the Roadway) refers to a collision with a parked/stopped off roadway motor vehicle (“not in- transport”). “Parked” motor vehicles are those vehicles parked in designated parking areas (curbside where parking is allowed, marked parking spaces in parking lots, private driveways, and other private property). Motor vehicles “Stopped off the Roadway” are those stopped on the shoulder, median or roadside. This code includes any motor vehicle that is not in-motion (stopped) outside the trafficway boundaries.

Code 15 (Non-Motorist on Personal Conveyance). A personal conveyance is (1) a human-powered, non-motorized device not propelled by pedaling, (2) such devices even when motorized. Includes rideable toys (roller skates, inline skates, skateboards, skates, baby carriage, scooters, toy wagons), motorized rideable toys (motorized skateboard, motorized scooter, motorized toy car), devices for personal mobility assistance (Segway-style devices, motorized and non-motorized wheelchairs, handicapped scooters).

Exclusions: Golf cart, low-speed vehicle (LSV), go-cart, mini bike are excluded because they are motor vehicles (see Collision with Motor Vehicle Codes)

Code 16 (Thrown or Falling Object) is a non-collision event and, unless there is another collision during the accident, IMPACT POINTS (V21) for the vehicle involved must be coded "00." Examples: Falling tree/rock, dropping/throwing something off bridge, throwing a snowball. However, it does not have to come from above. Excludes Cataclysms.

Code 17 (Boulder) is a rock of sufficient mass that when struck by a motor vehicle moves very little and remains basically intact. It may be considered as a fixed object.

Code 18 (Other Object [Not Fixed]) e.g., dead body, animal carcass, or fallen tree already laying in roadway, prior to the unstabilized situation in this accident; construction cones or barrels on road (temporary).

See Code "45 – Working Motor Vehicle (Construction, Maintenance or Utility Vehicle only)" for transport devices used as equipment (i.e., cherry picker at work, paint striper at work, etc.).

Code 20 (Impact Attenuator) is a device for controlling the absorption of energy released during vehicle collision ("crash cushions"). Its most common application involves the protection of fixed roadside objects such as bridge piers, elevated gores at exit ramps, etc. Examples include barrels filled with water or sand, and plastic collapsible structures.

Code 21 (Bridge Pier or Abutment) refers to support structures; most likely to be struck by vehicles passing under bridges (see code "50 – Bridge Overhead Structure" for vehicles striking the bottom of a bridge while traveling on a trafficway underneath it). If the vehicle first strikes a concrete barrier protecting a bridge pier or abutment, use code "25 – Concrete Traffic Barrier."

Bridge Pier - a square or round column of stone, concrete, brick, steel or wood for supporting a bridge between abutments.

Bridge Abutment - wall supporting the ends of a bridge generally retaining or supporting the embankment under bridge ends and composed of stone, concrete, brick or wood. (Includes wing-walls.)

Code 22 (Bridge Parapet End) and **Code 23 (Bridge Rail)** are components of the upper portion of bridges.

Code 22 (Bridge Parapet End) the end of a low wall which runs along the outer most edge of the roadway or sidewalk on the bridge and usually composed of brick, stone, or concrete. Balustrade is often used synonymously with parapet.

Code 23 (Bridge Rail) a wooden, brick, stone, concrete or metal fence-like wall which runs along the outermost edge of the roadway or sidewalk on the bridge or a rail constructed along the top of a parapet.

- a) Bridges do not need to support another roadway. It may be an overpass for a train or even for a viaduct (water conduit).
- b) See bridge components diagram on next page for bridge codes “21, 22 and 23.”
- c) Barriers as in codes “24, 25 and 26” refer to a physical structure such as a guardrail, a concrete safety barrier or a rock wall which has the primary function of preventing cross-median travel by deflecting and redirecting vehicles along the roadway on which they were traveling. Therefore, trees, curbing, rumble strips and drain depressions are not barriers.

Code 50 (Bridge Overhead Structure) is used when striking the bottom of a bridge while traveling on a trafficway underneath it.

BRIDGE COMPONENTS

Code 24 (Guardrail Face) is a low barrier running along the edge of a road shoulder either on the right or the left and which has the primary longitudinal structure composed of metal (plates, cable, mesh, box beam, etc.).

A guardrail is differentiated from Code “25 – Concrete Traffic Barrier” by the material making up the greatest part of the longitudinal portion of the structure. In

the case of guardrails, this is metal whereas in concrete barriers this is concrete (including concrete rails).

Guardrails, which serve as bridge rails, should be coded “23 – Bridge Rail.”

Code 52 (Guardrail End) is coded if a vehicle strikes the end of a guardrail. Guardrails can have a separate flat or rounded piece of metal attached to the end of an expanse of guardrail face.

Code 25 (Concrete Traffic Barrier). Refers to the longitudinal traffic barriers constructed of concrete and located on the outside of the road surface, in a median, or in gore areas. This includes all temporary concrete barriers regardless of location (i.e., temporary Jersey Barrier on a bridge being used to control traffic during bridge repair/construction). Concrete walls (vertical side surfaces) do not apply here; see code “39-Wall.”

When a vehicle is traveling under a bridge and strikes a concrete barrier used to protect the bridge pier or abutment use code “25.”

Code 26 (Other Traffic Barrier) is used for all other longitudinal barriers such as wood or rock and unknown barrier composition types.

Code 27 (Highway/Traffic Sign Post/Sign) is used when the post supporting a traffic sign, or the sign itself, is hit by a motor vehicle in-transport. Includes mile markers. (See Code “46” for traffic signal supports.)

Code 28 (Overhead Sign Support/Sign) is used when the sign supported is above the highway. The difference between codes “27” and “28” is the location of the sign (overhead or the side of the road).

Code 29 (Luminarie/Light Support) refers to supports for highway lighting systems, not including other private lighting systems (e.g., parking lot lights). Support does not include other fixed objects to which lighting is affixed (e.g., telephone poles).

Code 30 (Utility Pole) Electrical, Telephone, Cable & other utility pole-type supports.

Code 31 (Other Post, Other Pole, or Other Supports) is used for posts other than highway signs. (E.g., reflectors on poles along side of roadway, parking meters, flag poles, etc.). For mail box posts, use code “53 – Mail Box.”

Code 32 (Culvert) is any structure entirely under the roadway (driveway or entranceway) and less than 20 feet in span measured along the center line of the roadway.

Code 33 (Curb) is a concrete or asphalt structure up to 12 inches in height that borders the roadway. It provides drainage control and pavement edge delineation. The face of the curb may be sloped or vertical. Be careful that the PAR provides some indication that damage has occurred when a vehicle strikes a curb.

Codes 35-37 (Embankments) are raised structures to hold back water, to carry a roadway, or the result of excavation or washout (including erosion) that may be faced with earth (Code “35”) or rock (sometimes called a berm), stone or concrete (code “36”). An embankment can usually be differentiated from a wall by its incline, whereas a wall is usually vertical. However, there are exceptions; such as a retaining wall which may be inclined or a vertical embankment caused by a natural event such as a washout.

In accidents involving a field approach or crossing, if in doubt about when to use codes “32, 34” (Culvert/Ditch) or codes “35-37” (Embankments), use this criteria:

- a) Use code “32, 34” if the driver would not have been able to recover from the ditch even if there had been no field approach (crossing).
- b) Use code “35, 36, 37” if the driver would have been able to recover from the ditch, but struck the field approach (crossing) prior to doing so.
- c) Use code “35, 36, 37” if it is not known whether or not the driver would have been able to recover from the ditch and a field approach (crossing) is involved.

Code 38 (Fence) includes the fence posts. A fence can be made of wood, chain link, stone, etc. (not shrub hedges serving as containment for property).

Code 39 (Wall) is a primarily vertical (+ 15° from vertical) structure composed of concrete, metal, timber, or stone which is not part of a building or a fence but typically is used for retaining earth, abating noise, and separating areas but not for containment as in the primary function of a fence). Also not included as walls are wing-walls, which are attached to ends of bridge abutments and extend back at an angle from the roadway. Wing-walls should be coded as code “21.”

Code 42 (Tree [Standing Tree Only]) is used when a vehicle strikes a standing tree. If a vehicle strikes a tree lying in the roadway, use code “18 – Other Object (not fixed).” If a tree falls on a vehicle as it is passing by, use code “16 – Thrown or Falling Object.”

Code 43 (Other Fixed Object). This is used when the object is fixed (considered a permanent structure) and is not described by any of the other fixed object codes. Includes utility wires and “guy” wires attached to utility poles.

Code 45 (Working Motor Vehicle [Construction, Maintenance or Utility Vehicle Only]). Use this code when this motor vehicle strikes a construction, maintenance or utility vehicle in the process of working and not “in-transport.” (Examples: cherry picker working on the telephone lines, a paint striper painting lines on the road, a tractor mowing grass on trafficway, a county/state snow plow plowing snow, a highway dump truck dumping asphalt for a new travel lane, etc.

NOTE: Before 2004, code “45” was called “Transport Device Used as Equipment.” It included other working activities in addition to construction, maintenance and utility work on trafficways. From 2004 forward, code “45” excludes working activities other than highway construction, maintenance or utility vehicles (e.g., garbage truck picking

up trash, mail/delivery trucks while making deliveries, personal vehicles plowing snow, police vehicles at a construction work site, etc. These are considered motor vehicles “In-Transport”). Use Related Factors-Vehicle Level code “42 – Other Working Vehicle (Not construction, Maintenance, Utility, Police, Fire, or EMS Vehicle)” to identify these vehicles.

A question may arise when a police, fire or emergency medical vehicle is struck on the roadway while at the scene of an accident, at a traffic stop, as traffic control, or at a construction/ maintenance site. The question becomes, “has its function changed from being a motor vehicle in-transport to a working vehicle?” The answer is “no.” Treat these situations as a motor vehicle in-transport striking another motor vehicle in-transport. (Use codes 12 or 13.) Use Related Factors -Vehicle Level code “41 – Police, Fire, or EMS Vehicle Working at the Scene of an Emergency or Performing Other Traffic Control Activities” to identify that this vehicle was struck while performing these work activities.

Taxis/limousines and commercial buses, etc., are always considered to be “in-transport” because their primary work function is to transport persons from one place to another. (See codes “12, 13 or 14”).

Code 47 (Vehicle Occupant Struck or Run Over by Own Vehicle). Use when occupant falls or comes out of vehicle and is struck or run over by that vehicle. Does not apply to occupants ejected during overturns.

Code 48 (Snow Bank). Used when snow fall and/or road plowing creates essentially fixed barriers of snow/ice which are not snow-covered earth or rock embankments.

Code 49 (Ridden Animal or Animal-Drawn Conveyances) is used for collisions with animals being used as transportation. This includes ridden animals and animals (or teams of animals) drawing a transport device (e.g., a horse drawing a sleigh, a team of horses drawing a stage coach, etc.).

Code 51 (Jackknife) applies to a condition that occurs to an articulated vehicle, (any vehicle with a trailing unit(s) connected by a hitch; e.g., truck tractor or single-unit truck with one or more trailers, articulated bus, car pulling a boat on a trailer, etc.) while in motion. The condition reflects a loss of control of the vehicle by the driver in which the trailer(s) yaws from its normal straight-line path behind the power unit.

Code 54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport) is used when two motor vehicles in-transport make contact by something set-in-motion by one of the vehicles. Beginning in 2005, in these circumstances, both vehicles should have code “54” in their sequence of events.

Code 55 (Other Not In-Transport Motor Vehicle) is used when this vehicle has a harmful event involving a motor vehicle in motion outside the trafficway (not in-transport).

Code 60 (Cargo/Equipment Loss or Shift) refers specifically to the loss or shift of items carried on or in a motor vehicle or its trailing unit, and not to the vehicle or trailing unit, itself. As an event in the sequence for this vehicle, the loss or shift does not have to be harmful. Code “60” should never be used to refer to a “collision” event.

EXAMPLES:

1. A pickup truck brakes rapidly to avoid a collision. This causes a piece of lumber in the pickup bed to smash through the rear window, causing the driver to lose control and run off the road, striking a tree.
2. A tractor trailer rounds a sharp curve, causing cargo in its trailer to shift precipitating an overturn.
3. A pickup truck brakes rapidly to avoid a collision. This causes a piece of lumber in the pickup bed to slide against the dashboard through an open pass-through (no damage), startling the driver and causing him to lose control and run off the road, striking a tree.

Codes 54 & 60

In accidents involving a cargo loss by a motor vehicle in-transport, that strikes another motor vehicle, remember that a vehicle’s load is considered part of the vehicle.

EXAMPLES:

1. If cargo falls from a pickup truck (in-transport) and strikes another car in-transport, this is treated as a two-vehicle accident. Therefore, the proper Sequence of Events for the pickup is code “60 – Cargo/Equipment Loss or Shift” followed by code “54 – Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport.” For the car, you would use code “54 – Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport.”
2. If cargo falls from a truck (in-transport) and strikes another vehicle NOT in-transport (parked/stopped off roadway/working motor vehicles, motor vehicles in motion outside the trafficway), this is also treated as a two-vehicle accident; however in this example, the proper Sequence of Events codes for the “in-transport” vehicle that lost its load will NOT include “54.” Instead, use code “60” followed by one of the “Collision Involving Motor Vehicles Not In-Transport” codes “14, 45 or 55.”

Code 62 (Separation of Units) is used when a trailing unit separates from its power unit or another trailing unit(s). This applies to truck tractors with trailer(s), single-unit trucks with a trailer and other vehicles pulling a trailer (e.g., car pulling a boat or motor home).

Code 63 & 64 (Ran off Road – Right and Ran off Road – Left) is used if driver loses control of vehicle and runs off roadway (travel lanes). Identification of running off road can be determined from diagram. These codes can be used anytime in the event sequence before or after any harmful events.

Coding Guideline for Running Off Road on Divided Highways

On a divided highway, a vehicle can run off the roadway by leaving the roadway and entering the median. When this occurs, the proper “Ran Off Road” code is always code “64 – Ran Off Road – Left.” Code “64” will also apply in situations

where the vehicle traverses the median and continues across the opposing roadway.

Code 65 (Cross Median/Centerline) is used when a vehicle completely crosses the median and enters the shoulder or travel lanes on the opposite side of a divided highway. It also includes crossing over the center line or of a two-way, undivided highway. This also includes unstabilized situations involving vehicles completely crossing over a continuous left-turn lane.

Code 66 (Downhill Runaway) refers to any vehicle that loses control due to brake failure on a downhill grade.

Code 67 (Vehicle Went Airborne). Officer must indicate by narrative or diagram that the vehicle left the ground (excludes simple rollover) because vehicle drove off cliff a, or was propelled into air after striking another vehicle or after traversing a berm. Officer states, “launched, vaulted or went airborne.” Driving off bridge and landing on road or vehicle below.

EXAMPLES:

1. Officer states; “launched, vaulted or went airborne.”
2. Driving off bridge and landing on road or vehicle below.

Remarks:

Must be the major event **FOR THIS VEHICLE**, even if different from the FIRST HARMFUL EVENT.

This element is used for instances when the First Harmful Event is minor, for a particular vehicle, compared to some subsequent event. Otherwise, Most Harmful Event and First Harmful Event are coded the same for a given vehicle.

Code for each vehicle. May be different for each vehicle.

Code as follows:

(A) FATALITIES take precedence over INJURIES.

1. If this vehicle is involved in more than one event which causes fatality to its own occupants or to non-motorists, choose the event which causes the greatest number of fatalities to occupants of this vehicle or to non-motorists (not occupants of other vehicles).
2. If this vehicle is involved in more than one event that causes fatality to its own occupants or to non-motorists; and if there are an equal number of fatalities in each such event, choose the fatal event that is worst with respect to other injuries and property damage.
3. At last resort, choose the fatal event that occurred first, time-wise.

(B) INJURIES take precedence over PROPERTY DAMAGE.

1. If the vehicle is not involved in events that cause fatality to its occupants or to non-motorist, choose the event that produces the worst injury.
2. If in doubt, choose the event with the greatest number of injuries.
3. If in doubt, choose the event that occurred first, time-wise.

(C) If only PROPERTY DAMAGE results for this vehicle:

1. Choose the event causing the most damage.
2. If in doubt, choose the event that happened first, time-wise.

Code 01 (Overturn/Rollover) is used when a vehicle rotates 90° or more, side-to-side or end-to-end, producing the most damage or the most serious injury(ies). For motorcycles, laying the motorcycle down on its side is sufficient to code “Overturn” as a harmful event if damage or injury is produced, even though element “V19 – Rollover” is not applicable to motorcycles.

Code 04 (Gas Inhalation*) includes injury or death from carbon monoxide fumes leaking from a motor vehicle in-transport.

Code 05 (Fell/Jumped from Vehicle) is used when falling or jumping (not suicide) from the vehicle is the major event causing damage or injury. For example, a passenger of a motor vehicle in-transport leans against the car door, it opens and the passenger falls out and is injured by the fall or a person riding on a vehicle’s exterior (hood, roof, running board, etc.) falls or jumps.

Code 06 (Injured in Vehicle, Other than Cargo/Equipment Loss or Shift). Use where an occupant is injured during an unstabilized situation without a collision.

Example: Driver slams on brakes, causing an unrestrained passenger to be injured; driver makes a sharp turn causing driver to strike head on side window, knocking driver unconscious.

Code 07 (Other Non-Collision). Examples: driving off a cliff where damage is not the result of an overturn or collision with an object; a vehicle being towed by a chain, slides forward striking the towing vehicle causing injury or damage.

Code 11 (Live Animal) is used for collisions with live animals (domesticated or wild) that are not themselves being used as transportation or to draw a wagon, cart or other transport device (see ANSI D16.1). See code “49” for ridden animals and animals drawing transport devices. See Related Factors-Driver Level code “83 – Live Animal in Road” to determine if it applies. See code “18 – Other Object Not Fixed” for an animal carcass lying in the roadway.

Code 12 (Motor Vehicle In-Transport on Same Roadway). Use this code when one motor vehicle in-transport collides with another motor vehicle in-transport on an undivided highway or the same side of a divided highway.

Code 13 (Motor Vehicle In-Transport on Other Roadway) differs from Code “12 – Motor Vehicle In-Transport” in that it applies to events in which this motor vehicle in-transport leaves one roadway and enters a different roadway, having a collision with a motor vehicle in-transport on that roadway. For example, one motor vehicle in-transport travels across the median of a divided highway, enters oncoming traffic and is struck. Another example: when a motor vehicle in-transport traveling on an overpass leaves that trafficway and strikes or is struck by a motor vehicle in-transport traveling on a trafficway below. Code 13, is only used for the motor vehicle crossing over onto the other trafficway.

Code “13” should NOT be used in an at intersection accident (where the First Harmful Event occurs in the intersection).

Code 14 (Parked Motor Vehicle or Motor Vehicle Stopped Off the Roadway) is used when the most injury- or damage-producing event for this vehicle is a collision with a parked/stopped off roadway motor vehicle (“not in-transport”). “Parked” motor vehicles are those vehicles parked in designated parking areas (curbside where parking is allowed, marked parking spaces in parking lots, private driveways, and other private property). Motor vehicles “Stopped off the Roadway” are those stopped on the shoulder, median or roadside. This code includes any motor vehicle that is not in-motion (stopped) outside the trafficway boundaries.

Code 15 (Non-Motorist on Personal Conveyance). A personal conveyance is (1) a human-powered, non-motorized device not propelled by pedaling, (2) such devices even when motorized. Includes rideable toys (roller skates, inline skates, skateboards, skates, baby carriages, scooters, toy wagons), motorized rideable toys (motorized skateboard, motorized scooter, motorized toy car), devices for personal mobility assistance (Segway-style devices, motorized and non-motorized wheelchairs, handicapped scooters).

Exclusions: Golf cart, low-speed vehicle (LSV), go-cart, mini bike are excluded because they are motor vehicles (see Collision with Motor Vehicle Codes).

Code 16 (Thrown or Falling Object) is a non-collision event and, unless there is another collision during the accident, IMPACT POINTS (V20) for the vehicle involved must be coded "00." Examples: Falling tree/rock, dropping/throwing something off bridge, throwing a snowball. However, it does not have to come from above. Excludes Cataclysms.

Code 17 (Boulder) is a rock of sufficient mass that when struck by a motor vehicle moves very little and remains basically intact. It may be considered as a fixed object.

Code 18 (Other Object, Not Fixed) e.g., dead body, animal carcass, or fallen tree already laying in roadway, prior to the unstabilized situation in this accident; construction cones or barrels on road (temporary).

See Code "45 – Working Motor Vehicle (Construction, Maintenance or Utility Vehicle Only) for transport devices used as equipment (i.e., cherry picker at work, paint striper at work, etc.).

Code 20 * (Impact Attenuator) is a device for controlling the absorption of energy released during vehicle collision ("Crash Cushion"). Its most common application involves the protection of fixed roadside objects such as bridge piers, elevated gores at exit ramps, etc. Examples include barrels filled with water or sand, and plastic collapsible structures.

Code 21 (Bridge Pier or Abutment) refers to support structures. They are most likely to be struck by vehicles passing under bridges.

1. **Bridge Pier** - a square or round column of stone, concrete, brick, steel or wood for supporting a bridge between abutments.
2. **Bridge Abutment** - wall supporting the ends of a bridge generally retaining or supporting the embankment under bridge ends and composed of stone, concrete, brick or wood.

Code 22 (Bridge Parapet End) and **Code 23 (Bridge Rail)** are components of the upper portion of bridges.

Code 22 (Bridge Parapet End) the end of a low wall which runs along the outer most edge of the roadway or sidewalk on the bridge and usually composed of brick, stone or concrete. Balustrade is often used synonymously with parapet.

Code 23 (Bridge Rail) a wooden, brick, stone, concrete or metal fence-like wall which runs along the outermost edge of the roadway or sidewalk on the bridge or a rail constructed along the top of a parapet.

- a. Bridges do not need to support another roadway. It may be an overpass for a train or even for a viaduct (water conduit).
- b. See the figure on bridge components in (A17) First Harmful Event for a diagram of the three bridge codes “21, 22 and 23.”

Barriers as in codes “24, 25 and 26” refer to a physical structure such as a guardrail, a concrete safety barrier or a rock wall which has the primary function of preventing cross-median travel by deflecting and redirecting vehicles along the roadway on which they were traveling. Therefore; trees, curbing, rumble strips and drain depressions are not barriers.

Code 50 (Bridge Overhead Structure) is used when striking the bottom of a bridge while traveling on a trafficway underneath it.

Code 24 (Guardrail Face) is a low barrier running along the edge of a road shoulder either on the right or the left and which has the primary longitudinal structure composed of metal (plates, cable, mesh, box beam, etc.).

Code 52 (Guardrail End) is coded if a vehicle strikes the end of a guardrail. Guardrails can have a separate flat or rounded piece of metal attached to the end of an expanse of guardrail face.

A guardrail is differentiated from Code “25 – Concrete Traffic Barrier” by the material making up the greatest part of the longitudinal portion of the structure. In the case of guardrails, this is metal whereas in concrete barriers this is concrete (including concrete rails).

Guardrails, which serve as bridge rails, should be coded “23 – Bridge Rail.”

Code 25 (Concrete Traffic Barrier). Refers to the longitudinal traffic barriers constructed of concrete and located on the outside of the road surface, in a median, or in gore areas. This includes all temporary concrete barriers regardless of location (i.e., temporary Jersey Barrier on a bridge being used to control traffic during bridge repair/construction). Concrete walls (vertical side surfaces) do not apply here; see code “39 – Wall.”

Code 26 (Other Traffic Barriers) is used for all other longitudinal barriers such as wood or rock and unknown barrier composition type.

Code 27 (Highway/Traffic Sign Post/Sign) is used when the post supporting a traffic sign, or the sign itself, is hit by a motor vehicle in-transport. Includes mile markers. See Code “46 – Traffic Signal Supports/Signal.”

Code 28 (Overhead Sign Support/Sign) is used when the sign supported is above the highway. The difference between codes “27 and 28” is the location of the sign (overhead or the side of the road).

Code 29 (Luminarie/Light Support) refers to supports for highway lighting systems, not including other private lighting systems (e.g., parking lot lights). Support does not include other fixed objects to which lighting is affixed (e.g., telephone poles).

Code 30 (Utility Pole) Electrical, Telephone, Cable, & other utility pole-type supports.

Code 31 (Other Post, Other Pole, or Other Supports) is used for posts other than highway signs. (E.g., reflectors on poles along side of roadway, parking meters, flag poles, etc.). For mail box posts, use code “53 – Mail Box.”

Code 32 (Culvert) is any structure entirely under the roadway, driveway or entranceway and less than 20 feet in span measured along the centerline of the roadway.

Code 33 (Curb) is a concrete or asphalt structure up to 12 inches in height that borders the roadway. It provides drainage control and pavement edge delineation. The face of the curb may be sloped or vertical. Be careful that the PAR provides some indication that damage has occurred when a vehicle strikes a curb.

Codes 35-37 (Embankments) is a raised structure to hold back water, to carry a roadway or the result of excavation or washout (including erosion) which may be faced with earth (Code “35”) or rock, stone or concrete (Code “36”). An embankment can usually be differentiated from a wall by its incline whereas a wall is usually vertical. However, there are exceptions to this; such as a retaining wall that may be inclined or a vertical embankment that is caused by a natural event such as a washout.

In accidents involving a field approach or crossing, if in doubt about when to use codes “32-34” (Culvert/Ditch) or codes “35-37” (Embankments), use the following criteria:

- a. Use code “32, 34” if the driver would not have been able to recover from the ditch even if there had been no field approach (crossing).
- b. Use code “35, 36, 37” if the driver would have been able to recover from the ditch, but struck the field approach (crossing) prior to doing so.
- c. Use code “35, 36, 37” if it is not known whether or not the driver would have been able to recover from the ditch and a field approach (crossing) is involved.

Code 39 (Wall) is a primarily vertical (+ 15 from vertical) structure composed of concrete, metal, timber, or stone which is not part of a building or a fence but typically is used for retaining earth, abating noise, and separating areas (but not for containment as in the primary function of a fence). Also included as a wall are headwalls (or endwalls) that are sometimes provided on culvert ends principally to protect the sides of the embankment around the culvert opening against erosion. This does not include wingwalls, which are attached to ends of bridge abutments and extend back at an angle from the roadway. Wingwalls should be coded as code “21.”

Code 42 (Tree [Standing Trees Only]) is used when a vehicle strikes a standing tree. If a vehicle strikes a tree lying in the roadway, use code “18 – Other Object (Not Fixed).” If a tree falls on a vehicle as it is passing by, use code “16 – Thrown or Falling Object.”

Code 43 (Other Fixed Object). This is used when the object is fixed (considered a permanent structure) and is not described by any of the other fixed object codes.

Code 45 (Working Motor Vehicle [Construction, Maintenance or Utility Vehicle Only]). Use this code when this motor vehicle strikes a construction, maintenance or utility vehicle in the process of working and not “in-transport.” (Examples: cherry picker working on the telephone lines, a paint striper painting lines on the road, a tractor mowing grass on trafficway, a county/state snow plow plowing snow, a highway dump truck dumping asphalt for a new travel lane, etc.)

NOTE: Before 2004, this code was called “Transport Device Used as Equipment.” It included other working activities in addition to construction, maintenance and utility work on trafficways. From 2004 forward, code “45” excludes working activities other than highway construction, maintenance or utility vehicles (e.g., garbage truck picking up trash, mail/delivery trucks while making deliveries, personal vehicles plowing snow, etc. These are considered motor vehicles “In-transport”). Use Related Factors-Vehicle Level code “42 – Other Working Vehicle (Not Construction, Maintenance, Utility, Police, Fire, or EMS Vehicle)” to identify these vehicles.

A question may arise when a police, fire or emergency medical vehicle is struck on the roadway while at the scene of an accident, at a traffic stop, as traffic control, or at a construction/ maintenance site. The question becomes, “has its function changed from being a motor vehicle in-transport to a working vehicle?” The answer is “no.” Treat these situations as a motor vehicle in-transport striking another motor vehicle in-transport (Use codes “12 or 13”). Use Related Factors – Vehicle Level code “41 – Police, Fire, or EMS Vehicle Working at the Scene of an Emergency or Performing Other Traffic Control Activities” to identify that this vehicle was struck while performing these work activities.

Taxis/limousines and commercial buses, etc., are always considered to be “in-transport” because their primary work function is to transport persons from one place to another. (See code “12, 13 or 14”).

Code 47 (Vehicle Occupant Struck or Run Over by Own Vehicle) Use when occupant falls or comes out of vehicle and is struck or run over by that vehicle. Does not apply to occupants ejected during overturns.

Code 48 (Snow Bank) Use when snow fall and/or road plowing creates essentially fixed barriers of snow/ice which are not snow-covered earth or rock embankments.

Code 49 (Ridden Animal or Animal-Drawn Conveyance) is used for collisions with animals being used as transportation. This includes ridden animals and animals (or teams of animals) drawing a transport device (e.g., a horse drawing a sleigh, a team of horses drawing a stage coach, etc.).

Code 51 (Jackknife [Causing Injury or Damage]) applies to a condition that occurs to an articulated vehicle, (any vehicle with a trailing unit(s) connected by a hitch; e.g., truck tractor or single-unit truck with one or more trailers, articulated bus, car pulling a boat on a trailer, etc.) while in motion. The condition reflects a loss of control of the vehicle by the driver in which the trailer(s) yaws from its normal straight-line path behind the power unit, striking the power unit, causing damage to the power unit or trailer.

Code 54 (Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons or Objects Set-in-Motion From/by Another Motor Vehicle In-Transport) is used when this vehicle's most severe injury- or damage-producing event is striking another motor vehicle in-transport by setting something in motion, or being struck by something set-in-motion by another motor vehicle in-transport. Beginning in 2005, in these circumstances, both vehicles should have code "54" in their Sequence of Events.

In accidents involving harmful events caused by objects set-in-motion by a Motor Vehicle in-transport, remember that a vehicle's load is considered part of the vehicle.

EXAMPLES:

- 1) **Code "54" applies when:** cargo falls from a truck (in-transport) and strikes another vehicle in-transport, this is treated as a two-vehicle accident. Therefore, the proper Most Harmful Event code is "54 – Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport." Remember when this happens to also use Sequence of Events code "54 – Motor Vehicle In-Transport Strikes or is Struck by Cargo, Persons or Objects Set-in-Motion from/by Another Motor Vehicle In-Transport" in the sequence on both vehicles.
- 2) **Code "54" does NOT apply when:** cargo falls from a truck (in-transport) and strikes another vehicle NOT in-transport, this is also treated as a two-vehicle accident; however in this example, the proper Most Harmful Event code for the "in-transport" vehicle that lost its load will NOT be "54." Instead, choose one of the "Collision Involving Motor Vehicles Not In-Transport" codes "14, 45 or 55."

If it was the Most Harmful Event for the “not in-transport” vehicle which was struck by the load, it would be coded “12 or 13.”

Code 55 (Other Not In-Transport Motor Vehicle) is used when the most injury- or damage-producing event for this vehicle involves a motor vehicle in motion outside the trafficway (not in-transport).

Code 60 (Cargo/Equipment Loss or Shift, causing injury or damage) refers specifically to the loss or shift of items carried on or in a motor vehicle or its trailing unit, and not to the vehicle or trailing unit, itself. Code “60” is only used as the Most Harmful Event in accidents where the loss or shift causes damage to this vehicle, its cargo, or injury to its occupants and it is the most damage- or injury-producing event for this vehicle. Code “60” should never be used to refer to a “collision” event.

EXAMPLE:

A pickup truck brakes rapidly to avoid a collision. This causes a piece of lumber in the pickup bed to smash through the rear window, causing the driver to lose control and run off the road, striking a tree.

Code 99 (Unknown). This is used when it is not known what the Most Harmful Event is. For example, if a series of harmful events occurred and it is unclear which was first or most severe.

Consistency Checks:

	IF	THEN
(VH02) 1.	IMPACT POINT-PRINCIPAL equals 18,	MOST HARMFUL EVENT should equal 54.
(VH04) 2.	MOST HARMFUL EVENT equals 54,	IMPACT POINT-PRINCIPAL must not equal 00.
(VH05) 3.	MOST HARMFUL EVENT equals 54, <i>and VEHICLE ROLE equals 1, 3,</i>	IMPACT POINT-PRINCIPAL should equal 18.

Special Processing Rules:

	IF	THEN
(AL4P) 1.	MOST HARMFUL EVENT equals 01, and BODY TYPE does not equal 80-83, 88-89,	at least one SEQUENCE OF EVENTS must equal 01, and ROLLOVER must equal 1-2.

	IF	THEN
(AL5P) 2.	UNIT TYPE equals 1,	at least one event in the SEQUENCE OF EVENTS must equal the MOST HARMFUL EVENT.
(AL6P) 3.	MOST HARMFUL EVENT equals __, and UNIT TYPE equals 1,	at least one event in the SEQUENCE OF EVENTS must equal __.

Related Factors	Examples
Blanks	
00 None	
<u>Pre-existing Vehicle Defects or Conditions Noted</u>	
01 Tires	Excludes improper tire pressure, which is due to driver irresponsibility. Defective tires, tread separation, sidewall failure, excessively worn or bald tires. Tires improperly sized for this vehicle. Excludes: Tire damage produced in the crash (hitting pothole, curb, etc.). Dirt Bikes – Tires not suited for asphalt driving.
02 Brake System	Excludes locked wheels.
03 Steering System	Includes tie rod, kingpin, ball joint, etc.
04 Suspension	Includes springs, shock absorbers, MacPherson struts, axle bearing, control arms, etc. Modification to standard suspension (Suspension Lift Kit).
05 Power Train	Includes universal joint drive shaft transmission, engine clutch, gas pedal, motorcycle chain, gears, etc.
06 Exhaust System	Includes “exhaust system leaking into vehicle.”
07 Headlights	Defective/faulty/under-maintained as opposed to failure to use or misuse. Care must be used to distinguish defective headlight from Related Factors-Driver Level “23 – Failure to Dim Lights or Have Lights On When Required.”

Related Factors	Example
08 Signal Lights	Defective as opposed to failure to use or misuse. Care must be used to distinguish defective signal light from Related Factors-Driver Level “ 42 – Failure to Signal Intentions.”
09 Other Lights	Includes taillights, fog lights, parking lights.
10 Horn	Defective as opposed to failure to use or misuse. Care must be used to distinguish defective horn from Related Factors-Driver Level “42 – Failure to Signal Intentions” (failure to sound horn at curve on mountain road).
11 Mirrors	Includes missing mirrors.
12 Wipers	Defective/faulty/under-maintained as opposed to failure to use. Can be coded in conjunction with Related Factors-Driver Level “75 – Obstruction of View Due to Wiper Defect.”
13 Driver Seating and Control	Driver chair not fastened properly, cannot be adjusted properly so as interferes with control of the car. Seating removed, driver sitting on can, crate, etc.
14 Body, Doors, Hood, Other	All exterior not including cited. Includes trunk, hood hatch, bumpers, motorcycle kick stand.
15 Trailer Hitch	Excludes improper towing (Related Factors-Driver Level “22 – Towing or Pushing Improperly”). Care must be used to distinguish improper towing from defective trailer hitch. Improper towing denotes towing without a hitch, towing by cable, rope, chain, etc. Defective trailer hitch denotes improperly adjusted trailer hitch, lack of safety chain, 5 th wheel hitch, etc.
16 Wheels	Includes hub caps, multiple-piece rings.
17 Air Bag	Air bag, as designed, failed to deploy. Air bag deployed inappropriately.

Related Factors	Examples
19 Safety Belts	Excludes: Improper use. Failure described as webbing excessively worn, came unlatched, altered. Seatbelt failure.
18 Other Vehicle Defects	Includes faulty dash panel lights/control display (speedometer, etc.) and other electrical/electronic controls. Defective battery. Backup warning devices. Windows/windshield and window tinting.
31 <u>Special Vehicle Flags:</u> Hit-and-Run Vehicle	
32 Vehicle Registration for Handicapped	Vehicle registered and/or specially equipped for the handicapped. This can be derived from vehicle registration. Excludes placards which can be moved from one vehicle to the other.
33 Vehicle Being Pushed by Non-Motorist	This code supports Related Factors-Accident Level “17 – Vehicle Set-in-Motion by Non-Driver.”
35 Reconstructed Vehicle	Home-made vehicle from vehicle components A vehicle reconstructed by the owner; example: a two-wheel motorcycle converted to a three-wheel motorcycle. May have standard VIN or the State may issue a number in place of the VIN for their registration.
36 Electric/Alternative Fuel Vehicle	Vehicles fueled by rechargeable batteries, solar fuel, fuel cells, or any other fuel source (or combination of fuel sources) other than gasoline or diesel fuel. Includes vehicles fueled by alternative fuels in conjunction with gasoline or diesel fuel (e.g., Hybrid).
37 Transporting Children To/From Head Start/Day Care	Not intended for children transported to daycare by family/friends in personal vehicles. Applies to children transported to Day Care/Head Start in vehicles arranged, operated or owned by Head Start or Day Care Program.

Related Factors	Examples
39 Highway Construction, Maintenance or Utility Vehicle, In-Transport (Inside or Outside Work Zone)	<p>Do not use this code when the vehicle is working. Only use while the vehicle is “in-transport.” For example, while moving from job site to job site. Private construction excluded unless you know it is performing state or local contracted highway construction, maintenance or utility work.</p> <p>Refers to readily identifiable (lights, markings) vehicle in-transport at the time of the accident, which is owned by any local, county, state or federal agency.</p>
40 Highway Incident Response Vehicle	<p>State government-owned vehicles, whose function is to drive the major highways to assist motorists with flat tires, provide gas, etc.</p> <p>Could be called: DOT Help, Good Samaritans, Courtesy Patrol, Motorist Assist Vehicle, etc.</p>
41 Police, Fire, or EMS Vehicle Working at the Scene of an Emergency or Performing Other Traffic Control Activities	<p>Police car, fire truck or ambulance at the scene of an accident.</p> <p>Fire truck at the scene of a fire.</p> <p>Police car leading or trailing a convoy or funeral.</p> <p>Police car blocking the entrance to a parade route.</p> <p>Police car at a check point.</p>
42 Other Working Vehicle (Not Construction, Maintenance, Utility, Police, Fire, or EMS Vehicle)	<p>Garbage truck picking up trash.</p> <p>Personal pickup with a snow blade plowing.</p> <p>UPS or postal vehicle stopped in the roadway while making a delivery.</p>
44 <i>Adaptive Equipment</i>	<p><i>Special adaptive equipment for handicapped operator(s) of this vehicle.</i></p> <p><i>Examples of adaptive equipment are: Extended brake/gas pedals, special steering apparatus, hand brakes or accelerator, etc.</i></p>
99 Unknown	

Remarks:

Codes “01-19” - These are preexisting conditions not caused by damage in the crash. Use table above for examples or inclusions.

Care must be used to distinguish vehicle conditions from Related Factors-Driver Level. Driver irresponsibility will be explicitly stated in police report for coding as a Related Factors-Driver Level. Vehicle conditions include manufacturer defects, driver’s changes that are defective, and maintenance conditions. Related Factors-Driver Level “24-Operating Without Required Equipment” can be coded in conjunction with vehicle level conditions.

Factors 01-19 refer to the condition of vehicle components as indicated in the police accident report (PAR). The report may indicate that a component is inadequate, inoperative, faulty, damaged or defective. The condition may be due to owner/user neglect, poor or sub-standard maintenance, tampering or defective manufacturing.

The vehicle condition(s) noted only indicate the existence of the condition(s). They may or may not have played a role in the accident.

Factors 31-44 are flags used to identify this vehicle as one with special circumstances. They do not necessarily imply that this circumstance caused the accident.

Code 99 is used when “unknown” is reported for the vehicle condition in the police accident report itself and none of the special circumstances exist.

FIRE OCCURRENCE

Format: 2 numeric

Element Values:

- | | |
|-------|--|
| Blank | |
| 0 | No Fire |
| 1 | Fire Occurred in Vehicle During Accident |

Remarks:

If it cannot be determined that a fire occurred in the vehicle during the accident, code “0-No Fire.”

If the Most Harmful Event for the vehicle is “02-Fire/Explosion,” or a fire in the vehicle is produced by damage in the accident, use “1-Fire Occurred.” The involved vehicles may be at rest for a reasonable period of time.

If the vehicles are at rest long enough to raise a question about the fire’s relationship to the accident’s damage-producing events, do not use code “1.”

Fires that begin in a vehicle before the first impact may be counted. If damage is produced, “Fire/Explosion” would be the First Harmful Event.

<u>Example</u>	<u>Coding Examples for Fire Occurrence</u>	<u>Code</u>
1. Car strikes tank truck in rear, explodes into fire.		“1-Fire” (for car)
2. Inside of vehicle catches fire, causing driver to strike another vehicle.		“1-Fire” (for 1st Veh.)
3. Inside of vehicle catches fire, causing driver to stop vehicle in roadway and all occupants exit vehicle. Two minutes later, a second car rear-ends the stopped car and its driver is killed from collision.		“0-No Fire” (for both)
4. Two vehicles collide; a tank ruptures. Vehicles are stopped momentarily when fire ignites, causing fire damage to both vehicles.		“1-Fire” (for both)

Consistency Checks:

	IF	THEN
(4Z0P) 1.	SEQUENCE OF EVENTS equals 02,	FIRE OCCURRENCE for this vehicle must equal 1 or blank.
(4Z1P) 2.	<i>UNIT TYPE equals 1 and</i> FIRE OCCURRENCE equals 1,	at least one SEQUENCE OF EVENTS must equal 02.

Special Processing Rules:

Remarks:

Code 1 (Driver-Operated Vehicle) if a person is physically operating the vehicle. Do not code "1" just because a person (child) was sitting in the driver's seat.

If coded "2" or "9," all other elements on the Driver Level must be left blank except Related Factors-Driver Level that can be coded. A Person Level form with Person Type equal "01" must not be submitted for that vehicle.

Code 3 (Driver Left Scene) only if the driver fled leaving the vehicle at the scene of the accident.

Code 4 (Motor Vehicle Not In-Transport [Parked/Stopped Off Roadway/Working/In Motion Outside Trafficway]). Use when Unit Type (V5) for this vehicle is not a motor vehicle in-transport (Unit Type codes "2, 3, 4"). Use this code regardless of the presence of an occupant in the driver's seat. All other elements on the Driver Level must be left blank, except Related Factors-Driver Level which should all be coded "00."

Format: 5 numeric

Element Values:

Blanks	
00000	Not a resident of U.S. or Territories
nnnnn	Five Numeric
	Actual Values
99999	Unknown

Remarks:

Code only the first five digits of nine-digit zip codes.

Use the following guidelines to resolve discrepancies between the PAR and Driver License File:

If the street address is the same on both sources but the zip codes differ, use the zip code from the License File. If you have access to a Zip Code Directory, confirm the address with that.

If the street addresses on the two sources differ, then use the zip code for the address reported on the PAR.

If you have both a residence address and a different mailing address (i.e., a P.O. Box) use the zip code for the residence address.

If the PAR indicates an address in-state and a driver's license from another state is recorded (with a different residence address), attempt to determine the most current address for the driver. If the most current address cannot be determined, use the zip code that corresponds to the address from the driver's license state.

Official driver record and police report. Official driver records take precedence over police-reported information.

Remarks:

Prior to 1993, this element was Driver License Status and included codes "5 - Valid-Single Class" and "6 - Valid-Multiple Class."

Starting in 2004, this element was modified to capture both non-CDL license type and status to accommodate graduated driver license (GDL) programs.

This element is used to establish the driver's license type and status for all license classes except the commercial driver's license (CDL). It also captures the type and status of the NON-CDL driving privilege for drivers with CDLs.

The NON-CDL License Type/Status is coded for all drivers, including drivers with a CDL.

Use the "Type" field to record whether the driver has a full driver's license, intermediate driver's license, learner's permit, temporary license, or is not licensed. Use the "Status" field to record if the license is valid, suspended, revoked, expired, canceled or denied.

When involved drivers are in the military, the analyst should be cautious because some States automatically (without driver application) renew drivers' licenses or extend the license until the individual is discharged. Each state analyst should be familiar with their state's policy on military personnel and code these license variables accordingly. In addition, when out-of-state driver requests are made the analyst requesting the data should note that the driver is in the military.

Code 0 (Not Licensed) (for both Type and Status). Code "0" should be used only when it has been reasonably established that the driver is not registered (anywhere). Takes precedence over all other NON-CDL License Type/Status Codes. Drivers who have a license but fail to have their license with them at the time of the accident should be coded according to the type (class) of license they possess and the validity of the license. If the police report indicates that the driver has "no license," the analyst should first determine whether this means that the person was not in possession of his/her license at the time of the accident, or that the driver is not a registered motor vehicle operator. A review of the violations cited section of the police report may yield some clues in this matter. If the person is cited for not possessing his/her license or for not having one, then code this information in variables D21 and D22, Violations Charged and Related Factors – Driver Level. If the analyst is uncertain as to whether or not the person possesses a license, then code "9 – Unknown" should be used.

NON-CDL LICENSE TYPE REMARKS:

Code 1 (Full Driver License) is used for unlimited driving privileges (with no GDL restrictions). This is based on your state's eligibility guidelines.

Code 7 (Learner's Permit) and **code 2 (Intermediate Driver License)** are the first two stages of a tiered licensing process that allows young drivers to obtain full driver license privileges through safe driving practices. Typical restrictions include minimum age requirements, passing vision/ knowledge tests, and supervision by adult driver over the age of 21. Other requirements may include number of passenger in the vehicle,

occupants must wear seatbelts, zero alcohol tolerance, and no at-fault accidents or convictions for a period of time.

NOTE: Beginning in 2004, if Learner's Permit or Intermediate Driver License has expired, code Type as "2" or "7" and Status as "3 – Expired." (Prior to 2004, an expired Learner's Permit was coded as "0 – Not Licensed").

NOTE: It is important that you know your state's Graduated Driver License restrictions. GDL program restrictions vary from state-to-state.

Code 2 (Intermediate Driver License) is the second stage of obtaining a full license privilege. It is typically for drivers between the ages of 16 and 17, and does not require total supervision during daylight hours (e.g., adult supervision during the hours of midnight to 5 am). An Intermediate Driver License may be suspended or revoked under certain violations. Other conditions may include conviction-free performance, seat-belt use for occupants, and some age restrictions for passengers. If any restriction is violated, this GDL restriction period can be extended.

NOTE: Code "2" does not apply for states that do not have a GDL program. However, your state may have a Learner's Permit. Also, your state may not use the name "Intermediate Driver License" and may call it something else.

Code 7 (Learner's Permit) is the first stage of obtaining a full license privilege. It is typically for drivers between 14 and 16 years of age, and typically requires total adult supervision, seat-belt use for occupants, and conviction-free performance. If any restriction is violated, this GDL restriction period can be extended.

Code 8 (Temporary License) includes any type of non-permanent license issued for a period of time less than that for a permanent license (e.g., temporary license to drive within a resort area; temporary license issued to foreign nationals). Short-term permanent licenses are not temporary (e.g., license issued to elderly drivers requiring frequent re-testing).

Learner's Permit and Intermediate Driver License held by young drivers awaiting a Full Driver's License are not to be coded "8 – Temporary License."

Code 9 (Unknown License Type) should be used when the type of the license is unknown. Code "9" is also used when it is unknown whether the driver had a license or not (e.g., hit-and-run).

NON-CDL LICENSE STATUS REMARKS:

Code 0 (Not Licensed) should be used only when it has been reasonably established that the driver is not registered (anywhere). Takes precedence over all other Non-CDL License Status Codes. Drivers who have a license but fail to have their license with them at the time of the accident should be coded according to the type (class) of license

they possess and the validity of the license. If the police report indicates that the driver has “no license,” the analyst should first determine whether this means that the person was not in possession of his/her license at the time of the accident, or that the driver is not a registered motor vehicle operator. A review of the violations cited section of the police report may yield some clues in this matter. If the person is cited for not possessing his/her license or for not having one, then code this information in variables D21 and D22, Violations Charged and Related Factors-Driver Level. If the analyst is uncertain as to whether or not the person possesses a license, then code “9-Unknown” should be used.

Codes 1 (Suspended), 2 (Revoked) or 3 (Expired) are used if a Full Driver’s License* is suspended, revoked, or expired. An Intermediate Driver License may be suspended (code 1) or revoked (code 2) under certain violations. If Learner’s Permit or Intermediate Driver License has expired, code “3 – Expired.”

Examples: If a Full Driver License is revoked or suspended but limited driving is permitted (e.g., to and from work), use the following criteria:

- a. If the accident occurs during permitted times of driving, code Non-CDL License Type as “1 – Full License” and Status “6 – Valid,” code Compliance With License Restrictions as code “1 – Restrictions Complied With,” and code Related Factors-Driver Level as “19.”
- b. If the accident occurs during invalid times for driving, code Non-CDL License Type as “1 – Full License” and Status “1 – Suspended” or “2 - Revoked,” code Compliance With License Restrictions as “2 – Restriction Not Complied With,” and do not use Related Factors-Driver Level code “19.”

Code 1 (Suspended) takes precedence over all other License Status codes, except “Not Licensed.”

Code 4 (Canceled or Denied) is used whenever the driver’s official driver record indicates the driver’s license* (1) was canceled; or (2) the driver’s request for license, or an extension of one, was denied.

Code 6 (Valid) refers to any license held by the driver that is valid for a class of vehicle*. If the driver is in violation of some aspect of his/her license (e.g., one of the restrictions) do not consider the license as being not valid. Record the restriction on element D9 (Compliance with License Restrictions) if applicable. If the police cite the driver for the violation, then the information would be recorded under elements D21 and D22 (Violations Charged and/or Related Factors-Driver Level).

Code 9 (Unknown License Status) should be used when the status of the license is unknown. Code “9” is also used when it is unknown whether the driver had a license or not (e.g., hit-and-run).

See reference table for coding elements D7 and D10, following the remarks section of element (D10) License Compliance With Class Of Vehicle.

*** NON-CDL privilege only**

IMPORTANT NOTE:

In distinguishing license requirements from restrictions focus upon whether or not all drivers possessing the type of license are mandated to obey the requirement. If they are, then the requirement is not a restriction, but rather part of the definition of the license. Restrictions, on the other hand, are requirements specific to individual drivers.

Remarks:

This element indicates the status for a driver's Commercial Driver's License (CDL).

As of April 1, 1992, all states will require a driver to have a CDL for driving a **commercial motor vehicle in excess of 26,000 pounds**; or for transporting hazardous materials in sufficient amounts to be placarded; or for transporting 16 or more passengers, including the driver.

See the table on the following page for guidance on coding this element and related driver status elements.

Code 5 (Disqualified) is used for commercial drivers who have their CDL privilege taken away for violations against the federal regulations. Although similar to suspension, the reasons for "disqualification" of a CDL may differ from state suspension reasons.

Code 8 (Other - Not Valid) should be used when a CDL is surrendered or not valid due to the lack of medical clearance.

COMPLIANCE WITH LICENSE ENDORSEMENTS

Format: 1 numeric

Element Values:

- 0 No Endorsements Required for the vehicle
- 1 Endorsement(s) Required, complied with
- 2 Endorsement(s) Required, not complied with
- 3 Endorsement(s) Required, compliance unknown
- 9 Unknown, if required

Remarks:

This element indicates whether the vehicle driven at the time of the accident requires endorsement(s) on a Commercial Driver's License (CDL) and whether this driver is complying with the CDL endorsements. These endorsements include: double/triple bottoms, passenger vehicles with 16 passengers, tank, hazardous materials, combined tank/hazardous materials, and others. This element is to be coded independently from CDL Status. The driver is not automatically failing to comply with a CDL endorsement by not having a valid CDL.

Code 0 (No Endorsements Required for the vehicle). This vehicle requires no special endorsement on a CDL or requires no CDL to operate.

Code 1 (Endorsement(s) Required, complied with). The Vehicle Requires a CDL and requires a particular endorsement or set of endorsements, and the driver has a CDL and is in compliance with the specific endorsements. (Note: The status of the CDL is not used in determining if the driver has complied with the endorsement.)

Code 2 (Endorsement(s) Required, not complied with). The Vehicle Requires a CDL and particular endorsement(s) on the CDL, but the driver does not have a CDL or does not have the particular endorsement(s) required for the vehicle driven. The driver may have some other endorsement(s). (Note: The status of the CDL is not used in determining if the driver has complied with the endorsement.)

Code 3 (Endorsement(s) Required, compliance unknown). The vehicle requires a CDL and particular endorsement(s) on the CDL, but it is not known whether the driver was in compliance with the particular endorsement(s) or it is not known whether the driver had a CDL.

Code 9 (Unknown, if required). It is unknown whether a driver is required to have an endorsement on a CDL to operate the accident vehicle. The driver may or may not have a CDL.

The following table provides guidance for coding this element for the type of license and vehicle driven in the accident:

| 9 | Unknown |

Source:

Official driver record and police report. Official driver records take precedence over police reported information.

Remarks:

This element refers to the type of license possessed or not possessed by the driver for the class of vehicle being driven at the time of the accident. This element is coded according to the driver's Non-CDL License Status when driving a vehicle not requiring a CDL and to the driver's Commercial Motor Vehicle License Status when driving a vehicle requiring a CDL.
--

Also see Remarks for D7 on military personnel.
--

<p>Code 0 (Not licensed) should be used only when it has been reasonably established that the driver is not registered (anywhere) and where D7 equals "0." Drivers who have a license but fail to have their license with them at the time of the accident should be coded according to the type of license they possess and the class of vehicle they were driving. Code "0" should not be used in this instance. If the police report indicates that the driver has "no license," the analyst must first determine whether this means the person was not in possession of his/her license at the time of the accident or that the driver is not a registered motor vehicle operator. A review of the violations cited section of the police report might yield some clues in this matter. If the person is cited for not possessing his/her license or for not having one, then code this information in variables D21 and D22 (Violations Charged and Related Factors-Driver Level). If the analyst is uncertain as to whether or not the person possesses a license, then code "9 – Unknown" should be used.</p>

Code 1 (No license required for this class vehicle) means that a license was not required for the vehicle being driven (e.g., mopeds in some states).

Code 2 (No valid license for this class vehicle) may be used for suspended, revoked, canceled or expired driving privileges. It also refers to drivers with a valid license but not for the class of vehicle driven at the time of the accident. As an example, the driver has an “operator’s license” when a “public passenger” type license is required. For this driver, “2” should be coded. Another common situation occurs when a separate license is required for a motorcycle. If the driver possesses a valid license for a passenger car but not for the motorcycle, then code “2” should be used if the driver was involved in this accident while driving a motorcycle.

A license (or a portion of the license applicable to the class vehicle driven) that is not in effect because of some action taken by the State, such as suspended, revoked, etc., is not to be coded as valid. Similarly, learner’s permits that are not used under the proper conditions (for example, a required licensed driver for the class of vehicle driven is not present to accompany the driver involved) are not to be coded as valid either.

Code “2” should be used for suspended, revoked, disqualified, canceled or expired CDL licenses when the vehicle requires a CDL (see table for Commercial Motor Vehicle License Status).

Code 3 (Valid license for this class vehicle) refers to the class of vehicle being driven. As an example, the driver has a “motorcycle” driver’s license only and was driving a motorcycle at the time of the accident; code “3” should be used. On the other hand, a driver might possess a multiple-class license allowing him or her to drive a passenger car as well as a motorcycle. If the vehicle being driven at the time of the accident is a passenger car, also code this element “3.” If the vehicle driver requires a CDL and the CDL status is valid, use code “3.”

Code 8 (Unknown if CDL and/or CDL endorsement required for the vehicle) should be used if it cannot be determined if the vehicle driven requires a CDL or CDL endorsement. There should be sufficient cause to suspect the need for a CDL or CDL endorsement to use this code, such as the vehicle’s size (26,000 lbs.), configuration (tractor/trailer, combinations, tankers, etc.), or possibly hauling hazardous cargo.

Code 9 (Unknown) should be used when the driver has a license but the type or validity are uncertain or if it is unknown whether the driver had a license or not (e.g., hit-and-run).

A cross-reference table for coding variables D7 and D10 follows. Consult this table only when the driver is operating a vehicle that does not require a CDL.

Cross Reference Table for D7 and D10

D7	D10	0	1	2	3	8	9
0		Y	Y	N	N	N	N
1		N	Y	Y	N	N	N

COMPLIANCE WITH LICENSE RESTRICTIONS

Format: 1 numeric

Element Values:

Blank	
0	No Restrictions or Not Applicable
1	Restrictions Complied With
2	Restrictions Not Complied With
3	Restrictions, Compliance Unknown
9	Unknown

Remarks:

Refers to both physical restrictions (corrective lenses, automatic transmission, etc.) and imposed restrictions (limited driving). Starting in 2004, it also refers to any limitations imposed on Learner's Permits and Intermediate Licenses in states with Graduated Driver Licensing (GDL) programs. (e.g., driving during prohibited periods [midnight to 5 AM]; driving without adult supervision, etc.). (See "Coding Scenarios for GDL Licensing Program" table on next page.)

Code all applicable restrictions regardless of license status.

Examples: If a Full Driver License is revoked or suspended but limited driving is permitted (e.g., to and from work), use the following criteria:

- a. If the accident occurs during permitted times of driving, code Non-CDL License Type as "1 – Full License" and Status "6 – Valid," code Compliance With License Restrictions as code "1 – Restrictions Complied With," and code Related Factors-Driver Level as "19."
- b. If the accident occurs during invalid times for driving, code Non-CDL License Type as "1 – Full License" and Status "1 – Suspended" or "2 – Revoked," code Compliance With License Restrictions as "2 – Restrictions Not Complied With," and do not use Related Factors-Driver Level code "19."

If due to a CDL, a driver has more than one license restriction, code compliance for the most appropriate restrictions for the vehicle being driven.

2-8	Actual Feet
9	Unknown
INCHES:	
Blanks	
00-11, 24-96	Actual Inches
98	Other
99	Unknown

Remarks:

Use the driver licensing files to code this element. The Coroner's Report may be used and may contain more current/accurate information.

Code the driver's height in feet and inches, if available. Inches less than 10 must be right-justified with a leading "0" (e.g., nine inches is coded "09"). If Height is only available in total inches, then code INCHES and code FEET as "0."

The tallest Height that can be recorded in total INCHES is 96 inches (8 ft). The tallest Height that can be recorded in FEET and INCHES is 8 ft. – 11 inches. If the driver is taller than 96 inches, then you must code Height as feet and inches. If the driver is taller than 8 ft. – 11 inches, then you must code the DRIVER HEIGHT as "Other" (0 FEET, 98 INCHES).

DRIVER HEIGHT less than "3 Feet" or greater than "7 Feet – 0 Inches" or less than "36 Inches" or greater than "0 Feet – 84 Inches" will raise an error flag.

Remarks:

Use the driver licensing files to code this element. The Coroner's Report may be used and may contain more current/accurate information.

Code the driver's weight in pounds, if available.

Weight should be right justified.

Weights less than 100 lbs. Must be coded with a leading "0" in the left-most position (e.g., 98 lbs. Is coded "098").

DRIVER LEVEL COUNTERS

PREVIOUS RECORDED ACCIDENTS*
PREVIOUS RECORDED SUSPENSIONS AND REVOCATIONS*
PREVIOUS DWI CONVICTIONS*
PREVIOUS SPEEDING CONVICTIONS*
PREVIOUS OTHER HARMFUL MOVING VIOLATIONS*

Format: 2 numeric each

Element Values:

Blanks	
00	None
01-97	Actual Value, but any value greater than 05 will be questioned (except for "Previous Recorded Suspensions and Revocations" when any value greater than 10 will be questioned).
98	Accidents not reported on Driving Record (valid only for Previous Recorded Accidents)
99	Unknown

Remarks:

Count only events occurring within three years from the accident date.

If a driver has been DISQUALIFIED for a CDL, record this event in PREVIOUS RECORDED SUSPENSIONS AND REVOCATIONS.

DO NOT include the current accident in any of the counters.

Remember there is a difference between a violation and a conviction. The violation is not counted in Previous DWI, Previous Speeding and Previous Other Harmful Moving Violation Convictions. These elements refer **ONLY TO CONVICTIONS**. Both convictions and violations appear on driver records in many states. Be careful that you code the conviction dates and **NOT** the violation dates.

DWI refers to both alcohol and drug convictions.

When you are responding to another state's request for driver data, do the following:

1. In the counters, record both in-state and out-of-state convictions, accidents, suspensions and revocations that appear on your state's record.
2. List out-of-state activity that is included in the counters in the area provided on the OUT-OF-STATE DRIVER DATA RESPONSE (see example on following page).

PREVIOUS OTHER HARMFUL MOVING VIOLATIONS CONVICTIONS includes all other motor vehicle convictions. Some examples of convictions include:

- running a red light,
- reckless driving,
- improper lane changing,
- failure to yield, etc.

* For Element _____, Values greater than _____ are unlikely and will raise an error flag:

<u>Element</u>	<u>Value</u>
PREVIOUS RECORDED ACCIDENTS	5
PREVIOUS RECORDED SUSPENSIONS AND REVOCATIONS	10
PREVIOUS DWI CONVICTIONS	5
PREVIOUS SPEEDING CONVICTIONS	5
PREVIOUS OTHER HARMFUL MOVING VIOLATIONS	5

19	Alcohol, drug or impairment violations generally

Speed-Related Offenses

21	Racing
22	Speeding (above the speed limit)
23	Speed greater than reasonable & prudent (not necessarily over the limit)
24	Exceeding special limit (e.g.: for trucks, buses, cycles, or on bridge, in school zone, etc.)
25	Energy speed (exceeding 55 mph, non-pointable)
26	Driving too slowly
29	Speed related violations, generally

Rules of the Road – Traffic Sign & Signals

- 31 Fail to stop for red signal
- 32 Fail to stop for flashing red
- 33 Violation of turn on red (fail to stop & yield, yield to pedestrians before turning)
- 34 Fail to obey flashing signal (yellow or red)
- 35 Fail to obey signal, generally
- 36 Violate RR grade crossing device/regulations
- 37 Fail to obey stop sign
- 38 Fail to obey yield sign
- 39 Fail to obey traffic control device

Rules of the Road – Turning, Yielding, Signaling

- 41 Turn in violation of traffic control (disobey signs, turn arrow or pavement markings; this is not a right-on-red violation)
- 42 Improper method & position of turn (too wide, wrong lane)
- 43 Fail to signal for turn or stop
- 45 Fail to yield to emergency vehicle
- 46 Fail to yield, generally
- 48 Enter intersection when space insufficient
- 49 Turn, yield, signaling violations, generally

Rules of the Road – Wrong Side, Passing & Following

- 51 Driving wrong way on one-way road
- 52 Driving on left, wrong side of road, generally
- 53 Improper, unsafe passing
- 54 Pass on right (drive off pavement to pass)
- 55 Pass stopped school bus
- 56 Fail to give way when overtaken
- 58 Following too closely
- 59 Wrong side, passing, following violations, generally

Rules of the Road – Lane Usage

- 61 Unsafe or prohibited lane change
- 62 Improper use of lane (enter of 3-lane road, HOV designated lane)
- 63 Certain traffic to use right lane (trucks, slow-moving, etc.)
- 66 Motorcycle lane violations (more than two per lane, riding between lanes, etc.)
- 67 Motorcyclist attached to another vehicle
- 69 Lane violations, generally

Non-Moving – License and Registration Violations

- 71 Driving while license withdrawn (including violation of provisions of work permit)
- 72 Other driver license violations
- 73 Commercial driver violations (log book, hours, permits carried)
- 74 Vehicle registration violations
- 75 Fail to carry insurance card
- 76 Driving uninsured vehicle
- 79 Non-moving violations, generally

Equipment

- 81 Lamp violations
- 82 Brake violations
- 83 Failure to require restraint use (by self or passengers)
- 84 Motorcycle equipment violations (helmet, special equipment)
- 85 Violation of hazardous cargo regulations
- 86 Size, weight, load violations
- 89 Equipment violations, generally

License, Registration & Other Violations

- 91 Parking
- 92 Theft, unauthorized use of motor vehicle
- 93 Driving where prohibited (sidewalk, limited access, off truck route)
- 98 Other moving violation (coasting, backing, opening door)
- 99 Unknown VIOLATION

Remarks:

This refers to those violations to the Vehicle Code charged as noted on the police accident report. Code up to three violations.

Coding Hierarchy

When more than three violations are cited, the three most serious violations should be coded; choosing the lowest number first. The hierarchy is as follows:

Codes “01-09” (Serious violations), “11-19,” (Impairment offense), “21 – Racing,” “55 – Pass Stopped School Bus,” and “71 – Driving While License Withdrawn.”

Beyond this hierarchy, choose violations which are not reflected in other elements, such as Related Factors.

If you are unable to distinguish between the violations within a specific category, use the General Code (i.e., “09, 19, 29, 39, 49, 59, 69, 79, 89”) for that category.

Consistency Checks:

	IF	THEN
(1H6F)	1. DRIVER PRESENCE equals 2, 4, 9,	VIOLATIONS CHARGED must be blank.
(6K0P)	2. VIOLATIONS CHARGED equals 71,	RELATED FACTORS-DRIVER LEVEL must not equal 19.
(7K0P)	3. VIOLATIONS CHARGED equals 71,	NON-CDL DRIVER LICENSE STATUS must equal 0, 1-2, or COMMERCIAL MOTOR VEHICLE LICENSE STATUS must equal 1-2, 5.
(8K0P)	4. VIOLATIONS CHARGED equals 07-08,	HIT-AND-RUN must not equal 0.
(D080)	5. VIOLATIONS CHARGED equals 01-98,	all RELATED FACTORS-DRIVER LEVEL should not equal 00, 99.
(D090)	6. VIOLATIONS CHARGED equals 11-19, and PERSON TYPE equals 01, 03,	POLICE-REPORTED ALCOHOL INVOLVEMENT should equal 1, or POLICE-REPORTED OTHER DRUG INVOLVEMENT should equal 1.
(D350)	7. VIOLATIONS CHARGED equals 71,	NON-CDL LICENSE STATUS should not equal 0, 3, 6, 9.
(D510)	8. VIOLATIONS CHARGED equals 07-08,	one RELATED FACTORS-VEHICLE LEVEL should equal 31.
(D520)	9. VIOLATIONS CHARGED equals 33, 41-42, 49,	VEHICLE MANEUVER should equal 10-14.
(D530)	10. VIOLATIONS CHARGED equals 36,	RELATION TO JUNCTION should equal 06.
(D540)	11. VIOLATIONS CHARGED equals 53-55, 59,	VEHICLE MANEUVER should equal 05.

	IF	THEN
(D550)	12. VIOLATIONS CHARGED equals 61, 69,	VEHICLE MANEUVER should equal 16.
(D560)	13. VIOLATIONS CHARGED equals 66,	BODY TYPE should equal 80-83, 88-89.
(D580)	14. VIOLATIONS CHARGED equals 85,	HMI should equal 2.
(D590)	15. VIOLATIONS CHARGED equals 91,	VEHICLE MANEUVER should equal 07.

Special Processing Rules:

	IF	THEN
(D500)	1. VIOLATIONS CHARGED equals 05,	at least one RELATED FACTORS-ACCIDENT LEVEL should equal 20.
(D570)	2. VIOLATIONS CHARGED equals 83,	not all occupants of this vehicle should have PROTECTION SYSTEM USE equal 01-05, 08.

RELATED FACTORS-DRIVER LEVEL

Format: 2 numeric, occurring 4 times

Element Values:

	Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes
00	Blanks None		
	<u>Physical/Mental Condition</u>		
01	Drowsy, Sleepy, Asleep Fatigued		Asleep at the wheel not due to other factors (i.e., drugs). Worked all night.
02	Ill, Passed Out/Blackout		Diabetic reactions, seizure, heart attack, high/low blood pressure, fainting.
03	Emotional (e.g., Depression, Angry, Disturbed)		Fighting, disagreements, depressed, and emotionally upset. See Driver Level- Related Factors code "08 – Aggressive Driving/Road Rage" when officer uses the terms "Aggressive Driving" or "Road Rage."
08	Aggressive Driving / Road Rage	Aggressive Driving	Officer must use the term "Aggressive" in describing this driver's behavior. Can be indicated in the report under related/contributing factors, violations charged or in the narrative. You may encounter the term "Road Rage" used to describe aggressive driving behavior. Be cautious with this term as the two terms are not technically interchangeable.
13	Mentally Challenged		Mental illness/retardation may be included.

Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes
04	Reaction to or Failure to Take Drugs/Medication	Allergic reaction to medication/drugs. Reaction to drug interaction (over the counter and/or prescribed). Failure to take required medication.
05	Under the Influence of Alcohol, Drugs or Medication	Driver Impaired, DUI, DWI (of alcohol or drugs). Suspected by police or a positive test result shows this person is under the influence of alcohol or drugs. Taking prescription and over-the-counter drugs.
06	Operating the Vehicle in Careless or Inattentive Manner	Careless Driving, Illegal use of earphones, television, etc. Includes use of car phone, fax, etc. Driver distracted by children. Driver lighting cigarette.
		Operating and adjusting radio and other accessories. Reading, talking, eating, using electric razor, applying cosmetics, painting nails, etc.
07	Restricted to Wheelchair	Operator of motor vehicle in wheelchair (motorized or non-motorized wheelchair).
09	Impaired Due to Previous Injury	Includes only person injured from previous accident at this scene. See code "11" on Related Factors-Driver Level and code "17" on Related Factors-Person Level. Code "19" on Related Factors-Accident Level should be used with this code.
11	Other Physical Impairment	Individuals missing a limb, an eye, legally blind, with hearing impairment/deaf. Also includes individuals with injuries resulting from a previous incident, not a previous accident (at this scene) that is then coded under "09." Paraplegic
12	Mother of Dead Fetus	Fetus dies in or as a result of this accident.

Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes	
15	<u>Miscellaneous Factors:</u> Seat Back Not In Normal Upright Position, Seat Back Reclined		
18	Traveling on Prohibited Trafficways	Driving on prohibited trafficway/roadway (example: mopeds on interstate). Trucks prohibited on this trafficway.	
19	Legally Driving on Suspended or Revoked License	Individual with suspended/revoked license allowed to drive only to and from work. License restricted/occupational license issued. Modification of conditions/restrictions.	
20	Leaving Vehicle Unattended with Engine Running. Leaving Vehicle Unattended in Roadway.	Parked double. Parked on bridge, tunnel. Parking within intersection.	“Unattended” signifies “driverless.”
21	Overloading or Improper Loading of Vehicle With Passengers or Cargo	Unsecured or uncovered load violation.	Having more than 3 passengers in the front seat. Trunk open with extra large cargo protruding. Sitting/standing on rails, tailgate of pickup or improperly sitting in bed of pickup. Overweight/over length/oversize. Passenger on exterior of vehicle (car surfing). Excludes: Violation of transportation of hazardous material.
22	Towing or Pushing Improperly	Push vehicle in dangerous manner.	Towing with improper connection (i.e., only a cable, etc.) Using vehicle to push another vehicle.

Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes	
23	Failure to Dim Lights or to Have Lights on When Required	Fail to use proper headlight beam. Fail to dim headlights for, approaching vehicle, when following another. Using fog lights when prohibited.	Headlamps adjusted improperly, causing glare. Failing to have headlights on in tunnels. Motorcycle not using lights as required.
24	Operating Without Required Equipment	Defective or no lamps, brakes, mirrors, muffler, flares, wipers, horn, snow tires, chains, etc.	Only to be used for failure to use restraints, child restraints or motorcycle helmets if officer makes an issue that it is a factor in this case. Not for PAR box marked "not used."
26	Following Improperly	Following fire truck too closely. Failure to maintain safe passing distance between trucks. Vehicles in caravan too closely to allow entry. Following too close, generally.	Following too closely for weather conditions. NOTE: Improper Lane Change signifies "in the process," while Following Improperly denotes "after or before the process of lane change."
27	Improper or Erratic Lane Changing	Unsafe lane change. Failure to obey "no lane change" sign.	Weaving in and out of traffic.
28	Failure to Keep in Proper Lane	Driving over centerline. Trucks and buses, slower vehicles to keep right.	Vehicle crosses centerline and strikes oncoming vehicle. Vehicle going straight in turn lane. See code "51" for Driving on Wrong Side of Road.
29	Illegal Driving on Road Shoulder, in Ditch, on Sidewalk or on Median		Driving off pavement or roadway. Physically driving on shoulder, etc.

Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes
30	Making Improper Entry To or Exit From Trafficway	Driving onto or from controlled access highway where prohibited. Entering highway from adjacent pasture, field. Entering highway on exit ramp, or exiting on entrance ramp, going the wrong way. NOTE: Don't confuse with code "51 – Driving on the Wrong Side of Road."
31	Starting or Backing Improperly	Unsafe start from parked position. Backing up on one-way. Starting onto highway from parked position on shoulder.
32	Opening Closure into Moving Traffic or While Vehicle is in Motion	Opening door into moving traffic. Opening trunk while vehicle is in motion.
33	Passing Where Prohibited by Posted Signs, Pavement Markings, Hill or Curve, or School Bus Displaying Warning Not to Pass Line	Overtaking streetcar on left or right. Overtaking vehicle stopped to allow pedestrian movement. Passing stopped school bus. Crossing over solid line to pass. Passing uphill; mainly violations as designated by traffic controls.
34	Passing on Wrong Side	Passing on right prohibited. Passing on right. Passing on right shoulder, emergency lane, or roadside.
35	Passing With Insufficient Distance, or Inadequate Visibility, or Failing to Yield to Overtaking Vehicle	Passing with insufficient sight distance. Mainly passing violations based on faulty judgment.
36	Operating the Vehicle in an Erratic, Reckless or Negligent Manner Operating at Erratic or Suddenly Changing Speeds	Driving to endanger, willful or wanton disregard. Reckless driving reduced from DUI. Must be explicitly stated on police record. Acceleration followed by sudden braking.

Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes
16	Police or Law Enforcement Officer	Federal, state or local law enforcement officer working at the time of the accident. Includes military and park police, border patrol and all other sworn law enforcement officers.
37	Police Pursuing This Driver or Police Officer in Pursuit	“Hot pursuit.” This officer in pursuit of motorists or this motorist being pursued by police.
38	Failure to Yield Right-of-Way	Primarily intersection-related. Care should be used to distinguish yield violations from lane violations.
39	Failure to Obey Actual Traffic Signs, Traffic Control Devices or Traffic Officers. Failure to Obey Safety Zone Traffic Laws.	Oftentimes incorrectly coded in conjunction with “38-Failure to Yield.” Care must be used to distinguish from “38.” When vehicle does not stop when required by traffic control, code “39.” When vehicle stops, but fails to yield, code as “38” (4-way stops). Violating yield sign, code as “38” and “39.” Passing around railroad gates.
40	Passing Through or Around Barrier	Denotes “demarcated” area.

Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes
41	Failure to Observe Warnings or Instructions on Vehicles Displaying Them	<p>Failure to follow construction instructions (i.e., arrows directing traffic mounted on vehicle), instructions on emergency vehicles (ambulances, fire trucks, police cars).</p> <p>Failure to observe right-turn warning on trucks, buses.</p> <p>Failure to heed hazard lights on disabled vehicle, school bus arm.</p>
42	Failure to Signal Intentions	<p>Failure to sound horn at curve on mountain road.</p> <p>Failure to signal upon stopping to turn.</p>
44	Driving Too Fast for Conditions or in Excess of Posted Maximum	<p>Speed greater than reasonable or prudent.</p> <p>Towing house trailer at more than 45 mph.</p> <p>Speed in excess of posted maximum.</p>
45	Driving Less Than Posted Minimum	Driving too slowly, so as to impede traffic.
46	Racing	<p>Two or more vehicles racing at high speeds or acceleration.</p> <p>Drag Racing</p>
47	Making Right Turn From Left-Turn Lane, Left Turn from Right-Turn Lane	To distinguish from “27 – Improper Lane Change” police officer must have knowledge of driver’s intention.
48	Making Other Improper Turn	<p>Too wide right or left turn.</p> <p>Unsafe U-turn (from shoulder, etc.).</p>

Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes
50	Driving Wrong Way on One-Way Traffic	To distinguish from "51 – Driving on Wrong Side of Road." On a divided highway, although each side is "one-way," driving against traffic should be coded as "51" not "50."
51	Driving on Wrong Side of Road (Intentional or Unintentional)	To distinguish from "28 – Failure to Keep in Proper Lane" when a vehicle loses control, crosses a divided highway, it is coded as "28," not "51."
52	Operator Inexperience	New drivers, new truck/bus driver; based on the judgment of the police officer. Unfamiliar with vehicle.
53	Unfamiliar with Roadway	Possibly out-of-state licenses. New stretch of road, based on the judgment of the police officer.
54	Stopped in Roadway (Vehicle Not Abandoned)	"54" signifies both in the process of stopping and "stopped" vehicles. Usually implies unusual condition. Excludes stopping in traffic or stopping for traffic control.
55	Underriding a Parked Truck	Police report must be explicit. See Underride/Override Element.
57	Locked Wheel	Occurs when braking too suddenly as noted by police officer. Can't be inferred just from skid marks.
58	Overcorrecting	Based on the judgment of the police officer, with knowledge of driver's intention. Oversteering

Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes
59	Getting Off/Out of or On/In to a Vehicle	Applies for either moving or non-moving vehicles. To distinguish from “32 – Opening Vehicle Closure into Moving Traffic.” “59” takes precedence, not to be coded in conjunction with “32.”
61	<u>Vision Obscured By:</u> Rain, Snow, Fog, Smoke, Sand, Dust	
62	Reflected Glare, Bright Sunlight, Headlights	
63	Curve, Hill, Or Other Design Features (including traffic signs, embankment)	
64	Building, Billboard, Other Structures	
65	Trees, Crops, Vegetation	
66	Motor Vehicle (including load)	Vision Obscured by: Car stopped on roadway. Tractor-trailer moving on road. School bus stopped, loading or unloading children.
67	Parked Vehicle	Vision Obscured by: Vehicle stopped on shoulder, in parking lane.
68	Splash or Spray of Passing Vehicle	
69	Inadequate Defrost or Defog System	

Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes
70	Inadequate Lighting System	Low or inadequate lighting system on this driver's vehicle. Not to be used for highway lighting.
71	Obstructing Angles on Vehicle	Obstructing angles on this driver's vehicle. Not to be confused with visual obstructions from other vehicles. (See codes "66" and "67.")
72	Mirrors	Vision Obscured by: Rear view mirrors Side mirrors Other mirrors
75	Broken or Improperly Cleaned Windshield	
76	Other Visual Obstruction	Vision Obscured by: Head Restraints Trailer (only) left parked. Window stickers, sun shades, ornaments, etc. Objects in vehicle. Windows/Windshield tinting.
77	<p>Skidding, Swerving, Sliding Due To:</p> Severe Crosswind	
78	Wind From Passing Truck	
79	Slippery or Loose Surface	Refers to actual condition of roadway surface, i.e., loose gravel roadway. Slippery or old worn blacktop. Newly paved surface.
80	Tire Blowout or Flat	

Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes
81	Debris or Objects in Road	Nails, glass, trash cans, tire retread, trash, dead animals, pile of sand, barricades, etc.
82	Ruts, Holes, Bumps in Road	
83	Live Animals in Road	
84	Vehicle in Road	Includes both contact and non-contact vehicles that remain at the scene.
85	Phantom Vehicle	Non-contact vehicle that leaves the scene as described by the police officer.
86	Pedestrian, Pedal Cyclist, or Other Non-Motorist	
87	Ice, Snow, Slush, Water, Sand, Dirt, Oil, Wet Leaves on Road	This is for the substances on roadway that causes roadway to be slick, which may interfere with traction. These are not part of the roadway design (see code "79").
88	Trailer Fishtailing or Swaying	Describes where a trailer fishtails or sways causing vehicle to weave in traffic or swerve. Includes trucks & cars pulling a trailer. This may or may not result in a jackknife.
73	<p align="center"><u>Special Circumstances</u></p> Driver Has Not Complied With Learner's Permit or Intermediate Driver License Restrictions (GDL Restrictions)	Learner's/Intermediate nighttime restrictions (e.g., midnight – 6 AM). Learner's/Intermediate unsupervised Driving restrictions. Learner's/Intermediate passenger restriction. Mandatory Seat Belt Use Restriction.

Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes
74 Driver Has Not Complied With Physical or Other Imposed Restrictions (not including GDL Restrictions)		Driving without corrective lenses when required. Driving without required equipment (e.g., automatic transmission, adaptive controls, etc.). Driving on a suspended/revoked license for other than permitted activities (e.g., driving permitted only to and from work). Driving vehicle without "Interlock System" when required.
89 Driver has a Driving Record or Driver's License from More Than One State		Any combination of a state license or record. Regardless of the status of the license or the driving privilege.
90 Hit-and-Run Vehicle Driver		
91 Non-Traffic Violation Charged (manslaughter, homicide, or other assault offense committed without malice)		Driver charged with intoxicated assault. Driver charged with vehicular manslaughter.
92 Other Non-Moving Traffic Violations		
93 <u>Devices in Vehicle With Potential for Distractions</u> Cellular Telephone Present In Vehicle		Includes hand-held and hands-free cellular telephones. See code "94" for cell phone in use at time of crash.

Related Factors	Driver Violations Cited or Noted by Police	Examples/Notes
94	Cellular Telephone In Use In Vehicle	Includes hand-held and hands-free cellular telephones.
95	Computer/Fax Machines/Printers	Laptop/notebook computers PDAs (Palm Devices) Fax Machines Printers
96	Onboard Navigation System	
97	Two-Way Radio	
98	Head-up Display	
99	Unknown	

Remarks:

Code information provided in the narrative by the investigating officer. It is the officer's assessment.

This is a nominal list only and does NOT imply a hierarchy.

NOTE: RELATED FACTORS-DRIVER LEVEL SHOULD BE CODED ONLY FOR "IN-TRANSPORT VEHICLES" (UNIT TYPE "1").

RELATED FACTORS FOR PARKED/STOPPED OFF ROADWAY/WORKING MOTOR VEHICLES AND MOTOR VEHICLES IN MOTION OFF THE TRAFFICWAY SHOULD BE CODED UNDER RELATED FACTORS-PERSON LEVEL (UNIT TYPES "2, 3 AND 4").

In a case involving Police Pursuit, Code “37” should be used when pursuit has been initiated by police and is active at the time of the accident (also see Related Factors-Accident Level, for use of Code “20 – Police Pursuit Involved”). It can be used for either the pursued driver or the pursuing police officer.

Definition of Police Pursuit: A pursuit is an event that is initiated when a law enforcement officer, operating an authorized emergency vehicle, gives notice to stop (either through the use of visual or audible emergency signals or a combination of emergency devices) to a motorist who the officer is attempting to apprehend, and that motorist fails to comply with the signal by either maintaining his/her speed, increasing speed, or taking other evasive action to elude the officer’s continued attempts to stop the motorist. A pursuit is terminated when the motorist stops, or when the attempt to apprehend is discontinued by the officer or at the direction of a competent authority.

Code 44 (Driving Too Fast for Conditions or in Excess of Posted Maximum) is also appropriate if the officer indicates a high-speed chase. Make sure to check if the officer indicated high speed or speeding.

Code 73 (Driver Has Not Complied With Learner’s Permit or Intermediate Driver License Restrictions[GDL Restrictions]) is used to indicate that a young driver was not in compliance with a Learner’s Permit or Intermediate Driver License restriction under a state’s Graduated Driver’s License (GDL) program. (See table for examples.) This should not be used for restrictions for eyeglasses, lenses, equipment or other physical restrictions (see code “74 – Driver Has Not Complied With Other Imposed Restrictions [not including GDL Restrictions]). Call Coding Assistance Program for coding guidance and see FARShelf for examples.

Code 98 (Head-up Display) present information (e.g., speed, turn signal telltales, engine diagnostics) to a driver that appears to be displayed outside the vehicle in front of the windshield. The image is reflected from the windshield into the driver’s field of vision. Projection of the image occurs upward through the top of the dash in the area behind the steering wheel. The projection system and optics are mostly below the dash. There may be a projection area visible on the top of the dash that is either raised from the surface or flush with the dash. The projection area would be covered with glass or clear plastic. The windshield may or may not have a special reflective coating on the projection image area to enhance the display image.

Codes “95-98” refer only to the presence of devices and do not imply they were in use. See Remarks for Related Factors-Accident Level (A39).

Remarks:

Code “00” for persons not in motor vehicles.

Code “01-99” for motor vehicle occupants (In-Transport, Parked/Stopped Off Roadway/Working Motor Vehicles and Motor Vehicles in Motion Outside the Trafficway). This is the number assigned to the vehicle this person occupied.

See VEHICLE NUMBER – VEHICLE LEVEL for assignment of numbers.

Consistency Checks:

		IF		THEN
(2X0F)	1.	VEHICLE NUMBER equals 00,		PERSON TYPE must not equal 01-03, 09.
(3X0F)	2.	VEHICLE NUMBER is greater than 00,		PERSON TYPE must not equal 04-08, 10 , 19.

Case Structure Integrity Rule:

		IF		THEN
(CS15)	1.	VEHICLE NUMBER at the Person Level is greater than 00,		VEHICLE NUMBER at the Person Level must equal a VEHICLE NUMBER at the Vehicle Level.

PERSON NUMBER

Format: 2 numeric

| Must be coded on an original submission.
| System Generated (MDE System Only)

Element Values:

| 01-99

Remarks:

| For each motor vehicle, occupants must be numbered consecutively beginning with "01." Drivers do not have to be coded "01." Numbers must not be skipped.

| Persons not in motor vehicles must be numbered consecutively beginning with "01." Numbers must not be skipped.

Case Structure Integrity Rules:

- | (CSI6) 1. For each VEHICLE NUMBER, PERSON NUMBERS must be consecutive, beginning with 01 and with no gaps.
- | (CSI7) 2. PERSON NUMBERS for persons not in motor vehicles must be consecutive, beginning with 01 and with no gaps.

NON-OCCUPANT STRIKING VEHICLE NUMBER

Format: 2 numeric

Element Values:

Blanks	
00	Not Applicable – Occupant of a Motor Vehicle In-Transport or Not In-Transport (Including Motor Vehicles Parked/Stopped Off Roadway/Working/In Motion Outside the Trafficway)
01-98	Assigned Vehicle Number
99	Unknown

Remarks:

This element indicates the vehicle that made contact with or was responsible for striking a person not in a motor vehicle. This includes occupants of non-motor vehicle transport devices - Person Type code "04" (persons riding in an animal-drawn conveyance, on an animal, injured occupants of railway trains, etc.). This element only applies to those non-motorists who are not occupants of a motor vehicle.

The number must match the vehicle number of the striking vehicle.

In cases where more than one vehicle makes contact with a non-occupant, code the number of the vehicle that caused the most significant injury. If uncertain, code the number of the vehicle that made contact first.

Code 99 (Unknown) is used when the Analyst cannot determine which vehicle made contact. For example, the police officer arrives at the scene and observes a pedestrian and two vehicles all at rest. There are no survivors; therefore, there is no way of knowing which vehicle ran over the pedestrian.

Consistency Checks:

	IF	THEN

PERSON TYPE

Format: 2 numeric

| Must be coded on original submissions

Element Values:

MOTORISTS

- 01 Driver of a Motor Vehicle In-Transport
- 02 Passenger of a Motor Vehicle In-Transport
- 09 Unknown Occupant Type in a Motor Vehicle In-Transport

NON-MOTORISTS

- 03 Occupant of a Motor Vehicle Not In-Transport
- 04 Occupant of a Non-Motor Vehicle Transport Device

Non-Occupants

- 05 Pedestrian
- 06 Bicyclist
- 07 Other Cyclist
- 08 *Persons on Personal Conveyances*
- 10 *Persons In/On Buildings*

- 19 Unknown Type of Non-Motorist

Remarks:

An involved person in an accident must maintain Person Type during the accident. Once the unstabilized situation begins, a driver, passenger or non-motorist/non-occupant cannot change Person Type until the accident stabilizes.

If a person is entering or exiting a vehicle before the unstabilized situation begins, try to determine if the person has successfully changed type before control is lost. (i.e., a pedestrian getting into an automobile that begins to move, a passenger stepping off of a bus as it begins to pull away, etc.).

Codes 01, 02 and 09 are used for occupants of a motor vehicle in-transport. Code “09 – Unknown Occupant Type in a Motor Vehicle In-Transport” is used when it cannot be determined if the person was the driver or passenger, but it is known that the person was an occupant of a motor vehicle in-transport.

Code 03 (Occupant of a Motor Vehicle Not In-Transport) is used for occupants of parked/stopped off roadway/working motor vehicles and occupants of motor vehicles in motion outside the trafficway boundaries.

Prior to 2005, occupants of working motor vehicles (working highway maintenance vehicles, cherry pickers, etc.) were coded “08.” At that time, code “08” was labeled “Other Pedestrians.”

Code 04 (Occupant of a Non-Motor Vehicle Transport Device) refers to persons riding in an animal-drawn conveyance, on an animal, or injured occupants of railway trains, etc.

Code 05 (Pedestrian) is used for all pedestrians except for those in/on personal conveyances (See code “08” below) and in buildings. A pedestrian pushing a vehicle should be coded “05.”

Code 06 (Bicyclist) is used for a two-wheel, non-motorized cycle. Includes all persons (operator and passengers) on a bicycle.

Code 07 (Other Cyclist) is used for unicycles and tricycles.

Code 08 (Persons on Personal Conveyances): This code should be used for pedestrians using personal conveyances.

A personal conveyance is a device, other than a transport device, used by a pedestrian for personal mobility assistance or recreation. These devices can be motorized or human powered, but not propelled by pedaling.

Inclusions:

- 1) *Rideable toys*
 - *Roller Skates, In-Line skates*
 - *Skateboards*
 - *Skates*
 - *Baby carriage*
 - *Scooters*
 - *Toy Wagons*
- 2) *Motorized rideable toys*
 - *Motorized skateboard*
 - *Motorized toy car*
- 3) *Devices for personal mobility assistance*
 - *Segway-style devices*
 - *Motorized and non-motorized wheelchairs*
 - *Handicapped scooters*

Exclusions:

- *Golf cart*
- *Low Speed Vehicles (LSVs)*
- *Go-carts*

- *Minibike*
- *“Pocket” motorcycles*
- *Motor scooters*
- *Moped*

Prior to 2005, code “08” was labeled “Other Pedestrians” and also included occupants of motor vehicles used as equipment (working highway maintenance vehicles, cherry pickers, etc.). For occupants of working motor vehicles, see code “03.”

Prior to 2007, code “08” included persons in buildings. For persons in buildings, see code “10 – Persons In/On Buildings.”

Wheelchair: FARS will use the term, “wheelchair” as follows:

“Wheelchair - A mobility aid, usable indoors, and designed for and used by individuals with mobility impairments, whether operated manually or powered.”

Therefore all wheelchair users, motorized or not, are coded “08.” Use Related Factors-Person Level code “13” to further identify motorized wheelchair riders.

RATIONALE:

Some states have passed legislation to classify operators of motorized wheelchairs as “pedestrians” and others as “motor vehicles.”

Also, there seems to be an increase in the variety of forms these devices take (if not in the actual number in use). Some resemble 3-wheeled scooters; others small four-wheel carts; still others look like the typical human-powered wheelchair. They are in use by individuals who are unable to walk, who have limited walking ability, or who need to avoid walking for reasons of health or stamina. Since these devices simply supply a form of assisted “walking” for such persons, their legitimate users may be seen as “other persons on personal conveyances” just as other non-motorists moving along a sidewalk, walking with or against traffic on the edge of a road, crossing the roadway, or turning into a driveway.

Code 10 (Persons In/On Buildings) is used for a person inside of or on a building who is struck by a motor vehicle. Code “10” takes precedence over codes “05-08.”

Code 19 (Unknown Type of Non-Motorist) is used only when it cannot be determined which code is applicable for persons not in motor vehicles (i.e., Person Type codes “04-10”).

* For van-based buses, use the actual seating position if known, or use code "51" for the 2nd, 3rd & 4th rows, if actual seating position is not known.

Remarks:

“Seating Position” is applicable to all persons in motor vehicles (in-transport, parked/stopped off roadway/working motor vehicles and motor vehicles in motion outside the trafficway boundaries).

Prior to 2005, Seating Position was only applicable to motor vehicles “In-Transport.”

Code 00 (Not a Motor Vehicle Occupant) is used for all persons not in motor vehicles (Person Type codes “04, 05, 06, 07, 08 and 19”).

Prior to 2005, this code included occupants of motor vehicles “Not In-Transport.”

Coding of Seating Positions for Bus Occupants

Full-Size Buses

Do not submit Person Level forms for uninjured passengers of full-size buses (Body Types 50-52, 58-59). Submit Person Level forms for injured bus passengers in full-size buses and always use code “51” for their seating position.

Van-Based Buses

Before 2003, the policy was not to submit a Person Level form for uninjured occupants of van-based buses. This policy has changed beginning in 2003. Always submit a Person Level form for all occupants of van-based vehicles, including van-based buses. For front-seat passengers in van-based vehicles, always code their actual seating position. For van-based bus passengers not in the front seating positions, use the actual seating position if known, or use code “51” for the 2nd, 3rd and 4th rows, if actual seating position is not known.

Other Guidance

Use code “51” for passengers in the 5th row seats of a 15-seat, 5-row van.

Use codes “51-53” for occupants in the back of trucks including the cargo area.

More than one person may have the same seating position; e.g., child on mother’s lap.

For motorcycles, code the driver “11,” sidecar passenger “12,” passenger behind driver “21,” and passenger on lap of driver (in front of) “11.”

In coupes and other cars designed for only two passengers in front or in back, use codes “11, 13, 21 or 23” when coding occupants.

The codes for ‘other’ seats (i.e., “18, 28, 38 and 48”) are used for persons lying across the seat, for those occasions where there are two or more people sitting in the middle, etc.

Use code "55" for persons on the exterior who are set-in-motion by the vehicle; e.g., skateboard riders who are in motion by holding on to the vehicle, etc.

PROTECTION SYSTEM USE

Format: 2 numeric

Element Values:

- Blanks
- 00 None Used/Not Applicable – Not a Motor Vehicle Occupant
- 01 Shoulder Belt
- 02 Lap Belt
- 03 Lap and Shoulder Belt
- 04 Child Safety Seat
- 05 Motorcycle Helmet
- 06 Bicycle Helmet
- 13 Safety Belt Used Improperly
- 14 Child Safety Seat Used Improperly
- 15 Helmets Used Improperly
- 08 Restraint Used - Type Unknown
- 99 Unknown

Remarks:

Prior to 2007, this element was called “**Restraint**” System Use.

Code **Protection System Usage** for all persons in FARS under this element. Code this element regardless of whether the vehicle is equipped with manual systems, automatic belts or harnesses, air bags, or any combination of these. We will determine whether the restraint was manual or automatic via the VIN. Even if the VIN is unknown, use this rule.

Example:

You are coding a driver in vehicle that is indicated by the PAR to have an automatic shoulder harness and a manual belt. The police state that the shoulder harness was used at the time of the crash, but the lap belt was not, and there was no mention of air bag deployment or non-deployment. Code the following:

- P10 01 – Shoulder Belt
- P11 **29/99 – Unknown *if Deployed/Unknown if Available***

Code 00 (None Used/Not Applicable – Not a Motor Vehicle Occupant) is used if the person did not use an available restraint, there was not a restraint available in the vehicle, and for persons not in motor vehicles (except bicyclists and pedal cyclists using helmets).

Code 01 (Shoulder Belt). If consistency check “U170” is raised, we suggest you check PCVINA. If it confirms “Automatic,” you’re okay. If it indicates “Manual,” question or review your sources to verify. If you can’t find any other definitive information, use

code “08 – Restraint Used - Type Unknown.”

Code 04 (Child Safety Seat). There are several types of recognized child restraints. Small, lightweight “infant-only” safety seats are designed for rear-facing only. Larger “convertible” safety seats are used facing rear, but may be turned around to face front when the baby grows large enough. A less familiar restraint is the safety vest, *which has a harness used forward facing which has no shell/base surrounding the child.*

Code 4 includes approved car booster seats (for older/larger children) *that* come in two basic types. Boosters with shields for use with a vehicle’s lap belt only. Boosters without shields are for use only with a vehicle lap and shoulder belt. These are called “belt positioning boosters” because they position the child to fit the car’s belts better. There is also a variation available; a booster with a removable shield. The shield should be used or not used depending on what belt system is available in the intended seat position.

Code 05 (Motorcycle Helmet) is used only for all types of motorized cycles and snowmobiles (motorcycles, mopeds, mini-bikes, motor scooters and ATVs).

Code 06 (Bicycle Helmet) is used for bicycle, other pedal cycle riders and when indicated, for persons on personal conveyances. Code 06 is not used for motorcycle riders.

The coding scheme on some PARs may offer a choice, such as “seatbelt/harness” or “lap/shoulder” but does not distinguish between “lap belt only,” “shoulder belt only,” or “combination lap and shoulder belt.” If your PAR has such a coding scheme and the officer checks e.g., “seat belt/harness,” then the FARS code should be “08 – Restraint Used, Type Unknown” unless the narrative clarifies which type of restraint was used.

Guidelines For Coding Improper Protection System Use:		Type of Restraint Vehicle Equipped With	Proper Coding Of Protection System Use (P10)
Description of Use			
a. More than one person restrained in one device		01, 02 or 03	13
b. Shoulder belt cut, altered or placed behind occupant’s back, while lap belt portion secured		01, 02, 03	02
c. Shoulder belt only placed behind occupant’s back		01	00
d. Lap belt only buckled underneath person		02	00
e. Child safety seat not secured properly (Child secured in seat)		04	14
f. Child not properly secured in existing child safety seat		04	14
g. Seat other than a child safety seat used; NOT secured with belt		01, 02, 03	00
h. Seat other than a child safety seat used; secured with belt		01, 02, 03	13
i. Shoulder, lap, or lap & shoulder used to secure child requiring child safety seat		01, 02, 03	01, 02, 03
j. <i>Unapproved motorcycle or bicycle helmet; improper use of an approved motorcycle or bicycle helmet.</i>		05, 06	15

Guidelines When Police and EMS/M.E. Differ:

Occasionally, information from EMS personnel or medical examiners (M.E.) includes statements about *protection*/restraint use or presence. If these people were in a position to have information when the investigating officer(s) could not (e.g., EMS arrived and removed victims from vehicles before police arrived or the medical examiner reports definite indications of belt usage), then the EMS/M.E. assessment may override the PAR assessment of *Protection* System Use. **Make sure to note the arrival times of Police and EMS before making a decision.**

Rules of thumb are as follows, unless you have information to the contrary:

If the M.E./EMS report that a restraint was used but the PAR/Police report “NOT USED” or “UNKNOWN,” then accept the EMS/M.E. assessment. On the other hand, if the M.E./EMS report “NOT USED” but the PAR/Police report that a restraint was used, then try to verify the police assessment that a restraint was used. If the PAR/Police report that a restraint was used or was not used but the M.E./EMS report “UNKNOWN,” then accept the Police assessment.

AIR BAG AVAILABILITY/DEPLOYMENT

Format: 2 numeric

Element Values:

- Blanks
- 00 Not Applicable – Not a Motor Vehicle Occupant

DEPLOYED (For This Seat)

- 01 From the FRONT (*steering wheel, dashboard*)
- 02 From the SIDE (*door, seat, canopy*)
- 07 From OTHER Direction (*knee, airbelt, etc.*)
- 08 From MULTIPLE Directions
- 09 From UNKNOWN Direction

NOT DEPLOYED (For This Seat)

- 20 Air bag Available – NO DEPLOYMENT
- 28 Air bag Available – SWITCHED OFF

UNKNOWN IF DEPLOYED

- 29 Air bag Available – UNKNOWN IF DEPLOYED

NOT AVAILABLE

- 30 NOT AVAILABLE (This Seat)
- 31 PREVIOUSLY DEPLOYED/NOT REPLACED
- 32 DISABLED/REMOVED

- 99 UNKNOWN if Air bag Available (For This Seat)

Remarks:

This element is used to record air bag availability and deployment for this person. Code this element according to this person’s Seating Position, regardless of the motor vehicle’s Body Type or the age of the motor vehicle.

Code 00 (Not Applicable – Not a Motor Vehicle Occupant) should be used for any person who is not an occupant of a motor vehicle.

Codes 01-09 are used only if you have indication in the PAR or from EMS that an air bag deployed for this occupant's seat position (not for others in the vehicle.) There may be multiple air bags available for this occupant's seat position. For simplicity, these are grouped into FRONT ("01"), SIDE ("02") and OTHER ("07") air bags.

Codes "01", "02" or "07" is used if you have any information indicating that at least one air bag deployed for this person from only one of these directions.

Code "08" is used if your information indicates that air bags deployed from more than one direction (e.g., SIDE and FRONT) for this seat position.

Code "09" is used if an air bag did deploy for this person, but you have no information on the direction from which the bag deployed.

Code 20 (Air bag Available – NO DEPLOYMENT) is used only if (the police or EMS note that) the vehicle is equipped with an air bag (air bags) for this occupant's position, but it (they) did not deploy in this accident.

Code 28 (Air bag Available – SWITCHED OFF) is used when the police or EMS state that the air bag for this occupant's position was switched off and did not deploy.

Code 29 (Air bag Available – UNKNOWN IF DEPLOYED) is used if your information indicates that an air bag (air bags) is (are) available for this occupant's position, but you have no information on whether it deployed or not.

Code 30 (NOT AVAILABLE [This Seat]) is used for all seating positions that are not equipped with an air bag(s). Also use this code for every seating position in vehicles that do not come equipped with air bags in any position (e.g., motorcycles, early-model passenger cars, etc.)

Code 31 (PREVIOUSLY DEPLOYED/NOT REPLACED) is used when information indicates that the air bag(s) for this occupant's position was not available in this accident because it had deployed in an earlier incident and was never replaced.

Code 32 (DISABLED/REMOVED) is used when information indicates that the air bag for this occupant was unavailable because it had been stolen, tampered with so that it did not operate properly, or was otherwise disabled; except by use of a cut-off switch.

Code 99 (UNKNOWN if Air bag Available [For This Seat]) is used if it is not known whether an air bag exists for this occupant's seating position.

Consistency Checks:

	IF	THEN
	(2S0P) 1. PROTECTION SYSTEM USE equals 05,	AIR BAG AVAILABILITY/ DEPLOYMENT must equal 30.
	(2T0P) 2. PROTECTION SYSTEM USE equals 06,	AIR BAG AVAILABILITY/ DEPLOYMENT must equal 00.
	(2U0P) 3. BODY TYPE equals 80-83, 88-91,	AIR BAG AVAILABILITY/ DEPLOYMENT must equal 30.

	(V320) 10. BODY TYPE equals 50-52, 58-66, 71-79,	AIR BAG AVAILABILITY/ DEPLOYMENT should equal 30.

EJECTION

Format: 1 numeric

Element Values:

	Blank
	0 <i>Not Ejected</i>
	1 Totally Ejected
	2 Partially Ejected
	8 <i>Not Applicable</i>
	9 Unknown

Remarks:

- 

If no information is provided in the accident reports, assume that *the person was not ejected. Use code “0 – Not Ejected.”*

Ejection refers to persons being completely thrown from a compartment of a motor vehicle (including the bed of pickup trucks) during the course of the crash. This includes occupants of Jeeps, Go Carts, Snowmobiles, and three- or four-wheel ATVs. It also includes persons ejected from motor vehicles parked/stopped off roadway/working or motor vehicles in motion outside the trafficway boundaries.
- 

Code 8 (Not Applicable) Ejection is not applicable to persons riding on the exterior of a vehicle, to motorcycle occupants, or to persons not in motor vehicles. Exterior of vehicle includes running boards, roof, fenders and bumpers, but not the bed of pickup trucks.

Consistency Checks:

		IF	THEN
	(2P0F) 1.	PERSON TYPE equals 04-08, 10, 19,	EJECTION must equal 8.
	(3S0P) 2.	SEATING POSITION equals 55,	EJECTION must equal 8.
	(4S0P) 3.	BODY TYPE equals 80-83, 88-89,	EJECTION must equal 8.

- 6 Through Roof Opening (sun-roof, convertible top down)
- 7 Through Roof (convertible top up)
- 8 Other Path (e.g., back of pick-up truck)
- 9 Unknown/Unknown Path

Remarks:

If no information is provided in the accident reports, assume that EJECTION is not applicable. Use the following table as a guideline:

Ejection Path Guidelines

Path	Guideline
1. Through side door opening	all side doors
2. Through side window	all side windows, bus side windows
3. Through windshield	front windshield only
4. Through back window	standard rear window, back window of bronco, van
5. Through back door/tailgate opening	station wagon tailgate, back door of truck, back door of bronco, van
6. Through roof opening	(sun-roof, convertible top down) t-top, targa top
7. Through roof	(convertible top up)
8. Other path	(back of pick-up truck) torn-off roof, car cut in half
9. Unknown/Unknown Path	driver's side, unspecified; passenger's side unspecified.

Consistency Checks:

	(BE0P) 4. BODY TYPE equals 80-83, 88-89,	EJECTION PATH must equal 0.
	(BF0F) 5. PERSON TYPE equals 04-08, 10 , 19,	EJECTION PATH must equal 0.

EXTRICATION

Format: 1 numeric

Element Values:

- Blank
- 0 Not Extricated or Not Applicable
- 1 Extricated
- 9 Unknown

Remarks:

If no information is provided in the accident reports, assume that EXTRICATION is not applicable.

Extrication refers to the use of equipment or other force to remove persons from the vehicles; i.e., more than just lifting or carrying person out of wreckage. If the police officer uses the word “extricated” to indicate occupant removal, then this is sufficient information to use code “1,” even if no mention of equipment is made. The only exception to this is if the analyst knows the officer used the term “extrication” incorrectly. However, if the officer uses the term “pinned” or “wedged” or something similar, then the officer must indicate that equipment was used to remove the occupant.

Code 9 (Unknown) is to be used when the officer states that the occupant is “pinned” or “wedged,” etc., and suggests that the occupant may have been removed with force, but does not make it clear whether equipment was used or not.

This field is not applicable to motorcycle riders or to non-motorists.

Consistency Checks:

	IF	THEN
	(5S0P) 1. BODY TYPE equals 80-83, 88-89,	EXTRICATION must equal 0.
	(6S0P) 2. EJECTION equals 1,	EXTRICATION must not equal 1, 9.
	(9P0F) 3. PERSON TYPE equals 04-08, 10, 19,	EXTRICATION must not equal 1, 9.

- 14 Non-Intersection – In Parking Lane*
- 15 Non-Intersection – On Road Shoulder
- 16 Non-Intersection – Bike Path*
- 17 Non-Intersection – Outside Trafficway
- 18 Non-Intersection – Other, Not on Roadway
- 19 Non-Intersection – Unknown
- 99 Unknown

Remarks:

*** These values are unlikely occurrences and will raise an error flag.**

This field is only applicable for persons not in motor vehicles (i.e., pedal cyclists, pedestrians, persons on personal conveyances, etc.) and refers to the location of these persons at the time of the accident.

Code 00 is used for injured Railway Train Occupants, Occupants of Motor Vehicles In-Transport or Occupants of Motor Vehicles Not In-Transport (Including Motor Vehicles Parked/Stopped Off Roadway/Working/In Motion Outside the Trafficway).

Codes 01 - 09 are used when the person is in the vicinity of the intersection.

Codes 01, 02 can only be used when you know that a crosswalk exists at the intersection.

Code 03 (Intersection – On Roadway, Crosswalk not Available) is used when a crosswalk does not exist at this intersection. (Remember, we begin with the assumption a crosswalk may exist at an intersection location.)

Codes 04 (Intersection – On Roadway, Crosswalk Availability Unknown) is used when you know that the person is at the intersection AND on the roadway but you are NOT sure whether or not a crosswalk is available for them to use.

Code 05 (Intersection – Not on Roadway) is used when you know the person is at the intersection and NOT on the roadway. For example, if the non-motorist is on the sidewalk, median, island, etc.

Code 09 (Intersection – Unknown) is used when all you know is the person is at the intersection. You don't know whether: there is a crosswalk, they were on the sidewalk, they were on the roadway or not, etc.

Codes 10 - 19 are used when you know the person was NOT at an intersection.

Use codes 10 & 11 when you know that a crosswalk exists at the non-intersection; for example, a mid-block crosswalk.

Use code 12 when we have no information about a mid-block crosswalk. (This assumes that a crosswalk will most likely not exist in a mid-block area, unless otherwise noted.)

Use code 13 when there is some information (possibly conflicting) that leads you to believe that there may be a mid-block crosswalk at this intersection.

Use code 17 when the person is outside the trafficway boundaries. For example, a person struck inside a building or on a private driveway.

Use code 18 when the person is within the trafficway boundaries but NOT at an intersection and NOT on the roadway. For example, when the person is on the sidewalk, median, island, roadside, etc., this code should be used.

Use code 19 when all you know is that the person is NOT at an intersection. You don't know whether: there is a crosswalk, they were on the sidewalk, they were on the roadway or not, etc.

Code 99 (Unknown) is used when you don't even know whether the person was at an intersection or not.

POLICE-REPORTED ALCOHOL INVOLVEMENT
--

Format: 1 numeric

Element Values:

Blank	
0	No (Alcohol Not Involved)
1	Yes (Alcohol Involved)
8	Not Reported
9	Unknown (Police Reported)

Remarks:

Only use the police accident report to code these elements. This element will be coded independently from P18-ALCOHOL TEST TYPE/RESULTS.

Important Guidelines:

- Indicates only the police officer's judgment as to whether alcohol was involved or not in the accident. Do not change the coding of this element because a positive alcohol test is obtained from the coroner, medical examiner or state toxicology lab.
- A positive or negative BAC test submitted from the toxicology lab or coroner directly to the FARS analyst is not evidence of the officer's judgment.
- The police accident report "PAR" including a supplemental report or direct contact with the investigating officer are the only valid sources.
- Police officers may leave key data fields on the PAR blank or record "unknown" for alcohol involvement. Use code "8 – Not Reported" if the police officer makes no mention of alcohol involvement in either narrative or data fields.
- Use code "9 – Unknown (Police Reported)" if the police officer indicates in either narrative or data fields that alcohol involvement is "unknown."

Code 1 (Yes [Alcohol Involved]) is used only if the police accident report explicitly states or implies that alcohol was present.

If the police officer indicates that a pre-arrest breath test was given and a "positive" indication was received, code P16 as "1." Anytime an officer's judgment contradicts a pre-arrest test, the officer's judgment will be the determining factor.

Code 0 (No [Alcohol Not Involved]) vs. Code 8 (Not Reported):

The officer may give sufficient information in the police report fields (such as contributing circumstances, driver/pedestrian condition, alcohol presence or use, alcohol test, etc.) or narrative to indicate that he believes alcohol is not involved without

specifically mentioning “no” alcohol. In such cases, use code “0 – No (Alcohol Not Involved).”

Use code “8 – Not Reported” if the police officer makes no mention of alcohol involvement in either narrative or data fields.

If there is any question that the officer’s position on alcohol involvement is “no alcohol” because he is silent on the issue, then it is best to use code “8 – Not Reported.”

Code 8 (Not Reported): There are instances when the police do not indicate in the PAR whether alcohol was involved or not, but they do mention that a test was given or ordered. Use code “8” for these instances.

FOR EXAMPLE: The police may only say that an evidential test was ordered for a driver without indicating that they suspected alcohol or what the result was. The use of passive alcohol sensors (PAS) may also be mentioned as used by the police, without mention of the result.

Code 9 (Unknown [Police Reported]) is used only if the police officer states that he does not know whether alcohol was involved for this person.

When Police-Reported Alcohol Involvement (P16) is coded “8 – Not Reported” or “9 – Unknown (Police Reported),” Method of Alcohol Determination (P17) codes “1-8” are allowed. However, this should only happen when the method is stated by the police, but the involvement is not mentioned at all or stated as unknown.

Consistency Checks:

	IF	THEN
(8S0P) 1.	METHOD OF ALCOHOL DETERMINATION equals 9,	POLICE-REPORTED ALCOHOL INVOLVEMENT must equal 0-1, 8-9.
(D090) 2.	VIOLATIONS CHARGED equals 11-19, and PERSON TYPE equals 01, 03,	POLICE-REPORTED ALCOHOL INVOLVEMENT should equal 1, or POLICE-REPORTED OTHER DRUG INVOLVEMENT should equal 1.
(P070) 3.	POLICE-REPORTED ALCOHOL INVOLVEMENT equals 1, and PERSON TYPE equals 01, 03-19,	ALCOHOL TEST RESULT should not equal 95-96.

	IF	THEN
(P072)	4. PERSON TYPE equals 02-03, and INJURY SEVERITY equals 0, and ALCOHOL TEST RESULT equals 96,	POLICE-REPORTED ALCOHOL INVOLVEMENT should equal 0, 8.
(P110)	5. METHOD OF ALCOHOL DETERMINATION equals 1-5, 8,	POLICE-REPORTED ALCOHOL INVOLVEMENT should equal 0-1.
(P200)	6. POLICE-REPORTED ALCOHOL INVOLVEMENT equals 8-9,	METHOD OF ALCOHOL DETERMINATION should equal 9.
(P300)	7. POLICE-REPORTED ALCOHOL INVOLVEMENT equals 1, and INJURY SEVERITY equals 4,	ALCOHOL TEST RESULTS should not equal 95-96.

METHOD OF ALCOHOL DETERMINATION

(BY POLICE)

Format: 1 numeric

Element Values:

- Blank
- 1 Evidential Test (breath, blood, urine)
- 2 Preliminary Breath Test (PBT)
- 3 Behavioral
- 4 Passive Alcohol Sensor (PAS)
- 5 Observed
- 8 Other (e.g., Saliva test)
- 9 Not Reported

Remarks:

This variable is coded for each person involved in the accident. The Police Accident Report (PAR) and supplements are the source of information.

The purpose of this variable is to record the method by which the police made the determination as to whether alcohol was involved or not.

It is used primarily when the Police-Reported Alcohol Involvement variable (P16) is coded as “0 – No (Alcohol Not Involved)” or “1 – Yes (Alcohol Involved).”

Whenever P16 is coded “0 – No (Alcohol Not Involved),” try to find out how the police knew this. When P16 is coded “1-Yes (Alcohol Involved),” try to determine how the police knew this.

If P16 is coded as “8 – Not Reported” or “9 – Unknown (Police Reported),” then P17 is coded as “9 – Not Reported.” If more than one method is used by the police to determine alcohol involvement choose the method the police refer to when they record their assessment. If more than one method is used and they do not state which method was the basis for their alcohol determination, code the highest-ranking method used from the hierarchy (the highest ranking is “1”; the lowest is “5”).

Code 1 (Evidential Test [breath, blood, urine])

This is coded if P16 is coded “0” or “1” and the police indicate that they ordered an evidential test and their determination of alcohol involvement was based on the results of that test.

An evidential test can be a breath test on a state-approved breath test device, a blood test, or a urine test. No other tests are considered evidential.

The key in coding evidential test as the basis for the police alcohol assessment is the ordering of the test by the police. A routine test performed by a coroner or medical examiner that was not ordered by the police is not considered as evidential for the purposes of the variable.

Code 2 (Preliminary Breath Test [PBT])

This is coded if P16 is “0” or “1” and the police indicate that alcohol involvement was based upon the results of a preliminary breath test, or PBT. Preliminary breath testing devices are not yet considered evidential tests, but merely as tools for the police to help them determine whether alcohol is present or not. Many PBTs only indicate whether alcohol is present in the breath by pass (green) or fail (red) lights. Other PBTs indicate the approximate BAC in numbers. Some PBTs are of evidential quality in some States. But if the device was used only as a preliminary test and not the evidential test, then this value should be coded.

The key to coding this is the definite indication **by the police** that a PBT **was used** and was the basis (or the clinching evidence) that a driver had been drinking or not.

Code 3 (Behavioral)

This is coded if P16 is “0” or “1” and the police indicate that the basis for that alcohol assessment was the behavior by the driver during a field sobriety test.

Examples of field sobriety tests include the gaze nystagmus test, walking in a straight line, one leg stand, etc.

Do not confuse “3 – Behavioral” with “5 – Observed.”

Code 4 (Passive Alcohol Sensor [PAS])

This is coded if P16 is “0” or “1” and the police indicate that alcohol involvement was based upon the results of a passive alcohol sensor, or “sniffer.”

The PAS devices available and in use by police are devices that look like flashlights and when held within 6 inches of the driver’s mouth will detect alcohol in the breath while the driver is talking. The PAS is not considered an evidential test nor a PBT. It is not really a test, but a detector or an extension of the police officer’s senses. The PAS devices are usually PASS/FAIL indicators with a red light indicating alcohol on the breath.

The key to coding this attribute is the indication by the police that a PAS was used and was the basis for coding “0 – No” or “1 –Yes” for Police-Reported Alcohol Involvement.

Code 5 (Observed)

This is coded if P16 – Police-Reported Alcohol Involvement is “0” or “1” and the police indicate that the basis for their alcohol assessment was some observation of the driver. Do Not Confuse “5 – Observed” with “3 – Behavioral.” Examples of observations would be:

- smelling alcohol on the driver’s breath
- staggering, slurring of speech
- the driver admitting he had been drinking
- other observations described by the police that would not be considered field sobriety tests

Be careful not to simply assume that this is the appropriate code when some other method may have been used (e.g. breath test, PBT, PAS).

Code 8 (Other [e.g., Saliva test])

This is coded if P16 is “0” or “1” and the police indicate that the basis for alcohol determination was something other than the codes “1, 2, 3, 4 and 5” described above.

Examples of “8 – Other” methods include:

- results of a saliva test
- results of other tissue tests

The key to coding this element is the description by the police of some other method of alcohol determination that does not fall into codes “1-5.”

See the paragraph below on Witness Statements.

Code 9 (Not Reported)

This is coded if P16 is “8” or “9.” It is also coded if P16 is “0” or “1” and there is no indication in the police report or any documents as to how the police made the alcohol assessment.

See the paragraph below on Witness Statements.

Witness Statements:

Witness Statements may or may not be used by the police to make a determination of alcohol involvement. If the police did use witness statements alone to make a determination of alcohol involvement, use code “8 – Other.”

If the police mention, but did not use witness statements and there is no other indication of how a determination was made, use code “9 – Not Reported.”

There are instances when the police do not indicate in the PAR whether alcohol was involved or not, but they do mention that a test was given or ordered.

FOR EXAMPLE: The police may only say that an evidential test was ordered for a driver without indicating that they suspected alcohol or what the result was. The use of passive alcohol sensors (PAS) may also be mentioned as used by the police, without mention of the result.

Codes 1 - 8 may be used for Method Of Alcohol Determination (P17) when Police-Reported Alcohol Involvement (P16) is coded as “8 – Not Reported” or “9 – Unknown (Police Reported),” if this fits the case.

This should only happen when the method is stated by the police, but the involvement is not mentioned at all or stated as unknown.

Consistency Checks:

	IF	THEN
(8S0P)	1. METHOD OF ALCOHOL DETERMINATION equals 9,	POLICE-REPORTED ALCOHOL INVOLVEMENT must equal 0-1, 8-9.
(P110)	2. METHOD OF ALCOHOL DETERMINATION equals 1-5, 8,	POLICE-REPORTED ALCOHOL INVOLVEMENT should equal 0-1.
(P200)	3. POLICE-REPORTED ALCOHOL INVOLVEMENT equals 8-9,	METHOD OF ALCOHOL DETERMINATION should equal 9.

ALCOHOL TEST TYPE/RESULT

Format: 2 sets, 2 numeric

Element Values:

Blanks

Alcohol Test Type

- 00 Not Tested for Alcohol
- 01 Whole Blood
- 02 Breathalyzer “BAC”
- 10 Preliminary Breath Test (PBT)
- 03 Urine
- 04 Vitreous
- 05 Blood Plasma/Serum
- 06 Blood Clot
- 07 Liver
- 08 Other Test Type
- 99 Unknown/Not Reported

Alcohol Test Result

- 00-93 Actual Value
- 94 .94 or Greater
- 95 Test Refused
- 96 None Given
- 97 AC Test Performed, Results Unknown
- 98 Positive Reading With No Actual Value
- 99 Unknown If Tested

Remarks:

Do not convert the test results for urine, vitreous or other test types. Code the type of test and the results obtained without conversion.

As a general coding guideline, do not prematurely code Alcohol Test Result “97 – AC Test Performed, Results Unknown.” It is recommended that you leave the information blank for drivers and non-motorists until the test results are received from the state lab, coroner or police. You need to be reasonably certain that you will never receive the test results to use code “97” at the time of the initial coding and case entry. Examples of this situation would be if the test results are returned indicating a “Contaminated Sample” or “Insufficient Sample.”

Note: Beginning in 2006 code “98 – Positive Reading With No Actual Value” should be used for any test type where the final result is returned as “positive” with no actual result to record. This can occur when only a screening test is used. Before recording this value make sure that this is the final result and no actual value was available from a follow-up confirmatory test. Prior to 2006, this code read “PBT Positive Reading With No Actual Value” and was used strictly for recording test results for Preliminary Breath Test Devices.

State Law vs. Practice:

You may be aware that your state laws require testing of certain classes of accident victims. However, you may also know that the practice in your state is that the law is not observed.

In such cases, you are not bound only by what the law says. You may consider state practices in your coding decisions.

Example 1:

Your state law may require all fatalities to be tested for BAC, but you know that this does not happen in your state.

- In such a case, you cannot rely on the law for your coding decisions. Therefore, you should use code “99 – Unknown If Tested” rather than “97 – AC Test Performed, Results Unknown,” or “96 - None Given.”

Example 2:

Your state’s practice is that “live” passengers are never tested for alcohol and there is no mention of a test ordered by the police in the PAR.

- Code Alcohol Test Type as “00 – Not Tested for Alcohol” and Alcohol Test Result as “96 – None Given.” However, if you happen to obtain an alcohol test result later, you may go ahead and enter the appropriate test type and results.

General Coding Guidelines:

Note that there are test types for Whole Blood (“01”), Blood Plasma or Serum (“05”) and Blood Clot (“06”). If the Coroner, Medical Examiner or State Lab reports that the test was a “blood” test, this most likely refers to Whole Blood, but you should try to verify this. If the test was performed on whole blood, or if you know the results are already converted to a BLOOD ALCOHOL CONCENTRATION (BAC), then code TEST TYPE as “01 – Whole Blood” and code the actual value BAC in TEST RESULT (i.e., If the BAC result is 0.00%, then enter “00” as the code). If the report does not state the actual BAC, but does state that it is less than 0.01%, then code ALCOHOL TEST RESULT as “00.”

ALCOHOL TEST RESULT of “01” is a low probability and will raise an error flag.

Any BAC test result reported to you in 3 decimal places should be truncated, but not rounded. For example, a reported “.099” becomes “.09.” The reason for truncating is that the accuracy of most testing devices is only reliable to two decimal places, so the third decimal place is meaningless.

For fatalities, no time constraints are placed on when the alcohol test is taken. For non-fatalities, you should consider whether the test was done within a reasonable time after the accident, although no time constraints are placed on when the alcohol test is taken.

Computed Estimates of BACs

An expert may calculate an estimate of what the BAC would have been at the time of the crash (i.e., toxicologist uses the lapse time from crash and the victim’s weight to calculate the BAC). You may accept these results if the following are all true:

- Results were reported by someone with the authority in your state to make this determination; and
- the result is considered official in your state; and
- you can support the result with official documentation or it is reported on the PAR (may vary from state-to-state).

If BAC is not known, but you have the % alcohol from a different sample, then code TEST TYPE for the type of sample taken and code TEST RESULT as the actual % alcohol from that sample.

For example, if BAC is not known, but:

- a. If % alcohol from a urine sample is known, then code TEST TYPE as “03” and code the actual % alcohol from the urine sample in TEST RESULT.
- b. If % alcohol from a vitreous test is known, then code TEST TYPE as “04” and code the actual % alcohol from vitreous in TEST RESULT.

Breath Tests:

Code TEST TYPE as “02” if you have a result from an evidential breath test (a breath test performed on a State-approved breath test device). Usually, results from a Preliminary Breath Test (PBT) device are not considered evidential. Some PBTs are of evidential quality in some States; but if the device was used only as a preliminary test and not an evidential test, then do not use code “02.”

Usually, if more than one type of test is performed on the same person, a Whole Blood Test, a Blood Plasma or Blood Serum Test is preferred over other tests. There is an exception if you have information that casts clear doubt on the validity or reliability of the Blood Test. This might include information that:

- the test was spoiled;
- the sample was contaminated;
- the test was performed on a live victim unreasonably long after the accident; or
- the lab, coroner, or medical examiner expresses doubt in their result from a blood test.

Code 10 (Preliminary Breath Test [PBT]): Use code “10” when you have a PBT result and no other test is available. Update Test Type and Result if a PBT is followed by an evidential test, other than a PBT. A breath, blood, urine, vitreous or other evidential test will take precedence over a PBT result.

- Example 1:
 - You only receive a PBT with an actual value
 - Code Test Type “10 – PBT” and Test Result “the actual value received.”
- Example 2:
 - You only receive a PBT with a “negative” result returned
 - Code Test Type “10 – PBT” and Test Result “00”
- Example 3:
 - You only receive a PBT with “positive” result, but no actual value
 - Code Test Type “10 – PBT” and Test Result new code “98 – Positive Reading with no Actual Value.”
- Example 4:
 - You receive a PBT with an actual value of .10% and a blood test from the lab of .08%
 - Code Test Type “01 – Whole Blood” and Test Result .08
- Example 5:
 - You receive a PBT with an actual value of .10% and a breathalyzer test both from the police of .08%
 - Code Test Type “02 – Breathalyzer (BAC)” and Test Result .08

Alcohol Test Result Code “97” refers to alcohol content tests that were performed but the results are unknown.

If you have an alcohol test result, but you don’t know the type of test, then code ALCOHOL TEST TYPE as “99” and code the result in ALCOHOL TEST RESULT. If you don’t know whether this person was tested for alcohol, then code ALCOHOL TEST TYPE as “99” and code ALCOHOL TEST RESULT as “99.”

If no test was performed on this person, or if this person refused to take a test for alcohol, then code ALCOHOL TEST TYPE as “00.” Code ALCOHOL TEST RESULT as “96” or “95,” accordingly.

Alcohol Test Result Code “98” - Some PBTs only indicate whether alcohol is present in the breath by positive (green) or negative (red) lights. Other PBTs indicate the approximate BAC in numbers. Code “98” should be used when a PBT result only indicates “positive” for alcohol, with no actual BAC value. A negative PBT result should be coded as “00.” (See examples 2 and 3 above.)

CODING HIERARCHY: When more than one alcohol test exists, use the following hierarchy: Whole Blood, Blood Plasma/Serum, Breath “BAC,” Vitreous, Urine, Blood Clot, Liver, Preliminary Breath Test, Other Test Type.

Consistency Checks:

	IF	THEN
(5T0P) 1.	ALCOHOL TEST RESULT equals 00-94, 97-98,	ALCOHOL TEST TYPE must equal 01-08, 10, 99.

GUIDELINES FOR INTERPRETING DRUG TESTS

<u>IF YOU HAVE:</u>	<u>GUIDELINES:</u>					
A. Both Blood and Urine tests and the results are the same for both. Example: Blood – Fentanyl Urine – Fentanyl	Type 3	Result 151	Type 0	Result 000	Type 0	Result 000
B. Both Blood and Urine tests and the results are different for both. Example: Blood – Hexobarbital Urine – Cocaine	Type 1	Result 333	Type 2	Result 407	Type 0	Result 000
C. Both Blood and Urine tests and the results are given but not linked to either tests. Example: Results – Codeine and Ibogaine	Type 7	Result 128	Type 7	Result 509	Type 0	Result 000
D. Blood or Urine tests and other tests, such as vitreous. Example: Blood – Diazepam Vitreous – Cocaine	Type 1	Result 321	Type 8	Result 407	Type 0	Result 000
E. Urine test only and the results. Example: Urine – Benzodiazepines	Type 2	Result 304	Type 0	Result 000	Type 0	Result 000
F. Vitreous and other tests only. Example: Vitreous – Amphetamine and Verapamil	Type 8	Result 401	Type 8	Result 996	Type 0	Result 000
G. Not tested for drugs.	Type 0	Result 000	Type 0	Result 000	Type 0	Result 000
H. Unknown if tested for drugs.	Type 9	Result 999	Type 0	Result 000	Type 0	Result 000
I. Tested for Drugs, Results Unknown. Example: Blood test – Yes Results – Unavailable	Type 1	Result 997	Type 0	Result 000	Type 0	Result 000
J. Tested for Drugs, Drugs Found, Type of Drug Unknown. Example: Urine test – Yes Drugs found – Yes Drug listed – Blank	Type 2	Result 998	Type 0	Result 000	Type 0	Result 000

***See Specific Drug Listings**

Remarks:

This element excludes only Nicotine, Aspirin, Alcohol, and (all) drugs, administered after the crash for life-saving purposes by the EMS or hospital.

Use the translation table to assign the three-digit code. If the drug is not on the list, use code "996" Other Drug, except for drug confirmed as "post crash" administered. Caffeine and mild analgesics are coded "996."

Code up to three individual drugs (and their respective test types). When four or more drugs are present, use the categories as a hierarchy (ex. narcotics (100-295) over depressants (300-395) over stimulants (400-495), etc.)

***Note** – If the term "Ecstasy" is used to indicate drug test results, this is code "513 – MDMA (methylenedioxymethamphetamine)." "Ecstasy" is the slang term for the drug MDMA.

Definition: ANSI D16.1; 2.3.1 and 2.3.2

Each case must have at least one Person Level form with Injury Severity coded "4."

Code 1 (Possible Injury). A possible injury is any injury reported or claimed which is not a fatal injury, incapacitating injury or non-incapacitating evident injury. This includes: momentary unconsciousness, claim of injuries not evident, limping, complaint of pain, nausea and hysteria.

Code 2 (Non-incapacitating Evident Injury). A non-incapacitating evident injury is any injury, other than a fatal injury or an incapacitating injury, which is evident to observers at the scene of the accident in which the injury occurred. This includes: lump on head, abrasions, bruises and minor lacerations. This does not include limping (the injury cannot be seen). (See code "1").

Code 3 (Incapacitating Injury). An incapacitating injury is any injury, other than a fatal injury, which prevents the injured person from walking, driving or normally continuing the activities the person was capable of performing before the injury occurred. This includes: severe lacerations, broken or distorted limbs, skull or chest injuries, abdominal injuries, unconsciousness at or when taken from the accident scene, and unable to leave the accident scene without assistance. This does not include momentary unconsciousness. (See code "1").

Code 4 (Fatal Injury), must only be used if the death occurred within thirty consecutive 24-hour time periods from the time of the accident. Every effort should be made to determine that the Death Date was within thirty consecutive 24-hour time

periods from the Accident Time.

Code 6 (Died Prior To Accident*), refers to non-motor vehicle fatalities that are involved in an accident resulting in a motor vehicle fatality; e.g., a heart attack victim, a homicide victim, a suicide or person involved in a legal intervention that is involved in an accident in which another person dies (innocent victim).

In suicide incidents, use the following criteria:

1. If the only fatality is the suicide victim and it can be ascertained that the accident was a suicide, do not code the case.
2. If other fatalities occur, code the case as appropriate. The suicide victim’s Injury Severity should be coded “6 – Died Prior to Accident*” if the death occurred at the time of the accident (or prior) or “0” if the death occurred after the accident.

(U160) 5.	UNLIKELY: INJURY SEVERITY is equal to 6.	

TRANSPORTED FOR TREATMENT BY

Format: 1 numeric

Element Values:

- Blank
- 0 *Not Transported*
- 1 *Yes, EMS*
- 2 *Yes, Law Enforcement*
- 3 *Yes, Other*
- 4 *Yes, Transported by Unknown Source*
- 9 *Unknown*

Remarks:

Prior to 2007, this element was called “Taken to Hospital or Treatment Facility” and only recorded whether or not the person was transported for treatment.

Beginning in 2007, this element’s name was changed to “Transported for Treatment By” and indicates if the person was transported for treatment, and if transported, the source of transport.

Treatment Facility refers to an injury treatment facility. A morgue is not an injury treatment facility.

Code 0 (Not Transported)

Use this code for victims who are dead on the scene and for those who are not taken (or do not go) to a treatment facility or hospital for treatment. *For example, an uninjured occupant rides along with an injured person to a treatment facility.*

Code 1 (Yes, EMS)

Includes by private and county/city-owned ambulance or rescue squad vehicles.

Code 2 (Yes, Law Enforcement)

Includes by state, county or local law enforcement agency vehicles.

Code 3 (Yes, Other)

Includes by private citizens or individuals who drive themselves to the hospital or treatment facility. May be indicated on your crash report as “POV” (Privately/Personally Owned Vehicle).

Code 4 (Yes, Transported by Unknown Source)

Use this code if you know the person was transported to a treatment facility, but you do not know the source (i.e., codes 1-3)

Use codes 1-4 if the person did not go to a treatment facility directly from the scene, but was transported at a later time for injuries sustained in this accident.

Use appropriate code 1-4, even if the person dies en route to the treatment facility.

Code 9 (Unknown)

Use this code when it is unknown whether or not this victim was taken (or went) to a hospital/treatment facility for treatment.

Consistency Checks:

	IF	THEN
(2U3F) 1.	INJURY SEVERITY equals 3,	TRANSPORTED FOR TREATMENT BY should not equal 0.
(P090) 2.	TRANSPORTED FOR TREATMENT BY equals 1-4,	INJURY SEVERITY should not be blank, 0, 9.
(P091) 3.	TRANSPORTED FOR TREATMENT BY equals 1,	EMS TIME AT HOSPITAL should not equal 0000, 9997, 9998.
(P092) 4.	TRANSPORTED FOR TREATMENT BY equals 0,	INJURY SEVERITY should not equal 3.
(P50P) 5.	DIED AT SCENE/EN ROUTE equals 7,	TRANSPORTED FOR TREATMENT BY must equal 0.
(P51P) 6.	DIED AT SCENE/EN ROUTE equals 8,	TRANSPORTED FOR TREATMENT BY must equal 1-4.
(P520) 7.	ACCIDENT DATE and DEATH DATE are the same, and ACCIDENT TIME and DEATH TIME are the same,	TRANSPORTED FOR TREATMENT BY should equal 0, and DIED AT SCENE/EN ROUTE should equal 7.
(P52P) 8.	DIED AT SCENE/EN ROUTE equals 9,	TRANSPORTED FOR TREATMENT BY must equal 9.

	IF	THEN
(P55P) 9.	<i>TRANSPORTED FOR TREATMENT BY</i> equals 9,	DIED AT SCENE/EN ROUTE must equal 0, 9.

Special Processing Rules:

	IF	THEN
(A551) 1.	EMS TIME AT HOSPITAL equals 0000, 9997, 9998,	<i>TRANSPORTED FOR TREATMENT BY</i> should not equal 1 for any PERSON.

DIED AT SCENE / EN ROUTE

Format: 1 numeric

Element Values:

- Blank
- 0 Not Applicable
- 7 Died at Scene
- 8 Died En Route
- 9 Unknown

Remarks:

Code 0 (Not Applicable)

Enter this code for non-fatalities and victims dying at locations other than the scene or en route (e.g., hospital, at home, etc.) .

Code 7 (Died at Scene)

Enter this code for victims who are dead on the scene of the accident.

Code 8 (Died En Route)

Is used for victims who die en route to a hospital or treatment facility by EMS or other transport.

Code 9 (Unknown)

Use this code when you know the victim is a fatality, but you don't know if they died at the scene, en route, or at another location (i.e., home).

Consistency Checks:

	IF	THEN
	(1R1P) 1. DIED AT SCENE/EN ROUTE equals 7-8,	INJURY SEVERITY must equal 4.
	(P50P) 2. DIED AT SCENE/EN ROUTE equals 7,	TRANSPORTED FOR TREATMENT BY must equal 0.
	(P51P) 3. DIED AT SCENE/EN ROUTE equals 8,	TRANSPORTED FOR TREATMENT BY must equal 1-4.

	IF	THEN
	(P520) 4. ACCIDENT DATE and DEATH DATE are the same, and ACCIDENT TIME and DEATH TIME are the same,	TRANSPORTED FOR TREATMENT BY should equal 0, and DIED AT SCENE/EN ROUTE should equal 7.
	(P52P) 5. DIED AT SCENE/EN ROUTE equals 9,	TRANSPORTED FOR TREATMENT BY must equal 9.
	(P53P) 6. INJURY SEVERITY equals 0-3, 5-6,	DIED AT SCENE/EN ROUTE must equal 0.
	(P54P) 7. DIED AT SCENE/EN ROUTE equals 8,	EMS TIME AT HOSPITAL should not equal 0000, 9997, 9998.
	(P55P) 8. TRANSPORTED FOR TREATMENT BY equals 9,	DIED AT SCENE/EN ROUTE must equal 0, 9.

Special Processing Rules:

	IF	THEN
	(P510) 1. EMS TIME AT HOSPITAL equals 0000, 9997, 9998,	DIED AT SCENE/EN ROUTE should not equal 8 for any PERSON.

DEATH DATE

Format: 2 sets of 2 numeric, 1 set of 4 numeric

Element Values:

MONTH:

Blanks
 00 Not Applicable
 01-12
 99 Unknown

DAY:

Blanks
 00 Not Applicable
 01-31
 99 Unknown

YEAR:

Blanks
 0000 Not Applicable
 Actual Year of Death
 9999 Unknown

Remarks:

The death must occur within thirty 24-hour time periods from time of the accident in order to be an applicable FARS death.

This element, although it contains three (3) pieces of information should be treated as one element. Therefore, never leave any one portion blank when another is not.

Normally, the medical examiner or coroner is source of data for death date. If there are not data inconsistencies or errors, use the official death time as recorded on the Death Certificate. Do not change the official death date without good cause.

Consistency Checks:

	IF	THEN
(1U1F-1U2F)	1. INJURY SEVERITY equals 4,	DEATH DATE must not equal 00000000, and DEATH TIME must not equal 0000.
(1V0P)	2. DEATH MONTH or DAY equals 00, or DEATH YEAR equals 0000,	all must equal 0's.
(2U1F-2U2F)	3. INJURY SEVERITY is not equal to 4,	DEATH DATE and DEATH TIME must equal 00000000 and 0000, respectively.
(2V0P)	4. DEATH DAY and MONTH are greater than 00 and less than 99,	DEATH DAY must be a valid day for DEATH MONTH.
(3U0P)	5. DEATH DATE equals ACCIDENT DATE and ACCIDENT TIME is not equal to 9999 (or ACCIDENT HOUR equals Death Hour and Accident Minute is not equal to 99),	DEATH TIME must not be less than ACCIDENT TIME.
(4V1F)	6. ACCIDENT MONTH is not equal to 99, and ACCIDENT DAY is not equal to 99, and DEATH MONTH is not equal to 99 and not blanks, and DEATH DAY is not equal to 99 and not blanks,	DEATH DAY must be within 30 calendar days of the ACCIDENT DATE.
(4V2F)	7. ACCIDENT MONTH equals 12, and DEATH MONTH equals 01,	DEATH YEAR must equal ACCIDENT YEAR plus 1.
(4V3F)	8. ACCIDENT MONTH equals 12,	DEATH MONTH must equal 01, 12, 99, or blanks.
(4V4F)	9. ACCIDENT MONTH equals 02-11, and DEATH MONTH is not equal to 99 or blanks,	DEATH MONTH must equal ACCIDENT MONTH or ACCIDENT MONTH plus 1.

	IF	THEN
(4V5F)	10. ACCIDENT MONTH equals 01, and DEATH MONTH is not equal to 99 or blanks,	DEATH MONTH must equal ACCIDENT MONTH or ACCIDENT MONTH plus 1 or ACCIDENT MONTH plus 2.
(4V1P)	11. DEATH MONTH is greater than 00 and less than 13, and DEATH DAY is not blank, 99, or in error,	DEATH DATE must be within 30 calendar days of ACCIDENT DATE.
(4V2P)	12. DEATH MONTH is greater than 00 and less than 13, and DEATH DAY is blank, 99, or in error,	DEATH MONTH must be within one month of ACCIDENT MONTH.
(4V6P)	13. DEATH MONTH is not equal to blanks,	DEATH DAY and DEATH YEAR must not equal blanks.
(4V7P)	14. DEATH DAY is not equal to blanks,	DEATH MONTH and DEATH YEAR must not equal blanks.
(4V8P)	15. DEATH YEAR is not equal to blanks,	DEATH DAY and DEATH MONTH must not equal blanks.
(6V0P)	16. DEATH DATE must not be less than ACCIDENT DATE.	
(7V0F)	17. DEATH YEAR equals 9999,	ACCIDENT MONTH must not be 01-11.
(8V0P)	18. DEATH YEAR equals 9999,	DEATH MONTH and DEATH DAY must equal 99.
(9V0P)	19. DEATH MONTH equals 99,	DEATH DAY must equal 99.
(P520)	20. ACCIDENT DATE AND DEATH DATE are the same, and ACCIDENT TIME AND DEATH TIME are the same,	TRANSPORTED FOR TREATMENT BY should equal 0, and DIED AT SCENE/ EN ROUTE should equal 7.

DEATH TIME

Format: 4 numeric

Element Values:

Blanks	
0000	Not Applicable
0001-2400	Valid Military Time
0099-2399	Known Hour but Unknown Minutes
9999	Unknown

Remarks:

If minutes are unknown, code the actual hour and “99” for the minutes. One minute after midnight is coded “0001.”

Normally, the medical examiner or coroner is source of data for death time. If there are no data inconsistencies or errors, use the official death time as recorded on the Death Certificate. Do not change the official death time without good cause.

If it is known that the person died at the scene and the official death time (on the Death Certificate) is known to be in error, the accident time is the appropriate death time to be used. It is possible for a coroner to pronounce a person dead at the scene and differ from the police-reported accident time. There is no reason to change this pronounced dead time in favor of the accident time, unless there are known errors in the data.

How to Code Midnight:

In general, code midnight as “2400.” However, there may be confusion over which day midnight falls into. It is key to remember that in FARS, midnight or 2400 is taken to be the beginning of a new day, and never the end of a day. This may not be the practice followed in your sources. Therefore, you have to determine which part of the day is being considered in your sources.

End of Day: If your sources give you a DEATH DATE and are consistent in talking about the end of that day, when they give the death time as “midnight,” “12:00-midnight,” “24:00” or “00:00,” then you should code DEATH TIME as “2359.”

Beginning of Day: If your sources give a DEATH DATE and are consistent in referring to the beginning or early moments of that day when they give a death time, code midnight as “2400.”

Consistency Checks:

	IF	THEN
(1U1F-1U2F)	1. INJURY SEVERITY equals 4,	DEATH DATE must not equal 00000000, and DEATH TIME must not equal 0000.
(2U1F-2U2F)	2. INJURY SEVERITY is not equal to 4,	DEATH DATE and DEATH TIME must equal 00000000 and 0000, respectively.
(3U0P)	3. DEATH DATE equals ACCIDENT DATE and ACCIDENT TIME is not equal to 9999 (or ACCIDENT HOUR equals Death Hour and Accident Minute is not equal to 99),	DEATH TIME must not be less than ACCIDENT TIME.
(P520)	4. ACCIDENT DATE AND DEATH DATE are the same, and ACCIDENT TIME AND DEATH TIME are the same,	TRANSPORTED FOR TREATMENT BY should equal 0, and DIED AT SCENE/EN ROUTE should equal 7.

RELATED FACTORS – PERSON LEVEL

Format: 2 numeric occurring 3 times

Element Values:

Related Factors		Examples/Notes
	Blanks	
00	Not Applicable – Driver/None – All Other Persons	
NOTE: Factors “01-04” mainly describe pedestrians, bicyclists, cyclists and occupants of non-motor transport devices.		
01	Not Visible	Hidden by curve of road, vegetation, darkness, glare. Dressed in dark clothing.
02	Darting, Running or Stumbling Into Roadway	Condition denotes “entering from off roadway.” Walking included. Bicyclist can be used.
03	Improper Crossing of Roadway or Intersection	The intention is to cross roadway and crossing improperly. Includes Jaywalking.
04	Walking/Riding With or Against Traffic, Playing, Working, Sitting, Lying, Standing, etc., in Roadway	Condition denotes “in the roadway.” Should not include “riding a bike in roadway,” due to consistency checks. Does not include construction or maintenance personnel.
05	Interfering With Driver	Obstructing driver’s view. Striking driver with body or object. Rambunctious individuals who make driver inattentive, even without touching driver or controls. Motorcycle passenger (or other cyclist) shifting weight or affecting driver control.
06	Ill, Passed Out/Blackout	Diabetic reactions, seizure, heart attack, high/low blood pressure, fainting.
07	Emotional (e.g., Depression, Angry, Disturbed)	Fighting, disagreements, depressed, and emotionally upset.

Related Factors	Examples/Notes	
08	Mentally Challenged	Mental illness/retardation may be included.
09	Construction/Maintenance/Utility Worker	Highway department, contractor, utility company personnel, etc. Occupant of a working motor vehicle.
10	Inattentive	Reading, talking, eating.
11	Walking With Cane or Crutches	Can only be used to describe pedestrian or occupant of non-motor vehicle transport device.
12	Restricted to Wheelchair	This is primarily non-motorized wheelchair occupants outside of vehicle. Can only be used to describe occupant of non-motorized vehicle transport device.
13	Motorized Wheelchair Rider	Pedestrian riding in a motorized wheelchair.
14	Impaired Due to Previous Injury	Includes only person injured from previous accident at this scene. See code "11" on Related Factors-Driver Level and code "17" on Related Factors-Person Level. Code "19" on Related Factors-Accident Level should be used with this code.
16	Blind	Legally blind.
17	Other Physical Impairment	Individuals missing a limb, an eye, or with hearing impairment/deaf. Also includes individuals with injuries resulting from previous incident, not a previous accident (at this scene) which is then coded under "14." Paraplegic
18	Mother of Dead Fetus	Fetus dies in or as a result of this accident.
19	Pedestrian Jogging	This pedestrian is jogging.
<p>NOTE: Factors "21-59" describes mainly bicyclists, other cyclists or persons in Motor Vehicles Not In-Transport. It may also apply to pedestrians in some circumstances.</p>		

Related Factors	Examples/Notes	
21	Overloading or Improper Loading of Vehicle With Passengers or Cargo	Overloading bicycle, passenger or handlebars.
23	Failure to Dim Lights or Have Lights on When Required	Vehicles being used as equipment or bicyclist fails to have lights on when required.
24	Operating Without Required Equipment	Bicyclists operating without required equipment; helmets reflectors, lights or equipment is defective.
26	Following Improperly	Bicyclist following too closely or attempting to grab on to vehicle. Also applies to skateboard riders, roller bladders, etc.
27	Improper or Erratic Lane Changing	Bicyclists, roller bladder, skateboard riders, etc., weaving in and out of traffic.
28	Failure to Keep in Proper Lane	Bicyclist fails to keep in bicycle lane. Persons not in motor vehicles in-transport and working motor vehicles fail to stay in proper lane. Going straight in a turn lane.
29	Illegal Driving on Road Shoulder, in Ditch, on Sidewalk or on Median	Persons not in motor vehicles in-transport driving off pavement or roadway, physically driving on shoulder, etc.
30	Making Improper Entry to or Exit from Trafficway	Persons not in motor vehicles in-transport entering highway from adjacent pasture, field. Persons not in motor vehicles in-transport entering highway on exit ramp, or exiting on entrance ramp, going the wrong way. NOTE: not to be confused with “50 – Driving on Wrong Side of Road.”
32	Opening Vehicle Closure into Moving Traffic or While Vehicle is in Motion	Opening trunk while vehicle is moving. Opening door into moving traffic.
33	Passing Where Prohibited by Posted Signs, Pavement Markings, Hill or Curve, or School Bus Displaying Warning Not to Pass Line	Passing stopped school bus. Crossing over solid line to pass. Passing uphill; mainly violations as designated by traffic controls.
34	Passing on Wrong Side	

Related Factors	Examples/Notes
35 Passing With Insufficient Distance or Inadequate Visibility or Failing to Yield to Overtaking Vehicle	Mainly passing violations based on faulty judgment.
36 Operating the Vehicle in an Erratic, Reckless, Careless or Negligent Manner. Operating at Erratic or Suddenly Changing Speeds.	Must be explicitly stated on police record. Acceleration followed by sudden braking.
37 *Traveling on Prohibited Trafficways	Persons not in motor vehicles in-transport on areas prohibited by law, such as interstates. Persons not in motor vehicles in-transport on prohibited trafficways, i.e., bicyclist on interstate.
38 *Failure to Yield Right-of-Way	Primarily intersection-related. Care should be used to distinguish yield violations from lane violations.
39 *Failure to Obey Actual Traffic Sign, Traffic Control Devices or Traffic Officers; Failure to Obey Safety Zone Traffic Laws	Oftentimes incorrectly coded in conjunction with “38 – Failure to Yield.” Care must be used to distinguish from “38.” When persons not in motor vehicles in-transport do not stop when required by traffic control, code as “39.” When persons not in motor vehicles in-transport stop, but fail to yield, code as “38” (4-way stops). Violating yield sign, code as “38” and “39.” Persons not in motor vehicles in-transport passing around railroad gates.
40 Passing Through or Around Barrier	Denotes “demarcated” area.
41 *Failure to Observe Warnings or Instructions on Vehicles Displaying Them	Failure to follow construction instructions (i.e., arrows directing traffic mounted on vehicle), instructions on emergency vehicles (ambulances, fire trucks, police cars). Failure to observe right –turn warning on trucks, buses. Failure to heed hazard lights on disabled vehicle, school bus arm.
42 Failure to Signal Intentions *NOTE: Also applies to pedestrians	Failure to signal by either lamp turn signal or hand.

Related Factors	Examples/Notes	
44	Driving Too Fast for Conditions or in Excess of Posted Maximum	Conditions denote: weather, sharp curves, bridges, tunnels, school zone, traffic, person or road. Speed greater than reasonable or prudent.
45	Driving Less Than Posted Minimum	Driving too slowly, so as to impede traffic.
47	Making Right Turn From Left-Turn Lane, Left Turn From Right-Turn Lane	To distinguish from “27 – Improper Lane Change;” police officer must have knowledge of driver’s intention.
48	Making Other Improper Turn	To distinguish from “39 – Failure to Obey Traffic Controls,” “48” implies judgment-oriented actions, not those explicitly stated by the law. (Too wide at right or left turn, unsafe U-turns.)
49	Driving Wrong Way on One-Way Trafficway	To distinguish from “50 – Driving on Wrong Side of Road.” On a divided highway, although each side is “one-way,” driving against traffic should be coded as “50” not “49.”
50	Driving on Wrong Side of Road (Intentional or Unintentional)	To distinguish from “28 – Failure to Keep in Proper Lane;” when a vehicle loses control, crosses a divided highway, it is coded as “28” not “50.” Bicycle driving against traffic.
51	Operator Inexperience	Persons not in motor vehicles in-transport unfamiliar with transport device.
52	Unfamiliar with Roadway	Persons not in motor vehicles in-transport unfamiliar with roadway, based on the judgment of the police officer.
53	Stopped in Roadway (Vehicle Not Abandoned)	“53” signifies both in the process of stopping and “stopped” vehicles. Usually implies unusual condition. Excludes stopping in traffic or stopping for traffic control.
55	Getting Off/Out of or On/In to a Transport Vehicle	Only describes passenger of a transport vehicle, occupant of a non-motor vehicle transport device, pedestrian, and persons on personal conveyances.

Related Factors	Examples/Notes	
56	Non-Driver Flees Scene	Flags the non-driver who left the scene of a Hit-and-Run accident. Examples: passenger of motor vehicle in-transport fled scene on foot. Occupant of an involved parked vehicle leaves by driving their vehicle from the scene. A bicyclist clipped by a vehicle that runs off the road and overturns, leaves the scene on their bike. An involved motor vehicle in-transport is driven away by a passenger in that vehicle.
57	Improper Tire Pressure	Signifies that improper tire pressure is not a defect, but rather the irresponsibility of the persons not in motor vehicles in-transport.
58	Locked Wheel	Occurs when braking too suddenly as noted by police officer. Can't be inferred just from skid marks.
59	Overcorrecting	Based on the judgment of the police officer, with knowledge of the intention of the person not in a motor vehicle in-transport. Over steering.
<u>Vision Obscured by:</u>		
NOTE: Factors "60-83" describe mainly bicyclists, other cyclists or persons in Motor Vehicles Not In-Transport		
60	Rain, Snow, Fog, Smoke, Sand, Dust	
61	Reflected Glare, Bright Sunlight, Headlights	
62	Curve, Hill, or Other Design Features (including traffic signs, embankment)	
63	Building, Billboard, Other Structures	
64	Trees, Crops, Vegetation	
65	Motor Vehicle (including load)	Vision Obscured by: Car stopped on roadway. Tractor-trailer moving on road. School bus stopped, loading or unloading children.

Related Factors	Examples/Notes	
66	Parked Vehicle	Vision obscured by: Vehicle stopped on shoulder, in parking lane.
67	Splash or Spray of Passing Vehicle	
68	Inadequate Lighting System	
69	Obstructing Angles on Vehicle	Vision Obscured by: Obstructing angles on this person's vehicle. Not to be confused with visual obstructions from other vehicles. (See codes "65" and "66.")
70	Mirrors	Vision Obscured by: Rear view Side mirrors Others
72	Other Visual Obstruction	Trailer (only) left parked.
Skidding Swerving, Sliding Due To:		
73	Severe Crosswind	
74	Wind From Passing Truck	
75	Slippery or Loose Surface	Refers to actual condition of roadway surface, i.e., loose gravel roadway. Slippery or old worn blacktop. Newly paved surface.
76	Tire Blowout or Flat	
77	Debris or Objects in Road	Nails, glass, trash cans, tire retread, trash, dead animals, pile of sand, etc.
78	Ruts, Holes, Bumps in Road	
79	Live Animals in Road	
80	Vehicle in Road	Includes both contact and non-contact vehicles that remain at the scene.

Related Factors		Examples/Notes
81	Phantom Vehicle	Non-contact vehicle that leaves the scene as described by the police officer.
82	Pedestrian, Pedal Cyclists, or Persons on Personal Conveyances.	
83	Ice, Snow, Slush, Water, Sand, Dirt, Oil, Wet Leaves on Road	This is for the substances on roadway that causes roadway to be slick, which may interfere with traction. These are not part of the roadway design (see code "75").
<u>Other Non-Motorist Factors</u>

Remarks:

For forms with Person Type "01" (Driver), zero-fill all three fields. The related factors for drivers are captured in the Related Factors-Driver Level.

"Operator" and "Vehicle" in factors "21-59" refer to both motorized and non-motorized vehicles.

Code information provided in the narrative by the investigating officer.

SUPPLEMENTAL

THESE ELEMENTS DO NOT APPEAR ON THE CODING FORMS

They are presented on-screen by the M.D.E. System.

PERSON LEVEL ELEMENTS

Including Coding Instructions

SP1 – Death Certificate Number

SP2 – Fatal Injury At Work

SP3 – Race/Hispanic Origin

DEATH CERTIFICATE NUMBER

Format: 12 numeric

Element Values:

Blanks 0000-00-000000	Not Applicable (not a fatality)
--------------------------	---------------------------------

Any Numeric Characters 9999-99-999999	Unknown
--	---------

Remarks:

THIS ELEMENT DOES NOT APPEAR ON THE CODING FORMS. It is presented on-screen by the M.D.E. System.

Code the sequence number from the death certificate as assigned by your State Vital Statistics Department. The sequence number is six digits in length and is part of the State File Number.

The format for coding the numbers is as follows:

First four digits _ _ _ _	City (where death occurred)
Next two digits _ _	State (where death occurred)
Last six digits _ _ _ _ _ _	Sequence Number (as assigned by State Vital Statistics Department)

If this person is not a fatality, zero-fill this element.

Use GSA codes for the City and State where the death occurred according to the death certificate. These are the same GSA codes you use for the City variables (A7) in the Accident Level Form:

0000	Not a fatality or death not within city limits and no location code is available
0001-9996	GSA Geographical Location Codes
9997	Other (Death within city limits, but no GSA code available for this city)
9999	Unknown (City where death occurred cannot be found on death certificate).

The State codes are the same those you use for variables A1, V1, D1 and P1:

00	Not a fatality	30	Montana
01	Alabama		-
02	Alaska		-
	-		-
	-		-
	-		-
	-		-
29	Missouri	56	Wyoming

If the fatal crash occurred in your State, but the death occurred in a hospital of another State, please attempt to obtain the death certificate from that State and code the City and State where the death occurred.

If a person dies at the accident scene, code the appropriate city code or location code for the accident location. Code "0000" if the location is not within a city, and no geographical location code is available.

If the location is not within a city, but a geographical location code is available, use the location code.

If a person is transported by EMS and dies en-route or at the hospital, use the city code for the hospital's location.

Code the exact sequence number as indicated on the death certificate. If the sequence number is less than six-digits long (e.g., it is 12345 (five digits)) right-justify your coded number and zero-fill the first (and/or second digit) (e.g., _0_ _1_ _2_ _3_ _4_ _5_).

Note that if you receive a copy of the death certificate from the Medical Examiner or Coroner, it may not contain the sequence number. The sequence number needed is the one assigned by your State Vital Statistics or Vital Records Department, which is subsequently sent to the National Center for Health Statistics. In those instances, leave the sequence number blank until you are able to obtain it in a follow-up effort with your Vital Statistics Department.

If the sequence number contains a letter in it (e.g., N12345), simply ignore the letter and code the numbers only (right-justified), (e.g., _0_ _1_ _2_ _3_ _4_ _5_).

If the death certificate number cannot be obtained, "9-fill" this element.

If the death certificate number can be obtained, but is not yet received, leave this element blank until the number is available.

Consistency Checks:

	IF	THEN
(7E0P) 1.	INJURY SEVERITY equals 4,	DEATH CERTIFICATE NUMBER must NOT equal 0000-00-000000.
(7F0P) 2.	DEATH CERTIFICATE NUMBER not blank or 0000-00-000000,	INJURY SEVERITY must equal 4.

01 Mexican
02 Puerto Rican
03 Cuban
04 Central or South American
05 European Spanish
06 Hispanic, Origin not Specified or Other Origin
07 Non-Hispanic
99 Unknown

Remarks:

Race and Hispanic Origin should be obtained from the death certificate only.

THIS ELEMENT DOES NOT APPEAR ON THE CODING FORMS: It is presented on-screen by the M.D.E. System.

Both RACE and HISPANIC ORIGIN are coded for fatal victims only (INJURY SEVERITY on this person must be coded "4 - Fatal"). If INJURY SEVERITY is coded other than "4" on the Person Level, the M.D.E. System will automatically enter "00's" in both the RACE and HISPANIC ORIGIN fields.

In general, the actual race will be written literally (i.e., white, black, Chinese, etc.) on the death certificate. Hispanic Origin comes directly from a check box. Within that box, if Hispanic Origin is "yes" a specific location (i.e., Cuba, Puerto Rico or Mexico) is indicated.

For translating the entries on the death certificate, refer to the table, "Detail Race and Hispanic Origin for FARS." This table is based on the guidelines provided by the Center for Disease Control (CDC). The only exception is Hawaiian. Any race with Hawaiian is coded Hawaiian (See code "06-Hawaiian").

DETAIL RACE

Code "01 – White" should be coded for persons listed as White, Mexican, Puerto Rican, Cuban and Caucasian for race.

Code "03 – American Indian" includes American, Aleut, Alaskan, Canadian and Eskimo.

Code "06 – Hawaiian" should be coded for any person listed as Hawaiian, even if another race is listed as well.

Code "19 – Other Indian" includes South and Central America and any other Indians, except American or Asian Indians.

Code "68 – Other Asian or Pacific Islander" is used when an "Other Asian" or "Pacific Island" race is specified, and it is other than Chinese (Code "04"), Japanese (Code "05"), Hawaiian (Code "06"), Filipino (Code "07"), Asia Indian (Code "18"), Korean (Code "28"), Samoan (Code "38"), Vietnamese (Code "48"), or Guamanian (Code "58").

Code "78 – Asian or Pacific Islander, No Specific (individual) Race" is used when the death certificate or report lists "Asian" for race.

Code "97 – Multiple Races" is used when the death certificate indicates more than one race without specifying the individual races (e.g., "mixed," "multiple races," "multi-racial," etc.)

Code “98 – All Other Races” is used if an individual race listed on the death certificate or report is not found on the translation table.

If more than one race is listed on the death certificate or report, code the race entry listed first. An example is “American Indian/White,” which should be coded “03-American Indian.” Again, Hawaiian is the exception. (See code “06-Hawaiian.”)

HISPANIC ORIGIN

Code “06 – Hispanic Origin Not Specified, or Other Origin.” This includes when you know they are Hispanic, but the specific origin is not specified (e.g., Hispanic, Latino, Latin American, South American).

Code “99 – Unknown.” This person could be Hispanic, or not. You don’t have enough information to determine whether or not they are Hispanic. (E.g., all you know is that Race is “White,” “Black,” “European,” or “Indian,” and no other information is provided.)

If you receive a listing from the Vital Statistics Department, be sure you request a translation table for the code structure. For FARS, we tried to match the coding structure to the National Center for Health Statistics (NCHS) coding structure for these elements; however, it was necessary to modify NCHS’s structure slightly in order to be consistent with other FARS codes. (Reference: National Center for Health Statistics. Documentation for the Mortality Public Use Data Set, 1999. Available at URL: <http://www.cdc.gov/nchs/data/dvs/Mort99doc.pdf>).

ERROR CODE ERROR TEST

040F	The NUMBER OF PERSON FORMS SUBMITTED given on the ACCIDENT FORM is not equal to the total of NUMBER OF FORMS SUBMITTED FOR PERSONS NOT IN MOTOR VEHICLES and VEHICLE OCCUPANTS.
050P	If PERSON TYPE equals 04-08, 10 , 19, and NUMBER OF VEHICLE FORMS SUBMITTED equals 01, then NON-OCCUPANT STRIKING VEHICLE NUMBER must equal 01.
060P	If NON-OCCUPANT STRIKING VEHICLE NUMBER is not equal to 00, 99, then the NON-OCCUPANT STRIKING VEHICLE NUMBER must equal some VEHICLE NUMBER in the case.
170F	If MONTH equals current month, then DAY must be at least 2 days prior to current day or 99.
1A0P	If RELATED FACTORS-ACCIDENT LEVEL equals 14, then NUMBER OF VEHICLE FORMS SUBMITTED must be greater than 01.
1C0P	If ACCIDENT MONTH is between June and December, then the vehicle MODEL YEAR must not be greater than ACCIDENT YEAR plus ONE.
1D0P	If SPECIAL USE equals 1, then BODY TYPE must equal 02-09, 12, 14-21, 28-29, 99.
1E0P	If IMPACT POINT-INITIAL equals 00, then IMPACT POINT-PRINCIPAL must equal 00.
1E1P	If IMPACT POINT-PRINCIPAL equals 00, then IMPACT POINT-INITIAL must equal 00.
1G0P	If one RELATED FACTORS-VEHICLE LEVEL equals 99, then both factors must equal 99.
1H0F	If DRIVER PRESENCE equals 2, 4, 9, then PREVIOUS SPEEDING CONVICTIONS must be blank.
1H1F	If DRIVER PRESENCE equals 2, 4, 9, then LICENSE STATE must be blank.
1H2F	If DRIVER PRESENCE equals 2, 4, 9, then LICENSE COMPLIANCE WITH CLASS OF VEHICLE must be blank.

ERROR CODE	ERROR TEST
1H3F	If DRIVER PRESENCE equals 2, 4, 9, then NON-CDL LICENSE STATUS and COMMERCIAL MOTOR VEHICLE LICENSE STATUS must be blank.
