The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

FOREWORD

The 2008 edition of the Digest of Education Statistics is the 44th in a series of publications initiated in 1962. The *Digest* has been issued annually except for combined editions for the years 1977–78, 1983–84, and 1985–86. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from prekindergarten through graduate school. The Digest includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). To qualify for inclusion in the Digest, material must be nationwide in scope and of current interest and value. The publication contains information on a variety of subjects in the field of education statistics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to educational attainment, finances, federal funds for education, libraries, and international comparisons. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Although the Digest contains important information on federal education funding, more detailed information on federal activities is available from federal education program offices.

The *Digest* contains seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Programs for Education and Related Activities, Outcomes of Education, International Comparisons of Education, and Libraries and Educational Technology. Preceding these chapters is an Introduction that provides a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. The *Digest* concludes with three appendixes. The first appendix, Guide to Sources, provides a brief synopsis of the surveys used to generate the *Digest* tables; the second, Definitions, is included to help readers understand terms used in the *Digest*; and the third, Index of Table Numbers, allows readers to quickly locate tables on specific topics.

In addition to updating many of the statistics that have appeared in previous years, this edition contains new material, including

- number and percentage of public school students eligible for free or reduced-price lunch (table 42);
- percentage distribution of children at about 2 and 4 years of age, by type of child care arrangement and selected child and family characteristics (table 46);

- percentage distribution of quality ratings of child care arrangements of children at about 4 years of age, by type of arrangement and selected child and family characteristics (table 47);
- children's specific language, literacy, mathematics, color knowledge, and fine motor skills at about 4 years of age, by age of child and selected characteristics (table 114);
- average National Assessment of Educational Progress (NAEP) reading scale scores of 4th-, 8th-, and 12th-graders, by selected student and school characteristics (table 123);
- average NAEP writing scale score and percentage of students attaining NAEP writing achievement levels, by selected student characteristics and grade level (table 125);
- average NAEP mathematics scale scores of 4th-, 8th-, and 12th-graders, by selected student and school characteristics (table 136);
- average NAEP mathematics scale score of 8th-graders and percentage reporting various attitudes toward mathematics work, by frequency of attitude and selected student and school characteristics (table 137);
- average NAEP science scale score of 12th-graders and percentage reporting various attitudes toward science, by selected student and school characteristics (table 140);
- percentage of elementary and secondary school students who do homework outside of school, whose parents check that homework is done, and whose parents help with homework, by frequency and selected student and school characteristics (table 156);
- total full-year enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction (table 222);
- degrees in Arabic, Chinese, Korean, and Russian conferred by degree-granting institutions, by level of degree (table 309);
- full-time, first-time degree/certificate seeking undergraduate students enrolled in degree-granting institutions, by participation and average amount awarded in financial aid programs, and type and control of institution (table 336); and
- percentage of 18- to 25-year-olds reporting substance abuse during the past 30 days and the past year, by drug used and selected characteristics (table 396).

Updates to tables from the next *Digest of Education Statistics* will appear on the NCES website prior to printing the full edition. The *Digest* can be accessed from http://nces.ed.gov/programs/digest.

List of Figures

Figure		Page
1.	The structure of education in the United States	11
2.	Enrollment, total expenditures in constant dollars, and expenditures as a percentage of the gross domestic product (GDP), by level of education: Selected years, 1965–66 through 2007–08	12
3.	Percentage of persons 25 years old and over, by highest level of educational attainment: Selected years, 1940 through 2008	13
4.	Percentage of persons 25 through 29 years old, by highest level of educational attainment: Selected years, 1940 through 2008	13
5.	Highest level of education attained by persons 25 years old and over: March 2008	14
6.	Enrollment, number of teachers, pupil/teacher ratio, and expenditures in public schools: 1960–61 through 2006–07	57
7.	Total and full-day preprimary enrollment of 3- to 5-year-olds: October 1970 through October 2007	58
8.	Percentage change in public elementary and secondary enrollment, by state: Fall 2000 to fall 2006 .	58
9.	Percentage of revenue for public elementary and secondary schools, by source of funds: 1970–71 through 2005–06.	59
10.	Current expenditure per pupil in fall enrollment in public elementary and secondary schools: 1970–71 through 2005–06	59
11.	Enrollment, degrees conferred, and expenditures in degree-granting institutions: 1960–61 through 2006–07.	272
12.	Percentage change in total enrollment in degree-granting institutions, by state: Fall 2000 through fall 2006	273
13.	Enrollment in degree-granting institutions, by age: Fall 1970 through fall 2017	273
14.	Full-time-equivalent (FTE) students per staff member in public and private degree-granting institutions, by type of staff: 1976 and 2007	274
15.	Trends in bachelor's degrees conferred by degree-granting institutions in selected fields of study: 1996–97, 2001–02, and 2006–07	274
16.	Percentage distribution of total revenues of public degree-granting institutions, by source of funds: 2005–06.	275
17.	Percentage distribution of total revenues of private not-for-profit degree-granting institutions, by source of funds: 2005–06	275
18.	Federal on-budget funds for education, by level or other educational purpose: Selected years, 1965 through 2008	535
19.	Percentage of federal on-budget funds for education, by agency: Fiscal year 2007	536
20.	Department of Education outlays, by type of recipient: Fiscal year 2008	536
21.	Labor force participation rate of persons 20 to 64 years old, by age group and highest level of education: 2007.	554
22.	Unemployment rates of persons 25 years old and over, by highest level of education: 2007	555
23.	Labor force status of 2006–07 high school dropouts and completers not enrolled in college: October 2007	555
24.	Median annual earnings of persons 25 years old and over, by highest level of education and sex: 2007	556
25.	Average salaries of bachelor's degree recipients 1 year after graduation, by field: 1991, 1994, and 2001	556
26.	Percentage change in enrollment, by selected areas of the world and level of education: 1990 to 2005	579
27.	Bachelor's degree recipients as a percentage of the population of the typical ages of graduation, by country: 2005	580
28.	Public direct expenditures for education as a percentage of the gross domestic product (GDP), by country: 2005	580
29.	Percentage of all public schools and instructional rooms with internet access: Various years, fall 1994 through fall 2005	612

List of Tables

Chapter 1. All Levels of Education

Enrollment, Teachers, and Schools

Tab	ole		Page
	1.	Projected number of participants in educational institutions, by level and control of institution: Fall 2008	15
	2.	Enrollment in educational institutions, by level and control of institution: Selected years, fall 1980 through fall 2008	15
	3.	Enrollment in educational institutions, by level and control of institution: Selected years, 1869–70 through fall 2017	16
	4.	Number of teachers in elementary and secondary schools, and instructional staff in postsecondary degree-granting institutions, by control of institution: Selected years, fall 1970 through fall 2017.	18
	5.	Number of educational institutions, by level and control of institution: Selected years, 1980–81 through 2006–07	19
Enro	Ilme	ent Rates	
	6.	Percentage of the population 3 to 34 years old enrolled in school, by sex, race/ethnicity, and age: Selected years, 1980 through 2007	20
	7.	Percentage of the population 3 to 34 years old enrolled in school, by age group: Selected years, 1940 through 2007	22
Educ	atio	onal Attainment	
	8.	Percentage of persons age 25 and over and 25 to 29, by race/ethnicity, years of school completed, and sex: Selected years, 1910 through 2008	24
	9.	Number of persons age 18 and over, by highest level of education attained, age, sex, and race/ethnicity: 2008	26
1	10.	Persons age 18 and over who hold at least a bachelor's degree in specific fields of study, by sex, race/ethnicity, and age: 2001	27
1	11.	Educational attainment of persons 18 years old and over, by state: 2000 and 2006	28
1	12.	Educational attainment of persons 25 years old and over, by race/ethnicity and state: 2006 \dots .	29
1	13.	Educational attainment of persons 25 years old and over for the 25 largest states, by sex: 2006. $\boldsymbol{.}$	31
1	14.	Educational attainment of persons 25 years old and over for the 15 largest metropolitan areas, by sex: 2008	31
Popu	ılati	on	
1	15.	Estimates of resident population, by age group: 1970 through 2008	32
1	16.	Estimates of resident population, by race/ethnicity and age group: Selected years, 1980 through 2008	33
1	17.	Estimated total and school-age resident populations, by state: Selected years, 1970 through 2007	34
Char	acte	eristics of Families With Children	
1	18.	Number and percentage of family households, by family status and presence of own children under 18: Selected years, 1970 through 2007	35
1	19.	Characteristics of family households with own children under 18, by race/ethnicity and family structure: 2007	36

20.	1990, 2000, and 2005–07
21.	Poverty status of all persons, persons in families, and related children under age 18, by race/ethnicity: Selected years, 1959 through 2007
Opinion	s on and Parent Involvement in Education
22.	Average grade that the public would give the public schools in their community and in the nation at large: 1974 through 2008
23.	Percentage of elementary and secondary school children whose parents were involved in school activities, by selected child, parent, and school characteristics: 1999, 2003, and 2007
24.	Percentage of kindergartners through fifth-graders whose parents were involved in education-related activities, by selected child, parent, and school characteristics: 1999 and 2003
Finance	s
25.	Expenditures of educational institutions related to the gross domestic product, by level of institution: Selected years, 1929–30 through 2007–08
26.	Expenditures of educational institutions, by level and control of institution: Selected years, 1899–1900 through 2007–08
27.	Amount and percentage distribution of direct general expenditures of state and local governments, by function: Selected years, 1970–71 through 2005–06
28.	Direct general expenditures of state and local governments for all functions and for education, by level of education and state: 2005–06
29.	Direct general expenditures per capita of state and local governments for all functions and for education, by level of education and state: 2005–06
30.	Gross domestic product, state and local expenditures, personal income, disposable personal income, median family income, and population: Selected years, 1929 through 2007
31.	Gross domestic product price index, Consumer Price Index, education price indexes, and federal budget composite deflator: Selected years, 1919 through 2007
Chapter	2. Elementary and Secondary Education
Enrollm	ent
32.	Historical summary of public elementary and secondary school statistics: Selected years, 1869–70 through 2005–06
33.	Enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, fall 1990 through fall 2008
34.	Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2006
35.	Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2005
36.	Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2004
37.	Enrollment in public elementary and secondary schools, by grade: Selected years, fall 1980 through fall 2006
38.	Number and percentage of homeschooled students ages 5 through 17 with a grade equivalent of kindergarten through 12th grade, by selected child, parent, and household characteristics: 1999 and 2003
39.	Percentage distribution of students ages 5 through 17 attending kindergarten through 12th grade, by school type or participation in homeschooling and selected child, parent, and household characteristics: 1999 and 2003

40.	Selected years, 1969–70 through 2005–06
41.	Percentage distribution of enrollment in public elementary and secondary schools, by race/ ethnicity and state or jurisdiction: Fall 1996 and fall 2006
42.	Number and percentage of public school students eligible for free or reduced-price lunch, by state: 2000–01, 2004–05, 2005–06, and 2006–07
43.	Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by level of program, control of program, and attendance status: Selected years, 1965 through 2007
44.	Number of children under 6 years old and not yet enrolled in kindergarten, percentage in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2005
45.	Child care arrangements of 3- to 5-year-old children who are not yet in kindergarten, by age and race/ethnicity: Various years, 1991 through 2005
46.	Percentage distribution of children at about 2 and 4 years of age, by type of child care arrangement and selected child and family characteristics: 2003–04 and 2005–06
47.	Percentage distribution of quality rating of child care arrangements of children at about 4 years of age, by type of arrangement and selected child and family characteristics: 2005–06
48.	Children of prekindergarten through second-grade age, by enrollment status, selected maternal characteristics, and household income: 1995, 2001, and 2005
49.	Percentage of 3- to 5-year-olds not yet enrolled in kindergarten who have participated in home literacy activities with a family member, by type of activity and selected child and family characteristics: 1993, 2001, and 2005
50.	Children 3 to 21 years old served in federally supported programs for the disabled, by type of disability: Selected years, 1976–77 through 2006–07
51.	Percentage distribution of students 6 to 21 years old served under Individuals with Disabilities Education Act, Part B, by educational environment and type of disability: Selected years, fall 1989 through fall 2006
52.	Number and percentage of children served under Individuals with Disabilities Education Act, Part B, by age group and state or jurisdiction: Selected years, 1990–91 through 2006–07
53.	Number of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 and 2006
54.	Percentage of gifted and talented students in public elementary and secondary schools, by sex, race/ethnicity, and state: 2004 and 2006
55.	Enrollment in grades 9 through 12 in public and private schools compared with population 14 to 17 years of age: Selected years, 1889–90 through fall 2008
56.	Enrollment in foreign language courses compared with enrollment in grades 9 through 12 in public secondary schools: Selected years, fall 1948 through fall 2000
57.	Number and percentage of schools with students enrolled in distance education courses and enrollment in distance education courses, by instructional level and district characteristics: 2002–03
Private	Elementary and Secondary Schools
58.	Private elementary and secondary enrollment, teachers, and schools, by orientation of school and selected school characteristics: Fall 2005
59.	Private elementary and secondary enrollment, number of schools, and average tuition, by school level, orientation, and tuition: 1999–2000 and 2003–04
60.	Private elementary and secondary school full-time-equivalent staff and student to full-time-equivalent staff ratios, by orientation of school, school level, and type of staff: 2003–04
61.	Enrollment and instructional staff in Catholic elementary and secondary schools, by level: Selected years, 1919–20 through 2007–08
62.	Private elementary and secondary schools, enrollment, teachers, and high school graduates, by

Teachers and Other Staff

63.	Public elementary and secondary pupil/teacher ratios, by enrollment size, type, and level of school: Fall 1987 through fall 2006
64.	Public and private elementary and secondary teachers, enrollment, and pupil/teacher ratios: Selected years, fall 1955 through fall 2017
65.	Public elementary and secondary teachers, by level and state or jurisdiction: Selected years, fall 2000 through fall 2006
66.	Teachers, enrollment, and pupil/teacher ratios in public elementary and secondary schools, by state or jurisdiction: Selected years, fall 2000 through fall 2006
67.	Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2003–04
68.	Highest degree earned and years of full-time teaching experience for teachers in public and private elementary and secondary schools, by selected teacher characteristics: 1999–2000 and 2003–04
69.	Selected characteristics of public school teachers: Selected years, spring 1961 through spring 2001
70.	Percentage of public school teachers of grades 9 through 12, by field of main teaching assignment and selected demographic and educational characteristics: 2003–04
71.	Teachers' perceptions about serious problems in their schools, by control and level of school: Selected years, 1987–88 through 2003–04
72.	Teachers' perceptions about teaching and school conditions, by control and level of school: 1993–94, 1999–2000, and 2003–04
73.	Mobility of public and private elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987–88 through 2004–05
74.	Average base salary for full-time teachers in public elementary and secondary schools, by highest degree earned and years of full-time teaching: Selected years, 1990–91 through 2003–04
75.	Average salaries for full-time teachers in public and private elementary and secondary schools, by selected characteristics: 2003–04
76.	Average base salary for full-time public elementary and secondary school teachers with a bachelor's degree as their highest degree, by years of full-time teaching experience and state: 1993–94, 1999–2000, and 2003–04
77.	Average base salary for full-time public elementary and secondary school teachers with a master's degree as their highest degree, by years of full-time teaching experience and state: 1993–94, 1999–2000, and 2003–04
78.	Estimated average annual salary of teachers in public elementary and secondary schools: Selected years, 1959–60 through 2006–07
79.	Estimated average annual salary of teachers in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2006–07
80.	Staff employed in public elementary and secondary school systems, by functional area: Selected years, 1949–50 through fall 2006
81.	Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2006
82.	Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2005
83.	Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2004
84.	Staff and teachers in public elementary and secondary school systems, by state or jurisdiction: Fall 2000 through fall 2006
85.	Staff, enrollment, and pupil/staff ratios in public elementary and secondary school systems, by state or jurisdiction: Fall 1999 through fall 2006
86.	Principals in public and private elementary and secondary schools, by selected characteristics: 1993–94, 1999–2000, and 2003–04

Schools and School Districts

87.	Number of public school districts and public and private elementary and secondary schools: Selected years, 1869–70 through 2006–07
88.	Number and enrollment of regular public school districts, by enrollment size of district: Selected years, 1979–80 through 2006–07
89.	Number of public elementary and secondary education agencies, by type of agency and state or jurisdiction: 2005–06 and 2006–07
90.	Public elementary and secondary students, schools, pupil/teacher ratios, and finances, by type of locale: 2005–06 and 2006–07
91.	Selected statistics on enrollment, teachers, dropouts, and graduates in public school districts enrolling more than 15,000 students: 1990, 2000, 2004–05, and 2006
92.	Revenues, expenditures, poverty rate, and Title I allocations of public school districts enrolling more than 15,000 students: 2005–06 and fiscal year 2008
93.	Enrollment, poverty, and federal funds for the 100 largest school districts, by enrollment size in 2006: Fall 2006, 2005–06, and fiscal year 2008
94.	Public elementary and secondary schools, by type of school: Selected years, 1967–68 through 2006–07
95.	Number and percentage distribution of public elementary and secondary schools and enrollment, by type and enrollment size of school: 2004–05, 2005–06, and 2006–07
96.	Average enrollment and percentage distribution of public elementary and secondary schools, by type and size: Selected years, 1982–83 through 2006–07
97.	Public elementary and secondary school students, by racial/ethnic enrollment concentration of school: Fall 1995, fall 2000, and fall 2006
98.	Public elementary and secondary schools, by type and state or jurisdiction: 1990–91, 2000–01, and 2006–07
99.	Public elementary schools, by grade span, average school size, and state or jurisdiction: 2006–07
100.	Public secondary schools, by grade span, average school size, and state or jurisdiction: 2006–07
101.	Number and enrollment of traditional public and public charter elementary and secondary schools and percentages of students, teachers, and schools, by selected characteristics: 2003–04
102.	Percentage of public schools with permanent and portable (temporary) buildings and with environmental factors that interfere with instruction in classrooms, by selected school characteristics, type of factor, and extent of interference: 2005
103.	Percentage of public schools with enrollment under, at, or over capacity, by selected school characteristics: 1999 and 2005
High Sc	hool Completers and Dropouts
104.	High school graduates, by sex and control of school: Selected years, 1869–70 through 2008–09.
105.	Public high school graduates, by state or jurisdiction: Selected years, 1980–81 through 2006–07.
106.	Averaged freshman graduation rates for public secondary schools, by state or jurisdiction: Selected years, 1990–91 through 2005–06
107.	Public high school graduates and dropouts, by race/ethnicity and state or jurisdiction: 2005–06
108.	General Educational Development (GED) test takers and test passers, by age: 1971 through 2006
109.	Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2007
110.	Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and educational attainment: 1970 through 2007
111.	Number of 14- through 21-year-old students served under Individuals with Disabilities Education Act, Part B, who exited school, by exit reason, age, and type of disability: United States and other
	jurisdictions, 2004–05 and 2005–06

Educational Achievement

112.	Percentage of children demonstrating specific cognitive and motor skills at about 9 months of age, by child's age and selected characteristics: 2001–02	172
113.	Percentage of children demonstrating specific mental skills, physical skills, and secure emotional attachment to parents at about 2 years of age, by selected characteristics: 2003–04	173
114.	Children's specific language, literacy, mathematics, color knowledge, and fine motor skills at about 4 years of age, by age of child and selected characteristics: 2005–06	174
115.	Mean reading scale scores and specific reading skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2004	175
116.	Mean mathematics and science scale scores and specific mathematics skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2004	176
117.	Average reading scale score, by age and selected student and school characteristics: Selected years, 1971 through 2004	177
118.	Average reading scale score, by sex, grade, race/ethnicity, and percentile: Selected years, 1992 through 2007	178
119.	Average reading scale score, by age and amount of time spent on reading and homework: Selected years, 1984 through 2004	179
120.	Percentage of students at or above selected reading score levels, by age, sex, and race/ethnicity: Selected years, 1971 through 2004	180
121.	Average reading scale score and percentage of 4th-graders in public schools attaining reading achievement levels, by race/ethnicity and state or jurisdiction: Selected years, 1992 through 2007	182
122.	Average reading scale score and percentage of 8th-graders in public schools attaining reading achievement levels, by locale and state or jurisdiction: Selected years, 1998 through 2007	184
123.	Average reading scale scores of 4th-, 8th-, and 12th-graders, by selected student and school characteristics: Selected years, 1992 through 2007	186
124.	Average reading scale scores of 4th- and 8th-graders, by selected student and parent characteristics and school type: Various years, 2000 through 2005	187
125.	Average writing scale score and percentage of students attaining writing achievement levels, by selected student characteristics and grade level: 2002 and 2007	188
126.	Percentage of students attaining U.S. history achievement levels, by grade level and selected student characteristics: 2001 and 2006	189
127.	Average U.S. history scale score, by grade level and selected student characteristics, and percentage distribution of 12th-graders, by selected student characteristics: 1994, 2001, and 2006	190
128.	Average civics scale score and percentage of students attaining civics achievement levels, by grade level and selected student characteristics: 1998 and 2006	191
129.	Average economics scale score of 12th-graders, percentage attaining economics achievement levels, and percentage with different levels of economics coursework, by selected student and school characteristics: 2006.	192
130.	Percentage of students attaining geography achievement levels, by grade level and selected student characteristics: 2001	193
131.	Average mathematics scale score, by age and selected student and school characteristics: Selected years, 1973 through 2004	194
132.	Percentage of students at or above selected mathematics proficiency levels, by age, sex, and race/ethnicity: Selected years, 1978 through 2004	195
133.	Mathematics performance of 17-year-olds, by highest mathematics course taken, sex, and race/ethnicity: Selected years, 1978 through 2004	197
134.	Average mathematics scale score, percentage attaining mathematics achievement levels, and selected statistics on mathematics education of 4th-graders in public schools, by state or jurisdiction: Selected years, 1992 through 2007	198

135.	Average mathematics scale score and percentage attaining mathematics achievement levels of 8th-graders in public schools, by level of parental education and state or jurisdiction: Selected years, 1990 through 2007	199
136.	Average mathematics scale scores of 4th-, 8th-, and 12th-graders, by selected student and school characteristics: Selected years, 1990 through 2007	201
137.	Average mathematics scale score of 8th-graders and percentage reporting various attitudes toward mathematics work, by frequency of attitude and selected student and school characteristics: 2007	202
138.	Average science scale scores and percentage of 4th-, 8th-, and 12th-graders attaining science achievement levels, by selected student characteristics and percentile: 1996, 2000, and 2005.	203
139.	Average science scale score for 8th-graders in public schools, by selected student characteristics and state or jurisdiction: 1996, 2000, and 2005	204
140.	Average science scale score of 12th-graders and percentage reporting various attitudes toward science, by selected student and school characteristics: 2005	206
141.	SAT mean scores of college-bound seniors, by race/ethnicity: Selected years, 1986–87 through 2007–08	207
142.	SAT mean scores of college-bound seniors, by sex: 1966–67 through 2007–08	208
143.	SAT mean scores of college-bound seniors, by selected student characteristics: Selected years, 1995–96 through 2007–08	209
144.	SAT mean scores of college-bound seniors and percentage of graduates taking SAT, by state or jurisdiction: Selected years, 1987–88 through 2007–08	211
145.	ACT score averages and standard deviations, by sex and race/ethnicity, and percentage of ACT test takers, by selected composite score ranges and planned fields of study: Selected years, 1995 through 2008	212
146.	Percentage distribution of elementary and secondary school children, by average grades and selected child and school characteristics: 1996, 1999, and 2003	213
Courset	aking	
147.	Average number of Carnegie units earned by public high school graduates in various subject fields, by selected student characteristics: Selected years, 1982 through 2005	214
148.	Average number of Carnegie units earned by public high school graduates in career/technical education courses, by selected student characteristics: Selected years, 1982 through 2005	217
149.	Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by sex and race/ethnicity: Selected years, 1982 through 2005	220
150.	Percentage distribution of public and private high school graduates, by highest level of mathematics and science course completed and selected student characteristics: 2003–04	221
151.	Percentage of public and private high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: Selected years, 1982 through 2005	222
152.	Public high schools that offered and students enrolled in dual credit, Advanced Placement, and International Baccalaureate courses, by school characteristics: 2003	223
Student	Activities and Behavior	
153.	Percentage of high school seniors who say they engage in various activities, by selected student and school characteristics: 1992 and 2004	224
154.	Percentage of high school sophomores who participate in various school-sponsored extracurricular activities, by selected student characteristics: 1990 and 2002	225
155.	Percentage distribution of 4th-graders, by time spent on homework and television viewing each day and selected student and school characteristics: Selected years, 1992 through 2000	226
156.	Percentage of elementary and secondary school students who do homework outside of school, whose parents check that homework is done, and whose parents help with homework, by frequency and selected student and school characteristics: 2003 and 2007	227

157.	Tenth-graders' attendance patterns, by selected student and school characteristics: 1990 and 2002	22
158.	Percentage of public schools reporting crime incidents, and number and rate of incidents, by	00
159.	school characteristics and type of incident: 1999–2000 and 2005–06	23
159.	characteristics: 2003–04	23
160.	Number of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2006	23
161.	Percentage of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2006	23
162.	Percentage of students in grades 9 through 12 who reported experience with drugs and violence on school property, by race/ethnicity, grade, and sex: Selected years, 1997 through 2007	23
163.	Percentage of 12- to 17-year-olds reporting substance abuse during the past 30 days and the past year, by drug used, sex, and race/ethnicity: Selected years, 1982 through 2006	23
164.	Percentage of high school seniors reporting drug use, by type of drug and reporting period: Selected years, 1975 through 2007	24
State Re	egulations	
165.	Age range for compulsory school attendance and special education services, and policies on year-round schools and kindergarten programs, by state: Selected years, 1997 through 2008	24
166.	Minimum length of school year and policy on textbook selection, by state: 2000, 2004, and 2006.	24
167.	State requirements for a standard high school diploma: 2006	24
168.	States that use criterion-referenced tests (CRTs) aligned to state standards, by subject area and level: 2006–07	24
169.	States using minimum-competency testing, by grade levels assessed, expected uses of standards, and state or jurisdiction: 2001–02	24
170.	States requiring testing for initial certification of elementary and secondary teachers, by skills or knowledge assessment and state: 2007 and 2008	24
Revenue	es and Expenditures	
171.	Revenues for public elementary and secondary schools, by source of funds: Selected years, 1919–20 through 2005–06	24
172.	Revenues for public elementary and secondary schools, by source and state or jurisdiction: 2005–06	24
173.	Revenues for public elementary and secondary schools, by source and state or jurisdiction: 2004–05	24
174.	Summary of expenditures for public elementary and secondary education, by purpose: Selected years, 1919–20 through 2005–06	25
175.	Students transported at public expense and current expenditures for transportation: Selected years, 1929–30 through 2005–06	25
176.	Current expenditures for public elementary and secondary education, by state or jurisdiction: Selected years, 1969–70 through 2005–06	25
177.	Total expenditures for public elementary and secondary education, by function and state or jurisdiction: 2005–06	25
178.	Total expenditures for public elementary and secondary education, by function and state or jurisdiction: 2004–05	25
179.	Total expenditures for public elementary and secondary education, by function and subfunction: Selected years, 1990–91 through 2005–06	25
180.	Expenditures for instruction in public elementary and secondary schools, by subfunction and state or jurisdiction: 2004–05 and 2005–06	26
181.	Total and current expenditures per pupil in public elementary and secondary schools: Selected years, 1919–20 through 2005–06	26

182.	Total and current expenditures per pupil in fall enrollment in public elementary and secondary education, by function and state or jurisdiction: 2005–06	262
183.	Total and current expenditures per pupil in fall enrollment in public elementary and secondary education, by function and state or jurisdiction: 2004–05	263
184.	Current expenditure per pupil in fall enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2005–06	264
185.	Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1959–60 through 2005–06	266
Chapte	r 3. Postsecondary Education	
Enrollm	nent	
186.	Enrollment, staff, and degrees conferred in postsecondary institutions participating in Title IV programs, by type and control of institution, sex of student, type of staff, and type of degree: Fall 2005, fall 2006, and 2006–07	276
187.	Historical summary of faculty, students, degrees, and finances in degree-granting institutions: Selected years, 1869–70 through 2006–07	277
188.	Total fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: Selected years, 1947 through 2007	278
189.	Total fall enrollment in degree-granting institutions, by control and type of institution: 1963 through 2007	279
190.	Total fall enrollment in degree-granting institutions, by sex, age, and attendance status: Selected years, 1970 through 2017	280
191.	Total fall enrollment in degree-granting institutions, by level of enrollment, sex, age, and attendance status of student: 2007	281
192.	Total fall enrollment in degree-granting institutions, by control and type of institution, age, and attendance status of student: 2007	282
193.	Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 2007	283
194.	Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 2006	284
195.	Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 2005	285
196.	Total fall enrollment in degree-granting institutions, by attendance status, sex of student, and type and control of institution: Selected years, 1970 through 2006	286
197.	Fall enrollment and number of degree-granting institutions, by control and affiliation of institution: Selected years, 1980 through 2006	287
198.	Total first-time freshmen fall enrollment in degree-granting institutions, by attendance status, sex of student, and type and control of institution: 1955 through 2007	289
199.	Total first-time freshmen fall enrollment in degree-granting institutions, by attendance status, sex, control of institution, and state or jurisdiction: Selected years, 2000 through 2006	290
200.	Recent high school completers and their enrollment in college, by sex: 1960 through 2007	291
201.	Recent high school completers and their enrollment in college, by race/ethnicity: 1960 through 2007	292
202.	Graduation rates of previous year's 12th-graders and college attendance rates of those who graduated, by selected high school characteristics: 1999–2000 and 2003–04	294
203.	Estimated rate of 2005–06 high school graduates attending degree-granting institutions, by state: 2006	295
204.	Enrollment rates of 18- to 24-year-olds in degree-granting institutions, by type of institution and sex	296

205.	Total undergraduate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1967 through 2007
206.	Total graduate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1969 through 2007
207.	Total first-professional fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1969 through 2007
208.	Total fall enrollment in degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2006
209.	Total fall enrollment in public degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2006
210.	Total fall enrollment in private degree-granting institutions, by state or jurisdiction: Selected years, 1970 through 2006
211.	Total fall enrollment in all degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2005 and 2006
212.	Total fall enrollment in public degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2005 and 2006
213.	Total fall enrollment in private degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2005 and 2006
214.	Total fall enrollment in private not-for-profit degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2005 and 2006
215.	Total fall enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2005 and 2006
216.	Total fall enrollment in degree-granting institutions, by level of enrollment and state or jurisdiction: 2004, 2005, and 2006
217.	Total fall enrollment in degree-granting institutions, by control, level of enrollment, type of institution, and state or jurisdiction: 2006
218.	Total fall enrollment in degree-granting institutions, by control, level of enrollment, type of institution, and state or jurisdiction: 2005
219.	Full-time-equivalent fall enrollment in degree-granting institutions, by control and type of institution: 1967 through 2007
220.	Full-time-equivalent fall enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2000, 2005, and 2006
221.	Full-time-equivalent fall enrollment in degree-granting institutions, by control and state or jurisdiction: Selected years, 1980 through 2006
222.	Total full-year enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2005–06 and 2006–07
223.	Residence and migration of all freshmen students in degree-granting institutions, by state or jurisdiction: Fall 2006
224.	Residence and migration of all freshmen students in degree-granting institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2006
225.	Residence and migration of all freshmen students in 4-year degree-granting institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2006
226.	Total fall enrollment in degree-granting institutions, by race/ethnicity, sex, attendance status, and level of student: Selected years, 1976 through 2007
227.	Total fall enrollment in degree-granting institutions, by race/ethnicity of student and type and control of institution: Selected years, 1976 through 2007
228.	Fall enrollment in degree-granting institutions, by race/ethnicity of student and by state or jurisdiction: 2007
229.	Fall enrollment in degree-granting institutions, by race/ethnicity of student and by state or jurisdiction: 2006
230.	Total number of degree-granting institutions and fall enrollment in these institutions, by type and control of institution and percentage of minority enrollment: 2007

231.	status, and selected student characteristics: 2003–04	329
232.		330
233.	Graduate enrollment in science and engineering programs in degree-granting institutions, by discipline division: Fall 1994 through fall 2006	332
234.	Number of degree-granting institutions and enrollment in these institutions, by size, type, and control of institution: Fall 2006	333
235.	Selected statistics for degree-granting institutions enrolling more than 15,000 students in 2006: Selected years, 1990 through 2007	334
236.	Enrollment of the 120 largest degree-granting college and university campuses, by selected characteristics and institution: Fall 2006	344
237.	characteristics and institution: Fall 2006 and 2006–07	345
238.	Enrollment and degrees conferred in degree-granting institutions that serve large proportions of undergraduate Hispanic students, by selected characteristics and institution: Fall 2006 and 2006–07	346
239.		353
240.	Fall enrollment, degrees conferred, and expenditures in degree-granting historically Black colleges and universities, by institution: 2005, 2005–06, 2006, and 2006–07	354
241.	Selected statistics on degree-granting historically Black colleges and universities, by control and type of institution: Selected years, 1990 through 2007	356
242.	Fall enrollment in degree-granting historically Black colleges and universities, by type and control of institution: 1976 through 2006	357
Staff		
243.	Employees in degree-granting institutions, by sex, employment status, control and type of institution, and primary occupation: Selected years, fall 1987 through fall 2007	358
244.	Total and full-time-equivalent staff in degree-granting institutions, by employment status, control of institution, and occupation: Fall 1976, fall 1997, and fall 2007	359
245.	Employees in degree-granting institutions, by employment status, sex, control and type of institution, and primary occupation: Fall 2007	360
246.	Employees in degree-granting institutions, by race/ethnicity, sex, employment status, control and type of institution, and primary occupation: Fall 2007	362
247.	Number of full-time-equivalent (FTE) staff and faculty, and FTE staff and faculty/FTE student ratios in degree-granting institutions, by control and type of institution and state or jurisdiction: Fall 2005	363
248.	and type of institution: Selected years, fall 1970 through fall 2005	365
249.	rank: Fall 2003, fall 2005, and fall 2007	366
250.	Percentage distribution of full-time faculty and instructional staff in degree-granting institutions, by type and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003	367
251.	Percentage distribution of part-time faculty and instructional staff in degree-granting institutions, by type and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003	369
252.		371
253.	Full-time and part-time faculty and instructional staff in degree-granting institutions, by race/ethnicity, sex, and selected characteristics: Fall 2003	373
254.		

255.	Full-time and part-time faculty and instructional staff in degree-granting institutions, by race/ethnicity, sex, and program area: Fall 1998 and fall 2003	377
256.	Average base salary of full-time faculty and instructional staff in degree-granting institutions, by type and control of institution and field of instruction: Selected years, 1987–88 through 2003–04	379
257.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by academic rank, control and type of institution, and sex: Selected years, 1970–71 through 2007–08.	380
258.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by sex, academic rank, and control and type of institution: Selected years, 1999–2000 through 2007–08	383
259.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions,	303
	by control and type of institution and state or jurisdiction: 2006–07	384
260.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by control and type of institution and state or jurisdiction: 2005–06	385
261.	Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting institutions, by type and control of institution, rank of faculty, and state or jurisdiction: 2006–07.	386
262.	Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting institutions, by type and control of institution, rank of faculty, and state or jurisdiction: 2005–06.	387
263.	Average benefit expenditure for full-time instructional faculty on 9-month contracts in degree-granting institutions, by type of benefit and control of institution: Selected years, 1977–78 through 2006–07	388
264.	Percentage of full-time instructional staff with tenure for degree-granting institutions with a tenure system, by academic rank, sex, and control and type of institution: Selected years, 1993–94 through 2005–06	390
Institutio	ons	
265.	Degree-granting institutions, by control and type of institution: Selected years, 1949–50 through	
203.	2007–08	391
266.	Degree-granting institutions and branches, by type and control of institution and state or jurisdiction: 2007–08	392
267.	Degree-granting institutions that have closed their doors, by control and type of institution: 1969–70 through 2007–08	394
Degrees		
268.	Degrees conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1869–70 through 2017–18	395
269.	Associate's degrees conferred by degree-granting institutions, by discipline division: 1995–96 through 2006–07	396
270.	Associate's degrees and other subbaccalaureate awards conferred by degree-granting institutions, by length of curriculum, sex of student, and discipline division: 2006–07	397
271.	Bachelor's degrees conferred by degree-granting institutions, by field of study: Selected years, 1970–71 through 2006–07.	398
272.	Master's degrees conferred by degree-granting institutions, by field of study: Selected years, 1970–71 through 2006–07	399
273.	Doctor's degrees conferred by degree-granting institutions, by field of study: Selected years, 1970–71 through 2006–07	400
274.	Bachelor's, master's, and doctor's degrees conferred by degree-granting institutions, by field of study and year: Selected years, 1970–71 through 2006–07	401
275.	Bachelor's, master's, and doctor's degrees conferred by degree-granting institutions, by sex of student and discipline division: 2006–07	402
276.	Degrees conferred by degree-granting institutions, by control of institution and level of degree: 1969–70 through 2006–07	417

2//.	of study: 2006–07	418
278.	Number of degree-granting institutions conferring degrees, by control, level of degree, and field of study: 2006–07	419
279.	Number of institutions and first-professional degrees conferred by degree-granting institutions in dentistry, medicine, and law, by sex of student: Selected years, 1949–50 through 2006–07	420
280.	First-professional degrees conferred by degree-granting institutions, by sex of student, control of institution, and field of study: Selected years, 1985–86 through 2006–07	421
281.	Associate's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2006–07	422
282.	Associate's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07	423
283.	Associate's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2005–06	424
284.	Bachelor's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2006–07	425
285.	Bachelor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07	426
286.	Bachelor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2005–06	427
287.	Master's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2006–07	428
288.	Master's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07	429
289.	Master's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2005–06	430
290.	Doctor's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2006–07	431
291.	Doctor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07	432
292.	Doctor's degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2005–06	433
293.	First-professional degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2006–07	434
294.	First-professional degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2006–07	435
295.	First-professional degrees conferred by degree-granting institutions, by sex, race/ethnicity, and field of study: 2005–06.	435
296.	Degrees in agriculture and natural resources conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07	436
297.	Degrees in architecture and related services conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07	437
298.	Degrees in the biological and biomedical sciences conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1951–52 through 2006–07	438
299.	Degrees in biology, microbiology, and zoology conferred by degree-granting institutions, by level of degree: 1970–71 through 2006–07	439
300.	Degrees in business conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1955–56 through 2006–07	440
301.	Degrees in communication, journalism, and related programs and in communications technologies conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through	
	2006–07	441

302.	Degrees in computer and information sciences conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07	442
303.	Degrees in education conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07	443
304.	Degrees in engineering and engineering technologies conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07	44
305.	Degrees in chemical, civil, electrical, and mechanical engineering conferred by degree-granting institutions, by level of degree: 1970–71 through 2006–07	44
306.	Degrees in English language and literature/letters conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07	44
307.	Degrees in modern foreign languages and literatures conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07	44
308.	Degrees in French, German, Italian, and Spanish conferred by degree-granting institutions, by level of degree: Selected years, 1949–50 through 2006–07	448
309.	Degrees in Arabic, Chinese, Korean, and Russian conferred by degree-granting institutions, by level of degree: 1969–70 through 2006–07	449
310.	Degrees in the health professions and related sciences conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07	450
311.	Degrees in mathematics and statistics conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07	45
312.	Degrees in the physical sciences and science technologies conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1959–60 through 2006–07	45
313.	Degrees in chemistry, geology and earth science, and physics conferred by degree-granting institutions, by level of degree: 1970–71 through 2006–07	45
314.	Degrees in psychology conferred by degree-granting institutions, by level of degree and sex of student: Selected years, 1949–50 through 2006–07	45
315.	Degrees in public administration and social services conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07	45
316.	Degrees in the social sciences and history conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07	45
317.	Degrees in economics, history, political science and government, and sociology conferred by degree-granting institutions, by level of degree: Selected years, 1949–50 through 2006–07	45
318.	Degrees in visual and performing arts conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 through 2006–07	45
319.	Statistical profile of persons receiving doctor's degrees, by field of study and selected characteristics: 2004–05 and 2005–06	45
320.	Degrees conferred by degree-granting institutions, by control, level of degree, and state or jurisdiction: 2006–07	46
321.	Bachelor's and master's degrees conferred by degree-granting institutions, by field of study and state or jurisdiction: 2006–07	46
322.	Degrees conferred by degree-granting institutions, by level of degree and state or jurisdiction: 2005–06 and 2006–07	46
323.	Doctor's degrees conferred by the 60 institutions conferring the most doctor's degrees: 1997–98 through 2006–07	46
Outcom	es es	
324.	Percentage distribution of 1990 high school sophomores, by highest level of education completed through 2000 and selected student characteristics: 2000	46
325.	Mean number of semester credits completed by bachelor's degree recipients, by course area and major: 1976, 1984, and 1992–93	46

326.	Number and percentage of degree-granting institutions with first-year undergraduates using various selection criteria for admission, by type and control of institution: Selected years, 2000–01 through 2007–08	467
327.	Number of applications, admissions, and enrollees; their distribution across institutions accepting various percentages of applications; and SAT and ACT scores of applicants, by type and control of institution: 2007–08	468
328.	Percentage of degree-granting institutions offering remedial services, by type and control of institution: 1989–90 through 2007–08	469
329.	Percentage distribution of enrollment and completion status of first-time postsecondary students starting during the 1995–96 academic year, by type of institution and other student characteristics: 2001	470
330.	Average scores on Graduate Record Examination (GRE) general and subject tests: 1965 through 2007	472
Student	Charges and Student Financial Assistance	
331.	Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting institutions, by type and control of institution: 1964–65 through 2007–08	474
332.	Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting institutions, by type and control of institution and state or jurisdiction: 2006–07 and 2007–08	477
333.	Undergraduate tuition and fees and room and board rates for full-time students in degree-granting institutions, by percentile of charges and control and type of institution: 2000–01 through 2007–08	478
334.	Average graduate and first-professional tuition and required fees in degree-granting institutions, by first-professional field of study and control of institution: 1987–88 through 2007–08	479
335.	Percentage of undergraduates receiving aid, by type and source of aid and selected student characteristics: 2003–04	480
336.	Full-time, first-time degree/certificate seeking undergraduate students enrolled in degree-granting institutions, by participation and average amount awarded in financial aid programs, and type and control of institution: 2000–01 through 2005–06	481
337.	Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and selected student characteristics: 2003–04	482
338.	Average amount of financial aid awarded to part-time or part-year undergraduates, by type and source of aid and selected student characteristics: 2003–04	483
339.	control and type of institution: 2003–04	484
340.	Percentage of full-time, full-year undergraduates receiving aid, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2003–04	485
341.	Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2003–04	486
342.	Percentage of part-time or part-year undergraduates receiving aid, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2003–04	488
343.	Percentage of full-time and part-time undergraduates receiving federal aid, by aid program and control and type of institution: 2003–04	489
344.	Amount borrowed, aid status, and sources of aid for full-time, full-year postbaccalaureate students, by level of study and control and type of institution: Selected years, 1992–93 through 2003–04.	490
345.	Amount borrowed, aid status, and sources of aid for part-time or part-year postbaccalaureate students, by level of study and control and type of institution: Selected years, 1992–93 through 2003–04	491
346.	Percentage of full-time, full-year postbaccalaureate students receiving aid, by type of aid, level of study, and control and type of institution: Selected years, 1992–93 through 2003–04	492
347.	Percentage of part-time or part-year postbaccalaureate students receiving aid, by type of aid, level of study, and control and type of institution: Selected years, 1992–93 through 2003–04	493

Revenue

348.	Current-fund revenue of degree-granting institutions, by source of funds: Selected years, 1919–20 through 1995–96
349.	Current-fund revenue of public degree-granting institutions, by source of funds: Selected years, 1980–81 through 2000–01
350.	Revenues of public degree-granting institutions, by source of revenue and type of institution: 2003–04, 2004–05, and 2005–06
351.	Revenues of public degree-granting institutions, by source of revenue and state or jurisdiction: 2005–06
352.	Appropriations from state and local governments for public degree-granting institutions, by state or jurisdiction: Selected years, 1990–91 through 2005–06
353.	Total revenue of private not-for-profit degree-granting institutions, by source of funds and type of institution: 1997–98 through 2005–06
354.	Total revenue of private not-for-profit degree-granting institutions, by source of funds and type of institution: 2005–06
355.	Total revenue of private for-profit degree-granting institutions, by source of funds and type of institution: 1999–2000 through 2005–06
356.	Total revenue of private for-profit degree-granting institutions, by source of funds and type of institution: 2004–05 and 2005–06
357.	Current-fund revenue received from the federal government by the 120 degree-granting institutions receiving the largest amounts, by control and rank order: 2005–06
358.	Voluntary support for degree-granting institutions, by source and purpose of support: Selected years, 1959–60 through 2006–07
359.	Endowment funds of the 120 colleges and universities with the largest endowments, by rank order: 2006 and 2007
xpend	itures
360.	Current-fund expenditures and current-fund expenditures per full-time-equivalent student in degree-granting institutions, by type and control of institution: Selected years, 1970–71 through 2000–01
361.	Current-fund expenditures and educational and general expenditures of institutions of higher education, by purpose and per student: Selected years, 1929–30 through 1995–96
362.	Expenditures of public degree-granting institutions, by purpose of expenditure and type of institution: 2003–04, 2004–05, and 2005–06
363.	Expenditures of public degree-granting institutions, by type of institution, purpose of expenditure, and state or jurisdiction: 2003–04, 2004–05, and 2005–06
364.	Total expenditures of private not-for-profit degree-granting institutions, by purpose and type of institution: 1996–97 through 2005–06
365.	Total expenditures of private not-for-profit degree-granting institutions, by purpose and type of institution: 2005–06
366.	Total expenditures of private for-profit degree-granting institutions, by purpose and type of institution: 1998–99 through 2005–06
367.	Total expenditures of private for-profit degree-granting institutions, by purpose and type of institution: 2004–05 and 2005–06
368.	Total expenditures of private not-for-profit and for-profit degree-granting institutions, by level and state or jurisdiction: 1998–99 through 2005–06

Adult E	ducation
369.	Participants in adult basic and secondary education programs, by type of program and state or jurisdiction: Selected fiscal years, 1990 through 2005
370.	Participation of employed persons, 17 years old and over, in career-related adult education during the previous 12 months, by selected characteristics of participants: Various years, 1995 through 2005
371.	Participation rate of persons, 17 years old and over, in adult education during the previous 12 months, by selected characteristics of participants: Selected years, 1991 through 2005
Vocation	nal Education
372.	Number of non-degree-granting Title IV institutions offering postsecondary education, by control and state or jurisdiction: Selected years, 2000–01 through 2007–08
Chapter	4. Federal Programs for Education and Related Activities
373.	Federal support and estimated federal tax expenditures for education, by category: Selected fiscal years, 1965 through 2008
374.	Federal on-budget funds for education, by agency: Selected fiscal years, 1970 through 2007
375.	Federal on-budget funds for education, by level/educational purpose, agency, and program: Selected fiscal years, 1970 through 2008
376.	Estimated federal support for education, by type of ultimate recipient and agency: Fiscal year 2007
377.	U.S. Department of Education outlays, by type of recipient and level of education: Selected fiscal years, 1980 through 2008
378.	U.S. Department of Education appropriations for major programs, by state or jurisdiction: Fiscal year 2007
379.	Appropriations for Title I, No Child Left Behind Act of 2001, by program and state or jurisdiction: Fiscal years 2007 and 2008
380.	Federal obligations for research, development, and R&D plant, by performers, fields of science, and category of obligation: Fiscal years 1999 through 2007
Chapter	5. Outcomes of Education
Educati	onal Characteristics of the Workforce
381.	Labor force participation rates and employment to population ratios of persons 16 to 64 years old, by highest level of education, age, sex, and race/ethnicity: 2007
382.	Unemployment rate of persons 16 years old and over, by age, sex, race/ethnicity, and educational attainment: 2005, 2006, and 2007
383.	Occupation of employed persons 25 years old and over, by educational attainment and sex: 2007
384.	Median annual income of year-round, full-time workers 25 years old and over, by highest level of educational attainment and sex: 1990 through 2007
385.	Distribution of earnings and median earnings of persons 25 years old and over, by highest level of educational attainment and sex: 2007
386.	Literacy skills of adults, by type of literacy, proficiency levels, and selected characteristics: 1992 and 2003
387.	Percentage of 12th-graders working different numbers of hours per week, by selected student characteristics and school locale type: 1992 and 2004

388.	College enrollment and labor force status of 2005, 2006, and 2007 high school completers, by sex and race/ethnicity: 2005, 2006, and 2007
389.	Labor force status of high school dropouts, by sex and race/ethnicity: Selected years, 1980 through 2007
390.	Current postsecondary education and employment status, wages earned, and living arrangements of special education students out of secondary school up to 4 years, by type of disability: 2005.
391.	Full-time employment status of bachelor's degree recipients 1 year after graduation, by field of study: Selected years, 1976 through 2001
392.	Percentage distribution of 1999–2000 bachelor's degree recipients 1 year after graduation, by field of study, time to completion, enrollment status, employment status, occupational area, job characteristics, and annual salaries: 2001
393.	Enrollment in postbaccalaureate certificate or advanced degree programs and highest degree attained by 1992–93 bachelor's degree recipients, by education characteristics: 2003
394.	Average annual salary of bachelor's degree recipients employed full time 1 year after graduation, by field of study: Selected years, 1976 through 2001
395.	Percentage of 18- to 25-year-olds reporting substance abuse during the past 30 days and the past year, by drug used: Selected years, 1982 through 2006
396.	Percentage of 18- to 25-year-olds reporting substance abuse during the past 30 days and the past year, by drug used and selected characteristics: 2000 and 2006
397.	Percentage of 1972 high school seniors, 1992 high school seniors, and 2004 high school seniors who felt that certain life values were "very important," by sex: Selected years, 1972 through 2004
Populat 398.	and the control of th
398.	Selected population and finance statistics, school enrollment, and teachers, by major areas of the world: Selected years, 1980 through 2005
399.	Selected population and enrollment statistics for countries with populations over 10 million, by continent: Selected years, 1990 through 2006.
400.	School-age populations as a percentage of total population, by age group and country: Selected years, 1985 through 2005
401.	Percentage of population enrolled in secondary and postsecondary education, by age group and country: Selected years, 1985 through 2005
402.	Pupils per teacher in public and private elementary and secondary schools, by level of education and country: Selected years, 1985 through 2006
Achieve	ement, Instruction, and Student Activities
403.	Average mathematics literacy, reading literacy, and science literacy scores of 15-year-olds, by sex and country: 2006
404.	Mean scores and percentage distribution of 15-year-olds scoring at each mathematics literacy proficiency level, by country: 2006
405.	Mean scores and percentage distribution of 15-year-olds scoring at each scientific literacy proficiency level, by country: 2006
406.	Average fourth-grade mathematics scores, by content areas, index of time students spend doing mathematics homework in a normal school week, and country: 2003
407.	Average eighth-grade mathematics scores, by content areas, index of time students spend doing mathematics homework in a normal school week, and country: 2003
408.	Percentage of lesson time spent on various mathematics activities, yearly mathematics instructional time, and mathematics instructional time as a percentage of total instructional time in eighth grade, by country: 2003

409.	Average size and scores of eighth-grade mathematics classes and Index of Teachers' Emphasis on Mathematics Homework (EMH), by country: 2003
410.	Eighth-grade students' perceptions about mathematics and hours spent on leisure activities, by country: 2003
411.	Average mathematics scores at the end of secondary school, by sex, average time spent studying mathematics out of school, and country: 1995
412.	Average fourth-grade science scores in content areas and average time spent teaching science in school, by country: 2003
413.	Average eighth-grade science scores in content areas and average time spent studying out of school, by country: 2003
414.	Instructional practices and time spent teaching science in eighth grade, by country: 2003
Postsec	ondary Degrees
415.	Number of bachelor's degree recipients per 100 persons of the typical age of graduation, by sex and country: 2002 through 2005
416.	Percentage of bachelor's degrees awarded in mathematics and science, by field and country: Selected years, 1985 through 2005
417.	Percentage of graduate degrees awarded in mathematics and science, by field and country: Selected years, 1985 through 2005
Finance	s ·
418.	Public and private education expenditures per student, by level of education and country: Selected years, 2000 through 2005
419.	Total public direct expenditures on education as a percentage of the gross domestic product, by level and country: Selected years, 1985 through 2005
Foreign	Students in the United States
420.	Foreign students enrolled in institutions of higher education in the United States and other jurisdictions, by continent, region, and selected countries of origin: Selected years, 1980–81 through 2006–07
Chapter	7. Libraries and Educational Technology
Librarie	S .
421.	Selected statistics on school libraries/media centers, by control and level of school: 1999–2000 and 2003–04
422.	Selected statistics on public school libraries/media centers, by level and enrollment size of school: 2003–04
423.	Selected statistics on public school libraries/media centers, by state: 2003–04
424.	Collections, staff, and operating expenditures of degree-granting institution libraries: Selected years, 1976–77 through 2005–06
425.	Collections, staff, and operating expenditures of the 60 largest college and university libraries: 2005–06
426.	Public libraries, books and serial volumes, library visits, circulation, and reference transactions, by state: Fiscal year 2005
Comput	ers and Technology
427.	Public schools and instructional rooms with internet access, by selected school characteristics: Selected years, 1994 through 2005
428.	Use of the Internet by persons 3 years old and over, by type of use and selected characteristics of students and other users; 2003

429.	Number and percentage of home computer users, by type of application and selected characteristics: 1997 and 2003				
430.	. Number and percentage of student home computer users, by type of application and selected characteristics: 2003				
431.	Student use of computers, by level of enrollment, age, and student and school characteristics: 1993, 1997, and 2003	625			
432.	Percentage of workers, 18 years old and over, using computers on the job, by type of computer application and selected characteristics: 1993, 1997, and 2003	627

INTRODUCTION

In fall 2008, about 74.1 million people were enrolled in American schools and colleges (table 1). About 4.6 million people were employed as elementary and secondary school teachers or as college faculty, in full-time equivalents (FTE). Other professional, administrative, and support staff at educational institutions totaled 5.2 million. All data for 2008 in this Introduction are projected. Some data for other years are projected or estimated as noted. In discussions of historical trends, different time periods and specific years are cited, depending on the timing of important changes as well as the availability of relevant data.

Elementary/Secondary Education

Enrollment

A pattern of annual increases in total public elementary and secondary school enrollment began in 1985 (table 3). Between 1985 and 2008, public school enrollment rose 26 percent, from 39.4 million to 49.8 million (table 2). Private school enrollment grew more slowly than public school enrollment during this period, rising 9 percent, from 5.6 million to 6.1 million. As a result, the percentage of elementary and secondary students enrolled in private schools declined from 12.4 percent in 1985 to 10.8 percent in 2008.

In public schools between 1985 and 2008, there was a 29 percent increase in elementary enrollment (prekindergarten through grade 8), compared with a 20 percent increase in secondary enrollment. Part of the relatively fast growth in public elementary school enrollment resulted from the expansion of prekindergarten programs (table 37). Between 1985 and 2006, enrollment in prekindergarten increased 611 percent, while enrollment in other elementary grades increased 23 percent. The number of children enrolled in prekindergarten increased from 0.2 million in 1985 to 1.1 million in 2006, and the number enrolled in kindergarten through grade 8 increased from 26.9 million to 33.1 million. Public secondary school enrollment declined 8 percent from 1985 to 1990, but then started increasing. For most of the period after 1992, secondary enrollment increased more rapidly than elementary enrollment, leading to relatively large secondary enrollment gains in recent years. For example, between 1998 and 2008, public secondary school enrollment rose 13 percent, compared with 5 percent for public elementary school enrollment. Overall, public school enrollment rose 7 percent between 1998 and 2008.

Since the enrollment rates of kindergarten, elementary, and secondary school-age children changed by less than 2

percentage points between 1985 and 2007 (table 7), increases in public and private elementary and secondary school enrollment have been driven primarily by increases in the number of children in these age groups. The enrollment rate of prekindergarten age children (ages 3 and 4) rose between 1985 and 2007, which was reflected by an increase in prekindergarten enrollment.

The National Center for Education Statistics (NCES) forecasts record levels of total elementary and secondary enrollment through at least 2017, reflecting expected increases in the school-age population. For public schools, the projected fall 2008 enrollment is expected to be a new record, and new records are expected every year through 2017, the last year for which NCES enrollment projections have been developed (table 3). Public elementary school enrollment (prekindergarten through grade 8) is projected to increase by 10 percent between 2008 and 2017. Public secondary school enrollment (grades 9 through 12) is expected to increase 5 percent between 2008 and 2017. Overall, total public school enrollment is expected to increase 9 percent between 2008 and 2017.

Teachers

A projected 3.7 million full-time-equivalent (FTE) elementary and secondary school teachers were engaged in class-room instruction in fall 2008 (table 4). This number has risen 15 percent since 1998. The 2008 projected number of FTE teachers includes 3.2 million public school teachers and 0.5 million private school teachers.

The number of public school teachers has risen faster than the number of public school students over the past 10 years, resulting in declines in the pupil/teacher ratio (table 64). In the fall of 2008, there were a projected 15.3 public school pupils per teacher, compared with 16.4 public school pupils per teacher 10 years earlier.

The average salary for public school teachers in 2006–07 was \$50,816, about 3 percent higher than in 1996–97, after adjustment for inflation (table 78). The salaries of public school teachers have generally maintained pace with inflation since 1990–91.

Student Performance

Most of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The national main NAEP and state

1

NAEP provide current information about student performance in a variety of subjects, while long-term trend NAEP provides information on performance since the early 1970s in reading and mathematics only. Results from long-term trend NAEP are included in the discussion in chapter 2 of the *Digest*, while the information in this Introduction includes only results from the national main and state NAEP.

The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and nonpublic schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. The state NAEP is identical in content to the national main NAEP, but the state NAEP reports information only for public school students. Chapter 2 presents more information on the NAEP designs and methodology, and additional details appear in Appendix A: Guide to Sources.

Reading

Reported on a scale of 0 to 500, national average reading scores of 4th- and 8th-graders were higher in 2007 than in 1992, by 4 and 3 points, respectively (table 123). These 2007 scores were also higher than the 2005 scores. The reading score of 12th-graders was 6 points lower in 2005 (the most recent assessment year for grade 12) than in 1992. In the most recent assessment, females at each grade level outscored their male counterparts. For example, 12th-grade females scored 13 points higher than males in 2005. Average scores were higher in 2007 than in 1992 for White, Black, Hispanic, and Asian/Pacific Islander 4th-graders (ranging from 6 to 16 points) and for White, Black, and Hispanic 8th-graders (ranging from 5 to 7 points), while scores were lower in 2005 than in 1992 for White, Black, and Hispanic 12th-graders (ranging from 5 to 7 points).

The 2007 main NAEP reading assessment of states found that the average reading proficiency of public school 4th- and 8th-graders varied across participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia). For 4th-graders in public schools, the U.S. average score was 220, with average scores in participating jurisdictions ranging from 197 in the District of Columbia to 236 in Massachusetts (table 121). For 8th-graders in public schools, the U.S. average score was 261, with average scores in participating jurisdictions ranging from 241 in the District of Columbia to 273 in the Department of Defense schools, Massachusetts, and Vermont (table 122).

Mathematics

From 1990 to 2007, average NAEP mathematics scores increased 27 points for 4th-graders and 19 points for 8th-graders (table 136). (NAEP mathematics scores are reported on a scale of 0 to 500.) Increases in scores were seen for both males and females and for most racial/ethnic groups. Both male and female 4th- and 8th-graders scored higher in 2007 than in any of the previous assessments. In 2007, at each grade, males

outscored females by 2 points; these score gaps were not measurably different from the gaps in either 2005 or 1990. At grade 4, average scores in 2007 for White, Black, Hispanic, and Asian/Pacific Islander students were higher than the scores in any of the previous assessments. Although the score for American Indian/Alaska Native 4th-graders increased over time, there was no measurable difference between their 2005 and 2007 scores. At grade 8, average scores in 2007 for White, Black, and Hispanic students were higher than in any of the previous assessments. The average score for 8th-grade Asian/Pacific Islander students was higher in 2007 than in 1990, but not measurably different from their 2005 score. No measurable differences were detected in the scores for American Indian/Alaska Native 8th-graders over the assessment years.

The 2007 main NAEP assessment of states found that the average mathematics proficiency of public school 4th- and 8th-graders varied across participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia). For 4th-graders in public schools, the U.S. average score was 239, with average scores in participating jurisdictions ranging from 214 in the District of Columbia to 252 in Massachusetts (table 134). For 8th-graders in public schools, the U.S. average score was 280, with average scores in participating jurisdictions ranging from 248 in the District of Columbia to 298 in Massachusetts (table 135).

Science

NAEP has assessed the science abilities of students in grades 4, 8, and 12 in both public and private schools since 1996, using a separate scale of 0 to 300 for each grade. The national average 4th-grade science score increased from 147 in 1996 to 151 in 2005; there was no measurable change in the 8th-grade score; and the 12th-grade score decreased from 150 in 1996 to 147 in 2005 (table 138). Certain subgroups outperformed others in science in 2005. For example, males outperformed females at all three grades. Male 4th-graders had a higher average score in 2005 than in 1996, and both male and female 12th-graders had lower scores in 2005 than in 1996. White students scored higher, on average, than Black and Hispanic students at all three grades in 2005. At grade 4, average scores were higher for White, Black, Hispanic, and Asian/ Pacific Islander students in 2005 than in 1996. At grade 8, the average score for Black students was higher in 2005 than in 1996, but the scores did not measurably change for other racial/ethnic groups. At grade 12, there were no measurable changes in average scores for any racial/ethnic group when comparing results from 2005 with those from 1996.

International Comparisons

On the 2003 Trends in International Mathematics and Science Study (TIMSS), the average mathematics score of U.S. 4th-graders exceeded the international average for the 25 participating educational systems (table 406). (Most participating educational systems represent countries; however, some represent subnational entities with separate educational systems.)

U.S. 4th-graders outscored students in 13 educational systems, but were outperformed by students in 11 educational systems. Also on the 2003 TIMSS, U.S. 8th-graders exceeded the international average score for the 45 educational systems participating at the 8th-grade level (table 407). U.S. 8th-graders outscored students in 25 educational systems, and were outperformed by students in 9 educational systems.

On the 2006 Program for International Student Assessment (PISA), the average score of U.S. 15-year-olds in mathematics literacy was 474, which was lower than the Organization for Economic Cooperation and Development (OECD) average of 498 (table 403). (Possible scores on PISA assessments range from 0 to 1,000.) The average mathematics literacy score in the United States was lower than the average score in 23 of the other 29 OECD countries for which comparable PISA results were reported, higher than the average score in 4 of the other OECD countries, and not measurably different from the average score in 2 of the OECD countries. In science literacy, the average score of 15-year-olds in the United States was lower than the average score in 16 of the other 29 OECD countries, higher than the average score in 5 of the other OECD countries, and not measurably different from the average score in 8 of the OECD countries.

High School Graduates and Dropouts

About 3,328,000 high school students are expected to graduate during the 2008–09 school year (table 104), including 3,011,000 public school graduates and 317,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The number of high school graduates projected for 2008–09 is lower than the record-high projection of 3,346,000 graduates for 2007–08, but exceeds the high point during the baby boom era in 1976–77, when 3,152,000 students earned diplomas. In 2005–06, an estimated 73.4 percent of public high school students graduated on time—that is, received a diploma 4 years after beginning their freshman year (table 106).

The number of General Educational Development (GED) credentials issued rose from 330,000 in 1977 to 487,000 in 2000 (table 108). A record number of 648,000 GED credentials were issued in 2001. In that year, candidates who had already taken any of the five tests in the GED test battery had to complete the entire battery before the end of the year or else take all five tests over again. The reason is that a new GED test series was introduced in 2002. In the same year, data collection procedures changed, with data from the states on the number of credentials issued being replaced by test data from individual test-takers. In 2006, 464,000 passed the GED tests, up from 330,000 in 2002, the first year of the new test series.

The percentage of dropouts among 16- to 24-year-olds has shown some decreases over the past 20 years. This percent-

age, known as the status dropout rate, includes all people in the 16- to 24-year-old age group who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts.) Between 1987 and 2007, the status dropout rate declined from 12.6 percent to 8.7 percent (table 109). Although the status dropout rate declined for both Blacks and Hispanics during this period, their rates (8.4 and 21.4 percent, respectively) remained higher than the rate for Whites (5.3 percent) in 2007. This measure is based on the civilian noninstitutionalized population, which excludes people in prisons, people in the military, and other people not living in households.

Educational Technology

The number of computers in public schools has increased. In 2005, the average public school contained 154 instructional computers, compared with 90 in 1998 (table 427). One important technological advance that has come to classrooms following the introduction of computers has been connections to the Internet. The percentage of instructional rooms with access to the Internet increased from 51 percent in 1998 to 94 percent in 2005 (figure 29). Nearly all schools had access to the Internet in 2005 (table 427).

Postsecondary Education

College Enrollment

College enrollment was a projected 18.2 million in fall 2008, higher than in any previous year except 2007 (table 3). College enrollment is expected to continue setting new records throughout the fall 2009 through fall 2017 period. Between fall 2007 and fall 2017, enrollment is expected to increase by 10 percent. Despite decreases in the traditional college-age population during the late 1980s and early 1990s, total enrollment increased during this period (tables 7, 15, 188, and 204). The traditional college-age population (18 to 24 years old) rose 16 percent between 1997 and 2007, which was reflected by an increase of 26 percent in college enrollment. Between 1997 and 2007, the number of full-time students increased by 34 percent compared to a 15 percent increase in part-time students (table 188). During the same time period, the number of males enrolled increased 22 percent, while the number of females enrolled increased 29 percent.

Faculty

In fall 2007, degree-granting institutions—defined as postsecondary institutions that grant an associate's or higher degree and are eligible for Title IV federal financial aid programs—employed 1.4 million faculty members, including 0.7 million full-time and 0.7 million part-time faculty (table 245). In addition, degree-granting institutions employed 0.3 million graduate assistants.

¹ Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests*?, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

Postsecondary Degrees

During the 2008–09 academic year, postsecondary degrees are projected to number 731,000 associate's degrees; 1,603,000 bachelor's degrees; 649,000 master's degrees; 93,300 first-professional degrees; and 61,700 doctor's degrees (table 268). Between 1996–97 and 2006–07, the number of degrees conferred rose at all levels. The number of associate's degrees was 27 percent higher in 2006–07 than in 1996–97, the number of bachelor's degrees was 30 percent higher, the number of master's degrees was 44 percent higher, the number of first-professional degrees was 14 percent higher, and the number of doctor's degrees was 32 percent higher.

Between 1996-97 and 2006-07, the number of bachelor's degrees awarded to males increased 25 percent, while the number awarded to females increased 34 percent. As a result, females earned 57 percent of all bachelor's degrees in 2006-07, compared with 56 percent in 1996-97. Between 1996–97 and 2006–07, the number of White students earning bachelor's degrees increased 22 percent, compared with larger increases of 55 percent for Black students, 84 percent for Hispanic students, 53 percent for Asian/Pacific Islander students, and 54 percent for American Indian/Alaska Native students (table 284). In 2006–07, White students earned 72 percent of all bachelor's degrees awarded (vs. 77 percent in 1996–97), Black students earned 10 percent (vs. 8 percent in 1996–97), Hispanic students earned 8 percent (vs. 5 percent in 1996–97), and Asian/Pacific Islander students earned 7 percent (vs. 6 percent in 1996-97). American Indian/Alaska Native students earned about 1 percent of the degrees in both years.

Undergraduate Prices

For the 2007–08 academic year, annual prices for undergraduate tuition, room, and board were estimated to be \$11,578 at public institutions and \$29,915 at private institutions (table 331). Between 1997–98 and 2007–08, prices for undergraduate tuition, room, and board at public institutions rose 30 percent, and prices at private institutions rose 23 percent, after adjustment for inflation.

Educational Attainment

The U.S. Census Bureau collects annual statistics on the educational attainment of the population. Between 1998 and 2008, the percentage of the adult population 25 years of age and over who had completed high school rose from 83 percent to 87 percent, and the percentage of adults with a bachelor's degree increased from 24 percent to 29 percent (table 8). High school completers include those people who graduated from high school with a diploma, as well as those who completed high school through equivalency programs. The percentage of young adults (25- to 29-year-olds) who had completed high school in 2008 was about the same as it was in 1998 (88 percent in both years). The percentage of young adults who had completed a bachelor's degree increased from 27 percent in 1998 to 31 percent in 2008.

Education Expenditures

Expenditures for public and private education, from prekindergarten through graduate school (excluding postsecondary schools not awarding associate's or higher degrees), are estimated at \$1,017 billion for 2007–08 (table 25). Expenditures of elementary and secondary schools are expected to total \$631 billion, while those of degree-granting postsecondary institutions are expected to total \$386 billion. Total expenditures for education are expected to amount to 7.4 percent of the gross domestic product in 2007–08, about 0.5 percentage points higher than in 1997–98.

Interpreting Statistics

Readers should be aware of the limitations of statistics. These limitations vary with the exact nature of a particular survey. For example, estimates based on a sample of institutions will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey procedures. Standard errors are available for sample survey data appearing in this report. In most cases, standard errors for all items appear in the printed table. In some cases, only standard errors for key items appear in the printed table. Standard errors that do not appear in the tables are available from NCES upon request. Although some of the surveys conducted by NCES are census or universe surveys (which attempt to collect information from all potential respondents), all surveys are subject to design, reporting, and processing errors and errors due to nonresponse. Differences in sampling, data collection procedures, coverage of target population, timing, phrasing of questions, scope of nonresponse, interviewer training, data processing, coding, and so forth mean that the results from the different sources may not be strictly comparable. More information on survey methodologies can be found in Appendix A: Guide to Sources.

Estimates presented in the text and figures are rounded from original estimates, not from a series of roundings. Percentages in the text are rounded to whole numbers, while ratios and percentage distributions are normally presented to one decimal place, where applicable.

Unless otherwise noted, all data in this report are for the 50 states and the District of Columbia. Unless otherwise noted, all financial data are in current dollars, meaning not adjusted for changes in the purchasing power of the dollar due to inflation. Price indexes for inflation adjustments can be found in table 31.

Common data elements are collected in different ways in different surveys. Since the *Digest* relies on a number of data sources, there are discrepancies in definitions and data across tables in the volume. For example, several different surveys collect data on public school enrollment, and while similar, the estimates are not identical. The definitions of racial/ethnic groups also differ across surveys, particularly with respect to whether Hispanic origin is considered an ethnic group regardless of race, or counted separately as a racial/ethnic group. Individual tables note the definitions used in the given studies.

All statements cited in the text about differences between two or more groups or changes over time were tested for statistical significance and are statistically significant at the .05 level. Various test procedures were used, depending on the nature of the statement tested. The most commonly used test procedures were t tests, equivalence tests, and linear trend tests. Equivalence tests were used to determine whether two statistics are substantively equivalent or substantively different. This was accomplished by using a hypothesis test to determine whether the confidence interval of the difference between

sample estimates is substantively significant (i.e., greater or less than a preset substantively important difference). In most cases involving percentages, a difference of 3.0 was used to determine substantive equivalence or difference. In some comparisons involving only very small percentages, a lower difference was used. In cases involving only relatively large values, a larger difference was used, such as \$1,000 in the case of annual salaries. Linear trend tests were conducted by evaluating the significance of the slope of a simple regression of the data over time, and a *t* test comparing the end points.

GUIDE TO TABULAR PRESENTATION

This section is intended to assist the reader in following the basic structure of the *Digest* tables and to provide a legend for some of the common symbols and indexes used throughout the book. Unless otherwise noted, all data are for the 50 states and the District of Columbia. Changes in survey instruments sometimes mean that data for specific categories are not available in a consistent manner over the entire reporting period. Because of these survey limitations, data for these specific categories may be noted as included with other categories where applicable.

Table Components

Title Describes the table content concisely. (Tables may not include data for all years implied in table titles. When this is the case, the title will include the term "Selected years.")

Unit indicator Informs the reader of the measurement unit in the table—"In thousands," "In millions of dollars," etc. Noted below the title unless several units are used, in which case the unit indicators are generally given in the spanner or individual column heads.

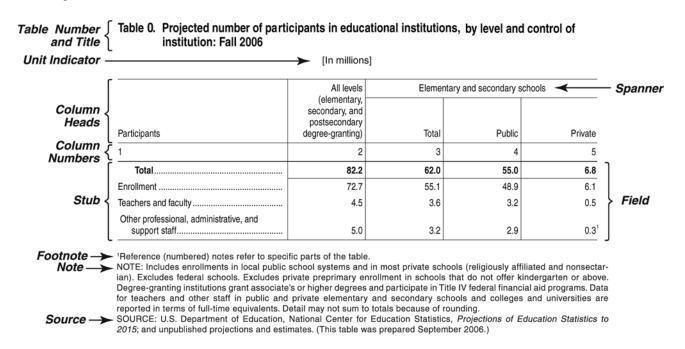

Spanner Describes a group of two or more columns.

Column head Describes a specific column.

Stub Describes a row or a group of rows. Each stub row is followed by a number of dots (leaders).

Field The area of the table which contains the data elements.

Example of Table Structure

Special notes Symbols used to indicate why data do not appear in designated cell.

- Not available.
- † Not applicable.
- # Rounds to zero.
- ! Interpret data with caution.
- ‡ Reporting standards not met.

Footnote Describes a unique circumstance relating to a specific item within the table. Following are two typical examples:

Estimated Based on available information from a subset of the population of interest.

Projected Calculated from a forecasting model based on historical information.

Note Furnishes general information that relates to the entire table.

Source The document or reference from which the data are drawn. This note may also include the organizational unit responsible for preparing the data.

Descriptive Terms

Measures of central tendency A number that is used to represent the "typical value" of a group of numbers. It is regarded as a measure of "location" or "central tendency" of a group of numbers.

Arithmetic mean (average) is the most commonly used average. It is derived by summing the individual item values of a particular group and dividing that sum by the number of items. This value is often referred to simply as the "mean" or "average."

Median is the measure of central tendency that occupies the middle position in a rank order of values. It generally has the same number of items above it as below it. If there is an even number of items in the group, the median is the average of the middle two items.

Average per capita, or per person, figure represents an average computed for every person in a specified group, or population. It is derived by dividing the total for an item (such as income or expenditures) by the number of persons in the specified population.

Index number A value that provides a means of measuring, summarizing, and communicating the nature of changes that

occur from time to time or from place to place. An index is used to express changes in prices over periods of time, but may also be used to express differences between related subjects at a single point in time.

The *Digest* most often uses the Consumer Price Index to compare purchasing power over time.

To compute a price index, a base year or period is selected. The base-year price is then designated as the base or reference price to which the prices for other years or periods are related.

A method of expressing the price relationship is:

Index number =

 $\frac{\text{Price of a set of one or more items for related year}}{\text{Price of the same set of items for base year}} \times 100$

When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

Current and constant dollars are used in a number of tables to express finance data. Unless otherwise noted, all figures are in current dollars, not adjusted for inflation. Constant dollars provide a measure of the impact of inflation on the current dollars.

Current dollar figures reflect actual prices or costs prevailing during the specified year(s).

Constant dollar figures attempt to remove the effects of price changes (inflation) from statistical series reported in dollar terms.

The constant dollar value for an item is derived by dividing the base-year price index (for example, the Consumer Price Index for 1999) by the price index for the year of data to be adjusted and multiplying by the price of item to be adjusted. The result is an adjusted dollar value as it would presumably exist if prices were the same as the base year—in other words, as if the dollar had constant purchasing power. Any changes in the constant dollar amounts would reflect only changes in the real values.

In the 2008 edition of the *Digest*, the following 26 tables include finance data that are adjusted to school year 2006–07 dollars: tables 26, 32, 74, 78, 79, 86, 171, 174, 175, 181, 184, 185, 256, 257, 263, 331, 334, 350, 353, 355, 360, 361, 362, 364, 366, and 424. Data adjusted to calendar year 2007 dollars appear in tables 20, 384, 394, and 418. Table 373 includes adjustments to fiscal year (FY) 2008 dollars.

CHAPTER 1 All Levels of Education

This chapter provides a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and postsecondary education, as well as from the general population, to present a composite picture of the American educational system. Tables feature data on the total number of people enrolled in school, the number of teachers, the number of schools, and total expenditures for education at all levels. This chapter also includes statistics on education-related topics such as educational attainment, family characteristics, population, and opinions about schools. Economic indicators and price indexes have been added to facilitate analyses.

The U.S. system of education can be described as having three levels of formal education (elementary, secondary, and postsecondary) (figure 1). Students ordinarily spend from 6 to 8 years in the elementary grades, which may be preceded by 1 to 3 years in nursery school and kindergarten. The elementary school program is followed by a 4- to 6-year program in secondary school. Students normally complete the entire program through grade 12 by age 18.

High school graduates who decide to continue their education may enter a technical or vocational institution, a 2-year community or junior college, or a 4-year college or university. A 2-year college normally offers the first 2 years of a standard 4-year college curriculum and a selection of terminal vocational programs. Academic courses completed at a 2-year college are usually transferable for credit at a 4-year college or university. A technical or vocational institution offers postsecondary technical training leading to a specific career.

An associate's degree requires at least 2 years of collegelevel coursework, and a bachelor's degree normally requires 4 years of college-level coursework. At least 1 year of coursework beyond the bachelor's is necessary for a master's degree, while a doctor's degree usually requires a minimum of 3 or 4 years beyond the bachelor's.

Professional schools differ widely in admission requirements and program length. Medical students, for example, generally complete a bachelor's program of premedical studies at a college or university before they can enter the 4-year program at a medical school. Law programs normally require 3 years of coursework beyond the bachelor's degree level.

Many of the statistics in this chapter are derived from the statistical activities of the National Center for Education Statistics (NCES). In addition, substantial contributions have been drawn from the work of other groups, both governmental and nongovernmental, as shown in the source notes of the tables. Information on survey methodologies is contained in Appendix A: Guide to Sources and in the publications cited in the table source notes.

Enrollment and Attainment

Enrollment in elementary and secondary schools grew rapidly during the 1950s and 1960s, reaching a peak in 1971 (table 3 and figure 2). This enrollment rise was caused by what is known as the "baby boom," a dramatic increase in births following World War II. From 1971 to 1984, total elementary and secondary school enrollment decreased every year, reflecting the decline in the school-age population over that period. After these years of decline, enrollment in elementary and secondary schools started increasing in fall 1985, began hitting new record levels in the mid-1990s, and has continued to reach a new record level in each subsequent year.

School enrollment rates among 5- and 6-year-olds, 7- to 13-year-olds, and 14- to 17-year-olds remained relatively steady between 1985 and 2007 (table 7). Since the enrollment rates of elementary and secondary school-age children changed by less than 2 percentage points between 1985 and 2007, increases in public and private elementary and secondary school enrollment have been driven primarily by increases in the number of children in these age groups. Increases in the enrollment rate of prekindergarten age children (ages 3 and 4) between 1985 and 2007 have also contributed to overall enrollment increases.

Public school enrollment in prekindergarten through grade 8 rose from 29.9 million in fall 1990 to 34.2 million in 2003 (table 3). After a decrease of less than 1 percent between fall 2003 and fall 2004, elementary enrollment increased to a projected total of 34.9 million for fall 2008. Public elementary enrollment is projected to continue this pattern of annual increases through 2017 (the last year for which NCES has projected school enrollment). Public school enrollment in the upper grades rose from 11.3 million in 1990 to 15.1 million in 2006, with a projected enrollment of 14.9 million for 2008. Public secondary enrollment is projected to show a decrease of 3 percent between 2006 and 2011, and then increase again through 2017. Public secondary school enrollment in 2017 is expected to be about 5 per-

cent higher than in 2008. Total public elementary and secondary enrollment is projected to set new records every year from 2008 to 2017.

College enrollment reached 14.5 million in fall 1992 and decreased to 14.3 million in fall 1995 (table 3). Total college enrollment increased 28 percent between 1995 and 2007, and a further increase of 10 percent is expected between fall 2007 and fall 2017. The percentage of 18- and 19-year-olds enrolled in school rose from 61 to 67 percent between 1996 and 2006. About 36 percent of 20- to 24-year-olds were enrolled in school in 2007.

Enrollment in Private Institutions

The percentage of students in private elementary and secondary schools declined from 11.7 percent in 1995 to 11.0 percent in 2005 (table 3). The percentage of college students who attended private colleges and universities rose from 22.2 to 25.5 percent between 1995 and 2005, and then continued to increase to 26.1 percent in 2007. In 2008, a projected 6.1 million students were enrolled in private schools at the elementary and secondary levels and 4.6 million students were in private (not-for-profit and for-profit) degree-granting institutions.

Educational Attainment of Adults

The percentages of adults 25 years old and over completing high school and higher education have been rising. In 2008, 87 percent of the population 25 years old and over had completed at least high school and 29 percent had completed a bachelor's or higher degree (table 8 and figure 3). These percentages are higher than in 1998, when 83 percent had completed at least high school and 24 percent had completed

a bachelor's or higher degree. In 2008, about 8 percent of people 25 years old or over held a master's degree as their highest degree, 2 percent held a professional degree (e.g., medicine or law), and 1 percent held a doctor's degree (table 9 and figure 5).

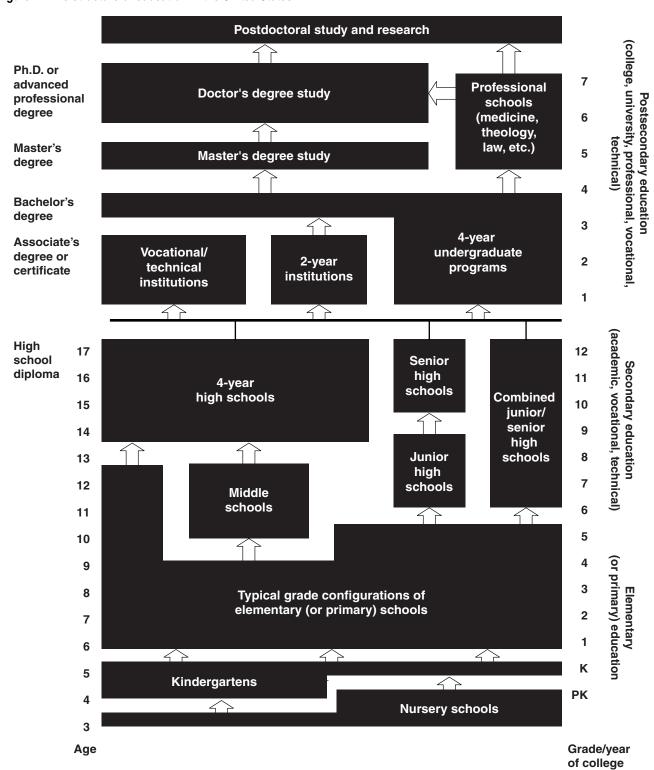

Teachers and Faculty

An estimated 3.7 million elementary and secondary school full-time-equivalent (FTE) teachers were engaged in classroom instruction in the fall of 2008 (table 4). This number has risen about 15 percent since 1998. The number of FTE public school teachers in 2008 was about 3.2 million, and the number of FTE private school teachers was about 0.5 million. FTE faculty at postsecondary degree-granting institutions totaled an estimated 0.9 million in 2008, including 0.6 million at public institutions and 0.3 million at private institutions (table 1).

Expenditures

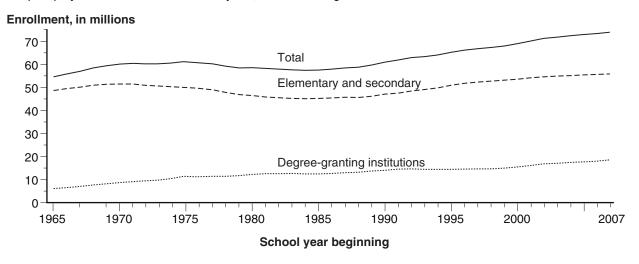

Expenditures of educational institutions rose to an estimated \$1,017 billion for the 2007–08 school year (table 26). Elementary and secondary schools spent about 62 percent of this total, and colleges and universities accounted for the remaining 38 percent. After adjustment for inflation, total expenditures of all educational institutions rose by an estimated 36 percent between 1997–98 and 2007–08. Expenditures of elementary and secondary schools rose by an estimated 33 percent during this period, while total expenditures of colleges and universities rose by 41 percent. In 2007–08, expenditures of educational institutions were an estimated 7.4 percent of the gross domestic product (table 25).

Figure 1. The structure of education in the United States

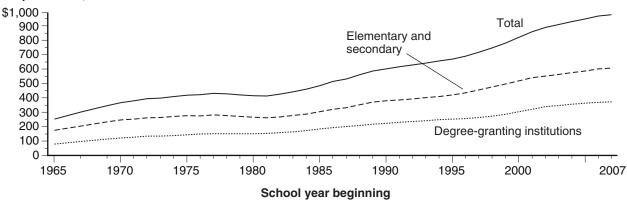

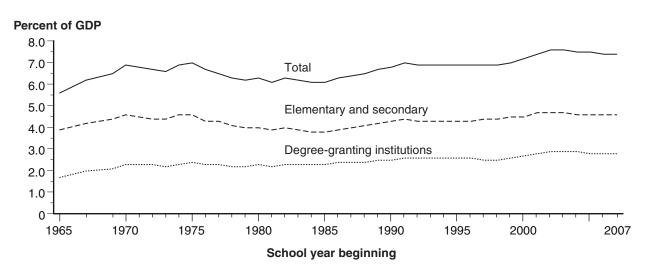

NOTE: Figure is not intended to show relative number of institutions nor relative size of enrollment for the different levels of education. Figure reflects typical patterns of progression rather than all possible variations. Adult education programs, while not separately delineated above, may provide instruction at the adult basic, adult secondary, or postsecondary education levels. ¹Private elementary and secondary education data are projected. ²Includes enrollments in local public school systems and in most private schools (religiously

Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes homeschooled children who were not also enrolled in public and private schools. Based on the National Household Education Survey, the homeschooled children numbered approximately 1.5 million in 2007. Private elementary enrollment includes preprimary students in schools offering kindergarten or higher grades.
Sestimated.

⁴Data are actual.

NOTE: Degree-granting enrollment projections are based on the middle alternative projections published by the National Center for Education Statistics. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few

higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Private school enrollment data for fall 1999 are based on improved methodology for apportioning the grade-unclassified students. ⁻Not available

NOTE: Elementary and secondary enrollment includes students in local public school systems and in most private schools (religiously affiliated and nonsectarian), but generally excludes homeschooled children and students in subcollegiate departments of colleges and in federal schools. Based on the National Household Education Survey, the homeschooled children numbered approximately 1.5 million in 2007. Excludes preprimary pupils in private schools that do not offer kindergarten or above. Postsecondary data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in

Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, *Annual*

(This table was prepared October 2008.)

¹Beginning in fall 1980, data include estimates for an expanded universe of private schools. Therefore, direct comparisons with earlier years should be avoided.

²Data for 1869-70 through 1949-50 include resident degree-credit students enrolled at any time during the academic year. Beginning in 1959, data include all resident and extension students enrolled at the beginning of the fall term.

³Estimated.

⁴Projected.

⁵Data for elementary and secondary are projected; data for degree-granting institutions are

⁻Not available

Includes teachers in local public school systems and in most private schools (religiously affiliated and nonsectarian). Teachers are reported in terms of full-time equivalents.

2Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Includes full-time and part-time faculty with the rank of instructor or above in colleges, universities, professional schools, and 2-year colleges. Excludes teaching assistants.

⁶Data for elementary and secondary are projected; data for degree-granting institutions are actual.

NOTE: Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Headcounts are used to report data for degree-granting institutions instructional staff.

[—]Not available.

¹Includes special education, alternative, and other schools not classified by grade span. Because of changes in survey definitions, figures for "other" schools are not comparable

NOTE: Postsecondary data for 1980-81 and 1990-91 are for institutions of higher education, while later data are for Title IV degree-granting and non-degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

NOTE: Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Enrollments in "special" schools, such as trade schools, business colleges, or correspondence schools, are not included. Beginning in 1994, preprimary enrollment was collected using new pro-

cedures and may not be comparable to figures for earlier years. Total includes persons from other racial/ethnic groups not shown separately. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, selected years, 1980 through 2007. (This table was prepared July 2008.)

[—]Not available.

Enrollments in "special" schools, such as trade schools, business colleges, or correspondence schools, are not included. Standard errors appear in parentheses.

SOURCE: U.S. Department of Commerce, Census Bureau, Historical Statistics of the United States, Colonial Times to 1970; Current Population Reports, Series P-20, various years; and Current Population Survey, October, 1970 through 2007. (This table was prepared July 2008.)

[†]Not applicable.

Preprimary enrollment collected using new procedures. Data may not be comparable to figures for earlier years. NOTE: Data for 1940 are for April. Data for all other years are as of October. Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night.

⁴Estimates based on Census Bureau reverse projection of 1940 census data on education

NOTE: Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Standard errors

SOURCE: U.S. Department of Commerce, Census Bureau, U.S. Census of Population, 1960, Volume 1, part 1; 1960 Census Monograph, Education of the American Population, by John K. Folger and Charles B. Nam; and Current Population Reports, Series P-20; various years; and Current Population Survey (CPS), March 1970 through March 2008. (This table was prepared September 2008.)

[†]Not applicable.

[#]Rounds to zero.
Includes persons of Hispanic ethnicity for years prior to 1980.

²Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers—i.e., those persons who graduated from high school with a diploma, as well as those who completed high school through equivalency

programs, such as a GED program.

3Data for years prior to 1993 are for persons with 4 or more years of college.

Table 9. Number of persons age 18 and over, by highest level of education attained, age, sex, and race/ethnicity: 2008 [In thousands]

[†]Not applicable.

Sources or $\underline{\text{http://www.census.gov/apsd/techdoc/cps/cps-main.html}} \ \ \text{for information on}$ calculating standard errors. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), March 2008. (This table was prepared August 2008.)

[#]Rounds to zero. ‡Reporting standards not met.

NOTE: Total includes other racial/ethnic groups not shown separately. Although cells with fewer than 75,000 weighted persons are subject to relatively wide sampling variation, they are included in the table to permit various types of aggregations; see Guide to

Table 10. Persons age 18 and over who hold at least a bachelor's degree in specific fields of study, by sex, race/ethnicity, and age: 2001

⁻Not available.

NOTE: Resident population includes civilian population and armed forces personnel residing within the United States; it excludes armed forces personnel residing overseas. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Estimates as of July 1. SOURCE: U.S. Department of Commerce, Census Bureau, Population Estimates, retrieved August 12, 2008, from http://www.census.gov/popest/national/asrh/2007-nat-res.html. (This table was prepared August 2008.)

¹Included under Asian.

²Data on persons of more than one race group were collected beginning in 2000. Direct comparability of the data (other than Hispanic) prior to 2000 with the data for 2000 and later years is limited by the extent to which people reporting more than one race in later years had been reported in specific race groups in earlier years.

Table 17. Estimated total and school-age resident populations, by state: Selected years, 1970 through 2007 [In thousands]

(This table was prepared September 2008.)

[‡]Reporting standards not met.

Adjusted by the Consumer Price Index research series using current methods (CPI-U-RS).

²Related children in a family include own children and all other children in the household who are related to the householder by birth, marriage, or adoption.

Based on 1989 incomes collected in the 1990 census. Data may differ from figures derived from the Current Population Survey. ⁴Based on 1999 incomes collected in the 2000 census. Data may differ from figures derived from the Current Population Survey. NOTE: Standard errors appear in parentheses. Standard errors in columns 12 and 13 cannot be shown with greater precision due to data source limitations.

Current Population Survey (CPS), Annual Social and Economic Supplement, retrieved September 15, 2008, from http://pubdb3.census.gov/macro/032008/pov/toc.htm. (This table was prepared September 2008.)

[†]Not applicable.

¹Refers to the person who owns or rents (maintains) the housing unit.

²Includes persons of Hispanic ethnicity.

³Excludes persons of Hispanic ethnicity.
⁴Includes Asians only (i.e., does not include Pacific Islanders).

¹In 1999, one item was used to ask parents if they had attended an event sponsored by a community, ethnic, or religious group. In 2003, attendance at an event sponsored by a religious group was asked about separately from attendance at an event sponsored by a community or ethnic group.

NOTE: The respondent was the parent most knowledgeable about the child's education. The responding parent reported on their own and their spouse's, or other household adults', activities. Excludes homeschooled children. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

⁻Not available.

NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Expenditures for colleges and universities in 1929–30 and 1939–40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949-50 through 1995-96 are for currentfund expenditures. Data for private degree-granting institutions for 1996–97 and later years are for total expenditures. Data for public degree-granting institutions for 1996–97 through 2000-01 are for current expenditures; data for later years are for total expenditures. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. ⁻Not available.

Data include current-fund expenditures and additions to plant value.

NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Public and private degree-granting institutions data for 1929–30 through 1995–96 are for current-fund expenditures, except where noted. Data for private degree-granting institutions for 1996–97 and later years are for total expenditures. Data for public degree-granting institutions for 1996–97 through 2000-01 are for current expenditures; data for later years are for total expenditures. Data through 1995-96 are for institutions of higher education, while later data are for degreegranting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is

very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

Includes state and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures. ²Includes assistance and subsidies to individuals, private elementary and secondary schools, and colleges and universities, as well as miscellaneous education expenditures.

NOTE: Current expenditure data in this table differ from figures appearing in other tables INUTE: Current expenditure data in this table differ from figures appearing in other tables because of slightly varying definitions used in the Governmental Finances and Common Core of Data surveys. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. Standard errors that are not shown are available upon request. SOURCE: U.S. Department of Commerce, Census Bureau, Governmental Finances. Retrieved July 15, 2008, from http://www.census.gov/govs/www/estimate06.html. (This table was prepared August 2008.)

¹Data for years prior to 1963 include expenditures for government fiscal years ending during that particular calendar year. Data for 1963 and later years are the aggregations of expenditures for government fiscal years that ended on June 30 of the stated year. General expenditures exclude expenditures of publicly owned utilities and liquor stores, and of insurance-trust activities. Intergovernmental payments between state and local governments are excluded. Payments to the federal government are included.

²Constant dollars based on a chain-price index, which uses the geometric mean of output weights of adjacent time periods compiled over a time series. Chain-price indexes reflect changes in prices, while implicit price deflators reflect both changes in prices and in the composition of output.

³Population of the United States including armed forces overseas. Includes Alaska and Hawaii beginning in 1960

⁴Resident population of the United States. Includes Alaska and Hawaii beginning in 1958. Data

for 1990 and later years include revisions based on the 2000 census.

NOTE: Gross domestic product (GDP) data are adjusted by the GDP chained weight price deflator. Personal income data are adjusted by the personal consumption deflator. Some data have been revised from previously published figures.

[—]Not available. $^{\rm 1}$ Index for urban wage earners and clerical workers through 1977; 1978 and later figures are for

all urban consumers.

2Consumer Price Index adjusted to a school-year basis (July through June).

NOTE: Some data have been revised from previously published figures.

CHAPTER 2 Elementary and Secondary Education

This chapter contains a variety of statistics on public and private elementary and secondary education. Data are presented for enrollments, teachers and other school staff, schools, dropouts, achievement, school violence, and revenues and expenditures. These data are derived from surveys conducted by the National Center for Education Statistics (NCES) and other public and private organizations. The information ranges from counts of students and schools to state graduation requirements.

Enrollments

Public elementary and secondary school enrollment increased by 3 percent from 2001 to 2006, but enrollment at the elementary and secondary levels increased at different rates (table 37 and figure 6). Between 2001 and 2006, public elementary enrollment rose by 1 percent, while secondary enrollment increased by 10 percent. Enrollments in private elementary and secondary schools decreased by an estimated 4 percent between 2001 and 2006 (table 3).

In 2007, two-thirds of 3- to 5-year-olds were enrolled in preprimary education (nursery school and kindergarten), similar to the proportion in 2000 (table 43 and figure 7). However, the percentage of children in full-day programs increased from 2000 to 2007. In 2007, about 57 percent of the children enrolled in preprimary education attended preprimary school all day, compared with 53 percent in 2000.

A higher percentage of 4-year-old children (57 percent) were primarily cared for in center-based programs during the day in 2005–06 than were cared for in home-based settings by their parents (20 percent), in home-based settings by relatives (13 percent), or in home-based settings by nonrelatives (8 percent) (table 46). There were differences in the average quality of care children received in these settings. A higher percentage of children in Head Start and other center-based programs (35 percent) received high-quality care than those in home-based relative and nonrelative care (9 percent), according to the ratings of trained observers (table 47).

From 2001–02 to 2006–07, some increases occurred in the numbers and percentages of children being served in programs for those with disabilities. During the 2001–02 school year, 13 percent of students were served in these programs, compared with 14 percent in 2006–07 (table 50). Some of the change since 2001–02 may be attributed to the increasing percentage of children identified as having other

health impairments (limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes), which rose from 0.7 to 1.2 percent of enrollment; autism, which rose from 0.2 to 0.5 percent of enrollment; and developmental delay, which rose from 0.5 to 0.7 percent of enrollment.

Teachers and Other School Staff

During the 1970s and early 1980s, public school enrollment decreased, while the number of teachers generally increased. As a result, the public school pupil/teacher ratio declined from 22.3 in 1970 to 17.9 in 1985 (table 64 and figure 6).1 After 1985, the number of pupils per teacher continued to decline, reaching 17.2 in 1989. After a period of relative stability during the late 1980s through the mid-1990s, the ratio declined from 17.3 in 1995 to 16.0 in 2000. Some decreases have continued since then, and the public school pupil/teacher ratio was 15.5 in 2006. The projected pupil/teacher ratio for private schools for 2006 was 13.5.1

The average class size in 2003–04 was 20.4 pupils for public elementary schools and 24.7 for public secondary schools (table 67).

In 2003–04, some 75 percent of public school teachers were female, 41 percent were under 40, and 48 percent had a master's or higher degree (table 68). Compared to public school teachers, a lower percentage of private school teachers (35 percent) had a master's or higher degree. Seventy-six percent of private school teachers were female.

Public school principals tend to be older and have more advanced credentials than public school teachers. In 2003–04, some 15 percent of the public school principals were under age 40 and 98 percent of the public school principals had a master's or higher degree (table 86). A lower percentage of principals than of teachers were female. About 48 percent of public school principals were female, compared to 75 percent of teachers.

¹The pupil/teacher ratio is based on all teachers—including teachers for students with disabilities and other special teachers—and all students enrolled in the fall of the school year. Unlike the pupil/teacher ratio, the average class size excludes students and teachers in classes that are exclusively for special education students. Class size averages are based on surveys of teachers reporting on the counts of students in their classes.

The numbers of both teaching and nonteaching staff employed by public schools grew during the 1970s, while the number of students declined (tables 80 and 3). Between 1970 and 1980, the percentage of staff who were teachers declined from 60 percent to 52 percent. From 1980 to 2006, the number of teachers and other staff grew at more similar rates (46 and 50 percent, respectively) than in the 1970s. As a result, the proportion of teachers among total staff was 1 percentage point lower in 2006 than in 1980, in contrast to the decrease of 8 percentage points during the 1970s. Two staff categories increased over 100 percent between 1980 and 2006—instructional aides, which rose 117 percent, and instructional coordinators, which rose 218 percent. Taken together, the percentage of staff with some instructional responsibilities (teachers and instructional aides) increased between 1980 and 2006, from 60 to 63 percent. In 2006, there were 8 pupils per staff member (total staff), compared with 10 pupils per staff member in 1980. In 2003, the number of pupils per staff member at private schools was 7 (table 60).

Schools

During most of the last century, the trend to consolidate small schools brought declines in the total number of public schools in the United States. In 1929–30, there were approximately 248,000 public schools, compared with about 99,000 in 2006-07 (table 87). But this number has been increasing in recent years; between 1996-97 and 2006-07, there was an increase of approximately 10,600 schools.

The shift in structure of public school systems toward middle schools (grade spans beginning with 4, 5, or 6 and ending with 6, 7, or 8) since the early 1970s has continued (table 94). The number of all elementary schools (beginning in grade 6 or below, with no grade higher than grade 8) rose by 12 percent to 68,990 between 1996-97 and 2006-07, and the subset of middle schools rose by 22 percent during the same time period. Meanwhile, the number of junior high schools (grades 7 and 8 or 7 to 9) declined by 16 percent. The average number of students in elementary schools declined from 478 students in 1996-97 to 473 students in 2006-07 (table 96). The average enrollment size of secondary schools increased from 703 in 1995-96 to 722 in 2003-04, but then decreased to an average of 711 students in 2006-07. The average size of regular secondary schools, which exclude alternative, special education, and vocational education schools, rose from 777 to 811 between 1996-97 and 2006-07.

High School Graduates and Dropouts

About 3,328,000 high school students are expected to graduate during the 2008-09 school year (table 104), including 3,011,000 public school graduates and 317,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The 2008–09 projection of high school graduates is lower than the record-high projection of 3,346,000 graduates for 2007–08, but exceeds the high point during the baby boom era in 1976–77, when 3,152,000 students earned diplomas. In 2005–06, an estimated 73.4 percent of public high school students graduated on time—that is, received a diploma 4 years after beginning their freshman year (table 106).

The number of General Educational Development (GED) credentials issued rose from 330,000 in 1977 to 487,000 in 2000 (table 108). A record number of 648,000 GED credentials were issued in 2001. In that year, candidates who had already taken any of the five tests in the GED test battery had to complete the entire battery before the end of the year or else take all five tests over again. The reason is that a new GED test series was introduced in 2002. In the same year, data collection procedures changed, with data from the states on the number of credentials issued being replaced by test data from individual test-takers. In 2006, some 464,000 passed the GED tests, up from 330,000 in 2002, the first year of the new test series.²

The percentage of dropouts among 16- to 24-year-olds has shown some decreases over the past 20 years. This percentage, known as the status dropout rate, includes all people in the 16- to 24-year-old age group who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts.) Between 1987 and 2007, the status dropout rate declined from 12.6 percent to 8.7 percent (table 109). Although the status dropout rate declined for both Blacks and Hispanics during this period, their rates (8.4 and 21.4 percent, respectively) remained higher than the rate for Whites (5.3 percent) in 2007. This measure is based on the civilian noninstitutionalized population, which excludes people in prisons, people in the military, and other people not living in households.

Achievement

Much of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and nonpublic schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. Because the assessment items reflect curricula associated with specific grade levels, the main NAEP uses samples of students at those grade levels.

² Information on changes in GED test series and reporting is based on the 2003 edition of Who Passed the GED Tests?, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

Since 1990, NAEP assessments have also been conducted at the state level. Each participating state receives assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. From 1990 through 2001, the national sample was a subset of the combined sample of students assessed in each participating state along with an additional sample from the states that did not participate in the state assessment. Since 2002, a combined sample of public schools has been selected for both state and national NAEP.

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement level of America's youth since the early 1970s. They are administered nationally and report student performance at ages 9, 13, and 17 in reading and mathematics. Measuring longterm trends of student achievement requires the precise replication of past procedures. For example, students of specific ages are sampled in order to maintain consistency with the original sample design. Similarly, the long-term trend instrument does not evolve based on changes in curricula or in educational practices. The differences in procedures between the main NAEP and the long-term trend NAEP mean that their results cannot be compared directly.

Long-term trend data have shown improvements in achievement in a number of areas. The average reading score at age 9 was higher in 2004 than in any previous assessment year (table 117). The average score at age 13 was higher in 2004 than in 1971, but not measurably different from the average score in 1999. Between 1999 and 2004, average reading scores at age 17 showed no measurable changes. The average score for 17-year-olds in 2004 was similar to that in 1971.

Significant gaps in performance continue to exist between racial/ethnic subgroups. For Black 9-, 13-, and 17year-olds, average reading scores in 2004 were higher than in 1971 (table 117). At age 9, Black students scored higher on average in 2004 than in any previous administration year. For White students, the average scores for 9- and 13year-olds were also higher in 2004 than in 1971. Separate data for Hispanics were not gathered in 1971, but as with the other racial/ethnic groups, the average reading score for Hispanic students at age 9 was higher in 2004 than in any other assessment year. The average score for Hispanic students at age 13 increased between 1975 and 2004. The scores for 17-year-old Hispanic students also increased between 1975 and 2004, but no measurable changes were seen between 1999 and 2004.

Female students scored higher on average in reading assessments than their male counterparts in 2004. The gender score gap at age 9 decreased from 1971 to 2004. In contrast, there has been no measurable change in the gender score gap at age 13 between 2004 and any previous assessment year. For 17-year-olds, the gender score gap in 2004 was larger than the gaps in 1980 and 1988, but showed no measurable difference from the gaps in other assessment years.

On the main NAEP reading assessment, public school fourth-graders scored higher in 2007 than in all previous assessment years. The average reading score was up 2 points since 2005 (based on unrounded scores) and up 5 points compared to the first main NAEP reading assessment in 1992 (table 121).

The 2007 main NAEP reading assessment of states found that reading proficiency varied among public school fourthgraders in participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia) (table 121). The U.S. average score was 220. The scores for the participating jurisdictions ranged from 197 in the District of Columbia to 236 in Massachusetts.

Mathematics achievement results from the long-term trend NAEP indicate a significant improvement for ages 9 and 13 between 1973 and 2004, but not for age 17 (table 131). The average score at age 9 in 2004 (241) was higher than in any previous year—up 9 points from 1999 and 22 points from 1973. The average score at age 13 in 2004 was higher than in any other assessment year. The 5-point increase between 1999 and 2004 resulted in an average score in 2004 that was 15 points higher than the average score in 1973. The average score at age 17 was not measurably different from the average score in 1973 or 1999. The apparent difference in average mathematics scores at age 9 between male and female students in 2004 was not statistically significant. Males had higher average scores than females at ages 13 and 17. The gender score gaps for 13- and 17-year-olds were measurably different between 1973 and 2004.

On the main NAEP mathematics assessment, the average score for public school eighth-graders in 2007 was 18 points higher than in 1990, the first assessment year. The average score in 2007 was higher than the score in any previous assessment (table 135).

The 2007 main NAEP assessment of states found that mathematics proficiency varied among public school eighthgraders in participating jurisdictions (the 50 states, the Department of Defense overseas and domestic schools, and the District of Columbia) (table 135). The main NAEP results are reported in the Digest in terms of both average scale scores and achievement levels. The achievement levels define what students who are performing at Basic, Proficient, and Advanced levels of achievement should know and be able to do. The Basic level denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at each grade. The Proficient level represents solid academic performance for each grade assessed; students reaching this level have demonstrated competency over challenging subject matter, including subject-matter knowledge, application of such knowledge to real-world situations, and analytical skills appropriate to the subject matter. The Advanced level signifies superior performance. Overall, 70 percent of these eighthgrade students performed at or above the Basic level in mathematics, and 31 percent performed at or above the Proficient level. The percentage of students performing at least at the Basic level in math ranged from 34 percent in the District of Columbia to 86 percent in North Dakota.

From 1996 to 2005, the national average 4th-grade science score increased from 147 to 151; there was no measurable change in the 8th-grade score; and the 12th-grade score decreased from 150 to 147 (table 138). Certain subgroups outperformed others in science in 2005. For example, males outperformed females at all three grades. White students scored higher, on average, than Black and Hispanic students at all three grades in 2005. At 4th grade, average scores increased for White, Black, Hispanic, and Asian/Pacific Islander students between 1996 and 2005. At 8th grade, the average score for Black students increased, but no measurable increases occurred for other racial/ethnic groups. At 12th grade, there were no measurable changes in average scores for any racial/ethnic group when comparing results from 2005 with those from 1996. Asian/Pacific Islander 4thgraders' 2000 results are not included because reporting standards were not met.

In addition to student performance data available through NAEP, the *Digest* presents data from other surveys to provide additional perspectives on student achievement. Differences among demographic groups in the acquisition of mental skills have been demonstrated at relatively early ages (table 113). In 2003–04, about 64 percent of 2-year-olds demonstrated skill in expressive vocabulary, which measured toddlers' skill in being able to communicate using gestures, words, and sentences. A higher percentage of females (69 percent) demonstrated expressive vocabulary than males (59 percent). Also, a higher percentage of White 2-year-olds (71 percent) demonstrated expressive vocabulary than Black, Hispanic, or American Indian/Alaska Native 2-year-olds (56, 54, and 50 percent, respectively). The percentage of 2-year-olds from families with high socioeconomic status (SES) who demonstrated expressive vocabulary (75 percent) was higher than the percentage of children from low-SES families (52 percent). Similar patterns of differences were observed among minority and economically disadvantaged children at about 4 years of age (table 114). There was little difference between the average literacy scores for female (13.7) and male (12.7) 48- to 57month-olds. White (14.2) and Asian (17.5) 48- to 57-monthold children had higher literacy scores than Black (12.0), Hispanic (10.7), and American Indian/Alaska Native (9.6) children. Also, high-SES children (18.0) had higher average literacy scores than low-SES children (9.2). These same patterns were observed among 48- to 57-month-old children with respect to average mathematics scores.

The SAT (formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test) is not designed as an indicator of student achievement, but rather as an aid for predicting how well students will do in college. Between 1997–98 and 2004–05, the mathematics SAT average score increased by 8 points, but it declined by 5 points between 2004–05 and 2007–08 (table 142). The critical reading average score was 3 points lower in 2007–08 than in 1997–98.

The average number of science and mathematics courses completed by public high school graduates increased between 1982 and 2005. The average number of mathematics courses (Carnegie units) completed in high school rose

from 2.6 in 1982 to 3.7 in 2005, and the number of science courses rose from 2.2 to 3.3 (table 147). The average number of courses in career/technical areas completed by all high school graduates was lower in 2005 (4.0 units) than in 1982 (4.6 units). As a result of the increased academic course load, the percentage of students completing the 1983 National Commission on Excellence recommendations for college-bound students (4 units of English, 3 units of social studies, 3 units of science, 3 units of mathematics, 2 units of foreign language, and .5 units of computer science) rose from 2 percent in 1982 to 36 percent in 2005 (table 151).

School Violence

In 2005–06, about 86 percent of public schools had a criminal incident, which is defined as a serious violent crime or a less serious crime such as a fight without weapons, theft, or vandalism (table 158). The percentage of schools having a criminal incident in 2005–06 was about the same as the percentage of schools having an incident in 1999–2000. In 2005–06, some 78 percent of schools reported a violent incident; 46 percent of schools reported a theft/larceny; and 68 percent reported other types of incidents. Overall, there were 5 crime incidents reported per 100 students.

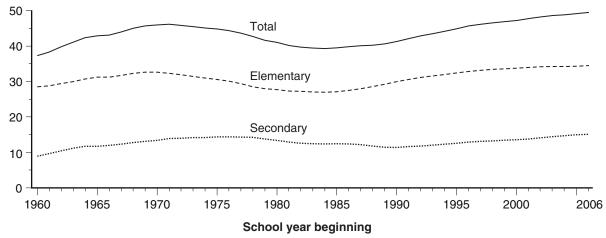

Revenues and Expenditures

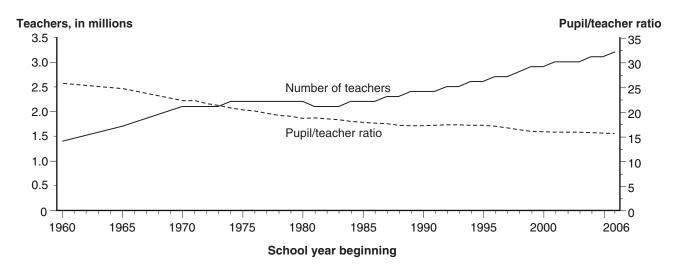

The state share of revenues for public elementary and secondary schools generally grew from the 1930s through the mid-1980s, while the local share declined during the same time period (table 171 and figure 9). However, this pattern changed in the late 1980s, when the local share began to increase at the same time the state share decreased. Between 1986-87 and 1993-94, the state share declined from 49.7 percent to 45.2 percent, while the local share rose from 43.9 percent to 47.8 percent. Between 1993–94 and 2000–01, the state share rose again to 49.7 percent, the highest share since 1986-87, but declined every school year afterward until 2005–06, when the state share was 46.5 percent. Between 1995–96 and 2005–06, the federal share of revenues rose to 9.1 percent. The local share declined from 45.9 percent in 1995-96 to 42.8 in 2002-03, and then increased to 44.4 percent in 2005-06.

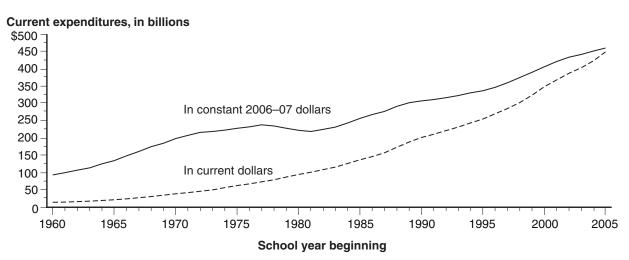

After adjustment for inflation, current expenditures per student in fall enrollment in public schools rose during the 1980s, remained stable during the first part of the 1990s, and rose again after 1992–93 (table 181 and figure 10). There was an increase of 37 percent from 1980–81 to 1990–91; an increase of less than 1 percent from 1990–91 to 1994–95 (which resulted from small decreases at the beginning of this period, followed by small increases after 1992–93); and an increase of 25 percent from 1994–95 to 2005–06. In 2005–06, current expenditures per student in fall enrollment were \$9,154 in unadjusted dollars. In 2005–06, some 55 percent of students in public schools were transported at public expense at a cost of \$746 per pupil, also in unadjusted dollars (table 175).

⁻Not available.

¹²Excludes current expenditures not allocable to pupil costs.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Annual Report of the United States Commissioner of Education, 1869–70 through 1909–10; Biennial Survey of Education in the United States, 1919–20 through 1949–50; Statistics of State School Systems, 1959–60 and 1969–70; Statistics of Public Elementary and Secondary School Systems, 1979–80; Revenues and Expenditures for Public Elementary and Secondary Education, FY 1980; Schools and Staffing Survey (SASS), "Public School Questionnaire," 1999–2000 and 2003–04; Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1989–90 through 2006–07, and "National Public Financial Survey," 1989–90 through 2005–06. Census Bureau, unpublished tabulations. Bureau of Economic Analysis, unpublished tabulations. Bureau of Labor Statistics, unpublished tabulations.

¹Data on population and labor force are from the Census Bureau, and data on personal income and national income are from the Bureau of Economic Analysis, U.S. Department of Commerce. Population data through 1900 are based on total population from the decennial census. From 1909–10 to 1959–60, population data are total population, including armed forces overseas, as of July 1. Data for later years are for resident population that excludes armed forces overseas.

²Data for 1869–70 through 1959–60 are school year enrollment. Data for later years are fall enrollment.

³Data for 1870-71.

⁴Estimated by the National Center for Education Statistics.

⁵Prior to 1919–20, data are for the number of different persons employed rather than number of positions.

⁶Prior to 1919–20, includes interest on school debt.

⁷Because of the modification of the scope of "current expenditures for elementary and secondary schools," data for 1959–60 and later years are not entirely comparable with prior years.

⁸Beginning in 1969–70, includes capital outlay by state and local school building authorities.

⁹Includes summer schools, community colleges, and adult education. Beginning in 1959–60, also includes community services, formerly classified with "current expenditures for elementary and secondary schools."

¹⁰Excludes community colleges and adult education.

¹¹Prior to 1959–60, average includes supervisors, principals, teachers, and other nonsupervisory instructional staff. Data for 1959–60 and later years are estimated by the National Education Association.

¹³"ADA" means average daily attendance in elementary and secondary schools.

¹⁴Expenditure figure is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt.

¹⁵Per-day rates derived by dividing annual rates by average length of term.

¹6Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Some data have been revised from previously published figures. Beginning in 1959–60, data include Alaska and Hawaii. Detail may not sum to totals because of rounding.

CHAPTER 2: Elementary and Secondary Education Enrollment

Table 33. Enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, fall 1990 through fall 2008

NOTE: Because of changes in reporting practices and imputation of data for nonrespondents since 1992, prekindergarten enrollment data for 1992 and later years are not comparable to prekindergarten enrollment data for prior years. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

NOTE: The number and percentage of homeschoolers exclude students who were enrolled in school for more than 25 hours a week and students who were only homeschooled due to a temporary illness. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. SOURCE: U.S. Department of Education, National Center for Education Statistics, *Home-*

schooling in the United States: 2003, Parent Survey (Parent:1999) and Parent and Family Involvement in Education Survey (PFI:2003) of the National Household Education Surveys Program. (This table was prepared September 2006.)

[#]Hounds to zero.

'Refers to all students in public and private schools and homeschooled students.

'Students whose grade-equivalent was "ungraded" were excluded from the grade analysis.

The percentage of students with an "ungraded" grade equivalent was 0.03 percent in 1999 and 0.02 percent in 2003.

'Urbanicity is based on a U.S. Census Bureau classification of places. Urban is a place with at least 50,000 people. Rural is a place not classified as urban.

¹Excludes students who were enrolled in school for more than 25 hours a week and students who were only homeschooled due to a temporary illness.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent Survey (Parent:1999) and Parent and Family Involvement in Education Survey (PFI:2003) of the National Household Education Surveys Program. (This table was prepared May 2007.)

²Students whose grade-equivalent was "ungraded" were excluded from the grade analysis. The percentage of students with an "ungraded" grade equivalent was 0.03 percent in 1999 and 0.02 percent in 2003.

 $^{^3}$ Urbanicity is based on a U.S. Census Bureau classification of places. Urban is a place with at least 50,000 people. Rural is a place not classified as urban.

†Not applicable. #Rounds to zero.

⁵Poverty status was determined by household income and number of persons in household. NOTE: A child's "primary arrangement" was defined as the regular nonparental care arrangement or early childhood education program in which the child spent the most time per week Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Program Participation Survey of the National Household Education Surveys Program (ECPP-NHES:2005). (This table was prepared October 2006.)

¹Mean hours per week per child, among preschool children enrolled in any type of nonparental care arrangement. For children with more than one arrangement, the hours of each weekly arrangement were summed to calculate the total amount of time in child care per week.

²Children who spend equal hours per week in multiple nonparental care arrangements.

³Excludes children living apart from their parents.

⁴Excludes children living in households with no mother or female guardian present.

[†]Not applicable.

⁸Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a house-hold's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18,392.

⁹Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income. NOTE: Data are based on a representative sample of children born in 2001. Estimates for children at about 2 years of age weighted by W3R0. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and suppression of cells that do not meet standards. Standard errors appear in parentheses.

[‡]Reporting standards not me

¹Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population with data on primary care arrangements.

²Primary type of care arrangement is the type of nonparental care in which the child spent the most hours.

³Care provided in the child's home or in another private home by a relative (excluding parents).

⁴Care provided in the child's home or in another private home by a person unrelated to the child.

⁵Care provided in places such as early learning centers, nursery schools, and preschools, including Head Start.

⁶Children who spent an equal amount of time in each of two or more arrangements.

⁷Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population between 44 and 65 months of age with data on primary care arrangements.

[†]Not applicable

7Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family

NOTE: Estimates weighted by W33P0. Estimates pertain to children assessed between 44 months and 65 months of age. Rating is for child's primary type of care arrangement, which was the type of nonparental care in which the child spent the most hours. Children who were primarily cared for by parents or in multiple arrangements are not included in this table. Ratings of care arrangement quality using both the FDCRS and ECERS scales were based on interviewer observations of children's interactions with adults and peers, children's exposure to materials and activities, the extent to which and the manner in which routine care needs were met, and the furnishings and displays in the classroom. The FDCRS and ECERS metrics are designed to be equivalent. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and suppression of cells that do not meet standards. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Birth Cohort 9-month-Preschool Restricted-Use Data File and Electronic Codebook. (This table was prepared December 2008.)

[#]Rounds to zero.

[‡]Reporting standards not met.

Primary type of care arrangement is the type of nonparental care in which the child spent the most hours. ²Care provided in the child's home or in another private home by a relative (excluding parents) or by a person unrelated to the

³Quality rating based on the Family Day Care Rating Scale (FDCRS). Low quality = score of 1 but less than 3. Medium quality = score of 3 but less than 5. High quality = score of 5 to 7.

⁴Quality rating based on the Early Childhood Environment Rating Scale (ECERS). Low quality = score of 1 but less than 3. Medium quality = score of 3 but less than 5. High quality = score of 5 to 7.

⁵Care provided in places such as early learning centers, nursery schools, and preschools, not classified as Head Start.

⁶Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18,392.

¹In 1993, respondents were asked about reading frequency in one of two versions. The percentages presented in the table are for all of the respondents who answered three or more times on either version of the questions.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, School Readiness Survey and Early Childhood Program Participation Survey of the National Household Education Surveys Program (SR-NHES:1993 and ECPP-NHES:2001 and 2005). (This table was prepared October 2006.)

²Refers to visiting a library at least once in the past month.

³Excludes children living in households with no mother or female guardian present.

⁴Poverty status was determined by household income and number of persons in household.

¹Other health impairments include having limited strength, vitality, or alertness due to chronic or

acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes. Includes preschool children ages 3–5 served under Chapter 1 and IDEA, Part B. Prior to 1987–88, these students were included in the counts by disability condition. Beginning in 1987–88, states were no longer required to report preschool children (ages 0–5) by disability

³Based on the total enrollment in public schools, prekindergarten through 12th grade.

NOTE: Includes students served under Chapter 1 of the Elementary and Secondary Education Act and under the Individuals with Disabilities Education Act (IDEA), formerly the Education of the Handicapped Act. Prior to October 1994, children and youth with disabilities were served under Chapter 1 as well as IDEA, Part B. In October 1994, funding for children and youth with

condition. Beginning in 2000-01, preschool children were again identified by disability condition.

disabilities was consolidated under IDEA, Part B. Data reported in this table for years prior to 1994–95 include children ages 0–21 served under Chapter 1. Counts are based on reports from the 50 states and the District of Columbia only (i.e., table excludes data for other jurisdictions). Increases since 1987-88 are due in part to new legislation enacted in fall 1986, which added a mandate for public school special education services for 3- to 5-year-old disabled children. Some data have been revised from previously published figures. Detail may not sum to totals because

NOTE: Prior to 1994, children and youth with disabilities were served under the Individuals with Disabilities Education Act (IDEA), Part B, and Chapter 1 of the Elementary and Secondary Education Act. In October 1994, funding for children and youth with disabilities was consolidated under IDEA, Part B. Data reported in this table for years prior to 1994 include children served under Chapter 1. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, Office of Special Education and Rehabilitative Services, Annual Report to Congress on the Implementation of the Individuals with Disabilities Education Act, selected years, 1992 through 2006, and Individuals with Disabilities Education Act (IDEA) database, retrieved April 17, 2008, from http://www.ideadata.org/PartBdata.asp. National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2006–07. (This table was prepared October 2008.)

¹Percentage of students with disabilities is based on the total enrollment in public schools, pre-kindergarten through 12th grade.

¹Includes a relatively small number of secondary ungraded students.

NOTE: Allocation of ungraded students to secondary levels based on proportions derived from prior years. Includes enrollment in public schools that are a part of state and local school systems and also in most private schools, both religiously affiliated and nonsectarian. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

U.S. Department of Commerce, Census Bureau, Current Population Reports, Series P-25, Nos. 1000, 1022, 1045, 1057, 1059, 1092, and 1095; and 2000 through 2007 Population Estimates, retrieved August 12, 2008, from http://www.census.gov/popest/national/asrh/2007-nat-res.html. (This table was prepared October 2008.)

²Data for 1890 through 1950 are from the decennial censuses of population. Later data are Census Bureau estimates as of July 1 preceding the opening of the school year.

³Gross enrollment ratio based on school enrollment of all ages in grades 9 to 12 divided by the 14- to 17-year-old population. Differs from enrollment rates in other tables, which are based on the enrollment of persons in the given age group only.

Data are for 1927-28.

⁵Data are for 1940-41.

⁶Estimated.

⁷Projected.

[–]Not available.

Includes students enrolled in unspecified modern foreign languages. Since 1990, enrollment in Japanese courses is reported as a separate category.

NOTE: Percent change computed from unrounded numbers.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1982 through 2000. American Council on the Teaching of Foreign Languages, Foreign Language Enrollments in U.S. Public Secondary Schools, Fall 2000. (This table was prepared April 2002.)

[†]Not applicable. #Rounds to zero.

[&]quot;Estimated.
2 Includes enrollment in ancient Greek (not shown separately). Fewer than 1,000 students

were enrolled in this language in each of the years shown.

3Until 1990, student enrollment in Japanese courses was included in the Other modern foreign languages category.

[†]Not applicable.

NOTE: Percentages are based on unrounded numbers. Percentages are based on the estimated 89,310 public schools in the nation in 2002-03. For the FRSS study sample, there were 3 cases for which district enrollment size was missing and 112 cases for which poverty concentration was missing. Detail may not sum to totals because of rounding or missing data. SOURCE: U.S. Department of Education, National Center for Education Statistics, Fast Response Survey System (FRSS), "Distance Education Courses for Public Elementary and Secondary School Students: 2002-03," FRSS 84, 2003. (This table was prepared July 2005.)

[#]Rounds to zero.

[!]Interpret data with caution.

¹Enrollment is based on students regularly enrolled in the districts. Enrollments include duplicated counts of students, since districts were instructed to count a student enrolled in each course in which he or she was enrolled.

²Combined or ungraded schools are those in which the grades offered in the school span both elementary and secondary grades or that are not divided into grade levels.

†Not applicable

¹Data reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students.

NOTE: Includes special education, vocational/technical education, and alternative schools. Tabulation includes schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

[†]Not applicable.

Excludes prekindergarten students. Includes schools reporting tuition of 0. Detail may not sum to totals because of rounding and cell suppression. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Private School Questionnaire," 1999–2000 and 2003–04. (This table was prepared in August 2006.)

[‡]Reporting standards not met.

Only includes kindergarten students who attend schools that offer first or higher grade.

²Tuition weighted by the number of students enrolled in schools.

NOTE: Excludes schools not offering first or higher grade. Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools have grades lower than 7 and higher than 8.

[†]Not applicable.

⁵Includes health and other noninstructional aides, and other employees not identified by function.

NOTE: Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Excludes all prekindergarten students from calculations, but includes kindergarten students attending schools that offer first or higher grade. Includes only schools that offer first or higher grade. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Private School Questionnaire," 2003–04. (This table was prepared August 2006.)

[‡]Reporting standards not met.

¹Includes schools beginning with grade 6 or below and with no grade higher than 8.

²Schools with no grade lower than 7.

³Schools with grades lower than 7 and higher than 8.

⁴Includes student support services professional staff, such as school psychologists, social workers, occupational therapists, and speech therapists.

NOTE: Pupil/leacher ratios are based on data reported by types of schools rather than by instructional programs within schools. Only includes schools that reported both enrollment and teacher data. Ratios are based on data reported by schools and may differ from data reported in other tables that reflect aggregate totals reported by states.

¹Estimated.

 $^2\mbox{Projected}.$ NOTE: Data for teachers are expressed in full-time equivalents (FTE). Counts of private NOTE: Data for teachers are expressed in full-time equivalents (F1E). Counts of private school teachers and enrollment include prekindergarten through grade 12 in schools offering kindergarten or higher grades. Counts of public school teachers and enrollment include prekindergarten through grade 12. The pupil/teacher ratio includes teachers for students with disabilities and other special teachers, while these teachers are generally excluded from class size calculations. Ratios for public schools reflect totals reported by states and

differ from totals reported for schools or school districts. Some data have been revised from

of the form totals reported to schools of school of schools of the data have been revised from previously published figures. Detail may not sum to totals because of rounding. NOTE: Distribution of elementary and secondary teachers determined by reporting units. Teachers reported in full-time equivalents (FTE). DoD = Department of Defense. SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2000–01 through 2006–07. (This table was prepared August 2008.)

¹Data have been revised from previously published figures. ²Includes imputed values for states.

³Includes imputations for underreporting of prekindergarten teachers.

⁴Imputed.

Table 66. Teachers, enrollment, and pupil/teacher ratios in public elementary and secondary schools, by state or jurisdiction: Selected years, fall 2000 through fall 2006

NOTE: Teachers reported in full-time equivalents (FTE). DoD = Department of Defense. SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2000–01 through 2006–07. (This table was prepared October 2008.)

 [—]Not available.

1 Data have been revised from previously published figures.

2 Includes imputed values for states.

3 Includes imputations for underreporting of prekindergarten teachers/enrollment.

⁴Imputed.

Table 67. Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2003-04

[†]Not applicable.

[‡]Reporting standards not met.

¹Teachers with less than a bachelor's degree are not shown separately.

Elementary teachers are those who taught self-contained classes at the elementary level, and secondary teachers are those who taught departmentalized classes (e.g., science, art, social science, or other course subjects) at the secondary level. Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught.

³Includes certificate of advanced graduate studies.

NOTE: Data are based on a head count of all teachers rather than on the number of full-time-equivalent teachers appearing in other tables. Excludes prekindergarten teachers. Standard errors appear in parentheses. Detail may not sum to totals because of rounding, cell suppression, and omitted categories (less than bachelor's).

⁻Not available.

NOTE: Excludes prekindergarten teachers. Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding and cell suppression. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public Teacher Questionnaire," 1999–2000 and 2003–04; "Private Teacher Questionnaire," 1999–2000 and 2003–04; and "Charter Teacher Questionnaire," 1999–2000. (This table was prepared September 2006.)

[†]Not applicable.

[‡]Reporting standards not met.

¹Includes certificate of advanced graduate studies.

²Data are only roughly comparable to 2003–04, because the new category of more than one race was introduced in 2003–04. ³Includes Pacific Islander.

⁴Included under other elementary.

⁵Included under other secondary.

Table 69. Selected characteristics of public school teachers: Selected years, spring 1961 through spring 2001

⁻Not available.

NOTE: Data are based on sample surveys of public school teachers. See Guide to Sources for information on interpreting data from this survey. Data differ from figures appearing in other tables because of varying survey processing procedures and time period coverages. Detail may not sum to totals because of rounding.

SOURCE: National Education Association, Status of the American Public School Teacher, 2000–01. (This table was prepared August 2003.)

Trigures for curriculum specialist or professional diploma based on 6 years of college study are not included.

²Measured in semester hours.

³Includes extra pay for extra duties.

[†]Not applicable.

NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, litinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff). Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public Teacher Questionnaire," 1990–91, 1993–94, 1999–2000, and 2003–04; and "Charter Teacher Questionnaire," 1999–2000. (This table was prepared July 2007.)

[‡]Reporting standards not met.

¹Includes teachers with levels of education below the bachelor's degree (not shown separately).

²Includes certificate of advanced graduate studies.

³Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

[†]Not applicable.

Includes additional compensation for extracurricular instruction or other additional activities, and bonuses and state supplements. NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff,

and support staff). Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Detail may not sum to totals because of rounding, missing values in cells with too few cases to report, and survey item nonresponse. SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public Teacher Questionnaire" and "Private Teacher Questionnaire", 2003–04. (This table was prepared July 2006.)

[‡]Reporting standards not met.

¹Calendar-year data from the U.S. Department of Commerce, Bureau of Economic Analysis, have been converted to a school-year basis by averaging the two appropriate calendar years in each case.

NOTE: Some data have been revised from previously published figures. Standard errors are not available for these estimates, which are based on state reports.

SOURCE: National Education Association, Estimates of School Statistics, 1959–60 through 2006–07; and unpublished tabulations. U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Product Accounts, retrieved August 28, 2008, from http://www.bea.gov/national/nipaweb/SelectTable.asp. (This table was prepared September 2008.)

years in each case.

²Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

Table 79. Estimated average annual salary of teachers in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969-70 through 2006-07

NOTE: Data for 1949–50 through 1969–70 are cumulative for the entire school year, rather than counts as of the fall of the year. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of

State School Systems, various years; Statistics of Public Elementary and Secondary Schools, various years; and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1986–87 through 2006–07. (This table was prepared August 2008.)

¹Includes school district administrative support staff, school and library support staff, student

support staff, and other support services staff.

Because of classification revisions, categories other than teachers, principals, librarians, and guidance counselors are only roughly comparable to figures for years after 1980.
3Data included in column 8.

[‡]Reporting standards not me

Total differs from data appearing in other tables because of varying survey processing procedures and time period coverages.
²Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor,

adjusted to a school-year basis. Excludes principals reporting a salary of \$0.

Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced studies.

⁴Data include Pacific Islander.

⁵A city consists of a territory inside an urbanized area and inside a principal city.

⁶A suburb is a territory outside a principal city and inside an urbanized area. An urbanized area includes a central place and densely populated surrounding area with at least 50,000 people.

⁷A town is a territory within an urban cluster. An urban cluster is a central place with a densely populated adjacent territory including at least 2,500 people.

⁸A rural area is a Census-defined rural territory that is outside of an urbanized area and urban clusters.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Standard errors appear in parentheses.

(This table was prepared September 2008.)

¹Includes operating and nonoperating districts.

²Schools with both elementary and secondary programs are included under elementary schools and also under secondary schools.

³Data for most years prior to 1976–77 are partly estimated. Prior to 1995–96, excludes schools with highest grade of kindergarten.

⁴Includes regular schools and special schools not classified by grade span.

⁵Includes elementary, secondary, and combined elementary/secondary schools.
⁶These data cannot be compared directly with the data for years after 1980–81.
⁷Because of expanded survey coverage, data are not directly comparable with figures after 1983-84.

NOTE: Size not reported includes school districts reporting enrollment of zero. Regular districts exclude regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools. Enrollment totals differ from

other tables because this table represents data reported by school districts rather than states or schools. Detail may not sum to totals because of rounding.

¹Regular school districts include both independent districts and those that are a dependent segment of a local government. Includes nonoperating agencies. Components of supervisory unions operate schools, but share superintendent services with other districts. ²New York City counted as one school district.

NOTE: DoD = Department of Defense.

¹Located inside an urbanized area and inside a principal city with a population of at least 250,000.

¹¹Located outside any urbanized area or urban cluster and more than 5 miles but less than or equal to 25 miles from an urbanized area, or more than 2.5 miles but less than or equal to 10 miles from an urban cluster.

 $^{12} \rm Located$ outside any urbanized area or urban cluster, more than 25 miles from an urbanized area, and more than 10 miles from an urban cluster.

¹³Average for schools reporting enrollment. Enrollment data were available for 94,164 out of 98 793 institutions in 2006–07

98,793 institutions in 2006–07.

14 Ratio for schools reporting both full-time-equivalent teachers and fall enrollment data.

 15 Includes tuition and fee revenues from other in-state school systems, which are excluded from state data reported through the "National Public Education Financial Survey."
 16 Property tax and parent government contributions are determined on the basis of independent

¹⁶Property tax and parent government contributions are determined on the basis of independence or dependence of the local school system and are mutually exclusive.

NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2006–07, and "Local Education Agency Universe Survey," 2005–06 and 2006–07; and "School District Finance Survey (Form F-33)," 2004–05. (This table was prepared September 2008.)

 $^{^2}$ Located inside an urbanized area and inside a principal city with a population of at least 100,000, but less than 250,000.

³Located inside an urbanized area and inside a principal city with a population less than 100.000.

⁴Located inside an urbanized area and outside a principal city with a population of 250,000 or more.

⁵Located inside an urbanized area and outside a principal city with a population of at least 100,000, but less than 250,000

^{100,000,} but less than 250,000. 6 Located inside an urbanized area and outside a principal city with a population less than 100,000.

⁷Located inside an urban cluster that is 10 miles or less from an urbanized area.

 $^{^{8}\}text{Located}$ inside an urban cluster that is more than 10 but less than or equal to 35 miles from an urbanized area.

⁹Located inside an urban cluster that is more than 35 miles from an urbanized area.

 $^{^{10}} Located$ outside any urbanized area or urban cluster, but 5 miles or less from an urbanized area or 2.5 miles or less from an urban cluster.

NOTE: Total enrollment, staff, and teacher data in this table reflect totals reported by school districts and may differ from data derived from summing school-level data to school district aggregates. SB = school board. ISD = independent school district. CISD = consolidated independent school district. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2006–07; "Local Education Agency Universe Survey," 1990–91, 2000–01, 2005–06, and 2006–07; and "Local Education Agency-Level Public-Use Data File on Public School Dropouts: School Year 2004–05." (This table was prepared September 2008.)

[†]Not applicable.

[#]Rounds to zero.

¹Alabama, Alaska, Arizona, Florida, Illinois, Maryland, New Jersey, New York, Tennessee, and Vermont reported data on an alternative July through June cycle, rather than the specified October through September cycle.

²Includes regular diplomas only.

³Data for total staff are imputed.

†Not applicable

⁴Includes other expenditures not shown separately.

⁵Data included under Modesto City Elementary.

NOTE: Detail may not sum to totals because of rounding. SB = school board. ISD = independent school district. CISD = consolidated independent school district.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (Form F-33)," 2005–06, and "Local Education Agency Universe Survey," 2006–07; and unpublished Department of Education budget data. (This table was prepared September 2008.)

¹Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds for 2005, see http://www.census.gov/hhes/www/poverty/threshld/thresh05.html.

²Current expenditure per pupil based on fall enrollment collected through the "School District Finance Survey (Form F-33)," 2005–06.

³Fiscal year 2008 Department of Education funds available for spending by school districts beginning with the 2008–09 school year divided by number of poverty children in 2005.

CHAPTER 2: Elementary and Secondary Education 151 Schools and School Districts

Table 93. Enrollment, poverty, and federal funds for the 100 largest school districts, by enrollment size in 2006: Fall 2006, 2005–06, and fiscal year 2008

							Revenue	es by source	of funds, 20	05–06	Revenue	for selecte	d federal pr	rograms (in t	housands)	, 2005–06	Title I a	Illocations (ir	thousand	s), fiscal yea	ar 2008 ²
Name of district	State	Rank order	Enroll- ment, fall 2006	5- to 17- year-old population, 2005	5- to 17- year-olds in poverty, 2005	Poverty rate of 5- to 17- year-olds, 2005 ¹	Total (in thousands)		Federal as a percent of total	Federal revenue per student ³	Title I basic and concen- tration grants	School lunch	Vocational education	Drug-free schools	Eisen- hower math and science	Special education	Total	Basic grants	Concen- tration grants	Targeted grants	Education finance incentive grants

⁻Not available.

NOTE: Detail may not sum to totals because of rounding. SB = school board. ISD = independent school district. SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (Form F-33)," 2005-06, and "Local Education Agency Universe Survey," 2006-07; and unpublished Department of Education budget data. (This table was prepared September 2008.)

¹Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds for 2005, see http://www.census.gov/hhes/www/poverty/threshld/thresh05.html.

²Fiscal year 2008 Department of Education funds available for spending by school districts in the 2008–09 school year.

³Federal revenue per student is based on fall enrollment collected through the "School District Finance Survey (Form F-33)."

⁷Because of revision in data collection procedures, figures not comparable to data for other

years. SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems, 1967–68 and 1975–76; Statistics of Public Elementary and Secondary Day Schools, 1970–71, 1972–73, 1974–75, and 1976–77 through 1980–81; and Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 1982–83 through 2006–07. (This table was prepared September 2008.)

[—]Not available.

Includes special education, alternative, and other schools not reported by grade span.
Includes schools beginning with grade 6 or below and with no grade higher than 8.
Includes schools with grade spans beginning with 4, 5, or 6 and ending with 6, 7, or 8.
Includes schools with no grade lower than 7.
Includes schools with grades 7 and 8 or grades 7 through 9.
Includes schools beginning with grade 6 or lower and ending with grade 9 or above.

¹Totals differ from those reported in other tables because this table represents data reported by schools rather than by states or school districts. Percentage distribution and average enrollment calculations exclude data for schools not reporting enrollment.

²Includes special education, alternative, and other schools not reported by grade span.
³Includes schools beginning with grade 6 or below and with no grade higher than 8.
⁴Includes schools with no grade lower than 7.

⁵Includes schools beginning with grade 6 or below and ending with grade 9 or above. ⁶Excludes special education schools, vocational schools, and alternative schools.

⁷Data have been revised from previously published figures. 8Data are for schools reporting their enrollment size. Enrollment data were available for 93,303 out of 96,513 schools in 2004–05, 93,845 out of 97,382 schools in 2005–06, and

^{94,164} out of 98,793 in 2006–07.

NOTE: Detail may not sum to totals because of rounding.

NOTE: Data reflect reports by schools rather than by states or school districts. Percentage distribution and average enrollment calculations exclude data for schools not reporting enrollment. Enrollment data were available for 94,164 out of 98,793 schools in 2006–07.

Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 1982–83 through 2006–07. (This table was prepared September 2008.)

¹Includes elementary, secondary, combined elementary/secondary, and other schools. ²Includes schools beginning with grade 6 or below and with no grade higher than 8.

³Includes schools with no grade lower than 7.

⁴Includes schools beginning with grade 6 or below and ending with grade 9 or above.

⁵Includes special education, alternative, and other schools not reported by grade span.

 $^{^6\}mbox{Excludes}$ special education schools, vocational schools, and alternative schools.

NOTE: Includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Annual Report of the Commissioner of Education, 1870 through 1910; Biennial Survey of Education in the United States, 1919–20 through 1949–50; Statistics of State School Systems, 1951–52 through 1957–58; Statistics of Public Elementary and Secondary School Systems, 1958–59 through 1980–81; Statistics of Nonpublic Elementary and Secondary Schools, 1959 through 1980; Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1981–82 through 2006–07; Private School Universe Survey (PSS), 1989 through 2005; and Projections of Education Statistics to 2017. (This table was prepared January 2009.)

¹Includes graduates of public and private schools.

²Data for 1929–30 and preceding years are from *Statistics of Public High Schools* and exclude graduates from high schools that failed to report to the Office of Education.

³For most years, private school data have been estimated based on periodic private school surveys.

⁴The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later.

⁵Includes estimates for New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.

⁶Private school data are projected.

NOTE: The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1986–87 through 2006–07; and The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04; and Projections of Education Statistics to 2017. (This table was prepared January 2009.)

¹Includes estimates for New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.

²U.S. total includes estimates for nonreporting states.

^{3.9.} Order includes estimates for nonreporting states.

3.9. Order includes estimates for nonreporting states.

3.9. Order includes estimates for nonreporting states.

⁻Not available.

NOTE: Includes only graduates for whom race/ethnicity was reported. Race categories exclude persons of Hispanic ethnicity. Event dropout rates measure the percentage of public school students in grades 9 through 12 who dropped out of school between one October and the next. DoD = Department of Defense.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2005–06 and 2006–07, and "State-Level Public School Dropouts," 2005–06; and unpublished tabulations. (This table was prepared January 2009.)

[†]Not applicable.

Reporting standards not met.

Data differ slightly from figures reported in other tables due to varying reporting practices

for racial/ethnic survey data.

2High school graduate counts include estimates for nonreporting states, based on 2005 12th-grade enrollment racial/ethnic distribution reported by state. Event dropout rate totals

are totals for reporting states only.

Projected high school graduates from NCES 2008-078, *Projections of Education Statistics* to 2017.

⁻Not available.

GED test passers must meet additional state requirements (e.g., complete an approved course in civics or government).

⁵Includes other jurisdictions, such as Puerto Rico, Guam, and American Samoa.

NOTE: Data are for the United States only and exclude other jurisdictions, except where noted. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: American Council on Education, General Educational Development Testing Service, the GED annual *Statistical Report*, 1971 through 1992; *Who Took the GED?* 1993 through 2001; *Who Passed the GED Testis?* 2002 through 2005; and *2006 GED Testing Program Statistical Report*. (This table was prepared July 2008.)

¹People who did not report their age were excluded from this calculation. Age data for 1988 and prior years are for all test takers and may not be comparable to data for later years.

²All people taking the GED tests (one or more subtests).

³People completing the entire GED battery of five tests.

⁴Data for 2002 and later years are for people passing the GED tests (i.e., earning both a passing total score on the test battery and a passing score on each individual test). Data for 2001 and prior years are for high school equivalency credentials issued by the states to GED test passers. In order to receive high school equivalency credentials in some states,

Table 109. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2007

⁻Not available.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. All data except for 1960 are based on October counts. Data are based on sample surveys of the civilian nonin-stitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Standard errors appear in parentheses.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October 1967 through October 2007. (This table was prepared July 2008.)

[†]Not applicable.

¹Includes other racial/ethnic categories not separately shown.

²Based on the April 1960 decennial census.

³White and Black include persons of Hispanic ethnicity.

⁴Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.

 $^{^5\}mbox{White}$ and Black exclude persons identifying themselves as more than one race.

Table 110. Percentage of high school dropouts among persons 16 through 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and educational attainment: 1970 through 2007

[—]Not available.

Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in prisons, persons in the military, and other persons not living in households. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October 1970 through October 2007. (This table was prepared August 2008.)

[†]Not applicable.

[‡]Reporting standards not met.

¹Includes persons employed, but not currently working.

²Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers.

Table 111. Number of 14- through 21-year-old students served under Individuals with Disabilities Education Act, Part B, who exited school, by exit reason, age, and type of disability: United States and other jurisdictions, 2004-05 and 2005-06

Source: U.S. Department of Education, Office of Special Education Programs, Individuals with Disabilities Education Act (IDEA) database. Retrieved July 21, 2008, from https://www.ideadata.org/StateLevelFiles.asp. (This table was prepared July 2008.)

¹Students may exit special education services due to maximum age beginning at age 18 depending on state law or practice or order of any court.

2"Dropped out" is defined as the total who were enrolled at some point in the reporting year,

were not enrolled at the end of the reporting year, and did not exit through any of the other bases described. Beginning in 2004–05, includes students previously categorized as "moved, not known to continue."

³"Transferred to regular education" was previously labeled "no longer receives special edu-

⁴Data have been revised from previously reported figures.

[†]Not applicable.

¹Ability to explore objects, for example, reaching for and holding objects. The child may have no specific purpose except to play or discover.

 $^{^2}$ Ability to explore objects with a purpose, such as to explore a bell to understand the source of the sound.

³Measures proficiency in communication through diverse nonverbal sounds and gestures, such as vowel and vowel-consonant sounds.

⁴Measures proficiency in engaging in early problem solving, such as using a tool to reach an out-of-reach toy or locating a hidden toy.

⁵Measures proficiency in early communication skills, such as saying simple words like "mama" and "dada."

⁶Measures proficiency in being able to use visual tracking to guide hand movements to pick up a small object.

⁷Measures proficiency in ability to maintain control of the muscles used in sitting with and without support.

[®]Measures proficiency in ability to engage in various prewalking types of mobility, with and without support, such as shifting weight from one foot to the other.

⁹Measures proficiency in ability to walk with help and to stand independently.

¹⁰Measures proficiency in being able to walk independently.

¹¹Measures proficiency in ability to maintain balance while shifting position.

¹²The type of nonparental care in which the child spent the most hours.

¹³Care provided in the child's home or in another private home by a relative (excluding parents).

¹⁴Care provided in the child's home or in another private home by a person unrelated to the child.

¹⁵Care provided in places such as early learning centers, nursery schools, and preschools, excluding Head Start.

¹⁶Children who spent an equal amount of time in each of two or more arrangements.

¹⁷Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18.392.

¹⁸Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: This table is based on a survey that sampled children born in 2001 and was designed to collect information about them for the first time when the children were about 9 months of age (i.e., 8 to 10 months). As shown in the table, some children were older than this, although only 6.5 percent were over 13 months of age. Estimates weighted by W1CO. Bace categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

†Not applicable.

Distribution of weighted Early Childhood Longitudinal Study, Birth Cohort survey population between 22 and 25 months of age.

²Based on assessments collected using the Bayley Short Form Research Edition (BSF-R), a shortened field method of administering the Bayley Scales of Infant Development-II (BSID-II) (Bayley 1993). The scores are fully equated with the BSID-II. The proficiency probabilities indicate mastery of a specific skill or ability within mental or physical domains.

³Secure attachment was measured by trained observers using Toddler Attachment Sort-45 Item (TAS-45) assessment. The formation of secure attachments in early childhood is an indicator that the child is able to use the parent as a secure base from which to explore novel stimuli in the environment freely and acquire a sense of self-confidence and adaptability to new and challenging situations. Other possible scale classifications in this metric were avoidant, ambivalent, and disorganized/disorientated.

NOTE: Estimates weighted by W2R0. Estimates pertain to children assessed between 22 months and 25 months of age. Children younger than 22 months (less than 1 percent of the survey population) and children older than 25 months (approximately 9 percent of the survey population) are excluded from this table. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Birth Cohort 9-month-Preschool Restricted-Use Data File and Electronic Codebook. (This table was prepared February 2008.)

⁴Ability to recognize and understand spoken words or to indicate a named object by pointing.

⁵Verbal expressiveness using gestures, words, and sentences.

⁶Ability to understand actions depicted by a story, in pictures, or by verbal instructions.

⁷Ability to match objects by their properties (e.g., color) or differentiate one object from another.

⁸Knowledge of counting words, knowledge of ordinality, and understanding of simple quantities.

⁹Ability to walk independently.

 $^{^{\}rm 10}\mbox{Ability}$ to maintain balance when changing position.

¹¹Ability to use fine motor control with hands, such as grasping a pencil or holding a piece of paper while scribbling.

¹²Ability to walk up and down stairs, with and without alternating feet.

¹³Ability to maintain balance when changing position or when in motion, such as jumping.

¹⁴Ability to anticipate, regulate, and execute motor movements, such as being able to attempt to replicate the motions of others.

¹⁵The type of nonparental care in which the child spent the most hours.

¹⁶Care provided in the child's home or in another private home by a relative (excluding parents).

¹⁷Care provided in the child's home or in another private home by a person unrelated to the child.

¹⁸Care provided in places such as early learning centers, nursery schools, and preschools, including Head Start.

¹⁹Children who spent an equal amount of time in each of two or more arrangements.

²⁰ Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18,392.

²¹Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

Table 114. Children's specific language, literacy, mathematics, color knowledge, and fine motor skills at about 4 years of age, by age of child and selected characteristics: 2005-06

[‡]Reporting standards not met.

¹Ability to recognize and understand spoken words or to indicate a named object by pointing. Potential score ranges from 0 to 15.

²Verbal expressiveness using gestures, words, and sentences. Potential score ranges from 0 to 5.

Includes letter recognition, in both receptive and expressive modes; letter sounds; and early reading knowledge and skills. Potential score ranges from 0 to 37.

⁴Ability to identify a letter by either its name or the sounds it makes. Average score can be interpreted as the percentage of children who were proficient at recognizing the letters of the alphabet. Potential score ranges from 0 to 100.

⁵Measures understanding of the sounds and structure of spoken language, including rhyming, blending, segmenting, deleting, and substituting words, syllables, and sounds. Potential score ranges from 0 to 8.

⁶Understanding of what print represents and how it works. Potential score ranges from 0 to 8.

⁷Includes number sense, geometry, counting, operations, and patterns. Potential score ranges from 0 to 44.

⁸Ability to recognize single-digit numbers and basic geometric shapes. Average score can be interpreted as the percentage of children who were proficient. Potential score ranges from 0 to 100.

⁹Percentage of children who scored 10 on a test with a potential score range of 0 to 10. These children were able to name the colors of five pictured objects (2 points per correct answer).

 $^{^{10}}$ Measures the ability to use fine motor skills in drawing basic forms and shapes. Potential score ranges from 0 to 7.

¹¹The type of nonparental care in which the child spent the most hours.

¹²Care provided in the child's home or in another private home by a relative (excluding parents).

¹³Care provided in the child's home or in another private home by a person unrelated to the child.

¹⁴Care provided in places such as early learning centers, nursery schools, and preschools, excluding Head Start.

¹⁵Children who spent an equal amount of time in each of two or more arrangements.

¹⁶Poverty status based on Census Bureau guidelines from 2002, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2002, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$18,392.

¹⁷Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

NOTE: Estimates weighted by W3R0. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

¹Status during kindergarten year.

grade, ungraded classrooms); most were in fifth grade in 2003–04, but 14 percent were in fourth grade or other grades (e.g., sixth grade). Mathematics scale ranges from 0 to 153. Science scale ranges from 0 to 92. Data were calculated using C1_6FC0 weight and therefore differ from previously published figures. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Kindergarten Class of 1998–99 (ECLS-K), Longitudinal Kindergarten–Third Grade Public-Use Data File, fall 1998, spring 1999, fall 1999, spring 2000, and spring 2002, and Fifth-Grade Restricted-Use Data File. (This table was prepared September 2006.)

²Family risk factors included living below the federal poverty level, primary home language was not English, mother's highest education was less than a high school diploma/GED, and living in a single-parent household. Values range from 0 to 4. NOTE: Detail may not sum to totals because of rounding. Estimates reflect the sample of children assessed in English in all assessment years. ECLS-K was not administered in 2000–01, when most of the children in the sample were in second grade. Most of the children were in first grade in 1999–2000, but 5 percent were in kindergarten or other grades (e.g., second grade, ungraded classrooms); most were in third grade in 2001–02, but 11 percent were in second grade or other grades (e.g., fourth

⁻Not available.

NOTE: The NAEP reading scores have been evaluated at certain performance levels. Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, sci-

ence, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity, except where noted. Some data have been revised from previously published figures. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), *NAEP 2004 Trends in Academic Progress*; and NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/), retrieved January 2006. (This table was prepared February 2006.)

[†]Not applicable.

¹Data for 1971 include persons of Hispanic ethnicity.

²Test scores of Hispanics were not tabulated separately.

⁻Not available. Data not collected.

NOTE: Scale ranges from 0 to 500. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 1994, 1998, 2000, 2002, 2003, 2005, and 2007 Reading Assessments, retrieved May 28, 2008, from the NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/). (This table was prepared June 2008.)

[†]Not applicable.

[‡]Reporting standards not met.

¹Accommodations were not permitted for this assessment.

²The percentile represents a specific point on the percentage distribution of all students ranked by their reading score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.

⁻Not available.

NOTE: The NAEP reading scores have been evaluated at certain performance levels. Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about litera-

ture, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

⁻Not available.

NOTE: The NAEP reading scores have been evaluated at certain performance levels. Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search for specific information, interrelate ideas, and make generalizations about literature, sci-

ence, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity, except where noted. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), NAEP 1999 Trends in Academic Progress; and NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/), retrieved July 2005. (This table was prepared February 2006.)

[†]Not applicable.

[‡]Reporting standards not met.

¹Data for 1971 include persons of Hispanic ethnicity.

²Test scores of Hispanics were not tabulated separately.

⁻Not available.

⁷Did not satisfy one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias. ⁸Did not satisfy one or more of the guidelines for school participation in 1994. Data are subject to appreciable nonresponse bias. ⁹Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

NOTE: The reading data include students for whom accommodations were permitted except for the 1992 and 1994 data. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 1994, 1998, 2002, 2003, 2005, and 2007 Reading Assessments, retrieved May 16, 2008, from the NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/). (This table was prepared May 2008.)

[†]Not applicable.

[‡]Reporting standards not met.

¹Scale ranges from 0 to 500.

²Race/ethnicity based on school records.

³Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 4th-grade level.

⁴Proficient represents solid academic performance for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter.

⁵Advanced signifies superior performance.

⁶Did not satisfy one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.

NOTE: The reading data include students for whom accommodations were permitted. Standard errors appear in parentheses. SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1998, 2002, 2003, 2005, and 2007 Reading Assessments, retrieved May 19, 2008, from the NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/). (This table was prepared May 2008.)

[†]Not applicable.

[‡]Reporting standards not met.

¹Scale ranges from 0 to 500.

²Central city is a large or mid-size central city of a Metropolitan Statistical Area (MSA). Urban fringe/large town includes places that are within an MSA of a central city but not primarily within its central city, as well as towns that are incorporated places not within an MSA and have a population greater than or equal to 25,000. Rural/small town includes places that are defined as rural by the U.S. Census Bureau and have a population less than 2,500 and/or a population density of less than 1,000 per square mile, as well as towns that are incorporated places not within an MSA and have a population less than 25,000 but greater than or equal to 2,500.

³Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at the 8th-grade level.

⁴Proficient represents solid academic performance for 8th-graders. Students reaching this level have demonstrated competency over challenging subject matter.

⁵Advanced signifies superior performance.

⁶Did not satisfy one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.

⁷Did not satisfy one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.

⁸Did not satisfy one or more of the guidelines for school participation in 2003. Data are subject to appreciable nonresponse bias.

⁹Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

Table 123. Average reading scale scores of 4th-, 8th-, and 12th-graders, by selected student and school characteristics: Selected years, 1992 through 2007

⁻Not available.

NOTE: Includes public and private schools. Excludes persons unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' writing proficiency). In 2002, the NAEP national samples of 4th- and 8th-graders were obtained by aggregating the samples from each state, rather than by independently selecting national samples for grades 4 and 8. As a consequence, the size of the national samples increased for these grade levels, and smaller differences were found to be statistically significant than would have been detected in previous assessments. Grade 4 was not included in the 2007 survey. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 2002 and 2007 Writing Assessments, retrieved May 6, 2008, from the NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/). (This table was prepared May 2008.)

[†]Not applicable.

[#]Rounds to zero.

[‡]Reporting standards not met.

Scale ranges from 1 to 300 for all three grades, but scores cannot be compared across grades. For example, a score of 156 at grade 8 does not denote higher performance than a score of 153 at grade 12.

²Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

³Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

⁴Advanced signifies superior performance for a given grade.

 ${}^5\mbox{Advanced}$ economics includes Advanced Placement, International Baccalaureate, and honors courses.

NOTE: Includes public and private schools. Excludes persons unable to be tested due to limited proficiency in English or due to a disability (if the accommodations provided were not sufficient to enable the test to properly reflect the students' economics proficiency). Detail may not sum to totals due to rounding. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 2006 Economics Assessment, retrieved August 23, 2007, from the NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/). (This table was prepared August 2007.)

[†]Not applicable.

[#]Rounds to zero.

 $[\]ddagger$ Reporting standards not met.

¹Scale ranges from 0 to 300.

²Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

³Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

⁴Advanced signifies superior performance for a given grade.

⁻Not available.

NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Includes public and private schools. Scale ranges from 0 to 500. A score of 150 implies the knowledge of some basic soldition and subtraction facts, and most students at this level can add two-digit numbers without regrouping. They recognize simple situations in which addition and subtraction apply. A score of 200 implies considerable understanding of two-digit numbers and knowledge of some basic multiplication and division facts. A score of 250 implies an initial understanding of the four basic operations. Students at this level can also compare information from graphs and charts and are developing an ability to analyze simple logical relations. A score of 300 implies an ability to compute decimals, simple fractions, and percents. Stu-

dents at this level can identify geometric figures, measure lengths and angles, and calculate areas of rectangles. They are developing the skills to operate with signed numbers, exponents, and square roots. A score of 350 implies an ability to apply a range of reasoning skills to solve multistep problems. Students at this level can solve routine problems involving fractions and percents, recognize properties of basic geometric figures, and work with exponents and square roots. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Some data have been revised from previously published figures. Standard errors appear in parentheses.

[—]Not available.

NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Includes public and private schools. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Assessment of Educational Progress (NAEP), 1999 NAEP Trends in Academic Progress and NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/), retrieved July 2005. (This table was prepared February 2006.)

[†]Not applicable.

[#]Rounds to zero.

[‡]Reporting standards not met.

¹Virtually no students were able to perform multistep problems and algebra.

²Virtually all students knew simple arithmetic facts.

³Scale score of 150 or above.

⁴Scale score of 200 or above.

⁵Scale score of 250 or above.

⁶Scale score of 300 or above.

⁷Scale score of 350 or above.

NOTE: Score level 200 indicates ability to perform simple additive reasoning and problem solving. Score level 250 indicates ability to perform simple multiplicative reasoning and two-step problem solving. Score level 300 indicates ability to perform reasoning and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra. Score level 350 indicates ability to perform reasoning and problem solving involving geom-

etry, algebra, and beginning statistics and probability. Scale ranges from 0 to 500. Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Includes public and private schools. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

⁸Because of modifications to the 2005 Puerto Rico administration, results from 2003 should not be compared to results from 2005. Although parallel changes were not made in the nation in 2005, within-year comparisons between Puerto Rico and the nation are valid.

NOTE: With the exception of 1992, includes students for whom accommodations were permitted. Excludes students unable to be tested (even with accommodations) due to limited proficiency in English or due to a disability. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

¹Scale ranges from 0 to 500.

 $^{^2\}textit{Basic}$ denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at the 4th-grade level.

³Proficient represents solid academic performance for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter.

⁴Advanced signifies superior performance.

⁵Percentage of students who report spending 30 minutes, 45 minutes, 1 hour, and over 1 hour on mathematics homework each day.

⁶Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.

 $^{^7\}text{Prior}$ to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic

⁻Not available.

⁷Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

⁶Because of modifications to the 2005 Puerto Rico administration, results from 2003 should not be compared to results from 2005. Although parallel changes were not made in the nation in 2005, within-year comparisons between Puerto Rico and the nation are valid.

NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability. Data for 2000, 2003, 2005, and 2007 include students for whom accommodations were permitted. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1990, 1992, 1996, 2000, 2003, 2005, and 2007 Mathematics Assessments, retrieved May 19, 2008, from the NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/). (This table was prepared May 2008.)

[†]Not applicable.

[‡]Reporting standards not met.

¹Scale ranges from 0 to 500.

²Excludes students who responded "I don't know" to the question about educational level of parents.

³Basic denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at the 8th-grade level.

⁴Proficient represents solid academic performance for 8th-graders. Students reaching this level have demonstrated competency over challenging subject matter.

⁵Advanced signifies superior performance.

⁶Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.

¹Scale ranges from 0 to 500.

NOTE: Includes public and private schools. Includes students for whom accommodations were permitted. Excludes students unable to be tested (even with accommodations) due to limited proficiency in English or due to a disability. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

⁻Not available.

NOTE: The NAEP science scale ranges from 0 to 300. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/), retrieved November 2006. (This table was prepared November 2006.)

[†]Not applicable.

[‡]Reporting standards not met.

¹Testing accommodations (e.g., extended time, small group testing) for children with disabilities and limited-English-proficient students were not permitted on the 1996 science assessment.

²The percentile represents a specific point on the percentage distribution of all students ranked by their science score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.

³Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work.

⁴Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

⁵Advanced signifies superior performance.

⁻Not available.

NOTE: Excludes persons not enrolled in school and those who were unable to be tested due to limited proficiency in English or due to a disability (if sample not tested with accommodations or if the accommodations provided in 2000 and 2005 were not sufficient to enable the test to properly reflect the students' science proficiency). Scale ranges from 0 to 300. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), NAEP 1996 Science Report Card for the Nation and the States, The Nation's Report Card: Science 2005, and the NAEP Data Explorer (http://nces.ed.gov/nationsreportcard/nde/, retrieved on December 4, 2006). (This table was prepared December 2006.)

[†]Not applicable.

[‡]Reporting standards not met.

¹Accommodations were not permitted for this assessment.

²Did not satisfy one or more of the quidelines for school participation in 1996. Data are subject to appreciable nonresponse bias. ³Significantly different from 2005 when only one jurisdiction or the nation is being examined.

⁴Did not satisfy one or more of the quidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.

⁵Before 2005, Department of Defense domestic and overseas schools were separate jurisdictions in NAEP. Data for 1996 and 2000 were recalculated for comparability.

NOTE: Data are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section. The writing section was introduced in March 2005.

1Data for 1966–67 to 1985–86 were converted to the recentered scale by using a formula applied to the original mean and standard deviation. For 1986–87 to 1994–95, individual student scores were converted to the recentered scale and then the mean was recomputed. For 1995–96 to 1998–99, nearly all students received scores on the recentered scale; any score on the original scale was converted to the recentered scale prior to recomputing the mean. From 1999–2000 on, all scores have been reported on the recentered scale.

²Writing data are based on students who took the SAT writing section, which was introduced in March 2005.

NOTE: Data for 1966–67 through 1970–71 are estimates derived from the test scores of all participants. Data for 1971–72 and later are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section. ⁻Not available.

⁵Home economics was changed to Family and consumer sciences/human sciences as of 2006–07.

NOTE: Data are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. Detail may not sum to totals because of rounding and survey item nonresponse.

SOURCE: College Entrance Examination Board, *College-Bound Seniors: Total Group Profile* [National] Report, selected years, 1995–96 through 2007–08, retrieved August 26, 2008, from http://professionals.collegeboard.com/data-reports-research/sat/cb-seniors-2008. (This table was prepared August 2008.)

[†]Not applicable.

[#]Rounds to zero.

[‡]Reporting standards not met.

¹Prior to 2006, the critical reading section was known as the verbal section.

 $^{^{2}}$ Writing data are based on students who took the SAT writing section, which was introduced in March 2005.

³Beginning in 2005–06, the College Board has reported third, fourth, and fifth quintiles as the bottom three quintiles instead of reporting them separately as in previous years.

⁴Data may not be comparable over time because of additions to the list of majors and changes in subspecialties within majors.

¹Participation rate is based on the projection of high school graduates by the Western Interstate Commission for Higher Education (WICHE), and the number of seniors who took the SAT in each state.

NOTE: Data are for seniors who took the SAT any time during their high school years through March of their senior year. If a student took a test more than once, the most recent score was used. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test. Possible scores on each part of the SAT range from 200 to 800. The critical reading section was formerly known as the verbal section.

SOURCE: College Entrance Examination Board, College-Bound Seniors Tables and Related Items, selected years, 1987–88 through 2007–08, retrieved August 26, 2008, from http://professionals.collegeboard.com/data-reports-research/sat/cb-seniors-2008. (This table was prepared August 2008.)

 $^{^2\}mbox{Writing}$ data are based on students who took the SAT writing section, which was introduced in March 2005.

³Participation rate is based on self-reported 12th-grade enrollment from D.C's public and nonpublic schools because WICHE estimated fewer graduating seniors than actual SAT test takers.

⁴Beginning with the spring SAT administration in 2006, all Maine high school juniors, including all students in their third year of high school, are required to take SAT tests in critical reading, writing, and mathematics.

⁻Not available.

⁵Includes social science and philosophy, religion, and theology.

⁶Includes education and teacher education.

NOTE: Race categories exclude persons of Hispanic ethnicity.

SOURCE: ACT, *High School Profile Report*, selected years, 1995 through 2008. (This table was prepared August 2008.)

[†]Not applicable.

¹Standard deviations not available for 1995.

²Minimum score is 1 and maximum score is 36.

 $^{^{3}}$ Includes business and management, business and office, and marketing and distribution.

⁴Includes engineering and engineering-related technologies.

Table 146. Percentage distribution of elementary and secondary school children, by average grades and selected child and school characteristics: 1996, 1999, and 2003

¹Includes general labor market preparation, consumer and homemaking education, and occupational education in agriculture, business, marketing, health, occupational home economics, trade and industry, and technical courses.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. SOURCE: U.S. Department of Education, National Center for Education Statistics, High School and Beyond Longitudinal Study of 1980 Sophomores (HS&B-So:80/82), "High School Transcript Study"; and 1987, 1990, 1994, 1998, 2000, and 2005 High School Transcript Study (HSTS). (This table was prepared January 2007.)

²Includes general skills, personal health and physical education, religion, military sciences, special education, and other courses not included in other subject fields.

³Though shown separately here, computer-related courses are also included in the mathematics and career/technical categories. ⁴Includes students who complete at least 12 Carnegie units in academic courses, but less than 3 Carnegie units in any occupational education field.

⁵Includes students who complete at least 3 Carnegie units in an occupational education field, but less than 12 Carnegie units in academic courses.

⁶Includes students who complete at least 12 Carnegie units in academic courses and at least 3 Carnegie units in an occupational education field.

⁷Includes students who complete less than 12 Carnegie units in academic courses and less than 3 Carnegie units in an occupational education field.

Table 148. Average number of Carnegie units earned by public high school graduates in career/technical education courses, by selected student characteristics: Selected years, 1982 through 2005

#Rounds to zero.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, High School and Beyond Longitudinal Study of 1980 Sophomores (HS&B-So:80/82), "High School Transcript Study"; and 1987, 1990, 1994, 1998, 2000, and 2005 High School Transcript Study (HSTS). (This table was prepared January 2007.)

¹Includes unclassified courses not shown separately.

²Includes students who complete at least 12 Carnegie units in academic courses, but less than 3 Carnegie units in any occupational education field.

³Includes students who complete at least 3 Carnegie units in an occupational education field, but less than 12 Carnegie units in academic courses

⁴Includes students who complete at least 12 Carnegie units in academic courses and at least 3 Carnegie units in an occupational education field.

⁵Includes students who complete less than 12 Carnegie units in academic courses and less than 3 Carnegie units in an occupational education field.

Table 149. Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by sex and race/ethnicity: Selected years, 1982 through 2005

[†]Not applicable

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria.

Some data have been revised from previously published figures. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, High School and Beyond Longitudinal Study of 1980 Sophomores (HS&B-So:80/82), "High School Transcript Study"; and 1987, 1990, 1994, 1998, 2000, and 2005 High School Transcript Study (HSTS). (This table was prepared January 2007.)

¹These data only report the percentage of students who earned the indicated credit (0.5 = one semester; 1.0 = one academic year) in each course while in high school and do not count those students who took these courses prior to entering high school. ²Excludes pre-algebra.

³Includes algebra/trigonometry and algebra/geometry.

[†] Not applicable.

⁵Transfer students were classified as "mixed" if their base-year school and their transfer school were in different categories (e.g., a Catholic school student who transferred to a public school or a student who transferred from an urban to a rural school).

⁶Region is defined by the U.S. Census Bureau based on the state in which the school is located.

NOTE: Highest mathematics and science courses taken are based on a taxonomy of course types for which the student received a nonzero credit while in high school. Detail may not sum to totals because of rounding. The academic year extended from September 1, 2003, to August 31, 2004. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Academic Pathways, Preparation, and Performance: A Descriptive Overview of the Transcripts From the High School Graduating Class of 2003–04, Education Longitudinal Study of 2002 (ELS:2002), "High School Transcript Study." (This table was prepared May 2007.)

¹Level 1 = no math; Level 2 = basic math/prealgebra; Level 3 = core secondary through algebra II; Level 4 = trigonometry, statistics, precalculus; and Level 5 = calculus.

²Level 1 = no science; Level 2 = primary physical science; Level 3 = secondary physical science and basic biology; Level 4 = general biology; Level 5 = chemistry I or physics I; Level 6 = chemistry I and physics I; Level 7 = chemistry II or physics II or advanced biology; Level 8 = both Levels 6 and 7.

³Race categories exclude persons of Hispanic ethnicity.

⁴The first language students learned to speak when they were children.

Table 151. Percentage of public and private high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: Selected years, 1982 through 2005

[†]Not applicable.

NOTE: Data were collected during the 2002–03 12-month school year. Dual credit courses are those in which high school students can earn both high school and postsecondary credits for the same course. Percentages are based on unrounded numbers. Detail may not sum to totals because of rounding or missing data. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Fast Response Survey System (FRSS), "Dual Credit and Exam-Based Courses," FRSS 85, 2003. (This table was prepared July 2005.)

[#]Rounds to zero.

[!]Interpret data with caution. ‡Reporting standards not met.

¹⁻neporting standards not met.

Tenrollments may include duplicated counts of students in each type of course, since schools were instructed to count a student enrolled in multiple courses of a particular type

for each course in which he or she was enrolled. ²Excludes schools not reporting minority enrollment.

¹Interscholastic refers to competition between teams from different schools. Intramural refers to competition between teams or students within the same school. Data on these categories are available only for 2002.

NOTE: Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Education Longitudinal Study of 2002 (ELS:2002); and *America's High School Sophomores: A Ten Year Comparison, 1980–1990*, National Education Longitudinal Study of 1988 (NELS:88/90), "First Follow-up, 1990." (This table was prepared December 2006.)

²Composite test performance quartile on mathematics, reading, science, and social studies in 1990 and composite test performance quartile on mathematics, reading, and science in 2002.

³Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

⁻ Not available.

NOTE: Includes children enrolled in kindergarten through grade 12 and ungraded students. Data based on responses of the parent most knowledgeable about the student's education. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. Totals include data for other racial/ethnic groups not separately shown.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2003 and 2007). (This table was prepared June 2008.)

[†]Not applicable.

[‡]Reporting standards not met.

[!]Interpret data with caution.

¹Refers to one or more parent or other household adult. Only includes students who had homework outside of school.

¹Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income. The "low" SES group is the lowest quarter; the "middle" SES group is the middle two quarters; and the "high" SES group is the upper quarter.

NOTE: Race categories exclude persons of Hispanic ethnicity. Data for 2002 for persons reporting more than one race are not shown separately, but are included in totals. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

⁻Not available

²Violent incidents include serious violent incidents (i.e., rape or attempted rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon) plus physical attack or fight without a weapon and threat of physical attack without a weapon.

3Serious violent incidents include rape or attempted rape, sexual battery other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon.

⁴Rape was defined for respondents as "forced sexual intercourse (vaginal, anal, or oral penetration). This includes penetration

⁵Sexual battery was defined for respondents as an "incident that includes threatened rape, fondling, indecent liberties, child molestation, or sodomy."

⁶Physical attack or fight was defined for respondents as an "actual and intentional touching or striking of another person against his or her will, or the intentional causing of bodily harm to an individual."

Weapon was defined for respondents as "any instrument or object used with the intent to threaten, injure, or kill. Includes look-alikes if they are used to threaten others."

⁸Robbery was defined for respondents as "the taking or attempting to take anything of value that is owned by another person or organization, under confrontational circumstances by force or threat of force or violence and/or by putting the victim in fear. A key difference between robbery and theft/larceny is that robbery involves a threat or battery."

⁹Theft/larceny (taking things over \$10 without personal confrontation) was defined for respondents as "the unlawful taking of another person's property without personal confrontation, threat, violence, or bodily harm. Included are pocket picking, stealing purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of bicycles, theft from vending machines, and all other types of thefts." ¹⁰Other incidents include possession of a firearm or explosive device; possession of a knife or sharp object; distribution, pos-

session, or use of illegal drugs or alcohol; and vandalism. 11Firearm/explosive device was defined as "any weapon that is designed to (or may readily be converted to) expel a projectile

by the action of an explosive. This includes guns, bombs, grenades, mines, rockets, missiles, pipe bombs, or similar devices designed to explode and capable of causing bodily harm or property damage."

¹²Vandalism was defined for respondents as "the willful damage or destruction of school property including bombing, arson. graffiti, and other acts that cause property damage. Includes damage caused by computer hacking."

NOTE: Either the school principal or the person most knowledgeable about discipline issues at school completed the SSOCS questionnaire. If the respondent did not provide a value for the total number of specified incidents at the school, the value was imputed to equal the number of specified incidents reported to police. Values associated with violent incidents, serious violent incidents, total incidents, and other incidents were obtained by adding the post-imputed values that comprise each of the preceding composite variables. All public schools include primary schools, middle schools, high schools, and combined schools. The population counts on SSOCS 2000 and 2006 exclude all schools in outlying U.S. territories; nonregular schools such as special education, vocational, alternative/other, and ungraded schools; and schools with a high grade of kindergarten or lower. "At school/at your school" was defined for respondents as including activities happening in school buildings, on school grounds, on school buses, and at places that are holding school-sponsored events or activities. Respondents were instructed to, unless the survey specified otherwise, only respond for those times that were during normal school hours or when school activities/events were in session. Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K-12 schools. Detail may not sum to totals because of rounding.

[†]Not applicable.

[‡]Reporting standards not met.

¹Access to buildings is controlled during school hours (e.g., by locked or monitored doors).

²Access to grounds is controlled during school hours (e.g., by locked or monitored gates).

³All students must pass through a metal detector each day.

⁴All or most students are required to stay on school grounds during lunch.

⁵Elementary schools have grade 6 or below, with no grade higher than 8; secondary schools have no grade lower than 7; and combined schools have grades lower than 7 and higher than 8.

NOTE: Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

[†]Not applicable.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, Office for Civil Rights, Civil Rights Data Collection: 2006. (This table was prepared July 2008.)

[#]Rounds to zero.

[!]Interpret data with caution.

¹A student is counted only once, even if suspended more than once during the same school year.

²Data are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.

⁻Not available.

NOTE: Standard errors appear in parentheses. Standard errors were calculated from formulas to perform trend analysis over an interval greater than 1 year (for example, a comparison between 1975 and 1990). A revised questionnaire was used in 1982 and later years to reduce the inappropriate reporting of nonprescription stimulants. This slightly reduced the positive responses for some types of drug abuse.

(This table was prepared September 2008.)

[—]Not available.

¹Most states have a provision whereby education is provided up to a certain age or completion of secondary school, whichever comes first.

²Child may be exempted from compulsory attendance if he/she meets state requirements for early withdrawal with or without meeting conditions for a diploma or equivalency.

³State requires districts with full-day programs to offer half-day programs.

⁴Districts may apply for exemptions from the requirement.

⁵Parent/guardian may request a waiver to delay entry to a later age per state law/regulation. ⁶Under 21 or until child graduates from high school.

⁷Full-day requirement becomes effective upon each district's confirming vote and upon specific funding appropriation by the General Assembly.

⁸State did not participate in the 2006 online survey.

⁹Attendance is compulsory until age 18 for Manatee County students, unless they earn a high school diploma prior to reaching their 18th birthday.

 $^{^{\}rm 10}\text{To}$ be determined by rules and regulations adopted by the state board.

¹¹Must be 5 before October 1, and not 20 before start of school year.

¹²State requires a "program," not necessarily a traditional kindergarten program.

 $^{^{\}rm 13} Compulsory$ attendance age becomes 18 effective July 1, 2009.

¹⁴Abbott districts only (31). These are districts covered by New Jersey Supreme Court rulings requiring the state to implement comprehensive programs and reforms to improve the education of students in the poorest schools.

¹⁵School-age unless otherwise provided by law.

¹⁶New York City and Buffalo require school attendance until age 17 unless employed.

¹⁷Must not be 21 by September 1.

¹⁸Children from birth through age 2 are eligible for additional services. Eligibility for special education services ceases upon completion of a secondary education program; no age limit.

¹⁹Beginning in 2011–12, with the option for districts to transfer intradistrict, interdistrict, or to a licensed child care provider.

²⁰Compulsory leaving age becomes 18 effective July 1, 2009; compulsory entry age becomes 5 effective July 1, 2010.

²¹Student may complete school year if 21st birthday occurs while attending school.

²²Districts are required to provide full-day kindergarten for low-income students.

NOTE: The Education of the Handicapped Act (EHA) Amendments of 1986 make it mandatory for all states receiving EHA funds to serve all 3- to 18-year-old disabled children.

Includes a relatively small amount from nongovernmental private sources (gifts and tuition and transportation fees from patrons). These sources accounted for 2.2 percent of total revenues in 2005-06.

²Revised from previously published figures.

NOTE: Beginning in 1980–81, revenues for state education agencies are excluded. Beginning in 1988–89, data reflect new survey collection procedures and may not be entirely comparable with figures for earlier years. With the exception of federal revenue per student,

data are not adjusted for changes in the purchasing power of the dollar due to inflation. Detail may not sum to totals because of rounding.

NOTE: Beginning in 1959–60, includes Alaska and Hawaii. Beginning in 1989–90, state administration expenditures were excluded from both "total" and "current" expenditures. Beginning in 1989–90, extensive changes were made in the data collection procedures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Biennial Survey of Education in the United States, 1919–20 through 1949–50; Statistics of State School Systems, 1959–60 and 1969–70; Revenues and Expenditures for Public Elementary and Secondary Education, 1979–80; and Common Core of Data (CCD), "National Public Education Financial Survey," 1989–90 through 2005–06. (This table was prepared April 2008.)

¹Prior to 1959–60, items included under "other school services" were listed under "auxiliary services," a more comprehensive classification that also included community services. ²Includes expenditures for summer schools, adult education, community colleges, and community services.

³Prior to 1969–70, excludes capital outlay by state and local school housing authorities.

⁴Plant operation also includes plant maintenance.

⁵Data not comparable to figures prior to 1989–90.

 $^{^{\}rm 6}\textsc{Data}$ have been revised from previously published figures.

¹Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems, 1929–30 through 1975–76; Revenues and Expenditures for Public Elementary and Secondary Education, 1977–78 and 1979–80; Common Core of Data (CCD), "National Public Education Financial Survey," 1987–88 through 2005–06 Bobit Publishing Co., School Bus Fleet, "School Transportation: 2000–2001 School Year"; School Transportation News, "K–12 Enrollment/Transportation Data," 2001–02 through 2006–07; and unpublished data. (This table was prepared August 2008.)

²Excludes capital outlay for years through 1979–80, and 1989–90 to the latest year. From 1980–81 to 1988–89 total transportation figures include capital outlay.

³Estimate based on data appearing in January issues of *School Bus Fleet*.

⁴Estimate based on data reported by *School Transportation News*. NOTE: Some data have been revised from previously published figures.

Table 176. Current expenditures for public elementary and secondary education, by state or jurisdiction: Selected years, 1969–70 through 2005–06 [In thousands of current dollars]

¹Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.

²Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Also includes small amounts for direct program support made by state education agencies for local school districts.

⁴Includes expenditures for health, attendance, and speech pathology services. ⁵Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey," 2005–06. (This table was prepared April 2008.)

⁻Not available.

¹Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.

²Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Also includes small amounts for direct program support made by state education agencies for local school districts.

 $^{^4}$ Includes expenditures for health, attendance, and speech pathology services.

⁵Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

⁻Not available.

elncludes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Includes very small amounts for direct program support made by state education agencies for local school districts.

Includes expenditures for property, and for buildings and alterations completed by school district staff or contractors. NOTE: Excludes expenditures for state education agencies. Data are not adjusted for changes in the purchasing power of the dollar due to inflation. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey," 1990–91 through 2005–06. (This table was prepared April 2008.)

[†]Not applicable.

¹Data have been revised from previously published figures.

²Includes estimated data for subfunctions of food services and enterprise operations.

³Includes expenditures for guidance, health, attendance, and speech pathology services.

⁴Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

slincludes business support services concerned with paying, transporting, exchanging, and maintaining goods and services for local education agencies; central support services, including planning, research, evaluation, information, staff, and data processing services; and other support services.

NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey," 2004–05 and 2005–06. (This table was prepared April 2008.)

Data have been revised from previously published figures.

2Includes purchased professional services of teachers or others who provide instruction for students and travel for instructional staff.

Table 181. Total and current expenditures per pupil in public elementary and secondary schools: Selected years, 1919-20 through 2005-06

⁻Not available

services, food services, and enterprise operations. Total expenditures include current expenditures, capital outlay, and interest on debt. Beginning in 1988–89, extensive changes were made in the data collection procedures. Some data have been revised from previously nulhished floures

previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States*, 1919–20 through 1955–56; *Statistics of State School Systems*, 1957–58 through 1969–70; *Revenues and Expenditures for Public Elementary and Secondary Education*, 1970–71 through 1986–87; and Common Core of Data (CCD), "National Public Education Financial Survey," 1987–88 through 2005–06. (This table was prepared April 2008.)

Data for 1919–20 to 1953–54 are based on school-year enrollment.

Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor

Statistics, U.S. Department of Labor, adjusted to a school-year basis.

³Excludes "Other current expenditures," such as community services, private school programs, adult education, and other programs not allocable to expenditures per student at public schools.

⁴Estimated

NOTE: Beginning in 1980–81, state administration expenditures are excluded from both "total" and "current" expenditures. Current expenditures include instruction, student support

¹Excludes "Other current expenditures," such as community services, private school programs, adult education, and other programs not allocable to expenditures per pupil in public

⁵Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. "0" indicates none or less than

80.50. Detail may not sum to totals because of rounding.
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey," 2005–06. (This table was prepared April 2008.)

 $^{^2 \}mbox{lncludes}$ expenditures for property and for buildings and alterations completed by school district staff or contractors.

³Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).

4Includes expenditures for health, attendance, and speech pathology services.

-Not available.

⁵Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. "0" indicates none or less than \$0.50. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey," 2004–05. (This table was prepared April 2008.)

¹Excludes "Other current expenditures," such as community services, private school programs, adult education, and other programs not allocable to expenditures per pupil in public schools.

schools.

2Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

 $^{^3\}mbox{lncludes}$ expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).

⁴Includes expenditures for health, attendance, and speech pathology services.

⁻Not available.

for public school districts was improved. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems, 1969–70; Revenues and Expenditures for Public Elementary and Secondary Schools, 1979–80; and Common Core of Data (CCD), "National Public Education Financial Survey," 1989–90 through 2005–06. (This table was prepared April 2008.)

¹Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.

NOTE: Expenditures for state administration are excluded in all years except 1969–70 and 1979–80. Beginning in 1989–90, survey was expanded and coverage of state expenditures

Table 185. Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1959–60 through 2005–06

—Not available.
¹Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.

2Estimated by the National Center for Education Statistics.

NOTE: State administration expenditures are excluded in all years except 1959–60,

1969-70, and 1979-80. Beginning in 1989-90, extensive changes were made in the data

collection procedures. There are discrepancies in average daily attendance reporting practices from state to state. Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statis*tics of State School Systems, 1959–60 and 1969–70; Revenues and Expenditures for Public Elementary and Secondary Education, 1979–80; and Common Core of Data (CCD), "National Public Education Financial Survey," 1989–90 through 2005–06. (This table was prepared April 2008.)

CHAPTER 3 Postsecondary Education

Postsecondary education includes an array of diverse educational experiences offered by American colleges and universities, and technical and vocational institutions. For example, a community college may offer vocational training or the first 2 years of training at the college level. A university typically offers a full undergraduate course of study leading to a bachelor's degree, as well as first-professional and graduate programs leading to advanced degrees. Vocational and technical institutions offer training programs that are designed to prepare students for specific careers. Community groups, religious organizations, libraries, and businesses provide other types of educational opportunities for adults.

This chapter provides an overview of the latest statistics on postsecondary education, which includes academic, vocational, and continuing professional education programs after high school. However, to maintain comparability over time, most of the data in the Digest are for degree-granting institutions, which are defined as postsecondary institutions that grant an associate's or higher degree and whose students are eligible to participate in the Title IV federal financial aid programs. Degree-granting institutions include almost all 2- and 4-year colleges and universities; they exclude institutions offering only vocational programs of less than 2 years' duration and continuing education programs. The degree-granting institution classification is very similar to the higher education institution classification that the National Center for Education Statistics (NCES) used prior to 1996-97.2 This chapter highlights historical data that enable the reader to observe long-range trends in college education in America.

Other chapters provide related information on postsecondary education. Data on price indexes and on the number of degrees held by the general population are shown in chapter 1. Chapter 4 contains tabulations on federal funding for postsecondary education. Information on employment outcomes for

college graduates is shown in chapter 5. Chapter 7 contains data on college libraries and use of computers by young adults. Further information on survey methodologies is presented in Appendix A: Guide to Sources and in the publications cited in the table source notes.

Enrollment

Enrollment in degree-granting institutions increased by 14 percent between 1987 and 1997 (table 188 and figure 11). Between 1997 and 2007, enrollment increased at a faster rate (26 percent), from 14.5 million to 18.2 million. Much of the growth between 1997 and 2007 was in full-time enrollment; the number of full-time students rose 34 percent, while the number of part-time students rose 15 percent. During the same time period, the number of females rose 29 percent, compared to an increase of 22 percent in the number of males. Enrollment increases can be affected both by population growth and by rising rates of enrollment. Between 1997 and 2007, the number of 18- to 24-year-olds increased from 25.5 million to 29.5 million, an increase of 16 percent (table 15), and the percentage of 18- to 24-year-olds enrolled in college remained relatively stable (37 percent in 1997 and 39 percent in 2007) (table 204). In addition to the enrollment in accredited 2-year colleges, 4-year colleges, and universities, about 447,000 students attended non-degree-granting, Title IV eligible, postsecondary institutions in fall 2006 (table 186).

The number of young students has been growing more rapidly than the number of older students, but this pattern is expected to shift (table 190 and figure 13). Between 1995 and 2006, the enrollment of students under age 25 increased by 33 percent. Enrollment of people 25 and over rose by 13 percent during the same period. From 2006 to 2017, NCES projects a rise of 10 percent in enrollments of people under 25, and a rise of 19 percent in enrollments of people 25 and over.

Enrollment trends have differed at the undergraduate, graduate, and first-professional levels. Undergraduate enrollment generally increased during the 1970s, but dipped from 10.8 million to 10.6 million between 1983 and 1985 (table 205). From 1985 to 1992, undergraduate enrollment increased each year, rising 18 percent before declining 2 percent and stabilizing between 1993 and 1996. Undergraduate enrollment rose 25 percent between 1997 and 2007. Graduate enrollment had been steady at about 1.3 million in the late 1970s and early 1980s, but rose about 67 percent between 1985 and 2007

¹ Title IV programs, which are administered by the U.S. Department of Education, provide financial aid to postsecondary students.

² Included among degree-granting institutions are some institutions (primarily 2-year colleges) that were not previously designated as higher education institutions. Excluded from degree-granting institutions are a few institutions that were previously designated as higher education institutions even though they did not award an associate's or higher degree. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. Institutions of higher education offered courses that led to an associate's or higher degree, or were accepted for credit towards a degree.

(table 206). After rising 60 percent between 1970 and 1980, enrollment in first-professional programs stabilized in the 1980s (table 207). First-professional enrollment began rising again in the 1990s and showed an increase of 18 percent between 1997 and 2007.

Since 1984, the number of females in graduate schools has exceeded the number of males (table 206). Between 1997 and 2007, the number of male full-time graduate students increased by 32 percent, compared to a 63 percent increase for female graduate students. Among part-time graduate students, the number of males increased by 10 percent and the number of females increased by 23 percent.

The percentage of American college students who are minorities has been increasing. In 1976, 15 percent were minorities, compared with 32 percent in 2007 (table 226). Much of the change from 1976 to 2007 can be attributed to rising numbers of Hispanic and Asian or Pacific Islander students. During that time period, the percentage of Asian or Pacific Islander students rose from 2 percent to 7 percent and the Hispanic percentage rose from 4 percent to 11 percent. The percentage of Black students was 9 percent at the beginning of the time period and it fluctuated during the early part of the period before rising to 13 percent in 2007. Nonresident aliens for whom race/ethnicity is not reported made up 3 percent of the total enrollment in 2007.

Despite the sizable numbers of small degree-granting colleges, most students attend the larger colleges and universities. In fall 2006, 41 percent of institutions had fewer than 1,000 students; however, these campuses enrolled 4 percent of college students (table 234). While 12 percent of the campuses enrolled 10,000 or more students, they accounted for 55 percent of total college enrollment.

In 2006, the five colleges with the highest enrollment were University of Phoenix Online Campus, with 165,373 students; Ohio State University, with 51,818 students; Miami-Dade College, with 51,329 students; Arizona State University at the Tempe Campus, with 51,234 students; and the University of Florida, with 50,912 students (table 236).

Faculty, Staff, and Salaries

Approximately 3.6 million people were employed in colleges and universities in the fall of 2007, including 2.6 million professional and 0.9 million nonprofessional staff (table 245). In the fall of 2007, there were 1.4 million faculty members in degree-granting institutions, including 0.7 million full-time and 0.7 million part-time faculty. The proportion of executive, administrative, and managerial staff was 6 percent in 2007, compared to 5 percent in 1976 (table 244). The proportion of other non-teaching professional staff rose from 10 percent in 1976 to 20 percent in 2007, while the proportion of nonprofessional staff (including technical and paraprofessional, clerical and secretarial, skilled crafts, and service and maintenance staff) declined from 42 percent to 26 percent. The full-time-equivalent (FTE) student/FTE staff ratio at colleges and universities was lower in 2007 (5.0) than in 1976 (5.4). The FTE student/FTE faculty ratio declined from 16.6 in 1976 to 14.9 in 2007.

Colleges differ in their practices of employing part-time and full-time staff. In fall 2007, 48 percent of the employees at public 2-year colleges were employed full time, compared with 68 percent at public 4-year colleges and universities, 67 percent at private 4-year colleges and universities, and 66 percent at private 2year colleges (table 245). A higher percentage of the faculty at public 4-year colleges and universities were employed full time (68 percent) than at private 4-year colleges and universities (48 percent), private 2-year colleges (46 percent), or public 2-year colleges (31 percent). In general, the number of full-time staff has been growing at a slower rate than the number of part-time staff (table 243). Between 1997 and 2007, the number of fulltime staff increased by 25 percent compared to an increase of 39 percent in the number of part-time staff. Most of the increase in the part-time staff was due to the increase in the number of parttime faculty (59 percent) and instruction and research assistants (48 percent) during this time period.

In fall 2007, minorities made up 17 percent of U.S. faculty (based on a total faculty count excluding persons whose race/ethnicity was unknown) (table 246). Seven percent of the faculty were Black, 6 percent were Asian/Pacific Islander, 4 percent were Hispanic, and 1 percent were American Indian/Alaska Native. About four-fifths of the faculty were White, with 43 percent being White males and 36 percent being White females. Minorities made up about 18 percent of executive, administrative, and managerial staff in 2007 and about 33 percent of nonprofessional staff. The proportions of minority staff at public 4-year colleges (23 percent), private 4-year colleges (22 percent), and public 2-year colleges (22 percent) were similar, with the proportion at private 2-year colleges (27 percent) being slightly higher.

On average, full-time instructional faculty and staff spent 58 percent of their time teaching in 2003 (table 250). Research and scholarship accounted for 20 percent of their time, and 22 percent was spent on other activities (administration, professional growth, etc.).

Faculty salaries generally lost purchasing power from 1972–73 to 1980–81, when average salaries for faculty on 9-month contracts declined 17 percent after adjustment for inflation (table 257). During the 1980s, average salaries rose and recouped most of the losses. Between 1997–98 and 2007–08, there was a further increase in average faculty salaries, resulting in an average of about 4 percent higher than the 1972–73 average, after adjustment for inflation. The average salary in current dollars for males in 2007–08 (\$76,935) was higher than the average for females (\$63,347). Between 1997–98 and 2007–08, the average salary for males increased by 5 percent and the average salary for females increased by 6 percent, after adjustment for inflation.

The percentage of faculty with tenure has declined in recent years. About 50 percent of full-time instructional faculty had tenure in 2005–06, compared with 56 percent in 1993–94 (table 264). A difference existed between the percentage of males and females with tenure. Fifty-five percent of males compared to 41 percent of females had tenure in 2005–06. About 52 percent of the instructional faculty at public institutions had tenure, compared to 45 percent of faculty at private not-for-profit institutions.

Degrees

During the 2007–08 academic year, 4,352 accredited institutions offered degrees at the associate's degree level or above (table 266). These included 2,675 4-year institutions and 1,677 2-year institutions. Institutions awarding various degrees in 2006–07 numbered 2,725 for associate's degrees, 2,256 for bachelor's degrees, 1,695 for master's degrees, and 648 for doctor's degrees (table 278).

Growing numbers of people are completing college degrees. Between 1996-97 and 2006-07, the number of associate's, bachelor's, master's, first-professional, and doctor's degrees rose (table 268). During this period, associate's degrees increased 27 percent, bachelor's degrees increased 30 percent, master's degrees increased 44 percent, first-professional degrees increased 14 percent, and doctor's degrees increased 32 percent. Since the mid-1980s, more females than males have earned associate's, bachelor's, and master's degrees. In 2006-07, the number of females earning doctor's degrees exceeded the number of males. Also, the number of females receiving all types of degrees has increased at a faster rate than the number for males. Between 1996-97 and 2006–07, the number of bachelor's degrees awarded to males increased by 25 percent, while the number awarded to females increased by 34 percent. The number of males earning doctor's degrees was about 11 percent higher in 2006-07 than in 1996–97, while the number of females earning doctor's degrees rose by 62 percent.

Of the 1,524,000 bachelor's degrees conferred in 2006–07, the largest numbers of degrees were conferred in the fields of business (328,000), social sciences and history (164,000), education (106,000), and health sciences (102,000) (table 271). At the master's degree level, the largest numbers of degrees were in the fields of education (177,000) and business (150,000) (table 272). The fields with the largest number of degrees at the doctor's degree level were health professions and related clinical sciences (8,400), education (8,300), engineering (8,100), biological and biomedical sciences (6,400), psychology (5,200), and physical sciences (4,800) (table 273).

In recent years, the numbers of bachelor's degrees conferred have followed patterns that differed significantly by field of study. While the number of degrees increased 30 percent overall between 1996-97 and 2006-07, there was substantial variation among the different fields of study, as well as shifts in the patterns of change during this time period (table 271). The number of bachelor's degrees conferred in the combined fields of engineering and engineering technologies declined 1 percent between 1996-97 and 2001-02, but then rose 10 percent between 2001-02 and 2006-07 (table 271 and figure 15). The number of engineering and engineering technologies degrees conferred in 2006-07 was about 8 percent higher than the number conferred in 1996-97. The number of degrees in the health professions declined by 17 percent between 1996-97 and 2001-02, but then rose 40 percent between 2001-02 and 2006-07. Similarly, the number of degrees in biological sciences decreased 7 percent between 1996-97 and 2001-02, but then increased 26 percent between

2001–02 and 2006–07; and the number in the physical sciences declined by 9 percent between 1996–97 and 2001–02, but increased 18 percent between 2001–02 and 2006–07. Some technical fields experienced a contrasting pattern. After an increase of 98 percent between 1996–97 and 2001–02, the number of degrees in computer and information sciences decreased 16 percent between 2001–02 and 2006–07. Other fields with sizable numbers of degrees (over 5,000) that showed increases of over 30 percent between 2001–02 and 2006–07 included security and protective services (54 percent); parks, recreation, and leisure studies (45 percent); and transportation and materials moving (41 percent).

Fifty-eight percent of the students who enrolled in a 4-year college or university as first-time freshmen in 1995–96 had completed a bachelor's degree by 2001 (table 329). About 7 percent of students had completed a certificate or associate's degree, 14 percent were still enrolled without having received a degree, and 21 percent were no longer working toward a bachelor's degree.

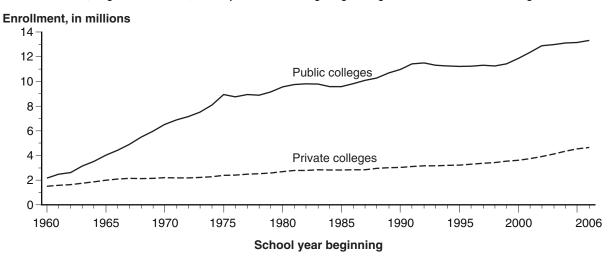

Finances

For the 2007–08 academic year, annual prices for undergraduate tuition, room, and board were estimated to be \$11,164 at public institutions and \$28,846 at private institutions (table 331). Between 1997–98 and 2007–08, prices for undergraduate tuition, room, and board at public institutions rose by 30 percent, and prices at private institutions rose by 23 percent, after adjustment for inflation.

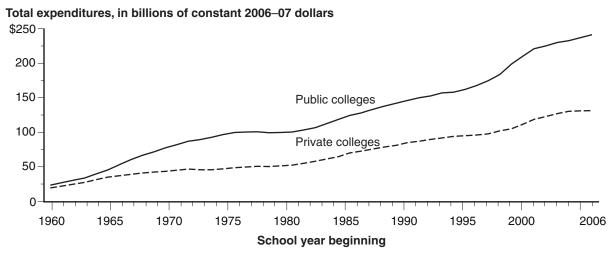

In 2005-06, average total expenditures per full-timeequivalent (FTE) student at public degree-granting colleges were \$24,126 (table 362). This total reflects an increase of about 2 percent between 2003-04 and 2005-06, after adjustment for inflation. In 2005-06, public 4-year colleges had average total expenditures per FTE student of \$32,483, compared to \$11,053 at public 2-year colleges. At private not-forprofit colleges, total expenditures per FTE student rose 15 percent between 1996-97 and 2005-06, after adjustment for inflation (table 364). In 2005–06, total expenditures per FTE student at private not-for-profit colleges were \$40,156, with an average of \$40,394 at 4-year colleges and \$18,240 at 2year colleges. The expenditures per FTE student at for-profit institutions were \$11,336 in 2005-06, which was about 3 percent lower than in 1998-99, after adjustment for inflation (table 366). The difference between average expenditures per FTE student at for-profit 4-year colleges (\$10,897) and forprofit 2-year colleges (\$12,558) was relatively small compared to the differences at 2-year versus 4-year public and private not-for-profit colleges.

As of June 30, 2007, the market value of the endowment funds of the 120 colleges and universities with the largest endowment amounts was \$322 billion, reflecting an increase of 18 percent compared to 2006, after adjustment for inflation (tables 31 and 359). The five colleges with the largest endowments in 2007 were Harvard University, Yale University, Stanford University, Princeton University, and University of Texas System.

NOTE: Data through 1989–90 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Biennial Survey of Education in the United States; Education Directory, Colleges and Universities; Faculty and Other Professional Statis in Institutions of Higher Education; Fall Enrollment in Colleges and Universities; Earned Degrees Conferred; Financial Statistics of Institutions of Higher Education; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education," "Degrees and Other Formal Awards Conferred," and "Financial Statistics of Institutions of Higher Education" surveys; and 1989 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:89–99), "Fall Staff Survey" (IPEDS-S89–99), "Finance Survey" (IPEDS-F:FY90–00), "Completions Survey" (IPEDS-C:90–00), "Institutional Characteristics Survey" (IPEDS-IC:89–99), Winter 2005–06, Spring 2007, and Fall 2007. (This table was prepared July 2008.)

¹Prior to 1979–80, excludes branch campuses.

²Total number of different individuals (not reduced to full-time equivalent). Beginning in 1959–60, data are for the first term of the academic year.

³Fetimated

⁴Estimated number of senior instructional staff. Excludes graduate assistants.

⁵Because of revised survey procedures, data may not be directly comparable with figures prior to 1989–90. Estimated number of senior instructional staff. Excludes graduate assistants.

Data for 1869-70 to 1949-50 are for resident degree-credit students who enrolled at any time during the academic year.

⁷From 1869–70 to 1959–60, first-professional degrees are included under bachelor's degrees.

⁸Figures for years prior to 1969–70 are not precisely comparable with later data.

⁹Includes unexpended plant funds.

¹⁰Book value. Includes other nonexpendable funds.

very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to

and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Biennial Survey of Education in the United States; Opening Fall Enrollment in Higher Education, 1963 through 1965; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1966 through 1985; and 1986 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2008. (This table was prepared October 2008.)

¹Degree-credit enrollment only.

²Includes part-time resident students and all extension students.

³Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

⁴Because of imputation techniques, data are not consistent with figures for other years. NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is

Table 189. Total fall enrollment in degree-granting institutions, by control and type of institution: 1963 through 2007

[—]Not available

more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Opening Fall Enrollment in Higher Education, 1965; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" surveys, 1966 through 1985; and 1986 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2008. (This table was prepared October 2008.)

¹Data for 2-year branch campuses of 4-year institutions are included with the 4-year institutions.

^{*}Clarge increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

Because of imputation techniques, data are not consistent with figures for other years. NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes

Table 190. Total fall enrollment in degree-granting institutions, by sex, age, and attendance status: Selected years, 1970 through 2017

NOTE: Distributions by age are estimates based on samples of the civilian noninstitutional population from the U.S. Census Bureau's Current Population Survey. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; 1990 through 2006 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90–99), and Spring 2001 through Spring 2007; and *Projections of Education Statistics to 2017.* U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, selected years, 1970 through 2007. (This table was prepared August 2008.)

Table 191. Total fall enrollment in degree-granting institutions, by level of enrollment, sex, age, and attendance status of student: 2007

¹Large increase in private 2-year institutions in 1980 is due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology. NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-

year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

(See Guide to Sources for details.)
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 through 1985; and 1990 through 2006 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90–99), and Spring 2001 through Spring 2007. (This table was prepared June 2008.)

CHAPTER 3: Postsecondary Education 287 Enrollment

Table 197. Fall enrollment and number of degree-granting institutions, by control and affiliation of institution: Selected years, 1980 through 2006

[—]Not available.

granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" and "Institutional Characteristics" surveys, 1980; and 1990 through 2006 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90–95), "Institutional Characteristics Survey" (IPEDS-IC:90–95), and Spring 2003 through Spring 2007. (This table was prepared June 2008.)

¹Counts of institutions in this table may be lower than reported in other tables, because counts in this table include only institutions reporting separate enrollment data.

²Included under "Other public."

³Religious affiliation as reported by institution.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-

⁻Not available

and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Beginning in fall 2000, data are for first-time degree/certificate-seeking undergraduates. Alaska and Hawaii are included in all years.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Biennial Survey of Education in the United States; Opening Fall Enrollment in Higher Education, 1963 through 1965; Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1966 through 1985; and 1986 through 2007 Integrated Post-secondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2008. (This table was prepared November 2008.)

¹Excludes first-time freshmen in occupational programs not creditable towards a bachelor's degree.

²Data for 2-year branches of 4-year college systems are aggregated with the 4-year institutions.

Because of imputation techniques, data are not consistent with figures for other years. NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

Table 199. Total first-time freshmen fall enrollment in degree-granting institutions, by attendance status, sex, control of institution, and state or jurisdiction: Selected years, 2000 through 2006

¹Individuals ages 16 to 24 who graduated from high school or completed a GED during the

Preceding 12 months.

Enrollment in college as of October of each year for individuals ages 16 to 24 who completed high school during the preceding 12 months.

NOTE: Data are based on sample surveys of the civilian population. High school completion data in this table differ from figures appearing in other tables because of varying survey pro-

cedures and coverage. High school completers include GED recipients. Standard errors appear in parentheses. Detail may not sum to totals because of rounding. SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the Census Bureau, 1960 through 1969. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2007. (This table was prepared July 2008.) was prepared July 2008.)

Table 201. Recent high school completers and their enrollment in college, by race/ethnicity: 1960 through 2007

⁻Not available.

⁴White and Black data exclude persons identifying themselves as more than one race.

NOTE: High school completion data in this table differ from figures appearing in other tables because of varying survey procedures and coverage. High school completers include GED recipients. Race categories exclude persons of Hispanic ethnicity. Total includes persons of other racial/ethnic groups not separately shown. Standard errors appear in parentheses. SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the Census Bureau, 1960 through 1969. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2007. (This table was prepared July 2008.)

Individuals ages 16 to 24 who graduated from high school or completed a GED during the preceding 12 months.

²Enrollment in college as of October of each year for individuals ages 16 to 24 who completed high school during the preced-

³Due to the small sample size, data are subject to relatively large sampling errors. A 3-year moving average is an arithmetic average of the year indicated, the year immediately preceding, and the year immediately following. Moving averages are used to produce more stable estimates.

Table 202. Graduation rates of previous year's 12th-graders and college attendance rates of those who graduated, by selected high school characteristics: 1999-2000 and 2003-04

¹Includes only students who were enrolled in 12th grade in fall of the school year and graduated with a diploma by the end of the following summer.

NOTE: Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Includes all schools, including combined schools, with students enrolled in the 12th grade. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

¹Total includes public high school graduates for 2005–06 and private high school graduates for 2004–05.

²All of the new students reported by the institutions in that state; i.e., all in-migrants and "remaining" students. Also, includes students who are not residents of the United States..

 $^{^3}$ All U.S. resident students living in a particular state when admitted to an institution in any state. Students may be enrolled in any state.

⁴Students who attend institutions in their home state

 $^{^5\}mbox{U.S.}$ total enrollment includes some students not identified by state.

⁶Projected data from NCES 2008-078, *Projections of Education Statistics to 2017.*

NOTE: Detail may not sum to totals because of rounding.

⁻Not available.

with figures for other years. All college students are counted as high school completers. Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Standard errors appear in parentheses.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1967 through 2007. (This table was prepared August 2008.)

[†]Not applicable.
¹Includes students who were enrolled in college, but did not report high school completion.

²White and Black data include persons of Hispanic ethnicity.

³White and Black data exclude persons identifying themselves as multiracial.

NOTE: Data are based on sample surveys of the civilian noninstitutional population. Percents based on 18- to 24-year-old high school completers for 1992 and later years use a slightly different definition of completion and may not be precisely comparable

Table 205. Total undergraduate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1967 through 2007

NOTE: Data include unclassified undergraduate students. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for

details.) Detail may not sum to totals because of rounding. Some data have been revised

from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1967 through 1985; and 1986 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2008. (This table was prepared October 2008.)

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1969 through 1985; and 1986 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2008. (This table was prepared October 2008.)

Data for 2000 and later years reflect substantial changes in survey coverage. NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; and 1990 through 2006 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2007. (This table was prepared May 2008.)

†Not applicable.

NOTE: Data through 1990 are for institutions of higher education, while later data are for degreegranting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; and 1990 through 2006 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2007. (This table was prepared May 2008.)

Table 211. Total fall enrollment in all degree-granting institutions, by attendance status, sex, and state or jurisdiction: 2005 and 2006

¹Large increases are due to the addition of schools accredited by the Accrediting Commis-

and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1967 through 1985; and 1986 through 2007 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2008. (This table was prepared October 2008.)

sion of Career Schools and Colleges of Technology in 1980 and 1981.

Because of imputation techniques, data are not consistent with figures for other years.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

Table 220. Full-time-equivalent fall enrollment in degree-granting institutions, by control and type of institution and state or jurisdiction: 2000, 2005, and 2006

¹Data for 2000 and later years reflect substantial change in survey coverage.
NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" 1980 survey; and 1990 through 2006 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2007. (This table was prepared June 2008.)

[†]Not applicable.

NOTE: Includes all first-time postsecondary students who graduated from high school in the previous 12 months and were enrolled at reporting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. SOURCE: U.S. Department of Education, National Center for Education Statistics, 2006 Integrated Postsecondary Education Data System (IPEDS), Spring 2007. (This table was prepared June 2008.)

¹Students residing in a particular state when admitted to an institution anywhere—either in their home state or another state.

²Includes students coming to U.S. colleges from foreign countries and other jurisdictions.

³Students whose residence is in the same state as the service academy. ⁴Institution unable to determine student's home state.

Table 226. Total fall enrollment in degree-granting institutions, by race/ethnicity, sex, attendance status, and level of student: Selected years, 1976 through 2007

NOTE: Race categories exclude persons of Hispanic ethnicity. Because of underreporting and nonreporting of racial/ethnic data, some figures are slightly lower than corresponding data in other tables. Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1976 and 1980; and 1990 through 2007 Integrated Post-secondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2008. (This table was prepared October 2008.)

NOTE: Race categories exclude persons of Hispanic ethnicity. Because of underreporting and nonreporting of racial/ethnic data, some figures are slightly lower than corresponding data in other tables. Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1976 and 1980; and 1990 through 2007 Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90), and Spring 2001 through Spring 2008. (This table was prepared October 2008.)

¹Research universities with a very high level of research activity.

NOTE: Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the research index ranking may be obtained from http://www.carnegiefoundation.org/classifications/index.asp?key=798#related. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some institutions do not report separate enrollment data for each branch campus. For this reason, counts of institutions in this table are somewhat lower than the figures appearing in some other tables. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2007 Integrated Postsecondary Education Data System (IPEDS), Spring 2008. (This table was prepared October 2008.)

²Research universities with a high level of research activity.

³Institutions that award at least 20 doctor's degrees per year, but did not have high levels of research activity.

Institutions that award at least 50 master's degrees per year.

⁵Institutions that primarily emphasize undergraduate education.

⁶Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering. Includes some institutions that have 4-year programs, but have not reported sufficient data to identify program category. Also includes institutions classified as 4-year under the IPEDS system, which had been classified as 2-year in the Carnegie classification system because they primarily award associate's degrees.

[†]Not applicable.

NOTE: Because of different survey editing and processing procedures, enrollment data in this table may differ from those appearing in other tables. Includes students who enrolled at any time during the 2003-04 academic year. Data include Puerto Ricc. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2003–04 National Postsecondary Student

Aid Study (NPSAS:04), unpublished tabulations. (This table was prepared September 2005.)

[‡]Reporting standards not met.

¹Includes less-than-2-year schools and schools not identified by level.

¹Doctoral, extensive institutions are committed to graduate education through the doctorate, and award 50 or more doctor's degrees per year across at least 15 disciplines.

²Doctoral, intensive institutions are committed to education through the doctorate, and award at least 10 doctor's degrees per year across 3 or more disciplines or at least 20 doctors.

⁵Specialized 4-year institutions award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, or engineering. Includes some institutions that have 4-year programs, but have not reported sufficient data to identify program category. Also includes institutions classified as 4-year under the IPEDS system, which had been classified as 2-year in the Carnegie system because they primarily award associate's degrees. SOURCE: U.S. Department of Education, National Center for Education Statistics, 2006 Integrated Postsecondary Education Data System (IPEDS), Spring 2007. (This table was prepared June 2008.)

tor's degrees overall.

³Master's institutions offer a full range of baccalaureate programs and are committed to education through the master's degree. They award at least 20 master's degrees per year. ⁴Baccalaureate institutions primarily emphasize undergraduate education.

¹Publicly controlled institutions are identified by a "1"; private, not-for-profit, by a "2"; and private, for-profit, by a "3."

²The types of institutions are identified as follows: "1" for 4-year institutions; and "2" for 2-

year institutions.

³Includes private and some public institutions reporting total expenses and deductions under Financial Accounting Standards Board (FASB) reporting standards and public institutions reporting total expenses and deductions under Governmental Accounting Standards Board (GASB) 34/35 reporting standards.

⁴Minority students who are U.S. citizens or resident aliens as a percentage of total enrollment including persections of the standards.

ment, including nonresident aliens.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2006 Integrated Postsecondary Education Data System (IPEDS), Spring 2007. (This table was prepared July 2007.)

¹College and university campuses ranked by fall 2006 enrollment data.
²Publicly controlled institutions are identified by a "1"; private, not-for-profit, by a "2"; and private, for-profit, by a "3".
³The types of institutions are identified as follows: "1" for 4-year institutions; and "2" for 2-year institutions.

Data are for colleges and universities identified by the Women's College Coalition as women's colleges in 2008. Excludes women's colleges whose IPEDS data are reported together with a coed institution or coordinate men's college. The following institutions were excluded for this reason: The Women's College of the University of Denver; Newcomb College Institute of Tulane University; Douglass College of Rutgers University; and Russell Sage College of the Sage Colleges.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2006 and 2006–07 Integrated Postsecondary Education Data System (IPEDS), Spring 2007 and Fall 2007. (This table was prepared July 2008.)

²1 = public, 4-year; 3 = private not-for-profit, 4-year; and 4 = private not-for-profit, 2-year.

Institution closed in 2007.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities," 1976 through 1985 surveys; and 1986 through 2006 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86–99), and Spring 2001 through Spring 2007. (This table was prepared October 2008.)

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Beginning in 2007, includes institutions with fewer than 15 full-time employees; these institutions did not report staff data prior to 2007. By definition, all graduate assistants are part-time.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1987 through 2007 Integrated Postsecondary Education Data System (IPEDS), "Fall Staff Survey" (IPEDS-S:87–99), and Winter 2001–02 through Winter 2007–08. (This table was prepared October 2008.)

NOTE: Data for 1976 are for institutions of higher education, while later data are for degreegranting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Beginning in 2007, includes institutions with fewer than 15 full-time employees; these institutions did not report staff data prior to 2007. By definition,

all graduate assistants are part-time in 1997 and 2007. Detail may not sum to totals

because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Staff Survey," 1976; and 1997 and 2007 Integrated Postsecondary Education Data System, "Fall Staff Survey" (IPEDS-S:97), and Winter 2007–08. (This table was prepared October 2008.)

†Not applicable.
¹Includes not-for-profit and for-profit private institutions.
NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Beginning in 2007, includes institutions with fewer than

15 full-time employees; these institutions did not report staff data prior to 2007. By definition, all graduate assistants are part-time. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, 2007 Integrated Postsecondary Education Data System (IPEDS), Winter 2007–08. (This table was prepared October 2008.)

institutions did not report staff data prior to 2007. By definition, all graduate assistants are

part-time.
SOURCE: U.S. Department of Education, National Center for Education Statistics, 2007 Integrated Postsecondary Education Data System (IPEDS), Winter 2007–08. (This table was prepared October 2008.)

[†]Not applicable.

¹Minority staff as a percentage of total staff, excluding race/ethnicity unknown.

²Race/ethnicity not collected.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnic-ity. Beginning in 2007, includes institutions with fewer than 15 full-time employees; these

CHAPTER 3: Postsecondary Education 363 Staff

⁻Not available.

³Data revised from previously published figures. NOTE: Includes faculty members with the title of professor, associate professor, assistant professor, instructor, lecturer, assisting professor, adjunct professor, or interim professor (or the equivalent). Excluded are graduate students with titles such as graduate or teaching fellow who assist senior faculty. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The

degree-granting classification is very similar to the earlier higher education classification, begree-granting classification is very similar to the earlier higher education classifications but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Data are for degree-granting institutions with 15 or more full-time employees; institutions with fewer than 15 employees did not report staff data prior to 2007. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher SOUNCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), Employees in Institutions of Higher Education, 1970 and 1972, and "Staff Survey" 1976; Projections of Education Statistics to 2000; 1987 through 2005 Integrated Postsecondary Education Data System (IPEDS), "Fall Staff Survey" (IPEDS-S:87–99), and Winter 2001–02 through Winter 2005–06; and U.S. Equal Employment Opportunity Commission, Higher Education Staff Information Survey (EEO-6), 1977, 1981, and 1983. (This table was prepared August 2007.)

Testimated on the basis of enrollment. For methodological details on estimates, see National Center for Education Statistics, *Projections of Education Statistics to 2000*.

Because of revised survey methods, data are not directly comparable with figures for

years prior to 1987.

¹Minority faculty as a percentage of total faculty, excluding race/ethnicity unknown.

North lacuny as a percentage of total lacuny, excluding facereuning distribution.

2 Race/ethnicity not collected.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Beginning in 2007, includes institutions with fewer than 15 full-time employees; these institutions did not report staff data prior to 2007. By definition, all graduate assistants are part-time. Race categories exclude persons of Hispanic

ethnicity. Totals may differ from figures reported in other tables because of varying survey

methodologies.

NOTE: Totals may differ from figures reported in other tables because of varying survey methodologies. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2004 National Study of Postsecondary Faculty (NSOPF:04). (This table was prepared December 2008.)

[‡]Reporting standards not met.

¹Distribution by student classroom contact hours per week is based on the number of contact hours that faculty and instructional staff spend each week with students during classroom instruction multiplied by the number of students taught.

[†]Not applicable.

NOTE: Totals may differ from figures reported in other tables because of varying survey methodologies. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2004 National Study of Postsecondary Faculty (NSOPF:04). (This table was prepared December 2008.)

[‡]Reporting standards not met.

¹Distribution by student classroom contact hours per week is based on the number of contact hours that faculty and instructional staff spend each week with students during classroom instruction multiplied by the number of students taught.

¹Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis.

NOTE: Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.

(See Guide to Sources for details.) Data for 1987–88 and later years include imputations for nonrespondent institutions.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Faculty Salaries, Tenure, and Fringe Benefits" surveys, 1970–71 through 1985–86; and 1987–88 through 2007–08 Integrated Post-secondary Education Data System, "Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty Survey" (IPEDS-SA:87–99), and Winter 2001–02 through Winter 2007–08. (This table was prepared October 2008.)

Table 258. Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by sex, academic rank, and control and type of institution: Selected years, 1999–2000 through 2007–08

¹Data revised from previously published figures.

NOTE: Data through 1992–93 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes

more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

⁻Not available.

the previous academic year.

NOTE: The coverage of this table differs from similar tables published in editions of the *Digest* prior to 2003. Previous tenure tabulations included only instructional staff classified as full-time faculty; this table includes all staff with full-time instructional duties, including faculty and other instructional staff. Data for 1993–94 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees

and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Data are for degree-granting institutions with 15 or more full-time employees; institutions with fewer than 15 employees did not report staff data prior to 2007. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1993–94 through 2005–06 Integrated Postsecondary Education Data System, "Fall Staff Survey" (IPEDS:593–99), Winter 2003–04, and Winter 2005–06. (This table was prepared August 2007.)

[‡]Reporting standards not met.

¹Institutions that awarded 20 or more doctor's degrees during the previous academic year.

²Institutions that awarded 20 or more master's degrees, but less than 20 doctor's degrees, during

The green control and the schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

NOTE: Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Changes in counts of institutions over time are partly

affected by increasing or decreasing numbers of institutions submitting separate data for branch campuses.

branch campuses. SOURCE: U.S. Department of Education, National Center for Education Statistics, *Education Directory, Colleges and Universities*, 1949–50 through 1965–66; Higher Education General Information Survey (HEGIS), "Institutional Characteristics of Colleges and Universities" surveys, 1966–67 through 1985–86; and 1986–87 through 2007–08 Integrated Postsecondary Education Data System, "Institutional Characteristics Survey" (IPEDS-IC:86–99), and Fall 2000 through Fall 2007. (This table was prepared July 2008.)

gory. Also includes institutions classified as 4-year under the IPEDS system, which had been classified as 2-year in the Carnegie classification system because they primarily award associate's degrees.

NOTE: Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the research index ranking may be obtained from http://www.carnegiefoundation.org/classifications/index.asp?key=798#related. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2007-08 Integrated Postsecondary Education Data System (IPEDS), Fall 2007. (This table was prepared July 2008.)

¹Research universities with a very high level of research activity.

²Research universities with a high level of research activity.

³Institutions that award at least 20 doctor's degrees per year, but did not have a high level of research activity.

⁴Institutions that award at least 50 master's degrees per year.

⁵Institutions that primarily emphasize undergraduate education.

⁶Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering. Includes some institutions that have 4-year programs, but have not reported sufficient data to identify program cate-

-Not available

NOTE: This table indicates the year by which the institution no longer operated (generally it closed at the end of or during the prior year). Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Education Directory, Higher Education, 1969–70 through 1974–75; Education Directory, Colleges and Universities, 1975–76 through 1983–84; 1982–83 Supplement to the Education Directory, Colleges and Universities; and 1986–87 through 2007–08 Integrated Postsecondary Education Data System, "Institutional Characteristics Survey" (IPEDS-IC:86-99), and Spring 2000 through Spring 2008. (This table was prepared September 2008.)

year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Earned Degrees Conferred, 1869–70 through 1964–65; Projections of Education Statistics to 2017; Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, 1965–66 through 1985–86; and 1986–87 through 2006–07 Integrated Postsecondary Education Data System, "Completions Survey" (IPEDS-C:87-99), and Fall 2000 through Fall 2007. (This table was prepared July 2008.)

¹Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional, such as M.D., D.D.S., and law degrees.

²Includes first-professional degrees.
³First-professional degrees are included with bachelor's degrees.

^{*}Prist-professional degrees are included with bachelors degrees.

*Projected.

NOTE: Data through 1994–95 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classifications are related to the degree of the programs. sification is very similar to the earlier higher education classification, but it includes more 2-

Table 269. Associate's degrees conferred by degree-granting institutions, by discipline division: 1995–96 through 2006–07

NOTE: The new Classification of Instructional Programs was initiated in 2002–03. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions Survey": "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; "Business" includes Business, management, marketing, and related support services and Personal and culinary services; and

[&]quot;Engineering technologies" includes Engineering technologies/technicians, Construction trades, and Mechanic and repair technologies/technicians.

NOTE: Includes Ph.D., E.D., and comparable degrees at the doctoral level. Excludes first-professional degrees such as M.D., D.D.S., and law degrees. The new Classification of Instructional Programs was initiated in 2002–03. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, carriar aggregations have been made of the degree fields as reported in the IPEDS "Completions Survey": "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; "Business" includes Business, management, marketing, and related support services and Personal and culinary services;

and "Engineering technologies" includes Engineering technologies/technicians, Construction trades, and Mechanic and repair technologies/technicians.

Includes degrees in Area, ethnic, cultural, and gender studies; English language and literature/letters; Foreign languages, literatures, and linguistics; Liberal arts and sciences, general studies, and humanities; Multi/interdisciplinary studies; Philosophy and religious studies; Theology and religious vocations; and Visual and performing arts.

2 Includes Psychology; and Social sciences and history.

cal sciences; Legal professions and studies; Library science; Military technologies; Parks, recreation, leisure, and fitness studies; Precision production; Public administration and social services; Security and protective services; Transportation and materials moving; and Not classified by field of study.

NOTE: Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, 1970–71 through 1985–86; and 1990–91 through 2006–07 Integrated Postsecondary Education Data System, "Completions Survey" (IPEDS-C:91–96), and Fall 2001 through Fall 2007. (This table was prepared September 2008.)

³Includes Biological and biomedical sciences; Mathematics and statistics; and Physical sciences and science technologies. ⁴Includes Computer and information sciences; Engineering; and Engineering technologies.

⁵Includes Agriculture and natural resources; Architecture and related services; Communication, journalism, and related programs; Communications technologies; Family and consumer sciences/human sciences; Health professions and related clini-

¹Includes degrees that require at least 6 years of college work for completion (including at least 2 years of preprofessional training).
²Doctor's degrees include Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional degrees such as M.D., D.D.S., and law degrees.
³Data have been revised from previously published figures.

¹Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional degrees, such as M.D., D.D.S., and law degrees. ²Excludes "Construction trades" and "Mechanics and repair technologies," which are listed

separately.

NOTE: To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS Fall survey: "Agriculture and natural resources" includes

Agriculture, agriculture operations, and related sciences and Natural resources and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services.

¹Excludes 1,170 males and 251 females whose racial/ethnic group was not available. ²Excludes 4,819 males and 1,384 females whose racial/ethnic group was not available. NOTE: Race categories exclude persons of Hispanic ethnicity. For 1989–90 and later years, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. (See Guide to Sources for details.) Detail may not sum to totals because of rounding.

¹Excludes "Construction trades" and "Mechanics and repair technologies," which are listed separately.

NOTE: Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS Fall survey: "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources

and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services.

¹Excludes "Construction trades" and "Mechanics and repair technologies," which are listed separately.

NOTE: Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS Fall survey: "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources

and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services.

SOURCE: Ú.S. Department of Education, National Center for Education Statistics, 2005–06 Integrated Postsecondary Education Data System (IPEDS), Fall 2006. (This table was prepared June 2007.)

Table 284. Bachelor's degrees conferred by degree-granting institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2006–07

¹Excludes 1,121 males and 528 females whose racial/ethnic group was not available. ²Excludes 258 males and 82 females whose racial/ethnic group was not available. NOTE: Race categories exclude persons of Hispanic ethnicity. For 1989–90 and later years, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. (See Guide to Sources for details.) Detail may not sum to totals because of rounding.

¹Excludes "Construction trades" and "Mechanics and repair technologies," which are listed separately.

NOTE: Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS Fall survey: "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources

and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services.

¹Excludes "Construction trades" and "Mechanics and repair technologies," which are listed separately.

NOTE: Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS Fall survey: "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources

and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services.

¹Excludes 387 men and 175 women whose racial/ethnic group was not available. ²Excludes 1,377 men and 179 women whose racial/ethnic group was not available. NOTE: Race categories exclude persons of Hispanic ethnicity. For 1989–90 and later years, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. (See Guide to Sources for details.) Detail may not sum to totals because of rounding.

¹Excludes "Construction trades" and "Mechanics and repair technologies," which are listed separately.

NOTE: Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS Fall survey: "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natu-

ral resources and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services.

reported. (See Guide to Sources for details.) Detail may not sum to totals because of

reported. (See Guiue to Sources for Golden, January, 2007). Trounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, 1976–77 and 1980–81; and 1989–90 through 2006–07 Integrated Postsecondary Education Data System, "Completions Survey" (IPEDS-C:90–99), and Fall 2000 through Fall 2007. (This table was prepared July 2008.)

¹Includes Ph.D., Ed.D, and comparable degrees at the doctoral level. Excludes first-professional degrees, such as M.D., D.D.S., and law degrees.

²Excludes 106 men whose racial/ethnic group was not available.

³Excludes 116 men and 3 women whose racial/ethnic group was not available.

NOTE: Race categories exclude persons of Hispanic ethnicity. For 1989–90 and later years, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not

¹Excludes "Construction trades" and "Mechanics and repair technologies," which are listed separately.

NOTE: Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS Fall survey: "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources

and conservation; and "Business" includes Business management, marketing, and related support services and Personal and culinary services. Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional, such as M.D., D.D.S., and law degrees.

toral plans for employment. NOTE: The above classification of degrees by field differs somewhat from that in most publications of the National Center for Education Statistics (NCES). One major difference is that history is included under humanities rather than social sciences. Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional degrees, such as M.D., D.D.S., and D.V.M. The number of degrees also differs slightly from that reported in the NCES Integrated Postsecondary Education Data System (IPEDS). The above tabulation excludes some nonresearch doctoral degrees such as doctor's degrees in theology, Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: Doctorate Recipients From United States Universities, 2006, Survey of Earned Doctorates, National Science Foundation, National Institutes of Health, U.S. Department of Education, National Endowment for the Humanities, U.S. Department of Agriculture, and the National Aeronautics and Space Administration. (This table was prepared July 2008.)

[#]Rounds to zero

[‡]Reporting standards not met.

¹Includes mathematics, computer science, physics and astronomy, chemistry, and earth, atmospheric, and marine sciences.

²Distribution by sex based on respondents of known sex only.

³Distribution by race/ethnicity based on U.S. citizens of known race only.

⁴Includes Native Hawaiians and other Pacific Islanders and those of more than one race.

⁵Percentages are based on only those doctorate recipients who responded to questions about postdoctoral plans.

⁶Percentages are based on only those doctorate recipients who indicated definite postdoctoral plans for study and who indicated the type of study.

⁷Percentages are based on only those doctorate recipients who indicated definite postdoctoral plans for employment and who indicated the sector of employment.

⁸Includes 2-year, 4-year, and foreign colleges and universities, medical schools, and elementary/secondary schools.

⁹Percentages are based on only those doctorate recipients who indicated definite postdoctoral plans for employment and who indicated their primary work activity

¹⁰Percentages are based on only those doctorate recipients who indicated definite postdoc-

[†]Not applicable.

¹Institutions are ranked by the total number of doctor's degrees conferred during the 10-year period ending June 30, 2007.

²Includes degrees conferred by the Endowed and Statutory Colleges.

NOTE: Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional, such as M.D., D.D.S., and law degrees.

[#]Rounds to zero

[‡]Reporting standards not met.

¹ Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

²Standardized quartile of composite of student assessments in mathematics and reading. ³Locus of control measures whether students attribute the events that happened to them, such as performing well on a test, to being under their own control (i.e., internal locus of control) or to being under the control of others or the environment (external locus of control). Higher scores (highest quartile) means greater internal control and lower scores (lowest quartile) means greater external control.

⁴Self-concept measures the degree to which students like and feel positively about themselves and perceive themselves as a person of worth. The NELS:88 variable is the general self-concept scale from Herbert Marsh's Self-Description Questionnaire (SDQ) II (Marsh 1990).

⁵These students' responses to the educational attainment question were not consistent with their transcript data.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

[†]Not applicable.

[#]Rounds to zero.

[‡]Reporting standards not met.

¹Excludes institutions not enrolling first-time degree/certificate-seeking undergraduates. The total on this table differs slightly from other counts of undergraduate institutions because approximately 0.4 percent of undergraduate institutions did not report application information.

²Data are only for institutions that require test scores for admission. Relatively few 2-year institutions require test scores for admission.

NOTE: Excludes information for the 0.4 percent of institutions that did not respond to survey questions. Detail may not sum to totals because of rounding.

NOTE: Data through 1995-96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.)

[†]Not applicable.

⁵Determined by a socioeconomic diversity index that includes parental income as a percentage of the 1994 federal poverty level, parental education, and the proportion of the student body at the student's high school that was eligible for free or reduced-price lunch.

NOTE: Data reflect completion and enrollment status by spring 2001 of first-time postsecondary students starting in academic year 1995-96. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1996/01 Beginning Postsecondary Students Longitudinal Study (BPS:96/01). (This table was prepared August 2003.)

[#]Rounds to zero.

[‡]Reporting standards not met.

Includes a small percentage of students who had attained a degree and were still enrolled. Includes recipients of degrees not

²Includes a small percentage of students who had attained an advanced degree.

³Includes students with a standard high school diploma who enrolled in postsecondary education in the same year as their

⁴Includes students whose goal was to transfer to a 4-year institution.

⁻Not available.

⁸Analytical writing test score data reflect the three-year average for all examinees who tested between July 1 three years prior to the reported test year and June 30 of the reported test year.

NOTE: GRE data include test takers from both within and outside of the United States. GRE scores for the verbal, quantitative, and analytical reasoning sections range from 200 to 800. Scores for the analytical writing section range from 0 to 6, in half-point increments. The range of scores is different for the various subject tests, from as low as 200 to as high as 990. The analytical reasoning section of the GRE, a multiple-choice test, was discontinued in September 2002, and replaced by the analytical writing section, an essay-based test. The education subject test was administered for the final time in April 1998. The engineering subject test was administered for the final time in April 2001. Some data have been revised from previously published figures. Standard deviations appear in parentheses.

U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, 1964–65 through 1985–86; and 1986–87 through 2006–07 Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:87–99), and Fall 2000 through Fall 2007. (This table was prepared August 2008.)

[†]Not applicable.

GRE takers include examinees from inside and outside of the United States, while the bachelor's degree recipients include U.S. institutions only.

²Total includes examinees who received no score on one or more general test measures.

³Data reported for 1994 through 1998 are from the revised education test.

⁴Subject test score data reflect the three-year average for all examinees who tested between October 1 three years prior to the reported test year and September 30 of the reported test year. These data are not directly comparable with data for most other years.

⁵Subject test score data reflect the three-year average for all examinees who tested between July 1 three years prior to the reported test year and June 30 of the reported test year. These data are not directly comparable with previous years, except for 1999 and 2000.

⁶Analytical writing test score data reflect the average for all examinees who tested between October 1, 2002, and June 30 of the reported test year.

Verbal and quantitative test score data reflect the three-year average for all examinees who tested between July 1 three years prior to the reported test year and June 30 of the reported test year. These data are not directly comparable with previous years.

⁻Not available.

NOTE: Data are for the entire academic year and are average total charges for full-time attendance. Tuition and fees were weighted by the number of full-time-equivalent undergraduates, but were not adjusted to reflect student residency. Room and board were

based on full-time students. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Because of their low response rate, data for private 2-year colleges must be interpreted with caution. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Institutional Characteristics of Colleges and Universities" surveys, 1965–66 through 1985–86; "Fall Enrollment in Institution of Higher Education" surveys, 1965 through 1985; and 1986–87 through 2007–08 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:86-99), "Institutional Characteristics Survey" (IPEDS-C:86-99), Spring 2001 through Spring 2006, and Fall 2000 through Fall 2007. (This table was prepared July 2008.)

[†]Not applicable

Data for 1986–87 and later years reflect a basis of 20 meals per week rather than meals 7 days per week. Because of this revision in data collection and tabulation procedures, data are not entirely comparable with figures for previous years. In particular, data on board rates are somewhat higher than in earlier years because they reflect the basis of 20 meals per week rather than meals served 7 days per week. Since many institutions serve fewer than 3 meals each day, the 1986–87 and later data reflect a more accurate accounting of total board costs.

²Room and board data are estimated.

³Preliminary data based on fall 2006 enrollment weights.

Table 332. Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting institutions, by type and control of institution and state or jurisdiction: 2006-07 and 2007-08

†Not applicable.

¹Preliminary data based on fall 2006 enrollment weights.

NOTE: Data are for the entire academic year and are average charges. Tuition and fees were weighted by the number of full-time-equivalent undergraduates, but were not adjusted to reflect student residency. Room and board are based on full-time students. (See Guide to Sources for details.) Degree-granting institutions grant associate's or higher degrees and par-

ticipate in Title IV federal financial aid programs. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, 2006–07 and 2007–08 Integrated Postsecondary Education Data System (IPEDS), Fall 2006, Fall 2007, and Spring 2007. (This table was prepared July 2008.)

¹Average undergraduate tuition and fees are based on in-state students only.

Preliminary data based on fall 2006 enrollment weights.

NOTE: Data are for the entire academic year and are average rates for full-time students. Student charges were weighted by the number of full-time-equivalent undergraduates, but were not adjusted to reflect student residency. The data have not been adjusted for changes in the purchasing power of the dollar. Degree-granting institutions grant associ-

ate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures.

†Not applicable.

NOTE: Average graduate student tuition weighted by fall full-time-equivalent graduate enrollment. Average first-professional tuition weighted by number of degrees conferred during the academic year. Some year-to-year fluctuations in tuition data may reflect nonreporting by individual institutions. Excludes institutions not reporting degrees conferred and institutions not reporting tuition. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher

degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, 1987–88 through 2007–08 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:87–99); "Completions Survey," (IPEDS-C:88–99); "Institutional Characteristics Survey" (IPEDS-C:87–99); Fall 2000 through Fall 2007; and Spring 2001 through Spring 2007. (This table was prepared August 2008.)

Preliminary graduate tuition average based on fall 2006 enrollment weights and first-professional tuition average based on 2006–07 degrees.

²Data are based on in-state tuition only.

[#]Rounds to zero

⁶Includes students who were single, divorced, or widowed.

NOTE: Detail may not sum to totals because of rounding and/or the fact that some students receive aid from multiple sources. Data include undergraduates in degree-granting and non-degree-granting institutions. Estimates for loans include PLUS loans and may differ from previously published figures. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Data include Puerto Rico.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2003–04 National Postsecondary Student Aid Study (NPSAS:04). (This table was prepared September 2005.)

¹Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey of students who enrolled at any time during the school year. Includes all postsecondary institutions.

²Includes students who reported they were awarded aid, but did not specify the source or type of aid.

³Includes Parent Loans for Undergraduate Students (PLUS).

⁴Details on federal and nonfederal work study participants are not available.

⁵Excludes persons not reported by race/ethnicity and persons reporting more than one race.

Table 336. Full-time, first-time degree/certificate seeking undergraduate students enrolled in degree-granting institutions, by participation and average amount awarded in financial aid programs, and type and control of institution: 2000-01 through 2005-06 [In current dollars]

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2000–01 through 2005–06 Integrated Postsecondary Education Data System (IPEDS), Spring 2002 through Spring 2007. (This table was prepared May 2008.)

¹Average amounts for students participating in indicated programs.

²Includes only loans made directly to students. Does not include Parent Loans for Undergraduate Students (PLUS) and other loans made directly to parents.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

[†]Not applicable.

⁵Includes students who were single, divorced, or widowed.

NOTE: Rows may not sum to totals because of rounding and/or the fact that some students receive aid from multiple sources. Data include undergraduates in degree-granting and non-degree-granting institutions. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Data include Puerto Rico.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2003–04 National Postsecondary Student

Aid Study (NPSAS:04). (This table was prepared September 2005.)

[‡]Reporting standards not met.

¹Includes students who reported they were awarded aid, but did not specify the source or type of aid.

²Includes Parent Loans for Undergraduate Students (PLUS).

³Details on federal and nonfederal work study participants are not available.

⁴Excludes persons not reported by race/ethnicity and persons reporting more than one race.

[†]Not applicable.

[‡]Reporting standards not met.

¹Includes students who reported they were awarded aid, but did not specify the source or type of aid.

²Includes Parent Loans for Undergraduate Students (PLUS).

³Details on federal and nonfederal work study participants are not available.

⁴Excludes persons not reported by race/ethnicity and persons reporting more than one race.

⁵Includes students who were single, divorced, or widowed.

NOTE: Rows may not sum to totals because of rounding and/or the fact that some students receive aid from multiple sources. Data include undergraduates in degree-granting and non-degree-granting institutions. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses. Data include Puerto Rico.

[†]Not applicable.

2003-04 loan estimates include Parent Loans for Undergraduate Students (PLUS) and may differ from previously published figures. Data include Puerto Rico.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1992-93, 1995-96, 1999-2000, and 2003-04 National Postsecondary Student Aid Studies (NPSAS:93, NPSAS:96, NPSAS:2000, and NPSAS:04). (This table was prepared August 2005.)

[#]Rounds to zero. ¹Details on nonfederal work study participants are not available.

²Includes students who reported they were awarded aid, but did not specify the source of aid.

NOTE: Excludes students whose attendance status was not reported. Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. Standard errors appear in parentheses. The

Table 341. Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2003–04

[†]Not applicable.

NOTE: Aid averages are for those students who received the specified type of aid. Full-time, full-year students were enrolled full time for 9 or more months from July 1 through June 30. Data include Puerto Rico. Standard errors appear in parentheses. SOURCE: U.S. Department of Education, National Center for Education Statistics, 1992-93, 1995-96, 1999-2000, and 2003-04 National Postsecondary Student Aid Studies (NPSAS:93, NPSAS:96, NPSAS:2000, and NPSAS:04). (This table was prepared August 2007.)

[‡]Reporting standards not met.

¹Details on nonfederal work study participants are not available.

²Includes students who reported that they were awarded aid, but did not specify the source or type of aid.

³Indicates all grants, scholarships, or tuition waivers received from federal, state, institutional, or private sources, including employers.

⁴Includes Parent Loans for Undergraduate Students (PLUS).

Table 342. Percentage of part-time or part-year undergraduates receiving aid, by type and source of aid and control and type of institution: Selected years, 1992–93 through 2003–04

[†]Not applicable.

Loans for Undergraduate Students (PLUS) and may differ from previously published figures. Standard errors appear in parentheses. Data include Puerto Rico.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1992–93, 1995–96, 1999–2000, and 2003–04 National Postsecondary Student Aid Studies (NPSAS:93, NPSAS:96, NPSAS:2000, and NPSAS:04). (This table was prepared August 2005.)

[#]Rounds to zero.

[‡]Reporting standards not met.

¹Details on nonfederal work study participants are not available.

²Includes students who reported they were awarded aid, but did not specify the source of aid.

NOTE: Excludes students whose attendance status was not reported. Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. The 2003–04 loan estimates include Parent

[†]Not applicable.

[#]Rounds to zero.

[‡]Reporting standards not met.

Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey of students who enrolled at any point during the year.

2Title IV of the Higher Education Act.

Supplemental Educational Opportunity Grants.

College Work Study. Prior to October 17, 1986, private, for-profit institutions were prohibited by law from spending CWS funds for on-campus work. Includes persons who participated in the program, but had no earnings.

Formerly National Direct Student Loans (NDSL).
Formerly Guaranteed Student Loans (GSL).
Parent Loans for Undergraduate Students.

NOTE: Excludes students whose attendance status was not reported. Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. Data include Puerto Rico.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2003–04 National Postsecondary Student Aid Study (NPSAS:04). (This table was prepared August 2005.)

†Not applicable. #Rounds to zero.

¹Includes students who reported they were awarded aid, but did not specify the source of aid. NOTE: Total includes some students whose level of study was unknown. Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid

from different sources. Standard errors appear in parentheses. Data include Puerto Rico. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1992–93, 1995–96, 1999–2000, and 2003–04 National Postsecondary Student Aid Studies (NPSAS:93, NPSAS:96, NPSAS:2000, and NPSAS:2004). (This table was prepared November 2008.)

[—]Not available.

⁶Fellowship estimates for 1992-93 and 1995-96 were based primarily on information provided by institutions and are not comparable to data for 1999-2000 or 2003-04, which were based on

information provided by both students and institutions.

NOTE: Excludes students whose attendance status was not reported. Total includes some students whose level of study or control of institution was unknown. Detail may not sum to totals because of rounding and because some students receive aid from multiple sources. Standard errors appear in parentheses. Data include Puerto Rico.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1992–93, 1995–96, 1999–2000, and 2003–04 National Postsecondary Student Aid Studies (NPSAS:93, NPSAS:96, NPSAS:2000, and NPSAS:04). (This table was prepared September 2005.)

[†]Not applicable.

[‡]Reporting standards not met.

Numbers of full-time, full-year postbaccalaureate students may not equal figures reported in other tables, since these data are based on a sample survey of all postbaccalaureate students

who enrolled at any time during the school year.

²Includes students who reported they were awarded aid, but did not specify the source of aid. ³Includes students who received teaching or research assistantships and/or participated in workstudy programs.

⁴Formerly Guaranteed Student Loans (GSL).

⁵Formerly National Direct Student Loans (NDSL).

⁶Fellowship estimates for 1992–93 and 1995–96 were based primarily on information provided by institutions and are not comparable to data for 1999–2000 or 2003–04, which were based on information provided by both students and institutions.

NOTE: Excludes students whose attendance status was not reported. Totals include some students whose level of study or control of institution was unknown. Data include Puerto Rico. Detail may not sum to totals because of rounding and because some students receive aid from multiple sources. Standard errors appear in parentheses.

rough that but to take because of tolerating and because some students receive and non-maining sources. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1992–93, 1995–96, 1999–2000, and 2003–04 National Postsecondary Student Aid Studies (NPSAS:93, NPSAS:96, NPSAS:2000, and NPSAS:04). (This table was prepared September 2005.)

[†]Not applicable.

¹Numbers of part-time or part-year postbaccalaureate students may not equal figures reported in other tables, since these data are based on a sample survey of all postbaccalaureate students enrolled at any time during the school year.

Includes students who reported they were awarded aid, but did not specify the source of aid. Includes students who received teaching or research assistantships and/or participated in workstudy programs.

⁴Formerly Guaranteed Student Loans (GSL).

⁵Formerly National Direct Student Loans (NDSL).

⁻Not available.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Data for years prior to 1969–70 are not entirely comparable with data for later years. Also, some details for 1969–70 are not directly comparable with data for later years. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Annual Report of the Commissioner of Education, 1919–20; Biennial Survey of Education in the United States, 1929–30 through 1959–60; Higher Education General Information Survey (HEGIS), "Financial Statistics of Institutions of Higher Education," 1969–70 through 1985–86; and 1986–87 through 1995–96 Integrated Postsecondary Education Data System, "Finance Survey" (IPEDS-F:FY86–96). (This table was prepared October 1998.)

¹Tuition and fees received from veterans under Public Law 550 are reported under student fees and are not under income from the federal government.

²Federally supported student aid that is received through students is included under tuition and auxiliary enterprises.

³Includes federal aid received through state channels and regional compacts, through 1959–60.

⁴Beginning in 1969–70, the private grants also include nongovernmental revenue for sponsored research, student aid, and other sponsored programs.

5Prior to 1959–60, data for hospitals are included under sales and services of educational

⁶Institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education.

⁷Income from state and local governments tabulated under "State governments."

and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to

and excludes a tew higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Financial Statistics of Institutions of Higher Education," 1980–81 and 1985–86 surveys; and 1990–91 through 2000–01 Integrated Postsecondary Education Data System, "Finance Survey" (IPEDS-F:FY91–00), and Spring 2001 and Spring 2002. (This table was prepared October 2003.)

¹Data were imputed using alternative procedures. (See Guide to Sources for details.)

²Included under restricted grants and contracts.

³Excludes Pell Grants. Federally supported student aid that is received through students is included under tuition and auxiliary enterprises.

⁴Generally includes only those revenues associated with major federally funded research

and development centers (FFRDC).

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees

¹Net of allowances and discounts.

according to the Financial Accounting Standards Board (FASB) questionnaire. Detail may

according to the Financial Accounting Standards Board (FASB) questionnaire. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2003–04 through 2005–06 Integrated Postsecondary Education Data System, Spring 2004 through Spring 2007. (This table was prepared May 2008.)

After deducting discounts and allowances.

3Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes data for public institutions reporting data

Table 351. Revenues of public degree-granting institutions, by source of revenue and state or jurisdiction: 2005-06 [In thousands of current dollars]

NOTE: Data for 1990–91 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Includes data for public institutions reporting data

according to the Financial Accounting Standards Board (FASB) questionnaire. Detail may

not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1990–91 through 2005–06 Integrated Postsecondary Education Data System, "Finance Survey" (IPEDS-F:FY91–96), and Spring 2001 through Spring 2007. (This table was prepared May 2008.)

Table 353. Total revenue of private not-for-profit degree-granting institutions, by source of funds and type of institution: 1997–98 through

¹Includes independent operations.

7Specialized 4-year institutions award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering. Includes some institutions that have 4-year programs, but have not reported sufficient data to identify program category. Also includes institutions classified as 4-year under the IPEDS system, which had been classified as 2-year in the Carnegie system because they primarily award associate's degrees.

⁸Tribally controlled colleges are located on reservations and are members of the American Indian Higher Education Consortium.

NOTE: Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2005–06 Integrated Postsecondary Education Data System (IPEDS), Spring 2006 and Spring 2007. (This table was prepared May 2008.)

²Includes contributions from affiliated entities.

³Doctoral, extensive institutions are committed to graduate education through the doctorate, and award 50 or more doctor's degrees per year across at least 15 disciplines.

⁴Doctoral, intensive institutions are committed to education through the doctorate and award at least 10 doctor's degrees per year across 3 or more disciplines or at least 20 doctor's degrees overall.

⁵Master's institutions offer a full range of baccalaureate programs and are committed to education through the master's degree. They award at least 20 master's degrees per year. ⁶Baccalaureate institutions primarily emphasize undergraduate education.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2004–05 and 2005–06 Integrated Postsecondary Education Data System (IPEDS), Spring 2006 and Spring 2007. (This table was prepared May 2008.)

¹Doctoral, intensive institutions are committed to education through the doctorate and award at least 10 doctor's degrees per year across 3 or more disciplines or at least 20 doctor's degrees overall.

²Master's institutions offer a full range of baccalaureate programs and are committed to education through the master's degree. They award at least 20 master's degrees per year. ³Baccalaureate institutions primarily emphasize undergraduate education.

⁴Specialized 4-year institutions award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering. Includes some institutions that

†Not applicable.

¹Publicly controlled institutions are identified by a "1"; private not-for-profit, by a "2"; and private for-profit, by a "3."

²Includes federal appropriations, unrestricted and restricted federal contracts and grants, and revenue for independent operations. Independent operations generally include only the revenues associated with major federally funded research and development centers. Federally supported student aid that is received through students is excluded. Data for public, private not-for-profit, and private for-profit institutions are only roughly comparable because

they were collected using different survey instruments.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in

Title IV federal financial aid programs.

¹Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

2Data are not available for years after 1995–96.

NOTE: Data through 1994–95 are for institutions of higher education, while later data are for

degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources

for details.) Private college data not collected on a basis consistent with public institutions after

for details.) Private college data not collected on a basis consistent with public institutions after 1995–96. Detail may not sum to totals because of rounding.

⁻Not available.

⁹Data for 1995–96 are for degree-granting institutions. The degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate's or higher degrees. (See Guide to Sources for details.)

NOTE: Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The data in this table reflect limitations of data availability and comparability. Major changes in data collection forms in 1965–66 and 1974–75 cause significant data comparability problems among the three mostly consistent time periods, 1929–30 to 1959–60, 1969–70, and 1974–75 to 1995–96. The largest problems affect Hospitals, Independent operations, Organized research, Other sponsored programs, Extension and public service, and Scholarships and fellowships. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States*, 1929–30 through 1959–60; Higher Education General Information Survey (HEGIS), "Financial Statistics of Institutions of Higher Education," 1969–70 through 1985–86; and 1986–87 through 1995–96 Integrated Postsecondary Education Data System, "Finance Survey" (IPEDS-F:FY87–96). (This table was prepared July 2007.)

¹Academic support excluding expenditures for libraries.

²Generally includes only those expenditures associated with federally funded research and development centers (FFRDCs).

 $^{^{\}rm 3}\textsc{Data}$ for 1929–30 and 1939–40 are based on school-year enrollment.

⁴Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

⁵Expenditures for federally funded research and development centers are included under "Organized research."

⁶Included under "Other current expenditures."

⁷Expenditures for hospitals included under "Organized activities related to instructional departments."

⁶Includes other sponsored programs, which are separately budgeted programs, other than research, which are supported by sponsors outside the institution.

¹Includes other categories not separately shown.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes data for public institutions reporting data according to the Financial Accounting Standards Board (FASB) questionnaire. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2003–04 through 2005–06 Integrated Postsecondary Education Data System (IPEDS), Spring 2005 through Spring 2007. (This table was prepared June 2008.)

Table 364. Total expenditures of private not-for-profit degree-granting institutions, by purpose and type of institution: 1996–97 through 2005–06

NOTE: Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, 1996–97 through 2005–06 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:96–99) and "Finance Survey" (IPEDS-F:FY97–99), and Spring 2001 through Spring 2007. (This table was prepared May 2008.)

Not available.
 Essentially self-supporting operations of institutions that furnish a service to students, faculty, or staff, such as residence halls and food services.
 Excludes tuition and fee allowances and agency transactions, such as student awards made from contributed funds or grant funds.
 Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor

Statistics, U.S. Department of Labor, adjusted to a school-year basis

¹Essentially self-supporting operations of institutions that furnish a service to students, fac-

⁷Specialized 4-year institutions award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering. Includes some institutions that have 4-year programs, but have not reported sufficient data to identify program category. Also includes institutions classified as 4-year under the IPEDS system, which had been classified as 2-year in the Carnegie system because they primarily award associate's degrees.

8Tribally controlled colleges are located on reservations and are members of the American

Indian Higher Education Consortium.

NOTE: Detail may not sum to totals because of rounding.

2005-06 Integrated Postsecondary Education Data System (IPEDS), Spring 2006 and Spring 2007. (This table was prepared May 2008.)

ulty, or staff, such as residence halls and food services.

2Excludes tuition and fee allowances and agency transactions, such as student awards made from contributed funds or grant funds.

³Doctoral, extensive institutions are committed to graduate education through the doctorate, and award 50 or more doctor's degrees per year across at least 15 disciplines.

4Doctoral, intensive institutions are committed to education through the doctorate and

award at least 10 doctor's degrees per year across 3 or more disciplines or at least 20 doctor's degrees overall.

⁵Master's institutions offer a full range of baccalaureate programs and are committed to education through the master's degree. They award at least 20 master's degrees per year.

Baccalaureate institutions primarily emphasize undergraduate education.

NOTE: Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, 1998-99 through 2005-06 Integrated Postsecondary Education Data System, "Fall Enrollment Survey" (IPEDS-EF:98-99) and "Finance Survey" (IPEDS-F:FY99), and Spring 2001 through Spring 2007. (This table was prepared May 2008.)

¹Essentially self-supporting operations of institutions that furnish a service to students, faculty, or staff, such as residence halls and food services.

 $^{^{2}\}text{Excludes}$ tuition and fee allowances and agency transactions, such as student awards made from contributed funds or grant funds.

³Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

¹Essentially self-supporting operations of institutions that furnish a service to students, faculty, or staff, such as residence halls and food services.

⁶Specialized 4-year institutions award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering. Includes some institutions that have 4-year programs, but have not reported sufficient data to identify program category. Also includes institutions classified as 4-year under the IPEDS system, which had been classified as 2-year in the Carnegie system because they primarily award associate's degrees.

NOTÉ: Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, 2004–05 and 2005–06 Integrated Postsecondary Education Data System (IPEDS), Spring 2006 and Spring 2007. (This table was prepared May 2008.)

²Excludes tuition and fee allowances and agency transactions, such as student awards made from contributed funds or grant funds.

⁹Doctoral, intensive institutions are committed to education through the doctorate and award at least 10 doctor's degrees per year across 3 or more disciplines or at least 20 doctor's degrees overall.

⁴Master's institutions offer a full range of baccalaureate programs and are committed to education through the master's degree. They award at least 20 master's degrees per year. ⁵Baccalaureate institutions primarily emphasize undergraduate education.

NOTE: Adult basic education provides instruction in basic skills for adults 16 and over functioning at literacy levels below the secondary level. Adult secondary education provides instruction at the high school level for adults who are seeking to pass the GED or obtain an adult high school credential. English literacy instruction is for adults who lack proficiency in English and who seek to improve their literacy and competence in English. SOURCE: U.S. Department of Education, Office of Vocational and Adult Education, Division of Adult Education and Literacy, "Adult Education Program Facts, Program Year 1990–1991," Enrollment and Participation in the State-Administered Adult Education Program, selected years, 2000 through 2005, retrieved on August 11, 2005, from http://www.ed.gov/about/offices/list/ovae/pi/AdultEd/aedatatables.html. ⁻Not available. †Not applicable.

NOTE: Data do not include persons enrolled in high school or below. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Adult Education Survey (AE-NHES:1995, AE-NHES:1999, and AE-NHES:2005) and Adult Education for Work-Related Reasons Survey (AEWR-NHES:2003) of the National Household Education Surveys Program. (This table was prepared August 2006.)

[#]Rounds to zero.

[‡]Reporting standards not met.

¹Estimates are not directly comparable to 1995, 1999, or 2005 estimates due to wording in questionnaire.

²For 2005, figures include "Production workers" occupations data.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2000–01 through 2007–08 Integrated Postsecondary Education Data System (IPEDS), Fall 2000 through Fall 2007. (This table was prepared July 2008.)

CHAPTER 4 Federal Programs for Education and Related Activities

This chapter provides a summary of federal legislation and funds for education to describe the scope and variety of federal education programs. Data in this chapter primarily reflect outlays and appropriations of federal agencies. These tabulations differ from federal receipts reported in other chapters because of numerous variations in the data collection systems. Federal dollars are not necessarily spent by recipient institutions in the same year they are appropriated. In some cases, institutions cannot identify the source of federal revenues because they flow through state agencies. Some types of revenues, such as tuition and fees, are reported as revenues from students even though they may be supported by federal student aid programs. Some institutions that receive federal education funds are not included in regular surveys conducted by the National Center for Education Statistics (NCES). Thus, the federal programs data tabulated in this chapter are not comparable with figures reported in other chapters. Readers should also be careful about comparing the data on obligations shown in table 380 with the data on outlays and appropriations appearing in other tables in this chapter.

Federal on-budget funding for education increased 342 percent from fiscal year (FY) 1965 to FY 2007, after adjustment for inflation (table 373). Between FY 1965 and FY 1975, federal on-budget funding for education increased 149 percent. After a decrease of less than 1 percent from FY 1975 to FY 1980, there was a further decrease of 16 percent from FY 1980 to FY 1985. Thereafter, federal on-budget funding for education generally increased. After adjustment for inflation, federal on-budget funding for education increased by 14 percent from FY 1985 to FY 1990, by 20 percent from FY 1990 to FY 1995, by 9 percent from FY 1995 to FY 2000, and by 42 percent from FY 2000 to FY 2007.

Between FY 1990 and FY 1995, after adjustment for inflation, federal on-budget funding increased for each of the four major categories reported: elementary and secondary education (by 32 percent), postsecondary education (by 12 percent), other education (by 21 percent), and research at educational institutions (by 7 percent) (table 373 and figure 18). During the FY 1995 to FY 2000 period, federal funding increased for three of these categories: elementary and secondary education (by 19 percent), other education (by 6 percent), and research at educational institutions (by 26 percent). During the same period, however, funding for postsecondary education decreased by 22 percent. For the categories for which FY 2008 data are available, funding was higher in FY 2008 than

in FY 2000. Funds for elementary and secondary education were 34 percent higher in FY 2008 than in FY 2000, funds for postsecondary education were 104 percent higher, and funds for other education were 16 percent higher.¹

Off-budget support (federal support for education not tied to appropriations) and nonfederal funds generated by federal legislation (e.g., private loans, grants, and aid) showed an increase of 47 percent in constant dollars between FY 1980 and FY 1990 (table 373). These same funds showed an increase of 137 percent between FY 1990 and FY 2000 and an increase of 63 percent between FY 2000 and FY 2008.

According to FY 2007 estimates, \$71.8 billion (about 49 percent of the \$147.5 billion spent by the federal government on education) came from the U.S. Department of Education (figure 19 and table 374). Large amounts of money also came from the U.S. Department of Health and Human Services (\$25.7 billion), the U.S. Department of Agriculture (\$15.4 billion), the U.S. Department of Labor (\$5.4 billion), the U.S. Department of Veterans Affairs (\$5.3 billion), the U.S. Department of Energy (\$4.6 billion), the National Science Foundation (\$4.4 billion), and the National Aeronautics and Space Administration (\$3.0 billion).

For FY 2008, estimates of federal program funds are \$72.8 billion for elementary and secondary education, \$38.0 billion for postsecondary education, and \$7.9 billion for other education programs (table 375). In FY 2007, \$32.2 billion in federal funds were spent for research at universities and related institutions (FY 2008 data were not available at the time this publication was prepared).

In FY 2007, educational institutions (including local education agencies, state education agencies, and degree-granting institutions) received 66 percent of federal program funds for education (table 376). Another 15 percent was used for post-secondary student support. Other education organizations (including Head Start programs at child care centers, vocational education programs, and federal programs at libraries and museums) received 12 percent of federal program funds for education. Federal institutions received 3 percent, as did other recipients (including American Indian tribes, private nonprofit agencies, and banks).

¹ Changes in postsecondary expenditures between 2005 and 2007 resulted primarily from changes in accounting procedures. At the time that this publication was prepared, 2008 data on funding for research at educational institutions were not yet available.

Of the \$73.8 billion spent by the U.S. Department of Education in FY 2008, about 40 percent (\$29.7 billion) went to local education agencies (school districts) and 11 percent (\$8.0 billion) to state education agencies (table 377 and figure 20). About 19 percent (\$13.9 billion) went to postsecondary institutions and another 19 percent (\$14.3 billion) to postsecondary students. Smaller percentages (totaling 11 percent) went to federal institutions, other education organizations, and other recipients.

Chronology of Federal Education Legislation

A capsule view of the history of federal education activities is provided in the following list of selected legislation:

- **1787** *Northwest Ordinance* authorized land grants for the establishment of educational institutions.
- **1802** An Act Fixing the Military Peace Establishment of the United States established the U.S. Military Academy. (The U.S. Naval Academy was established in 1845 by the Secretary of the Navy.)
- **1862** First Morrill Act authorized public land grants to the states for the establishment and maintenance of agricultural and mechanical colleges.
- **1867** *Department of Education Act* authorized the establishment of the U.S. Department of Education.²
- **1876** *Appropriation Act*, U.S. Department of the Treasury, established the U.S. Coast Guard Academy.
- **1890** Second Morrill Act provided for money grants for support of instruction in the agricultural and mechanical colleges.
- **1911** State Marine School Act authorized federal funds to be used for the benefit of any nautical school in any of 11 specified state scaport cities.
- **1917** *Smith-Hughes Act* provided for grants to states for support of vocational education.
- **1918** *Vocational Rehabilitation Act* provided for grants for rehabilitation through training of World War I veterans.
- **1920** *Smith-Bankhead Act* authorized grants to states for vocational rehabilitation programs.
- **1935** *Bankhead-Jones Act* (Public Law 74-182) authorized grants to states for agricultural experiment stations.
 - Agricultural Adjustment Act (Public Law 74-320) authorized 30 percent of the annual customs receipts to be used to encourage the exportation and domestic consumption of agricultural commodities. Commodities purchased under this authorization began to be used in school lunch programs in 1936. The National

- School Lunch Act of 1946 continued and expanded this assistance.
- 1936 An Act to Further the Development and Maintenance of an Adequate and Well-Balanced American Merchant Marine (Public Law 74-415) established the U.S. Merchant Marine Academy.
- **1937** *National Cancer Institute Act* established the Public Health Service fellowship program.
- 1941 Amendment to Lanham Act of 1940 authorized federal aid for construction, maintenance, and operation of schools in federally impacted areas. Such assistance was continued under Public Law 815 and Public Law 874, 81st Congress, in 1950.
- **1943** *Vocational Rehabilitation Act* (Public Law 78-16) provided assistance to disabled veterans.
 - School Lunch Indemnity Plan (Public Law 78-129) provided funds for local lunch food purchases.
- **1944** Servicemen's Readjustment Act (Public Law 78-346), known as the GI Bill, provided assistance for the education of veterans.
 - Surplus Property Act (Public Law 78-457) authorized transfer of surplus property to educational institutions.
- 1946 National School Lunch Act (Public Law 79-396) authorized assistance through grants-in-aid and other means to states to assist in providing adequate foods and facilities for the establishment, maintenance, operation, and expansion of nonprofit school lunch programs.
 - George-Barden Act (Public Law 80-402) expanded federal support of vocational education.
- 1948 United States Information and Educational Exchange Act (Public Law 80-402) provided for the interchange of persons, knowledge, and skills between the United States and other countries.
- **1949** Federal Property and Administrative Services Act (Public Law 81-152) provided for donation of surplus property to educational institutions and for other public purposes.
- 1950 Financial Assistance for Local Educational Agencies
 Affected by Federal Activities (Public Law 81-815
 and Public Law 81-874) provided assistance for construction (Public Law 815) and operation (Public Law 874) of schools in federally affected areas.
 - *Housing Act* (Public Law 81-475) authorized loans for construction of college housing facilities.
- 1954 An Act for the Establishment of the United States Air Force Academy and Other Purposes (Public Law 83-325) established the U.S. Air Force Academy.
 - Educational Research Act (Public Law 83-531) authorized cooperative arrangements with universities, colleges, and state educational agencies for educational research.

² The U.S. Department of Education as established in 1867 was later known as the Office of Education. In 1980, under Public Law 96-88, it became a cabinet-level department. Therefore, for purposes of consistency, it is referred to as the "U.S. Department of Education" even in those tables covering years when it was officially the Office of Education.

- **1956** *Library Services Act* (Public Law 84-597) provided grants to states for extension and improvement of rural public library services.
- **1957** Practical Nurse Training Act (Public Law 84-911) provided grants to states for practical nurse training.
- 1958 National Defense Education Act (Public Law 85-864) provided assistance to state and local school systems for strengthening instruction in science, mathematics, modern foreign languages, and other critical subjects; improvement of state statistical services; guidance, counseling, and testing services and training institutes; higher education student loans and fellowships; foreign language study and training provided by colleges and universities; experimentation and dissemination of information on more effective utilization of television, motion pictures, and related media for educational purposes; and vocational education for technical occupations necessary to the national defense.
 - Education of Mentally Retarded Children Act (Public Law 85-926) authorized federal assistance for training teachers of the disabled.
 - Captioned Films for the Deaf Act (Public Law 85-905) authorized a loan service of captioned films for the deaf.
- **1961** *Area Redevelopment Act* (Public Law 87-27) included provisions for training or retraining of persons in redevelopment areas.
- **1962** *Manpower Development and Training Act* (Public Law 87-415) provided training in new and improved skills for the unemployed and underemployed.
 - Migration and Refugee Assistance Act of 1962 (Public Law 87-510) authorized loans, advances, and grants for education and training of refugees.
- 1963 Health Professions Educational Assistance Act of 1963 (Public Law 88-129) provided funds to expand teaching facilities and for loans to students in the health professions.
 - Vocational Education Act of 1963 (Part of Public Law 88-210) increased federal support of vocational education schools; vocational work-study programs; and research, training, and demonstrations in vocational education.
 - Higher Education Facilities Act of 1963 (Public Law 88-204) authorized grants and loans for classrooms, libraries, and laboratories in public community colleges and technical institutes, as well as undergraduate and graduate facilities in other institutions of higher education.
- **1964** *Civil Rights Act of 1964* (Public Law 88-352) authorized the Commissioner of Education to arrange for support for institutions of higher education and school districts to provide inservice programs for assisting

- instructional staff in dealing with problems caused by desegregation.
- Economic Opportunity Act of 1964 (Public Law 88-452) authorized grants for college work-study programs for students from low-income families; established a Job Corps program and authorized support for work-training programs to provide education and vocational training and work experience opportunities in welfare programs; authorized support of education and training activities and of community action programs, including Head Start, Follow Through, and Upward Bound; and authorized the establishment of Volunteers in Service to America (VISTA).
- 1965 Elementary and Secondary Education Act of 1965
 (Public Law 89-10) authorized grants for elementary and secondary school programs for children of low-income families; school library resources, textbooks, and other instructional materials for school children; supplementary educational centers and services; strengthening state education agencies; and educational research and research training.
 - Health Professions Educational Assistance Amendments of 1965 (Public Law 89-290) authorized scholarships to aid needy students in the health professions.
 - Higher Education Act of 1965 (Public Law 89-329) provided grants for university community service programs, college library assistance, library training and research, strengthening developing institutions, teacher training programs, and undergraduate instructional equipment. Authorized insured student loans, established a National Teacher Corps, and provided for graduate teacher training fellowships.
 - National Foundation on the Arts and the Humanities Act (Public Law 89-209) authorized grants and loans for projects in the creative and performing arts and for research, training, and scholarly publications in the humanities.
 - National Technical Institute for the Deaf Act (Public Law 89-36) provided for the establishment, construction, equipping, and operation of a residential school for postsecondary education and technical training of the deaf.
 - School Assistance in Disaster Areas Act (Public Law 89-313) provided for assistance to local education agencies to help meet exceptional costs resulting from a major disaster.
- **1966** *International Education Act* (Public Law 89-698) provided grants to institutions of higher education for the establishment, strengthening, and operation of centers for research and training in international studies and the international aspects of other fields of study.
 - National Sea Grant College and Program Act (Public Law 89-688) authorized the establishment and operation of Sea Grant Colleges and programs by initiating and supporting programs of education and research in

the various fields relating to the development of marine resources.

Adult Education Act (Public Law 89-750) authorized grants to states for the encouragement and expansion of educational programs for adults, including training of teachers of adults and demonstrations in adult education (previously part of Economic Opportunity Act of 1964).

Model Secondary School for the Deaf Act (Public Law 89-694) authorized the establishment and operation, by Gallaudet College, of a model secondary school for the deaf.

1967 Education Professions Development Act (Public Law 90-35) amended the Higher Education Act of 1965 for the purpose of improving the quality of teaching and to help meet critical shortages of adequately trained educational personnel.

Public Broadcasting Act of 1967 (Public Law 90-129) established a Corporation for Public Broadcasting to assume major responsibility in channeling federal funds to noncommercial radio and television stations, program production groups, and ETV networks; conduct research, demonstration, or training in matters related to noncommercial broadcasting; and award grants for construction of educational radio and television facilities.

1968 Elementary and Secondary Education Amendments of 1968 (Public Law 90-247) modified existing programs, authorized support of regional centers for education of children with disabilities, model centers and services for deaf-blind children, recruitment of personnel and dissemination of information on education of the disabled; technical assistance in education to rural areas; support of dropout prevention projects; and support of bilingual education programs.

Handicapped Children's Early Education Assistance Act (Public Law 90-538) authorized preschool and early education programs for disabled children.

Vocational Education Amendments of 1968 (Public Law 90-576) modified existing programs and provided for a National Advisory Council on Vocational Education and collection and dissemination of information for programs administered by the Commissioner of Education.

1970 Elementary and Secondary Education Assistance Programs, Extension (Public Law 91-230) authorized comprehensive planning and evaluation grants to state and local education agencies; provided for the establishment of a National Commission on School Finance.

National Commission on Libraries and Information Services Act (Public Law 91-345) established a National Commission on Libraries and Information Science to effectively utilize the nation's educational resources. Office of Education Appropriation Act (Public Law 91-380) provided emergency school assistance to desegregating local education agencies.

Environmental Education Act (Public Law 91-516) established an Office of Environmental Education to develop curriculum and initiate and maintain environmental education programs at the elementary/secondary levels; disseminate information; provide training programs for teachers and other educational, public, community, labor, and industrial leaders and employees; provide community education programs; and distribute material dealing with the environment and ecology.

Drug Abuse Education Act of 1970 (Public Law 91-527) provided for development, demonstration, and evaluation of curricula on the problems of drug abuse.

1971 Comprehensive Health Manpower Training Act of 1971
(Public Law 92-257) amended Title VII of the Public Health Service Act, increasing and expanding provisions for health manpower training and training facilities.

1972 Drug Abuse Office and Treatment Act of 1972 (Public Law 92-255) established a Special Action Office for Drug Abuse Prevention to provide overall planning and policy for all federal drug-abuse prevention functions; a National Advisory Council for Drug Abuse Prevention; community assistance grants for community mental health centers for treatment and rehabilitation of persons with drug-abuse problems; and, in December 1974, a National Institute on Drug Abuse.

Education Amendments of 1972 (Public Law 92-318) established the Education Division in the U.S. Department of Health, Education, and Welfare and the National Institute of Education; general aid for institutions of higher education; federal matching grants for state Student Incentive Grants; a National Commission on Financing Postsecondary Education; State Advisory Councils on Community Colleges; a Bureau of Occupational and Adult Education and State Grants for the design, establishment, and conduct of postsecondary occupational education; and a bureau-level Office of Indian Education. Amended current U.S. Department of Education programs to increase their effectiveness and better meet special needs. Prohibited sex bias in admission to vocational, professional, and graduate schools, and public institutions of undergraduate higher education.

1973 Older Americans Comprehensive Services Amendment of 1973 (Public Law 93-29) made available to older citizens comprehensive programs of health, education, and social services.

Comprehensive Employment and Training Act of 1973 (Public Law 93-203) provided for opportunities for employment and training to unemployed and underemployed persons. Extended and expanded provisions in

- **1974** Education Amendments of 1974 (Public Law 93-380) provided for the consolidation of certain programs; and established a National Center for Education Statistics.
 - Juvenile Justice and Delinquency Prevention Act of 1974 (Public Law 93-415) provided for technical assistance, staff training, centralized research, and resources to develop and implement programs to keep students in elementary and secondary schools; and established, in the U.S. Department of Justice, a National Institute for Juvenile Justice and Delinquency Prevention.
- **1975** *Indian Self-Determination and Education Assistance Act* (Public Law 93-638) provided for increased participation of Indians in the establishment and conduct of their education programs and services.
 - Harry S Truman Memorial Scholarship Act (Public Law 93-642) established the Harry S Truman Scholarship Foundation and created a perpetual education scholarship fund for young Americans to prepare and pursue careers in public service.
 - Indochina Migration and Refugee Assistance Act of 1975 (Public Law 94-23) authorized funds to be used for education and training of aliens who have fled from Cambodia or Vietnam.
 - Education for All Handicapped Children Act (Public Law 94-142) provided that all children with disabilities have available to them a free appropriate education designed to meet their unique needs.
- 1976 Educational Broadcasting Facilities and Telecommunications Demonstration Act of 1976 (Public Law 94-309) established a telecommunications demonstration program to promote the development of nonbroadcast telecommunications facilities and services for the transmission, distribution, and delivery of health, education, and public or social service information.
- 1977 Youth Employment and Demonstration Projects Act of 1977 (Public Law 95-93) established a youth employment training program that includes, among other activities, promoting education-to-work transition, literacy training and bilingual training, and attainment of certificates of high school equivalency.
 - Career Education Incentive Act (Public Law 95-207) authorized the establishment of a career education program for elementary and secondary schools.
- 1978 Tribally Controlled Community College Assistance Act of 1978 (Public Law 95-471) provided federal funds for the operation and improvement of tribally controlled community colleges for Indian students.

- Education Amendments of 1978 (Public Law 95-561) established a comprehensive basic skills program aimed at improving pupil achievement (replaced the existing National Reading Improvement program); and established a community schools program to provide for the use of public buildings.
- Middle Income Student Assistance Act (Public Law 95-566) modified the provisions for student financial assistance programs to allow middle-income as well as low-income students attending college or other postsecondary institutions to qualify for federal education assistance.
- 1979 Department of Education Organization Act (Public Law 96-88) established a U.S. Department of Education containing functions from the Education Division of the U.S. Department of Health, Education, and Welfare (HEW) along with other selected education programs from HEW, the U.S. Department of Justice, U.S. Department of Labor, and the National Science Foundation.
- 1980 Asbestos School Hazard Detection and Control Act of 1980 (Public Law 96-270) established a program for inspection of schools for detection of hazardous asbestos materials and provided loans to assist educational agencies to contain or remove and replace such materials.
- 1981 Education Consolidation and Improvement Act of 1981
 (Part of Public Law 97-35) consolidated 42 programs into 7 programs to be funded under the elementary and secondary block grant authority.
- 1983 Student Loan Consolidation and Technical Amendments Act of 1983 (Public Law 98-79) established an 8 percent interest rate for Guaranteed Student Loans and an extended Family Contribution Schedule.
 - Challenge Grant Amendments of 1983 (Public Law 98-95) amended Title III, Higher Education Act, and added authorization of the Challenge Grant program. The Challenge Grant program provides funds to eligible institutions on a matching basis as an incentive to seek alternative sources of funding.
 - Education of the Handicapped Act Amendments of 1983 (Public Law 98-199) added the Architectural Barrier amendment and clarified participation of children with disabilities in private schools.
- 1984 Education for Economic Security Act (Public Law 98-377) added new science and mathematics programs for elementary, secondary, and postsecondary education. The new programs included magnet schools, excellence in education, and equal access.
 - Carl D. Perkins Vocational Education Act (Public Law 98-524) continued federal assistance for vocational education through FY 1989. The act replaced the Vocational Education Act of 1963. It provided aid to the states to make vocational education programs

- accessible to all persons, including disabled and disadvantaged, single parents and homemakers, and the incarcerated.
- Human Services Reauthorization Act (Public Law 98-558) created a Carl D. Perkins scholarship program, a National Talented Teachers Fellowship program, a Federal Merit Scholarships program, and a Leadership in Educational Administration program.
- 1985 Montgomery GI Bill—Active Duty (Public Law 98-525), brought about a new GI Bill for individuals who initially entered active military duty on or after July 1, 1985.
 - Montgomery GI Bill—Selected Reserve (Public Law 98-525), established an education program for members of the Selected Reserve (which includes the National Guard) who enlist, reenlist, or extend an enlistment after June 30, 1985, for a 6-year period.
- 1986 Handicapped Children's Protection Act of 1986 (Public Law 99-372) allowed parents of children with disabilities to collect attorneys' fees in cases brought under the Education of the Handicapped Act and provided that the Education of the Handicapped Act does not preempt other laws, such as Section 504 of the Rehabilitation Act.
 - Drug-Free Schools and Communities Act of 1986 (Part of Public Law 99-570), part of the Anti-Drug Abuse Act of 1986, authorized funding for FYs 1987–89. Established programs for drug abuse education and prevention, coordinated with related community efforts and resources, through the use of federal financial assistance.
- 1988 Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (Public Law 100-297) reauthorized through 1993 major elementary and secondary education programs including: Chapter 1, Chapter 2, Bilingual Education, Math-Science Education, Magnet Schools, Impact Aid, Indian Education, Adult Education, and other smaller education programs.
 - Technology-Related Assistance for Individuals with Disabilities Act of 1988 (Public Law 100-407) provided financial assistance to states to develop and implement consumer-responsive statewide programs of technology-related assistance for persons of all ages with disabilities.
 - Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Public Law 100-628) extended for 2 additional years programs providing assistance to the homeless, including literacy training for homeless adults and education for homeless youths.
 - Tax Reform Technical Amendments (Public Law 100-647) authorized an Education Savings Bond for the purpose of postsecondary educational expenses. The

- bill grants tax exclusion for interest earned on regular series EE savings bonds.
- 1989 Children with Disabilities Temporary Care Reauthorization Act of 1989 (Public Law 101-127) revised and extended the programs established in the Temporary Child Care for Handicapped Children and Crises Nurseries Act of 1986.
 - Childhood Education and Development Act of 1989 (Part of Public Law 101-239) authorized the appropriations to expand Head Start programs and programs carried out under the Elementary and Secondary Education Act of 1965 to include child care services.
- 1990 Excellence in Mathematics, Science and Engineering Education Act of 1990 (Public Law 101-589) was established to promote excellence in American mathematics, science, and engineering education by creating a national mathematics and science clearinghouse, and creating several other mathematics, science, and engineering education programs.
 - Student Right-To-Know and Campus Security Act (Public Law 101-542) required institutions of higher education receiving federal financial assistance to provide certain information with respect to the graduation rates of student-athletes at such institutions.
 - Americans with Disabilities Act of 1990 (Public Law 101-336) prohibited discrimination against persons with disabilities.
 - National and Community Service Act of 1990 (Public Law 101-610) increased school and college-based community service opportunities and authorized the President's Points of Light Foundation.
- 1991 National Literacy Act of 1991 (Public Law 102-73) established the National Institute for Literacy, the National Institute Board, and the Interagency Task Force on Literacy. Amended various federal laws to establish and extend various literacy programs.
 - High-Performance Computing Act of 1991 (Public Law 102-194) directed the President to implement a National High-Performance Computing Program. Provided for: (1) establishment of a National Research and Education Network; (2) standards and guidelines for high performance networks; and (3) the responsibility of certain federal departments and agencies with regard to the Network.
 - Veterans' Educational Assistance Amendments of 1991 (Public Law 102-127) restored certain educational benefits available to reserve and active-duty personnel under the Montgomery GI Bill to students whose course of studies were interrupted by the Persian Gulf War.
 - Civil Rights Act of 1991 (Public Law 102-166) amended the Civil Rights Act of 1964, the Age Discrimination in Employment Act of 1967, and the Americans with Disabilities Act of 1990, with

- 1992 Ready-To-Learn Act (Public Law 102-545) amended the General Education Provisions Act to establish Ready-To-Learn Television programs to support educational programming and support materials for preschool and elementary school children and their parents, child care providers, and educators.
- 1993 Student Loan Reform Act (Public Law 103-66) reformed the student aid process by phasing in a system of direct lending designed to provide savings for taxpayers and students. Allows students to choose among a variety of repayment options, including income contingency.
 - National Service Trust Act (Public Law 103-82) amended the National and Community Service Act of 1990 to establish a Corporation for National Service and enhance opportunities for national service. In addition, the Act provided education grants up to \$4,725 per year for 2 years to people age 17 years or older who perform community service before, during, or after postsecondary education.
 - NAEP Assessment Authorization (Public Law 103-33) authorized the use of NAEP for state-by-state comparisons.
- 1994 Goals 2000: Educate America Act (Public Law 103-227) established a new federal partnership through a system of grants to states and local communities to reform the nation's education system. The Act formalized the national education goals and established the National Education Goals Panel.
 - School-To-Work Opportunities Act of 1994 (Public Law 103-239) established a national framework within which states and communities can develop School-To-Work Opportunities systems to prepare young people for first jobs and continuing education. The Act also provided money to states and communities to develop a system of programs that include work-based learning, school-based learning, and connecting activities components.
 - Safe Schools Act of 1994 (Part of Public Law 103-227) authorized the award of competitive grants to local educational agencies with serious crime to implement violence prevention activities such as conflict resolution and peer mediation.
- 1996 Contract With America: Unfunded Mandates (Public Law 104-4) curbed the practice of imposing unfunded federal mandates on states and local governments; strengthened the partnership between the federal government and state, local, and tribal governments; ended the imposition, in the absence of full consideration by Congress, of federal mandates on state, local, and tribal governments without adequate funding, in a manner that may displace other essential governmental priorities; and ensured that the federal government pays the costs incurred by those governments in complying with certain

- requirements under federal statutes and regulations.
- Human Rights, Refugee, and Other Foreign Relations Provisions Act of 1996 (Public Law 104-319) made certain provisions with respect to internationally recognized human rights, refugees, and foreign relations to revise U.S. human rights policy.
- **1997** *The Taxpayer Relief Act of 1997* (Public Law 105-34) enacted the Hope Scholarship and Life-Long Learning Tax Credit provisions into law.
 - Emergency Student Loan Consolidation Act of 1997 (Public Law 105-78) amended the Higher Education Act to provide for improved student loan consolidation services.
- 1998 Workforce Investment Act of 1998 (Public Law 105-220) enacted the Adult Education and Family Literacy Act, and substantially revised and extended, through FY 2003, the Rehabilitation Act of 1973.
 - Omnibus Consolidated and Emergency Supplemental Appropriations Act, 1999 (Public Law 105-277) enacted the Reading Excellence Act, to promote the ability of children to read independently by the third grade; and earmarked funds to help states and school districts reduce class sizes in the early grades.
 - Charter School Expansion Act (Public Law 105-278) amended the charter school program, enacted in 1994 as Title X, Part C of the Elementary and Secondary Education Act of 1965.
 - Carl D. Perkins Vocational and Applied Technology Education Amendments of 1998 (Public Law 105-332) revised, in its entirety, the Carl D. Perkins Vocational and Applied Technology Education Act, and reauthorized the Act through FY 2003.
 - Assistive Technology Act of 1998 (Public Law 105-394) replaced the Technology-Related Assistance for Individuals with Disabilities Act of 1988 with a new Act, authorized through FY 2004, to address the assistive-technology needs of individuals with disabilities.
- 1999 Education Flexibility Partnership Act of 1999 (Public Law 106-25) authorized the Secretary of Education to allow all states to participate in the Education Flexibility Partnership program.
 - District of Columbia College Access Act of 1999 (Public Law 106-98) established a program to afford high school graduates from the District of Columbia the benefits of in-state tuition at state colleges and universities outside the District of Columbia.
- 2000 The National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398) included, as Title XVIII, the Impact Aid Reauthorization Act of 2000, which extended the Impact Aid programs through FY 2003.
 - College Scholarship Fraud Prevention Act of 2000 (Public Law 106-420) enhanced federal penalties for offenses involving scholarship fraud; required an annual scholarship fraud report by the Attorney

- General, the Secretary of Education, and the Federal Trade Commission (FTC); and required the Secretary of Education, in conjunction with the FTC, to maintain a scholarship fraud awareness website.
- Consolidated Appropriations Act 2001 (Public Law 106-554) created a new program of assistance for school repair and renovation, and amended the Elementary and Secondary Education Act of 1965 to authorize credit enhancement initiatives to help charter schools obtain, construct, or repair facilities; reauthorized the Even Start program; and enacted the "Children's Internet Protection Act."
- 2001 50th Anniversary of Brown v. the Board of Education (Public Law 107-41) established a commission for the purpose of encouraging and providing for the commemoration of the 50th anniversary of the 1954 Supreme Court decision Brown v. Board of Education
- 2002 No Child Left Behind Act of 2001 (Public Law 107-110) provided for the comprehensive reauthorization of the Elementary and Secondary Education Act of 1965, incorporating specific proposals in such areas as testing, accountability, parental choice, and early reading.
 - Reauthorization of the National Center for Education Statistics and the Creating of the Institute of Education Sciences of 2002 (Public Law 107-279) established the Institute of Education Sciences within the U.S. Department of Education to carry out a coordinated, focused agenda of high-quality research, statistics, and evaluation that is relevant to the educational challenges of the nation.
 - The Higher Education Relief Opportunities for Students Act of 2001 (Public Law 107-122) provided the Secretary of Education with waiver authority under student financial aid programs under Title IV of the Higher Education Act of 1965, to deal with student and family situations resulting from the September 11, 2001, terrorist attacks.
 - Established fixed interest rates for student and parent borrowers (Public Law 107-139) under Title IV of the Higher Education Act of 1965.
- 2003 The Higher Education Relief Opportunities for Students Act of 2003 (Public Law 108-76) provided the Secretary of Education with waiver authority under student financial aid programs under Title IV of the Higher Education Act of 1965, to deal with student and family situations resulting from wars or national emergencies.
- **2004** Assistive Technology Act of 2004 (Public Law 108-364) reauthorized the Assistive Technology program, administered by the Department of Education.
 - Taxpayer-Teacher Protection Act of 2004 (Public Law 108-409) temporarily stopped excessive special allowance payments to certain lenders under the Federal Family Education Loan (FFEL) Program and increases the amount of loans that can be forgiven for certain borrowers who are highly qualified

- mathematics, science, and special education teachers who serve in high-poverty schools for 5 years.
- Individuals with Disabilities Education Improvement Act of 2004 (Public Law 108-446) provided a comprehensive reauthorization of the Individuals with Disabilities Education Act.
- 2005 Student Grant Hurricane and Disaster Relief Act
 (Public Law 109-67) authorized the Secretary of
 Education to waive certain repayment requirements
 for students receiving campus-based federal grant
 assistance if they were residing in, employed in, or
 attending an institution of higher education located
 in a major disaster area, or their attendance was
 interrupted because of the disaster.
 - Natural Disaster Student Aid Fairness Act (Public Law 109-86) authorized the Secretary of Education during FY 2006 to reallocate campus-based student aid funds to institutions of higher learning in Louisiana, Mississippi, Alabama, and Texas, or institutions that have accepted students displaced by Hurricane Katrina or Rita. The law also waived requirements for matching funds that are normally imposed on institutions and students.
 - Hurricane Education Recovery Act (HERA) (Public Law 109-148, provision in the Defense Department Appropriations Act for FY 2006) provided funds for states affected by Hurricane Katrina to restart school operations, provide temporary emergency aid for displaced students, and assist homeless youth. The law also permitted the Secretary of Education to extend deadlines under the Individuals with Disabilities Education Act for those affected by Katrina or Rita.
- **2006** Higher Education Reconciliation Act of 2005 (Public Law 109-171) made various amendments to programs of student financial assistance under Title IV of the Higher Education Act of 1965.
 - Public Law 109-211 reauthorized the "ED-FLEX" program (under the Education Flexibility Partnership Act of 1999), under which the Secretary permits states to waive certain requirements of federal statutes and regulations if they meet certain conditions.
 - Carl D. Perkins Career and Technical Education Improvement Act of 2006 (Public Law 109-270) reauthorized the vocational and technical education programs under the Perkins Act through 2012.
 - Third Higher Education Extension Act of 2006 (Public Law 109-292) extended the Higher Education Act through June 30, 2007, to afford Congress additional time to complete work on a comprehensive reauthorization.
 - Public Law 109-323 extended, for an additional year (through September 30, 2007), the period for which the Secretary of Education may waive certain fiscal requirements for states in which the President declared disaster areas as a result of Hurricanes Katrina and Rita.

The America COMPETES Act (or "America Creating Opportunities to Meaningfully Promote Excellence in Technology, Education, and Science") (Public Law 110-69) creates new STEM (science, technology, engineering, and mathematics) education programs in various agencies, including the Department of Education.

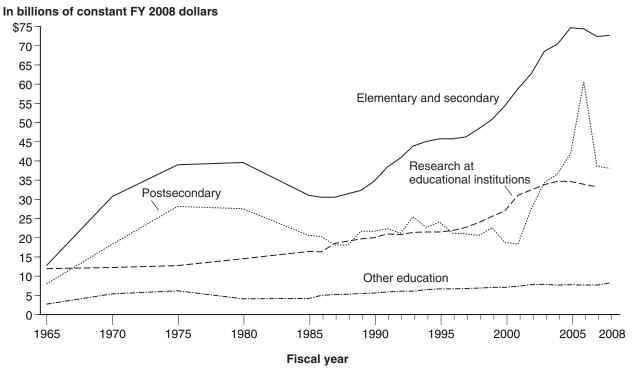

The College Cost Reduction and Access Act of 2007 (Public Law 110-84) reduces interest rates on student loans and makes other amendments to the Higher Education Act of 1965 to make college more accessible and affordable.

Permanent extension of the Higher Education Relief Opportunities for Students Act of 2003 (HEROES Act) (Public Law 110-93) gives the Secretary authority to waive or modify any statutory or regulatory provision applicable to the student financial assistance programs under title IV of the Higher Education Act of 1965 as deemed necessary in connection with a war or other military operation or national emergency.

2008 Ensuring Continued Access to Student Loans Act of 2008 (Public Law 110-227) provides various authorities to the Department of Education, among other provisions, to help ensure that college students and their parents continue to have access to loans in the tight credit market.

The *Higher Education Opportunity Act* (Public Law 110-315) provides a comprehensive reauthorization of the Higher Education Act of 1965.

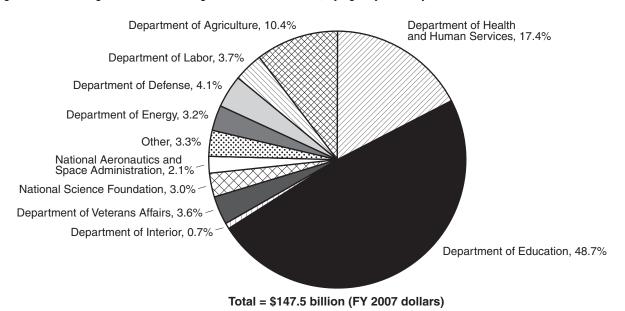

Figure 18. Federal on-budget funds for education, by level or other educational purpose: Selected years, 1965 through 2008

NOTE: Changes in postsecondary expenditures between 2005 and 2007 resulted primarily from changes in accounting procedures. Data for Research at educational institutions not available for 2008.

SOURCE: U.S. Department of Education, Budget Service, unpublished tabulations. U.S. Department of Education, National Center for Education Statistics, unpublished tabulations. U.S. Office of Management and Budget, Budget of the U.S. Government, Appendix, fiscal years 1967 through 2009. National Science Foundation, Federal Funds for Research and Development, fiscal years 1965 through 2007.

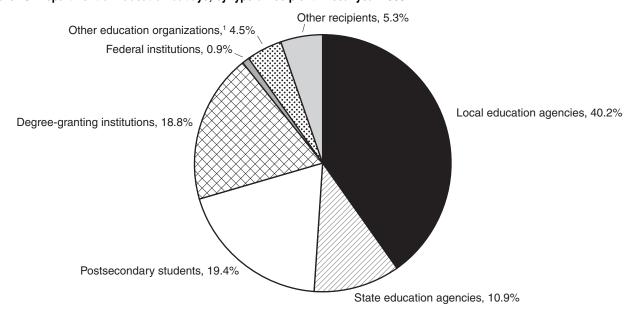

Figure 19. Percentage of federal on-budget funds for education, by agency: Fiscal year 2007

NOTE: Detail may not sum to totals because of rounding.

⁻Not available.

⁸Formerly the State Student Incentive Grant program. Starting in fiscal year 2000, amounts under \$30.0 million have required dollar-for-dollar state matching contributions, while amounts over \$30.0 million have required two-to-one state matching contributions.

⁹Institutions award grants to undergraduate students, and the federal share of such grants may not exceed 75 percent of the total grant.

NOTE: To the extent possible, federal education funds data represent outlays rather than obligations. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Changes in postsecondary expenditures between 2005 and 2007 resulted primarily from changes in accounting procedures.

SOURCE: U.S. Department of Education, Budget Service, unpublished tabulations. U.S. Department of Education, National Center for Education Statistics, unpublished tabulations. U.S. Office of Management and Budget, *Budget of the U.S. Government, Appendix*, fiscal years 1967 through 2009. National Science Foundation, *Federal Funds for Research and Development*, fiscal years 1967 through 2007. (This table was prepared October 2008.)

[†]Not applicable.

¹On-budget support includes federal funds for education programs tied to appropriations.

²Losses of tax revenue attributable to provisions of the federal income tax laws that allow a special exclusion, exemption, or deduction from gross income or provide a special credit, preferential rate of tax, or a deferral of tax liability affecting individual or corporate income tax liabilities.

³Other education includes libraries, museums, cultural activities, and miscellaneous research.

⁴The William D. Ford Direct Program (commonly referred to as the Direct Loan Program) provides students with the same benefits they are currently eligible to receive under the Federal Family Education Loan (FFEL) program, but provides loans to students through federal capital rather than through private lenders.

⁵Formerly the Guaranteed Student Loan program. Includes new student loans guaranteed by the federal government and disbursed to borrowers.

⁶Student loans created from institutional matching funds (since 1993 one-third of federal capital contributions). Excludes repayments of outstanding loans.

⁷Student loans created from institutional matching funds (one-ninth of the federal contribution). This was a demonstration project that involved only 10 institutions and had unsubsidized interest rates. Program repealed in fiscal year 1992.

¹⁰Employer contributions to student earnings are generally one-third of federal allocation.

¹¹Estimated

¹²Data adjusted by the federal funds composite deflator reported in the U.S. Office of Management and Budget, *Budget of the U.S. Government, Historical Tables, Fiscal Year 2009.*

†Not applicable

NOTE: To the extent possible, amounts reported represent outlays, rather than obligations. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. Negative amounts occur when program receipts exceed outlays. Much of the fluctuation in Department of Education funds between 2005 and 2007 was due to changes in postsecondary expenditures that resulted primarily from changes in accounting procedures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, unpublished tabulations. U.S. Office of Management and Budget, *Budget of the U.S. Government, Appendix*, fiscal years 1972 through 2009. National Science Foundation, *Federal Funds for Research and Development*, fiscal years 1970 to 2007. (This table was prepared October 2008.)

[—]Not available.

¹⁰Assisted in the construction of public facilities, such as vocational schools, through grants or loans. No funds have been appropriated for this program since FY 1977, and it was completely phased out in FY 1984.

[†]Not applicable.

¹Excludes federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Benefits excluded from total because data before fiscal year (FY) 1990 are not available. This program existed since Medicare began, but was not available as a separate budget item until FY 1990. Excluded amounts are as follows: \$4,440,000,000 in FY 1990, \$7,510,000,000 in FY 1995, \$8,020,000,000 in FY 2000, \$8,400,000,000 in FY 2005, \$8,400,000,000 in FY 2006, \$8,500,000,000 in FY 2007, and an estimated \$9,000,000,000 in FY 2008.

²Estimated.

³The U.S. Department of Education was created in May 1980. It formerly was the Office of Education in the U.S. Department of Health, Education, and Welfare.

⁴Arranges for the education of children who reside on federal property when no suitable local school district can or will provide for the education of these children.

⁵Includes many programs, such as No Child Left Behind, 21st Century Community Learning Centers, Class Size Reduction, Charter Schools, Safe and Drug-Free Schools, and Innovative programs.

⁶Included the School-To-Work Opportunities program, which initiated a national system to be administered jointly by the U.S. Departments of Education and Labor. Programs in the Education Reform program were transferred to the school improvement programs or discontinued in FY 2002. Amounts after FY 2002 reflect balances that are spending out from prior-year appropriations.

⁷Starting in FY 1994, the Special Milk Program has been included in the child nutrition

⁸The Farm Security and Rural Investment Act of 2002 (Public Law 107-171) carries out preschool and school feeding programs in foreign countries to help reduce the incidence of hunger and malnutrition, and improve literacy and primary education.

⁹These commodities are purchased under Section 32 of the Act of August 24, 1935, for use in the child nutrition programs.

¹¹Established in 1979, with funds first appropriated in FY 1980.

¹²Formerly in the Office of Economic Opportunity. In FY 1972, funds were transferred to the U.S. Department of Health, Education, and Welfare, Office of Child Development.

¹³Created by the Family Support Act of 1988 to provide funds for the Job Opportunities and Basic Skills Training program. Replaced by Temporary Assistance for Needy Families program.

¹⁴After age 18, benefits terminate at the end of the school term or in 3 months, whichever comes first

¹⁵Transferred from the U.S. Department of Transportation to the U.S. Department of Homeland Security in March of 2003.

¹⁶Provides funding for supplemental programs for eligible American Indian students in public schools.

¹⁷Finances the cost of academic, social, and occupational education courses for inmates in federal prisons.

¹⁸Some of the work and training programs were in the Office of Economic Opportunity and were transferred to the U.S. Department of Labor in FYs 1971 and 1972. From FY 1994 through FY 2001, included the School-to-Work Opportunities program, which was administered jointly by the U.S. Departments of Education and Labor.

¹⁹Established in FY 1972 and closed in FY 1986.

²⁰The states' share of revenue-sharing funds could not be spent on education in FYs

²¹Provided educational assistance allowances in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active military service between January 31, 1955, and January 1, 1977.

- ²²This program is in "Readjustment Benefits" program, Chapter 31, and covers the costs of subsistence, tuition, books, supplies, and equipment for disabled veterans requiring vocational rehabilitation.
- ²³This program is in "Readjustment Benefits" program, Chapter 35, and provides benefits to children and spouses of veterans.
- ²⁴Head Start program funds were transferred to the U.S. Department of Health, Education, and Welfare, Office of Child Development, in FY 1972.
- ²⁵Most of these programs were transferred to the U.S. Department of Health, Education, and Welfare, Office of Education, in FY 1972.
- ²⁶Transferred to the U.S. Department of Labor in FYs 1971 and 1972.
- ²⁷Transferred to the ACTION Agency in FY 1972.
- ²⁸Transferred from the U.S. Department of Housing and Urban Development to the U.S. Department of Health, Education, and Welfare, Office of Education, in FY 1979.
- ²⁹Transferred from the National Science Foundation to the U.S. Department of Commerce in October 1970.
- 30Transferred from the U.S. Department of Commerce to the U.S. Department of Transportation in FY 1981.
- ³¹Includes special education programs (military and civilian); legal education program; flight training; advanced degree program; college degree program (officers); and "Armed Forces Health Professions Scholarship" program.
- 32 Does not include higher education assistance loans.
- ³³Alcohol, drug abuse, and mental health training programs are included starting in FY 1992.
- ³⁴Beginning in FY 1992, data were included in the National Institutes of Health training grants program.
- 35This program closed in FY 2004.
- 36Postsecondary student benefits were ended by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) and were completely phased out by August 1985.
- $^{\rm 37} lncludes$ flight training. Transferred to the U.S. Department of Homeland Security in March of 2003.
- 38Transferred from the U.S. Department of State to the United States Information Agency in 1977, then transferred back to the U.S. Department of State in FY 1998.
- ³⁹Part of the Ronald W. Reagan National Defense Authorization Act for FY 2005 (Public Law 108-375), enacted October 28, 2004. The Reserve Education Assistance Program (REAP) provides educational assistance to members of the National Guard and Reserves who serve on active duty in support of a contingency operation under federal authority on or after September 11, 2001.
- $^{\rm 40} Abolished$ in FY 1998, with functions transferred to the U.S. Department of State and the newly created Broadcasting Board of Governors.

- ⁴¹Included in the "Educational and Cultural Affairs" program in FYs 1980 through 1983, and became an independent program in FY 1984.
- ⁴²Transferred from U.S. Department of Education to the Institute of Museum and Library Services in FY 1997.
- ⁴³Transferred to the U.S. Department of Homeland Security in FY 2003.
- ⁴⁴The disaster relief program repairs and replaces damaged and destroyed school buildings. In FY 1995, funds were for repairs due to the Northridge Earthquake in California. In FY 1995, \$74.4 million was spent on school districts, \$8.4 million on community colleges, and \$87.6 million on colleges and universities. This program was transferred from the Federal Emergency Management Agency to the U.S. Department of Homeland Security in FY 2003.
- ⁴⁵The National Service Trust Act of 1993 established the Corporation for National and Community Service. In 1993, ACTION became part of this agency.
- ⁴⁶The Federal Emergency Management Agency was created in 1979, representing a combination of five existing agencies. The funds for the Federal Emergency Management Agency in FY 1970 to FY 1975 were in other agencies. This agency was transferred to the U.S. Department of Homeland Security in March of 2003.
- ⁴⁷These programs include the Fall-Out Shelter Analysis, Blast Protection Design through FY 1992. Starting in FY 1993, earthquake training and safety for teachers and administrators for grades 1 through 12 are included.
- ⁴⁸Transferred from the General Services Administration to the National Archives and Records Administration in April 1985.
- ⁴⁹Public Law 110-161 transferred the National Commission on Libraries and Information Science to the Institute of Museum and Library Services starting in FY 2008.
- ⁵⁰Includes federal obligations for research and development centers and R & D plant administered by colleges and universities. FY 2006 and FY 2007 data are estimated, except the U.S Department of Education data, which are actual numbers.
- ⁵¹FY 1970 includes outlays for the "Research and Training" program. FY 1975 includes the "National Institute of Education" program. FYs 1990 through 2008 include outlays for the Office of Educational Research and Improvement and the Institute for Education Sciences.

NOTE: Some data have been revised from previously published figures. To the extent possible, amounts reported represent outlays rather than obligations. Detail may not sum to totals because of rounding. Negative amounts occur when program receipts exceed outlays. Changes in total postsecondary expenditures between 2005 and 2007 resulted primarily from changes in accounting procedures in the Federal Family Education Loan Program. SOURCE: U.S. Department of Education, Budget Service, unpublished tabulations. U.S. Office of Management and Budget, Budget of the U.S. Government, Appendix, fiscal years 1972 through 2009. National Science Foundation, Federal Funds for Research and Development, fiscal years 1970 through 2007. (This table was prepared October 2008.)

†Not applicable.

NOTE: Outlays by type of recipient are estimated based on obligation data. Changes in postsecondary expenditures between 2005 and 2007 resulted primarily from changes in accounting procedures. Some data have been revised from previously published figures. Detail may

not sum to totals because of rounding.

SOURCE: U.S. Office of Management and Budget, *Budget of the U.S. Government*, fiscal years 1982 through 2009. U.S. Department of Education, Office of the Deputy Secretary, Budget Office, unpublished tabulations. (This table was prepared October 2008.)

¹Includes funds for vocational education and for federal programs at libraries and museums. ²Other recipients include American Indian tribes, private nonprofit agencies, and banks.

CHAPTER 5 Outcomes of Education

This chapter contains tables comparing educational attainment and workforce characteristics. The data show labor force participation and income levels of high school dropouts and high school and college graduates. Population characteristics are provided for many of the measures to help provide comparisons among various demographic groups. Tables 381 to 383 contain data from the U.S. Bureau of Labor Statistics on labor force participation, employment, unemployment, and type of occupation by highest level of educational attainment, sex, age, and race/ethnicity. Tables 384 and 385 provide income comparisons by education level and sex. Table 386 provides literacy scores for adults by education level, employment status, and demographic characteristics. Percentages of high school seniors with various characteristics who work different numbers of hours per week are shown in table 387.

Tables 388 and 389, compiled from U.S. Census Bureau data on high school completers and dropouts, show the labor force participation and college enrollment of high school students within the year after they leave school. The tabulations also provide comparative labor force participation and unemployment rates for high school completers and dropouts. Additional information on college enrollment rates by race/ethnicity and sex has been included to help form a more complete picture of high school outcomes. Table 390 provides data on college enrollment and employment among special education students who have left secondary school. Tables 391 to 394 were prepared from the Recent College Graduates and Baccalaureate and Beyond surveys by the National Center for Education Statistics (NCES). These tables provide data on employment outcomes and salaries for college graduates 1 year after graduation. Tables 395 to 397 deal with drug use and life values of high school seniors and young adults.

Statistics related to outcomes of education appear in other sections of the *Digest*. For example, statistics on educational attainment of the entire population are in chapter 1. More detailed data on the numbers of high school and college graduates are contained in chapters 2 and 3. Chapter 3 contains trend data on the percentage of high school completers going to college. Additional data on the income of people by educational attainment may be obtained from the U.S. Census Bureau in the *Current Population Reports*, Series P-60. The U.S. Bureau of Labor Statistics has a series of publications dealing with the educational characteristics of the labor force. Further information on survey methodologies is in Appendix A: Guide to Sources and in the publications cited in the table source notes.

Labor Force

Adults with higher levels of education generally had higher labor force participation rates than adults with less education (table 381 and figure 21). (People participating in the labor force are those employed or actively seeking employment.) Among people 25 to 64 years old, 86 percent of those with a bachelor's or higher degree participated in the labor force in 2007, compared with 76 percent of those who had completed only high school. In comparison, 64 percent of those ages 25 to 64 who had not completed high school were in the labor force. The 2007 labor force participation rate for those ages 25 to 64 who had completed only high school was higher for Whites (77 percent) and Hispanics (79 percent) than for Asians (74 percent) and Blacks (72 percent) (table 381). Among people ages 25 to 64 with a bachelor's or higher degree, the labor force participation rates for Whites, Blacks, and Hispanics (86 to 88 percent) were higher than the rate for Asians (82 percent).

Unemployment rates were generally higher for people with lower levels of educational attainment than for those with higher levels of educational attainment (table 382). (The unemployment rate is the percentage of people in the labor force who are not employed, but made specific efforts to find employment sometime during the prior 4 weeks.) The 2007 unemployment rate for adults (25 years old and over) who had not completed high school was 7.1 percent, compared with 4.4 percent for those who had completed high school and 2.0 percent for those with a bachelor's or higher degree (figure 22). Younger people tended to have higher unemployment rates than did people 25 years old and over (table 382).

The relative difficulties dropouts have in entering the job market are highlighted by comparing their labor force participation rates to those of other youth. Of the 2006–07 high school completers who were not in college in October 2007, 77 percent were in the labor force (employed or looking for work), and 20 percent of those in the labor force were looking for work (table 388). In comparison, 2006–07 high school dropouts participated in the labor force at a lower rate (56 percent) in October 2007 (table 389).

One year after graduating from college in 1999–2000, 87 percent of individuals receiving bachelor's degrees were employed (77 percent full time and 11 percent part time), 6 percent were unemployed, and 6 percent were not in the labor force (table 392).

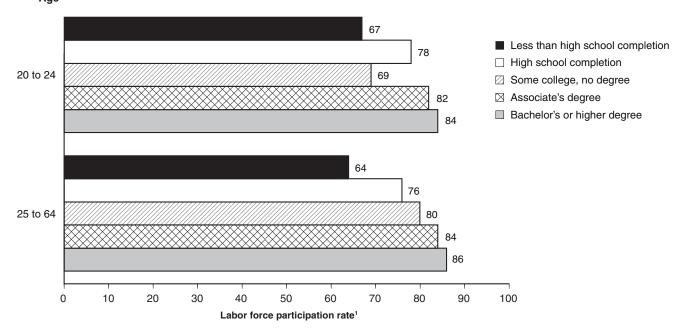

Income

Among full-time year-round workers 25 years old and over, the median annual income of males, when adjusted for inflation, increased between 1995 and 1999, but decreased between 1999 and 2007, resulting in a 2007 income that was similar to the 1995 income (table 384). The median annual income for females working full-time year-round rose between 1995 and 2001, and had no consistent trend

between 2001 and 2007, for a net increase of 7 percent for the entire period. Females' incomes remained lower than males' incomes overall, as well as by education level. For example, the median 2007 income for full-time year-round workers with a bachelor's degree was \$62,090 for males and \$45,770 for females. Among people 25 years old and over who had earnings in 2007, median annual earnings were lower for females than for males (\$29,540 vs. \$41,540) (table 385 and figure 24).

†Not applicable.

NOTE: The unemployment rate is the percentage of individuals in the labor force who are not working and who made specific efforts to find employment sometime during the prior 4 weeks. The labor force includes both employed and unemployed persons. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Labor, Bureau of Labor Statistics, Office of Employment and Unemployment Statistics, unpublished 2005, 2006, and 2007 annual average data from the Current Population Survey (CPS). (This table was prepared August 2008.)

[‡]Reporting standards not met.

¹Excludes persons enrolled in school.

⁻Not available.

Prose literacy refers to the knowledge and skills needed to search, comprehend, and use information from continuous texts. Adults at the Below Basic level, rated 0 to 209, range from being nonliterate in English to being able to locate easily identifiable information in short, commonplace prose texts. At the Basic level, rated 210 to 264, adults are able to read and understand information in short, commonplace prose texts. At the Intermediate level, rated 265 to 339, adults are able to read and understand moderately dense, less commonplace prose texts as well as summarize, make simple inferences, determine cause and effect, and recognize the author's purpose. At the Proficient level, rated 340 to 500, adults are able to read lengthy, complex, abstract prose texts as well as synthesize information and make complex inferences.

²Document literacy refers to the knowledge and skills needed to search, comprehend, and use information from noncontinuous texts in various formats. Adults at the Below Basic level, rated 0 to 204, range from being nonliterate in English to being able to locate easily identifiable information and follow instructions in simple documents (e.g., charts or forms). At the Basic level, rated 205 to 249, adults are able to read and understand information in simple documents. At the Intermediate level, rated 250 to 334, adults are able to locate information in dense, complex documents and make simple inferences about the information. At the Proficient level, rated 335 to 500, adults are able to integrate, synthesize, and analyze multiple pieces of information located in complex documents.

³Quantitative literacy refers to the knowledge and skills required to identify and perform computations, either alone or sequentially, using numbers embedded in printed materials. Adults at the Below Basic level, rated 0 to 234, range from being nonliterate in English to being able to locate numbers and use them to perform simple quantitative operations (primarily addition) when the mathematical information is very concrete and familiar. At the Basic level, rated 235 to 289, adults are able to locate easily identifiable quantitative information and use it to solve simple, one-step problems when the arithmetic operation is specified or easily inferred. At the Intermediate level, rated 290 to 349, adults are able to locate less familiar quantitative information and use it to solve problems when the arithmetic operation is not specified or easily inferred. At the Proficient level, rated 350 to 500, adults are able to locate more abstract quantitative information and use it to solve multistep problems when the arithmetic operations are not easily inferred and the problems are more complex.

NOTE: Adults are defined as people age 16 and older living in households or prisons. Adults who could not be interviewed due to language spoken or cognitive or mental disabilities (3 percent in 2003 and 4 percent in 1992) are excluded from this table. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

[†]Not applicable.

NOTE: Enrollment data are for October of given year. Data are based on sample surveys of the civilian noninstitutional population. Percentages are only shown when the base is 75,000 or greater. Even though the standard errors are large, smaller estimates are shown to permit users to combine categories in various ways. Totals include race categories or separately shown. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October 2005, 2006, and 2007. (This table was prepared August 2008.)

[‡]Reporting standards not met.

¹The labor force participation rate is the percentage of persons either employed or seeking employment.

²The labor force includes all employed persons plus those seeking employment. The unemployment rate is the percentage of persons in the labor force who are not working and who made specific efforts to find employment sometime during the prior 4 weeks.

³Includes 16- to 24-year-olds who completed high school between October of the previous year and October of the given year.

†Not applicable.

‡Reporting standards not met.

NOTE: Data are based on sample surveys of the civilian noninstitutional population. Includes dropouts from any grade, including a small number from elementary and middle schools. Percentages are only shown when the base is 75,000 or greater. Even though the standard errors are large, smaller estimates are shown to permit users to combine categories in various ways. Totals include race categories not separately shown. Race categories exclude persons of Hisparic ethnicity unless otherwise noted. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, selected years, 1980 through 2007. (This table was prepared August 2008.)

¹The labor force includes all employed persons plus those seeking employment. The labor force participation rate is the percentage of persons either employed or seeking employment. The unemployment rate is the percentage of persons in the labor force who are seeking employment. ²Persons 16 to 24 years old who dropped out of school in the 12-month period ending in October of years shown.

 $^{^{\}rm 3} Includes$ persons of Hispanic ethnicity.

⁻Not available.

Academies, deceased graduates, and graduates living at foreign addresses at the time of the survey. Standard errors appear in parentheses. Standard error values are not available for all years.

SOURCE: U.S. Department of Education, National Center for Education Statistics, "Recent College Graduates" surveys, 1976 through 1991; and 2000/01 Baccalaureate and Beyond Longitudinal Study (B&B:2000/01). (This table was prepared September 2003.)

Interpret data with caution.

[‡]Reporting standards not met.

¹Includes 2- and 4-year colleges, and vocational/technical schools.

²Competitively employed refers to those receiving more than minimum wage and working in an environment where the majority of workers are not disabled.

³Includes wages from noncompetitive jobs.

Living independently includes living alone, with a spouse or roommate, in a college dormitory, in Job Corps housing, or in military housing as a service member.

⁶Includes deaf and hard of hearing.

[†]Not applicable.

Includes those who have not finished all requirements for teaching certification or were previously qualified to teach.

²Includes computer sciences

NOTE: Data are from sample surveys of recent college graduates. Notes on methodology are included in the Guide to Sources. Data exclude bachelor's recipients from U.S. Service

Table 392. Percentage distribution of 1999–2000 bachelor's degree recipients 1 year after graduation, by field of study, time to completion, enrollment status, employment status, occupational area, job characteristics, and annual salaries: 2001

[†]Not applicable.

³Only includes respondents who completed a master's, doctor's, or first-professional degree. These graduates could also have left another graduate program without completing or be currently enrolled in another graduate program.

NOTE: Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1993/03 Baccalaureate and Beyond Longitudinal Study (B&B:93/03). (This table was prepared August 2006.)

[#]Rounds to zero.

¹Columns are not mutually exclusive; bachelor's degree recipients who are currently enrolled could have completed a prior graduate program.

²Includes completion of postbaccalaureate certificates.

[†]Not applicable.

¹Most educators work 9- to 10-month contracts.

²Reported salaries of full-time workers under \$2,600 in 1976, \$4,200 in 1981, \$5,000 in 1985, and \$1,000 in 1994 and 2001 were excluded from the tabulations. Also, those with salaries over \$500,000 in 1994 and 2001 were excluded.

NOTE: Marijuana includes hashish usage for 1996 and later years. Due to changes in the survey instrument and administration and to improve comparability with new data, estimates for 1982 through 1993 have been adjusted and may differ from those reported in previous years. Data for 1999 have been revised from previously published figures. Data for 1999 and later years were gathered

using Computer Assisted Interviewing (CAI) and may not be directly comparable to previous years. Standard errors appear in parentheses.

CHAPTER 6 International Comparisons of Education

This chapter offers a broad perspective on education across the nations of the world. It also provides an international context for examining the condition of education in the United States. Insights into the educational practices and outcomes of the United States are obtained by comparing them with those of other countries. The National Center for Education Statistics (NCES) carries out a variety of activities to provide statistical data for international comparisons of education.

This chapter presents data drawn from materials prepared by the United Nations Educational, Scientific, and Cultural Organization (UNESCO), the Organization for Economic Cooperation and Development (OECD), the International Association for the Evaluation of Educational Achievement (IEA), and the Institute of International Education (IIE). Basic summary data on enrollments, teachers, enrollment ratios, and finances were synthesized from information appearing in *Education at a Glance*, published by OECD. Even though OECD tabulations are very carefully prepared, international data users should be cautioned about the many problems of definition and reporting involved in the collection of data about the educational systems of the world (see the OECD entry in Appendix A: Guide to Sources).

This chapter also presents data from the Trends in International Mathematics and Science Study (TIMSS), carried out under the aegis of the IEA and supported by NCES and the National Science Foundation. This survey was formerly known as the Third International Mathematics and Science Study. TIMSS, conducted every 4 years, is an assessment of fourth- and eighth-graders in mathematics and science. In 1995, TIMSS collected data for both grade 4 and grade 8. In 1999, TIMSS collected data for grade 8 only. With the 2003 data collection, TIMSS offers the first international trend comparisons in mathematics and science at grades 4 and 8. In 2003, the United States and a number of other countries participated in data collection at one or both grade levels: 25 nations collected data on fourth-graders, and 45 nations collected data on eighth-graders. For 15 of these nations, including the United States, TIMSS offers comparisons of fourth-grade student achievement between 1995 and 2003. For 34 of these nations, including the United States, TIMSS also offers comparisons of eighth-grade student achievement between 2003 and at least one prior data collection year, either 1995 or 1999.

This chapter includes additional information on performance scores of 15-year-olds in the areas of reading, mathematics, and science literacy from the Program for International Student Assessment (PISA). PISA also measures general, or cross-curricular, competencies such as learning strategies. While this study focuses on OECD countries, data from some non-OECD countries are also provided.

The role that the United States plays in the world of higher education is illuminated by data on foreign students enrolled in U.S. institutions of higher education. The IIE provides estimates of the number of foreign students and their countries of origin.

Further information on survey methodologies is in Appendix A: Guide to Sources and in the publications cited in the table source notes.

Population

Among the reporting OECD countries in 2005, Mexico had the largest percentage of its population made up of young people ages 5 to 14 (21 percent), followed by Turkey (19 percent) (table 400). Countries with relatively small percentages of people in this age group included Italy, Japan, and Spain (all at 9 percent) and the Czech Republic, Germany, Greece, and Portugal (all at 10 percent). In the United States, the proportion of 5- to 14-year-olds was 14 percent, which was higher than in most of the other OECD countries.

Enrollments

In 2005, about 1.3 billion students were enrolled in schools around the world (table 398). Of these students, 693 million were in elementary-level programs, 511 million were in secondary programs, and 138 million were in postsecondary programs. Between 1990 and 2005, enrollment changes varied from region to region. Changes in elementary enrollment ranged from increases of 68 percent in Africa, 16 percent in Oceania, 15 percent in Asia, and 8 percent in Northern America (defined in UNESCO tabulations as including the United States, Canada, Greenland, Bermuda, St. Pierre, and Miquelon) to a 22 percent decrease in Europe and a 9 percent decrease in Central and South America (figure 26). Over the same period, enrollment increases at the secondary level outpaced increases at the elementary level. At the secondary level, enrollments increased by 164 percent in Central and South America, 97 percent in Africa, 86 percent in Oceania, 70 percent in Asia, 27 percent in Northern America, and 2 percent in Europe.

At the postsecondary level, developing areas of the world also had increases in enrollment between 1990 and 2005 (table 398 and figure 26). Postsecondary enrollment rose by 191 percent in Africa, 169 percent in Asia, 106 percent in Oceania, 114 percent in Central and South America, 68 percent in Europe, and 19 percent in Northern America (figure 26). These increases are due to both growth in the percentages of people attending postsecondary institutions and increases in the total populations in these regions.

In 2005, the reporting OECD countries with the highest proportions of 22- to 25-year-olds enrolled in postsecondary education were Finland (40 percent), followed by Denmark (34 percent), the Republic of Korea and Sweden (both at 32 percent), and Norway and Poland (both at 30 percent) (table 401). The United States' proportion of enrolled 22- to 25year-olds was 23 percent. Also in 2005, the reporting OECD countries with the highest proportions of 18- to 21-year-olds enrolled in postsecondary education were Greece and the Republic of Korea (both at 65 percent), followed by the United States (45 percent), and Flemish Belgium (43 percent). Postsecondary enrollment varied among countries due partially to differences in how postsecondary education is defined and the age at which postsecondary education begins. For example, programs classified as postsecondary education in some countries may be classified as long-duration secondary education in other countries.

In 2006–07, there were about 583,000 foreign students studying at U.S. colleges and universities (table 420). Fiftynine percent of these students were from Asian countries. Between 1990 and 2006, the proportion of students at U.S. colleges who were nonresident aliens rose from 2.8 to 3.4 percent (table 226).

Achievement

On the 2003 TIMSS assessment, U.S. fourth-grade students scored 518, on average, in mathematics, exceeding the international average of 495 for the 25 participating educational systems (table 406). (Average scale scores from the TIMSS assessment are based on a range of possible scores from 0 to 1,000. Most participating educational systems represent countries; however, some represent subnational entities with separate educational systems, such as Hong Kong, SAR.¹) U.S. fourth-graders were outperformed by their peers in 11 educational systems, including 4 Asian educational systems (Chinese Taipei; Hong Kong, SAR; Japan; and Singapore) and 7 European educational systems (Flemish Belgium, England, Hungary, Latvia, Lithuania, the Netherlands, and the Russian Federation). On the other hand, U.S. fourth-graders outscored students in 13 educational systems. In 2003, U.S. eighth-grade students scored 504 in mathematics, on average, exceeding the international average of 467 for the 45 participating educational systems (table 407). U.S. eighth-graders were outperformed by their peers in 9 educational systems, including 5 Asian educational systems (Chinese Taipei; Hong Kong, SAR; Japan; the Republic of Korea; and Singapore) and 4 European educational systems (Flemish Belgium, Estonia, Hungary, and the Netherlands). On the other hand, U.S. eighth-graders outscored students in 25 educational systems.

On the 2006 PISA, the average score of U.S. 15-year-olds in mathematics literacy was 474, which was lower than the OECD average of 498 (table 403). (Possible scores on PISA assessments range from 0 to 1,000.) The average mathematics literacy score in the United States was lower than the average score in 23 of the other 29 OECD countries for which comparable PISA results were reported, higher than the average score in 4 of the other OECD countries, and not measurably different from the average score in 2 of the OECD countries. Comparable mathematics literacy results were also reported for 27 non-OECD jurisdictions, 8 of which had higher average scores than did the United States. In science literacy, the average score of 15-year-olds in the United States was lower than the average score in 16 of the other 29 OECD countries, higher than the average score in 5 of the other OECD countries, and not measurably different from the average score in 8 of the OECD countries. In 6 of the 27 non-OECD jurisdictions, the science literacy scores of 15-year-olds were higher than the average score in the United States. PISA 2006 reading literacy results were not reported for the United States because of an error in printing the test booklets (for more information, please refer to footnote 3 on table 403 and to the PISA publication cited in the table's source note).

Degrees

In OECD countries, ratios of bachelor's degrees conferred per 100 people at the typical age of graduation in 2005 ranged from 11 in Turkey and 15 in Mexico to 56 in Iceland and 60 in Australia (table 415 and figure 27). The ratio for the United States was 34 degrees per 100 people. In 2005, women had higher bachelor's degree ratios than men in 25 of the 28 OECD countries reporting data.

The percentages of undergraduate degrees awarded in mathematics and science fields—including natural sciences, mathematics and computer science, and engineering-varied across the 28 reporting OECD countries in 2005 (table 416). Three of the reporting OECD countries awarded at least 30 percent of their undergraduate degrees in mathematics and science fields: the Republic of Korea (37 percent), Germany (31 percent), and Finland (30 percent). Four of the countries awarded 15 percent or less of their undergraduate degrees in these fields: Hungary (11 percent), Iceland (14 percent), Norway (14 percent), and the Netherlands (15 percent). In 2005, the United States awarded 17 percent of its undergraduate degrees in mathematics and science fields, a lower percentage than most other reporting countries. The percentages of graduate degrees awarded in mathematics and science fields also ranged widely across countries in

¹ Hong Kong, SAR is a Special Administrative Region (SAR) of the People's Republic of China.

2005 (table 417). Nine of the reporting OECD countries awarded at least 30 percent of their graduate degrees in mathematics and science fields: the Republic of Korea (44 percent), Greece (43 percent), Austria (39 percent), Spain (38 percent), the Slovak Republic (37 percent), Portugal (34 percent), Switzerland (32 percent), Germany (31 percent), and Finland (30 percent). Four OECD countries awarded 15 percent or less of their graduate degrees in mathematics and science fields: Hungary (6 percent), Poland (9 percent), the United States (13 percent), and Mexico (15 percent).

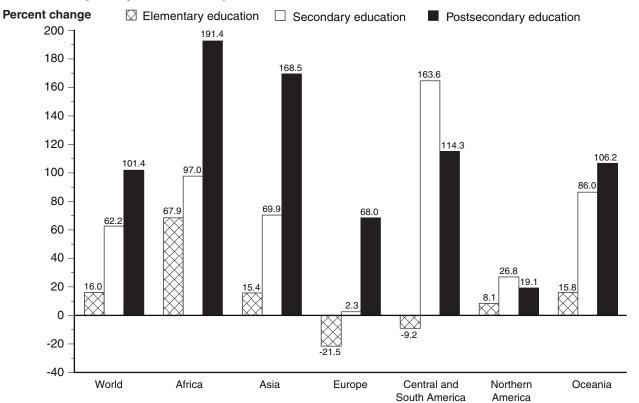

Finances

In 2005, per student expenditures at the elementary level of education were at least \$7,500 in eight OECD countries (table 418). Specifically, Luxembourg spent \$14,100 per student at the elementary level, Iceland \$9,300, the United States \$9,200, Norway \$9,000, Denmark \$8,500, Switzerland \$8,500, Austria \$8,300, and Sweden \$7,500. At the secondary level, six countries had expenditures of over \$9,000 per student: Luxembourg (\$18,800), Switzerland (\$12,900),

Norway (\$11,000), the United States (\$10,400), Austria (\$9,800), and Denmark (\$9,400). At the higher education level, the following seven countries had expenditures of at least \$14,000 per student in 2005: the United States (\$24,400), Switzerland (\$21,700), Sweden (\$15,900), Norway (\$15,600), Denmark (\$15,000), Austria (\$14,800), and Australia (\$14,600). These expenditures were adjusted to U.S. dollars using the purchasing-power-parity (PPP) index. This index is considered more stable and comparable than indexes using currency exchange rates.

A comparison of public direct expenditures on education as a percentage of gross domestic product (GDP) in reporting OECD countries shows that national investment in education in 2005 ranged from 3.4 percent in Japan and 3.7 percent in the Slovak Republic to 6.8 percent in Denmark and 7.2 percent in Iceland (table 419 and figure 28). Among reporting OECD countries, the average public investment in education in 2005 was 5.0 percent of GDP. In the United States, the public expenditure on education as a percentage of GDP was 4.8 percent.

Figure 26. Percentage change in enrollment, by selected areas of the world and level of education: 1990 to 2005

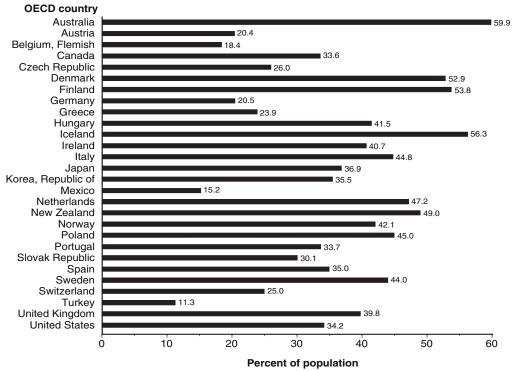

Area of the world

NOTE: Northern America includes Bermuda, Canada, Greenland, St. Pierre and Miquelon, and the United States of America. Hawaii is included in Northern America rather than Oceania. Central and South America includes Latin America and the Caribbean. Oceania includes American Samoa, Australia, Cook Islands, Fiji, French Polynesia, Guam, Kiribati, Marshall Islands, Nauru, New Caledonia, New Zealand, Niue, Norfolk Island, Pacific Islands, Papua New Guinea, Samoa, Solomon Islands, Tokelau, Tonga, Tuvalu, and the Republic of Vanuatu. Data include imputed values for nonrespondent countries.

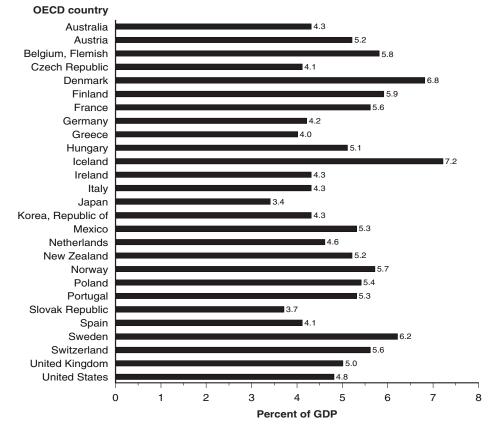

SOURCE: United Nations Educational, Scientific, and Cultural Organization (UNESCO), Statistical Yearbook, 1999, and unpublished tabulations.

Figure 27. Bachelor's degree recipients as a percentage of the population of the typical ages of graduation, by country: 2005

NOTE: Includes graduates of any age. Includes all OECD countries for which comparable data are available. SOURCE: Organization for Economic Cooperation and Development (OECD), Education Online Database.

Figure 28. Public direct expenditures for education as a percentage of the gross domestic product (GDP), by country: 2005

NOTE: Includes all OECD countries for which comparable data are available. Includes all government expenditures for education institutions, plus public subsidies to households for living costs that are not spent at education institutions.

SOURCE: Organization for Economic Cooperation and Development (OECD), Education at a Glance, 2008.

[‡]Reporting standards not met.

⁹Second-level enrollment includes general education, teacher training (at the second level), and technical and vocational education. This level generally corresponds to secondary education in the United States, grades 7–12.

NOTE: Detail may not sum to totals because of rounding. Public expenditure data not available for 1995, 2000, and 2005. Data in this table include imputed values for nonrespondent countries. SOURCE: United Nations Educational, Scientific, and Cultural Organization (UNESCO), Statistical Yearbook, 1999, and unpublished tabulations. (This table was prepared July 2008.)

¹Enrollment and teacher data exclude the Democratic People's Republic of Korea.

²Excludes Rodrigues and other small islands.

³Includes five countries of the former Union of Soviet Socialist Republics (U.S.S.R.), Arab states, and both the Asian and the European portions of Turkey.

⁴Includes all countries of the former U.S.S.R. except Kazakhstan, Uzbekistan, Kyrgyzstan, Tajikistan, and Turkmenistan.

⁵Northern America includes Bermuda, Canada, Greenland, St. Pierre and Miquelon, and the United States of America. Hawaii is included in Northern America rather than in Oceania. Central and South America includes Latin America and the Caribbean.

elincludes American Samoa, Australia, Cook Islands, Fiji, French Polynesia, Guam, Kiribati, Marshall Islands, Nauru, New Caledonia, New Zealand, Niue, Norfolk Island, Pacific Islands, Papua New Guinea, Samoa, Solomon Islands, Tokelau, Tonga, Tuvalu, and the Republic of Vanuatu. 7Estimate of midyear population.

⁸First-level enrollment generally consists of elementary school, grades 1–6.

¹⁰Third-level enrollment includes college and university enrollment, and technical and vocational education beyond the high school level. There is considerable variation in reporting from country to country.

¹¹This figure is for Europe, not including the former U.S.S.R.

¹²Estimated.

¹³Estimated by the UNESCO Institute for Statistics.

¹⁴Includes estimates for major areas of the world not separately shown.

-Not available.

#Rounds to zero.

¹Selection based on total population for midyear 2006.

²First-level enrollment consists of elementary school, typically corresponding to grades 1–6 in the United States.

³Second-level enrollment includes general education, teacher training (at the second level), and technical and vocational education.

This level generally corresponds to secondary education in the United States, grades 7–12.

⁴Third-level enrollment includes college and university enrollment, and technical and vocational education beyond the high school level. There is considerable variation in reporting from country to country.

⁵Data represent the total enrollment of all ages in the school level divided by the population of the specific age groups that correspond to the school level. Adjustments have been made for the varying lengths of first and second level programs. Ratios may exceed 100 because some countries have many students from outside the normal age range.

⁶Enrollment totals and ratios exclude Democratic People's Republic of Korea, Data do not include adult education or special education provided outside regular schools.

7World total data for 2004-05.

⁸Estimated by the UNESCO Institute for Statistics.

⁹Classification or data coverage of levels has been revised. Data by level may not be comparable over time.

10Data for 1994-95.

¹¹Policy change in 2000–01: introduction of free universal primary education.

12Data for 1991-92.

13Excludes private institutions.

¹⁴Data refer to universities and exclude Al Azhar.

15 Excludes nonuniversity institutions (such as teacher training colleges and technical colleges) and excludes distance-learning universities.

¹⁶General education enrollment only. Excludes teacher training and vocational education enrollments.

17Data for 1992-93.

18Data for 1993-94.

¹⁹Not including the former Independent States of Transke, Bophuthatswana, Venda, and Ciskei.

²¹Data refer to government aided and maintained schools only.

²²Data for 1985-86.

²³Includes preprimary education.

²⁴National estimation.

²⁵Excludes some nonuniversity institutions.

²⁶Includes full-time students only.

²⁷Data include both former East and West Germany.

²⁸Including vocational education.

²⁹Not including former ISCED level 7.

30Data do not include Vocational Education and Training Institutes (VETS).

NOTE: Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. ⁻Not available.

NOTE: Data refer to programs classified by the Organization for Economic Cooperation and Development (OECD) as International Standard Classification of Education (ISCED) level 3, level 5A (first and second award), level 5B, and level 6. ISCED level 3 corresponds to secondary education in the United States. ISCED levels 5A (first and second award), 5B, and 6 together make up total tertiary education, which corresponds to 2-year and 4-year college undergraduate and graduate programs in the United States. Includes both full-time and part-

time students. Some increases in enrollment rates may be due to more complete reporting by countries. Enrollment figures may not be directly comparable due to differing definitions of post-secondary (tertiary) education and the age at which it begins. Differences in reference dates between enrollment and population data can result in enrollment rates that exceed 100 percent. Some data have been revised from previously published figures.

⁻Not available.

[†]Not applicable.

¹Public schools only.

²Includes junior high school data. ³Includes only general programs.

⁴Includes preprimary data.

⁵Includes postsecondary non-higher-education.

⁶Country did not exist in its current form in the given year.

⁷Includes elementary school data.

⁹Includes tertiary type B education (i.e., occupation-specific education corresponding to that offered at the associate's degree level in the United States).

⁹Excludes independent private institutions.

¹⁰Data for 1985 are for the former West Germany.

¹¹Excludes general programs in upper secondary education.

NOTE: In the U.S. data in this table, elementary corresponds to grades 1 through 6, junior high school corresponds to grades 7 through 9, and senior high school corresponds to grades 10 through 12.

⁻Not available.

fact, the necessary passage appeared on the previous page. Because of the small number of items used in assessing reading literacy, it was not possible to recalibrate the score to exclude the affected items. Also, as a result of the printing error, the mean performance in mathematics and science may be misestimated by approximately 1 score point. The impact is below one standard error.

NOTE: Possible scores range from 0 to 1,000. Standard errors appear in parentheses. SOURCE: Organization for Economic Cooperation and Development (OECD), Program for International Student Assessment (PISA), 2006, *PISA 2006 Science Competencies for* Tomorrow's World. (This table was prepared July 2008.)

[†]Not applicable.

Illustrates how a country compares with the OECD area as a whole. Computed taking the OECD countries as a single entity, to which each country contributes in proportion to the number of 15-year-olds enrolled in its schools.

²Refers to the mean of the data values for all OECD countries, to which each country contributes equally, regardless of the absolute size of the student population of each country.
PISA 2006 reading literacy results are not reported for the United States because of an error in printing the test booklets. In several areas of the reading literacy assessment, students were incorrectly instructed to refer to the passage on the "opposite page" when, in

Table 404. Mean scores and percentage distribution of 15-year-olds scoring at each mathematics literacy proficiency level, by country: 2006

†Not applicable

¹Level 1: Able to answer questions involving familiar contexts where all relevant information is present and the questions are clearly defined. Level 2: Able to interpret and recognize situations in contexts that require no more than direct inference, extract relevant information from a single source, and employ direct reasoning for literal interpretations of results. Level 3: Able to execute clearly described procedures, interpret and use representations based on different information sources, and develop short communications reporting their interpretations, results, and reasoning. Level 4: Able to work effectively with explicit models for complex concrete situations that may involve constraints or call for making assumptions, select and integrate different representations, reason with some insight, and construct and communicate explanations and arguments based on their interpretations and actions. Level 5: Able to develop and work with models for complex situations, work strategically using broad, well-developed thinking and reasoning skills, and communicate their interpretations and reasoning. Level 6: Able to conceptualize, generalize, and utilize information, link different information sources and representations, and formulate and precisely communicate

actions and reflections regarding findings and interpretations.

*Illustrates how a country compares with the OECD area as a whole. Computed by taking the OECD countries as a single entity to which each country contributes in proportion to the

number of 15-year-olds enrolled in its schools.

Refers to the mean of the data values for all OECD countries, to which each country contributes equally, regardless of the absolute size of the student population of each country.

*As a result of a printing error, the mean performance in mathematics may be misestimated by approximately 1 score point. The impact is below one standard error.

NOTE: Possible scores range from 0 to 1,000. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.

¹Level 1: Able to present scientific explanations that are obvious and that follow explicitly from given evidence. Level 2: Able to provide possible explanations in familiar contexts, draw conclusions based on simple investigations, and make literal interpretations of the results of scientific inquiry or technological problem solving. Level 3: Able to select facts to explain phenomena and apply simple models or inquiry strategies, develop short statements using facts, and make decisions based on scientific knowledge. Level 4: Able to select and integrate explanations from different disciplines of science or technology, link those explanations directly to aspects of life situations, and communicate decisions using scientific knowledge and evidence. Level 5: Able to apply scientific concepts and knowledge to many complex life situations, select and evaluate appropriate scientific evidence, bring critical insights to situations, and construct explanations based on evidence and arguments based on critical analysis. Level 6: Able to consistently explain and apply scientific knowledge in a variety of complex life situations, use evidence from different sources to justify decisions, clearly and consistently demonstrate advanced scientific thinking and reasoning, and develop arguments in support of recommendations and decisions that center on personal, social, or global situations.

Illustrates how a country compares with the OECD area as a whole. Computed by taking the OECD countries as a single entity to which each country contributes in proportion to the number of 15-year-olds enrolled in its schools.

Refers to the mean of the data values for all OECD countries, to which each country contributes equally, regardless of the absolute size of the student population of each country.

⁴As a result of a printing error, the mean performance in science may be misestimated by

approximately 1 score point. The impact is below one standard error.

NOTE: Possible scores range from 0 to 1,000. Standard errors appear in parentheses.

Detail may not sum to totals because of rounding.

[†]Not applicable.

NOTE: TMH index data are provided by students. Data are for fourth-grade students or equivalent in most countries. Possible scores range from 0 to 1,000. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. SOURCE: International Association for the Evaluation of Educational Achievement (IEA), Trends in International Mathematics and Science Study (TIMSS), 2003, TIMSS 2003 International Mathematics Report, by Ina V.S. Mullis et al. (This table was prepared March 2005.)

[‡]Reporting standards not met.

¹Topic includes whole numbers; fractions and decimals; integers; and ratio, proportion, and percent.

 $^{^2\}mbox{Topic}$ includes patterns, equations and formulas, and relationships.

³Topic includes attributes and units and tools, techniques, and formulas.

⁴Topic includes lines and angles, two- and three-dimensional shapes, congruence and similarity, locations and spatial relationships, and symmetry and transformations.

⁵Topic includes data collection and organization, data representation, and data interpretation.

⁶High level indicates more than 30 minutes of mathematics homework assigned 3–4 times a week.

⁷Medium level includes all possible combinations of responses not included in the high or low level categories (see below for details on the low level).

⁸Low level indicates no more than 30 minutes of mathematics homework assigned no more than twice a week.

⁹Response rate for the TMH index was at least 70 but less than 85 percent of the students, with missing data having not been explicitly accounted for in the analysis.

¹⁰Met international guidelines for participation rates only after replacement schools were included.

¹¹SAR = Special Administrative Region.

¹²National Desired Population does not cover all of the International Desired Population.

¹³Response rate for the TMH index was at least 50 but less than 70 percent of the students, with missing data having not been explicitly accounted for in the analysis.

¹⁴Students had received 4 years of formal schooling, but first grade is called "First grade/preschool."

[†]Not applicable.

NOTE: TMH index data are provided by students. Data are for eighth grade or equivalent in most countries. Possible scores range from 0 to 1,000. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.

SOURCE: International Association for the Evaluation of Educational Achievement (IEA), Trends in International Mathematics and Science Study (TIMSS), 2003, TIMSS 2003 International Mathematics Report, by Ina V.S. Mullis et al. (This table was prepared April 2005.)

[‡]Reporting standards not met.

¹Topic includes whole numbers; fractions and decimals; integers; and ratio, proportion, and percent.

²Topic includes patterns, algebraic expressions, equations and formulas, and relationships.

³Topic includes attributes and units and tools, techniques, and formulas.

⁴Topic includes lines and angles, two- and three-dimensional shapes, congruence and similarity, locations and spatial relationships, and symmetry and transformations.

⁵Topic includes data collection and organization, data representation, data interpretation, and uncertainty and probability.

⁶High level indicates more than 30 minutes of mathematics homework assigned 3–4 times a week.

⁷Medium level includes all possible combinations of responses not included in the high or low level categories (see below for details on the low level).

 $^{^{8}}$ Low level indicates no more than 30 minutes of mathematics homework assigned no more than twice a week.

⁹The international average of 467 may sometimes appear as 466. In that case, the TIMSS 2003 average for eighth-graders published in the National Center for Education Statistics report reflects the deletion of England from the average.

¹⁰Did not satisfy guidelines for sample participation rates.

¹¹Met quidelines for sample participation rates only after replacement schools were included.

¹²SAR = Special Administrative Region.

¹³National Desired Population does not cover all of International Desired Population.

¹⁴National Defined Population covers less than 90 percent of National Desired Population.

¹⁵Korea tested the same cohort of students as other countries, but later in 2003, at the beginning of the next school year.

¹⁶Nearly satisfied guidelines for sample participation rates only after replacement schools were included.

¹⁷Response rate for the TMH index was at least 70 but less than 85 percent of the students, with missing data having not been explicitly accounted for in the analysis.

[†]Not applicable.

⁸Class size data available for at least 50 but less than 70 percent of students, with missing data having not been explicitly accounted for in the analysis.

¹⁵Nearly satisfied guidelines for sample participation rates only after replacement schools were included.

NOTE: Background data provided by teachers. Data are for eighth grade or equivalent in most countries. Possible scores range from 0 to 1,000. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: International Association for the Evaluation of Educational Achievement (IEA), Trends in International Mathematics and Science Study (TIMSS), 2003, *TIMSS 2003 International Mathematics Report*, by Ina V.S. Mullis et al. (This table was prepared April 2005.)

[#]Rounds to zero.

[‡]Reporting standards not met.

¹Index based on teachers' responses to two questions about how often they usually assign mathematics homework and how many minutes of mathematics homework they usually assign.

²High EMH indicates the assignment of more than 30 minutes of homework in about half of the lessons or more.

³Medium level includes all possible combinations of responses not included in the high or low level categories (see below for details on the low level).

⁴Low level indicates no assignment or the assignment of less than 30 minutes of homework in about half the lessons or less.

⁵Class size data available for at least 70 but less than 85 percent of students, with missing data having not been explicitly accounted for in the analysis.

⁶EMH data available for at least 70 but less than 85 percent of students, with missing data having not been explicitly accounted for in the analysis.

⁷Did not satisfy guidelines for sample participation rates.

⁹Met guidelines for sample participation rates only after replacement schools were included.

¹⁰SAR = Special Administrative Region.

¹¹National Desired Population does not cover all of International Desired Population.

¹²National Defined Population covers less than 90 percent of National Desired Population.

¹³Korea tested the same cohort of students as other countries, but later in 2003, at the beginning of the next school year.

¹⁴EMH data available for at least 50 but less than 70 percent of students, with missing data having not been explicitly accounted for in the analysis.

[‡]Reporting standards not met.

^{&#}x27;Index based on students' responses to four statements about mathematics: 1) I usually do well in mathematics; 2) Mathematics is more difficult for me than for many of my classmates (reverse scored); 3) Mathematics is not one of my strengths (reverse scored); 4) I learn things quickly in mathematics. Average is computed across the four items based on a 4-point scale: 1. Agree a lot; 2. Agree a little; 3. Disagree a lot. Students showing positive attitudes a little or a lot of the time across the four statements were assigned to the high level. Students showing negative attitudes a little or a lot of the time across the four statements were assigned to the low level. Students showing mixed attitudes across the four statements were assigned to the low level. Students showing mixed attitudes across the four statements were assigned to the middle level.

²Number of hours based on: No time = 0; Less than 1 hour = 0.5; 1–2 hours = 1.5; More than 2, but less than 4 hours = 3; 4 or more hours = 4.5. Activities are not necessarily exclusive; students may have reported engaging in more than one activity at the same time.

³Did not satisfy guidelines for sample participation rates.

⁴SAR = Special Administrative Region.

⁵Korea tested the same cohort of students as other countries, but later in 2003, at the beginning of the next school year.

NOTE: Data are for eighth grade or equivalent in most countries. Possible scores range from 0 to 1,000. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

⁻Not available.

NOTE: Data are for eighth grade or equivalent in most countries. Possible scores range from 0 to 1,000. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: International Association for the Evaluation of Educational Achievement (IEA), Trends in International Mathematics and Science Study (TIMSS), 2003, TIMSS 2003 International Science Report, by Michael O. Martin et al. (This table was prepared October 2005.)

[†]Not applicable.

[‡]Reporting standards not met.

¹Index based on students' reports on the frequency and amount of science homework they are given. High level indicates more than 30 minutes of science homework assigned 3-4 times a week. Low level indicates no more than 30 minutes of science homework no more than twice a week. Medium level includes all other possible combinations of responses.

²Country average significantly lower than international average.

³Country average significantly higher than international average.

⁴Students were asked about natural science; data pertain to grade 8 physics/chemistry course.

⁵Did not satisfy guidelines for sample participation rates.

⁶SAR = Special Administrative Region.

⁷Met guidelines for sample participation rates only after replacement schools were included.

⁸National Desired Population does not cover all of International Desired Population.

⁹National Defined Population covers less than 90 percent of National Desired Population.

¹⁰Korea tested the same cohort of students as other countries, but later in 2003, at the beginning of the next school year.

¹¹Nearly satisfied guidelines for sample participation rates only after replacement schools were included.

¹²Students study only biology at grade 8.

⁻Not available.

NOTE: Data are for eighth grade or equivalent in most countries. Standard errors appear in parentheses. Detail may not sum to totals because of rounding.

SOURCE: International Association for the Evaluation of Educational Achievement (IEA), Trends in International Mathematics and Science Study (TIMSS) 2003, *TIMSS 2003 International Science Report*, by Michael O. Martin et al. (This table was prepared April 2005.)

[†]Not applicable.

[‡]Reporting standards not met.

 $^{^{\}rm 1}\textsc{Data}$ are available for at least 50 but less than 70 percent of the students.

²Data are available for at least 70 but less than 85 percent of the students.

³Students in Chinese Taipei were asked about natural science; data pertain to grade 8 physics/chemistry course.

⁴Data reported in physics column are for grade 8 physics/chemistry.

⁵SAR = Special Administrative Region.

⁶Data reported in biology column are for grade 8 biology/earth science.

⁷Students study only biology at grade 8.

⁻Not available.

¹Typical age of graduation data not available. Estimates calculated using the age range 22–23. NOTE: Data in this table refer to degrees classified by the Organization for Economic Cooperation and Development (OECD) as International Standard Classification of Education (ISCED) level 5A, first award. This level corresponds to the bachelor's degree in the United States. The recipients per 100 persons ratio relates the number of people of all ages earning bachelor's degrees in a particular year to the number of people in the population at the typical age of graduation. The typical age is based on full-time attendance and normal progression through the education.

cation system (without repeating a year, taking a year off, etc.); this age varies across countries because of differences in their education systems and differences in program duration. Data for Luxembourg are not shown because tertiary students study for only 1 year in Luxembourg. Some data have been revised from previously published figures.

NOTE: Data in this table refer to degrees classified by the Organization for Economic Cooperation and Development (OECD) as International Standard Classification of Education (ISCED) level 5A, first award. This level corresponds to the bachelor's degree in the United States. Data for Luxembourg are not shown because tertiary students study for only 1 year in Luxembourg. Some data have been revised from previously published figures.

NOTE: Data in this table refer to degrees classified by the Organization for Economic Cooperation and Development (OECD) as International Standard Classification of Education (ISCED) level 5A, second award, and as ISCED 6. ISCED 5A, second award, corresponds to master's and first-professional degrees in the United States, and ISCED 6 corresponds to doctor's degrees. Data for Luxembourg are not shown because tertiary students study for only 1 year in Luxembourg. Some data have been revised from previously published figures.

NOTE: Direct public expenditure on educational services includes both amounts spent directly by governments to hire educational personnel and to procure other resources, and amounts provided by governments to public or private institutions, or households. Figures for 1985 also include transfers and payments to private entities, and thus are not strictly comparable with later figures. Some data have been revised from previously published figures.

SOURCE: Organization for Economic Cooperation and Development (OECD), Education Online Database; Annual National Accounts, Vol. 1, 1997; and Education at a Glance, 2006 through 2008. (This table was prepared August 2008.)

¹Includes public subsidies to households attributable for educational institutions and direct expenditure on educational institutions from international sources, except where noted.

²Public subsidies to households not included in public expenditure.

³Direct expenditure on education institutions from international sources exceeds 1.5 percent of all public expenditure.

 $^{^4\}mbox{Postsecondary}$ non-higher-education included in higher education.

⁵Country did not exist in its current form in the given year.

⁶Postsecondary non-higher-education included in both secondary and higher education.

⁷Data for 1985 are for the former West Germany.

⁸Preprimary education (for children age 3 and older) is included in primary and secondary education.

⁹Occupation-specific education corresponding to that offered at the associate's degree level in the United States is included in primary and secondary education.

[#]Rounds to zero.

¹Cyprus (not shown separately) and Turkey were classified as being in the Middle East prior to 2004–05, but in Europe for 2004–05 and later years.

²Data for 1980–81 and 1985–86 are for West Germany (Federal Republic of Germany before unification).

³Excludes Mexico and Central America, which are included with Latin America.

⁴Home country unknown or undeclared.

CHAPTER 7

Libraries and Educational Technology

This chapter contains statistics on libraries and the use of information technologies. These data show the extent of America's public access to information technologies outside of formal classroom activities. The data also provide a capsule description of the magnitude and availability of library resources.

The first section of the chapter (tables 421 to 426) deals with public libraries, public and private school libraries, and college and university libraries. It contains data on collections, population served, staff, and expenditures. Table 425 provides institutional-level information for the 60 largest college libraries in the country.

The second part of the chapter (tables 427 to 432) provides information on the availability and use of technology at school, home, and work. For example, the percentage of children using computers at school is shown over time. Also included are data on the use of home computers and the Internet by adults and school children, with comparisons among various demographic groups.

Related data may be found in other chapters of the *Digest*. For example, statistics on the number of degrees conferred in computer and information sciences and library sciences are in chapter 3. Further information on survey methodologies is in Appendix A: Guide to Sources and in the publications cited in the table source notes.

Libraries

The average number of library staff per school with a library was 1.8 at public schools in 2003–04 and 1.2 at private schools in 1999–2000 (table 421). On average, public school libraries had smaller numbers of books on a per student basis (1,803 per 100 students) than private school libraries (2,857 per 100 students) in 1999–2000. The number of books on a per student basis in public school libraries in 2003–04 (1,891 per 100 students) was not measurably different from the number in 1999–2000. In 2003–04, public elementary school libraries had larger holdings than public secondary school libraries on a per student basis (2,127 books per 100 students, compared to 1,376 books per 100 students).

Between 1991–92 and 1999–2000, the increase in college library operating expenditures was greater than the increase in enrollment; after adjustment for inflation, library operating expenditures per full-time-equivalent (FTE) student rose 6 percent during this period (table 424). Between 1999–2000

and 2005–06, library operating expenditures per FTE student dropped 12 percent. Overall, there was a net decrease of 7 percent in library operating expenditures per FTE student between 1991–92 and 2005–06. In 2005–06, the average library operating expenditure per FTE student was \$472.

In 2005, there were 9,198 public libraries in the United States with a total of 816 million books and serial volumes. The annual number of visits per capita was 4.7, and the annual reference transactions per capita were 1.1 (table 426).

Computers and Technology

In 2005, the average public school contained 154 instructional computers (table 427). One important technological advance that has come to classrooms following the introduction of computers has been connections to the Internet. The percentage of instructional rooms with internet access increased from 51 percent in 1998 to 94 percent in 2005 (figure 29). Nearly all schools had access to the Internet in 2005 (table 427).

The increasing number of computers in schools has coincided with rising percentages of students using computers (table 431). The percentage of elementary and secondary school students using computers at school rose from 70 percent in 1997 to 83 percent in 2003. In 2003, the use of computers at school by elementary and secondary school students varied by age and family income. Among students in elementary and secondary schools, a higher percentage of those age 10 or older than of those younger than 10 used computers at school. In general, a greater percentage of elementary and secondary school students from higher income families than of students from lower income families used computers at school. For example, in 2003, 80 percent of students from families with incomes of \$20,000 to \$24,999 used computers at school, compared to 86 percent of students from families with incomes of \$75,000 or more.

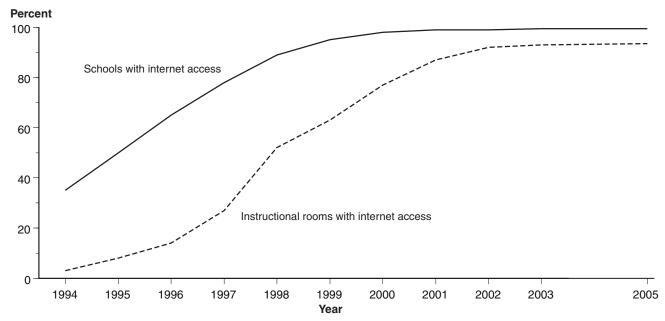

A majority of students in 2003 used computers at home (table 431). In 2003, 68 percent of elementary and secondary school students used computers at home, compared to 43 percent in 1997. Between 1997 and 2003, the percentage of students using computers at home for school work rose from 25 to 47 percent. In 2003, a higher percentage of females than males used computers at home for school work (49 vs. 46 percent). About 54 percent of White elementary and secondary school students used computers at home for school

work in 2003, compared to 35 percent of Black students and 34 percent of Hispanic students. A greater percentage of students from higher income families than of students from lower families reported using computers at home for school work. For instance, 63 percent of students from families with incomes of \$75,000 or more used a computer at home for school work, compared to 32 percent of students from families with incomes of \$20,000 to \$24,999.

The percentage of college students using computers at school rose from 63 percent in 1997 to 85 percent in 2003. About 76 percent used computers at home for school work in 2003 (table 431).

Computers are widely used in the workplace. In 2003, 56 percent of all workers used computers at work (table 432). More frequent use of computers at work was associated with higher levels of education and higher incomes. For example, 16 percent of high school dropouts and 40 percent of high school graduates used computers at work, compared to 82 to 87 percent of workers with bachelor's, master's, first-professional, or doctor's degrees. Among the common computer applications used by all employees using computers on the job were Internet and e-mail (75 percent), word processing/desktop publishing (68 percent), spreadsheets/databases (64 percent), and calendar/schedule (57 percent).

Figure 29. Percentage of all public schools and instructional rooms with internet access: Various years, fall 1994 through fall 2005

[—]Not available.

¹²Includes furniture/equipment, computer hardware/software, and utilities/networks/consortia as well as expenditures classified as "other library operating expenditures"

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. (See Guide to Sources for details.) Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Library Statistics of Colleges and Universities, selected years, 1976-77 through 1984-85; 1987-88 through 2005-06 Integrated Postsecondary Education Data System, "Academic Libraries Survey" (IPEDS-L:88-98), "Fall Enrollment Survey" (IPEDS-EF:87-99), and Spring 2002 through Spring 2006; Academic Libraries Survey (ALS), 2000 through 2006; and Academic Libraries: 2006 (NCES 2008-337). (This table was prepared July 2008.)

¹Includes data for U.S. territories.

²Fall enrollment for the academic year specified. ³Includes data for schools newly added to the survey system, so end of year figure for 1997-98 exceeds total of volumes added during the year plus end of year value from 1996-97.

Includes microform and electronic serials.

⁵Electronic files, formerly labeled "Computer files."

⁶Excludes student assistants

⁷Excludes capital outlay.

⁸Includes salary equivalents of contributed services staff.

⁹Expenditures for fringe benefits included under salaries (except for 1984-85, 1987-88, and 1999-2000).

¹⁰Hourly wages included under salaries (except for 1976–77 and 1981–82).

¹¹Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

¹The total number of persons entering the library for any purpose during the year.

NOTE: Data include imputations for nonresponse. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Public Libraries Survey (PLS), fiscal year 2005, *Public Libraries in the United States: Fiscal Year 2004*. (This table was prepared May 2008.)

²A reference transaction is an information contact that involves the knowledge, use, recommendations, interpretation, or instructions in the use of one or more information sources by a member of the library staff.

 $^{^{3}}$ Consists of 7, 4 33 single-outlet libraries and 1,765 multiple-outlet libraries. Some single-outlet libraries are bookmobiles, and some multiple-outlet libraries consist of or include bookmobiles.

⁻Not available

NOTE: For estimates that are 100 percent, the event defined could have been reported by fewer schools had a different sample been drawn. Detail may not sum to totals because of rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Fast Response Survey System (FRSS), Internet Access in U.S. Public Schools and Classrooms: 1994–2005; and unpublished tabulations. (This table was prepared July 2007.)

[†]Not applicable.

¹Data for combined schools are included in the totals and in analyses by other school characteristics, but are not shown separately. ²Percent of students eligible for free or reduced-price lunch was not available for some schools. In the 1994 survey, free and reduced-price lunch data came from the Common Core of Data (CCD) only and were missing for 430 schools (percentages presented in this table are based on cases for which data were available). In subsequent years, free and reduced-price lunch information was obtained on the questionnaire, supplemented, if necessary, with CCD data. Missing data ranged from 0 schools (2002, 2003, and 2005) to 10 schools (1999).

 $^{^{\}rm 3}\textsc{Some}$ data differ slightly (e.g., by 1 percent) from previously published figures.

 $^{^4}$ This estimate fell between 99.5 percent and 100.0 percent and therefore was rounded to 100 percent.

 $^{^{5}\}mbox{lncludes}$ computers used for instructional or administrative purposes.

⁶Includes all classrooms, computer labs, and library/media centers.

⁻Not available.

NOTE: Data are based on a sample survey of households and are subject to sampling and nonsampling error. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October 2003, unpublished tabulations. (This table was prepared May 2005.)

[†]Not applicable.

[‡]Reporting standards not met.

¹Individuals may be counted in more than one internet activity.

²Data are for persons 12 years old and over.

³Data are for persons 15 years old and over.

⁴Includes online banking and stock and securities transactions.

⁵Excludes persons whose income data were not available.

⁶Includes prekindergarten through grade 12.

 $^{^{\}rm 1} lncludes$ students enrolled in prekindergarten through grade 12, ages 3 and above.

NOTE: Data are based on a sample survey of households and are subject to sampling and nonsampling error. Race categories exclude persons of Hispanic ethnicity. Standard errors appear in parentheses.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October 1993, October 1997, and October 2003, unpublished tabulations. (This table was prepared May 2005.)

²Includes students enrolled at the undergraduate and postbaccalaureate levels.

³Excludes persons whose income data were not available.

[—]Not available.

NOTE: Data are based on a sample survey of households and are subject to sampling and nonsampling error. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors appear in parentheses. SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October 1993, October 1997, and October 2003, unpublished tabulations. (This table was prepared May 2005.)

[†]Not applicable.

¹Individuals may be counted in more than one computer activity.

²Due to changes in occupational definitions, older data are not comparable to 2003 data.

³Excludes persons whose income data were not available.

APPENDIX A Guide to Sources

Sources and Comparability of Data

The information presented in this report was obtained from many sources, including federal and state agencies, private research organizations, and professional associations. The data were collected using many research methods, including surveys of a universe (such as all colleges) or of a sample, compilations of administrative records, and statistical projections. Digest users should take particular care when comparing data from different sources. Differences in sampling, data collection procedures, coverage of target population, timing, phrasing of questions, scope of nonresponse, interviewer training, and data processing and coding mean that results from different sources may not be strictly comparable. Following the general discussion of data accuracy below, descriptions of the information sources and data collection methods are presented, grouped by sponsoring organization. More extensive documentation of a particular survey's procedures does not imply more problems with the data, only that more information is available.

Accuracy of Data

The joint effects of "sampling" and "nonsampling" errors determine the accuracy of any statistic. Estimates based on a sample will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey instruments, instructions, and procedures. In addition to such sampling errors, all surveys, both universe and sample, are subject to design, reporting, and processing errors and errors due to nonresponse. To the extent possible, these nonsampling errors are kept to a minimum by methods built into the survey procedures. In general, however, the effects of nonsampling errors are more difficult to gauge than those produced by sampling variability.

Sampling Errors

The samples used in surveys are selected from large numbers of possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. The difference between a sample estimate and the average of all possible samples is called the sampling deviation. The standard, or sampling, error of a survey estimate is a measure of the variation among the estimates from all possible samples and thus is a measure of the precision with which an estimate from a particular sample approximates the average result of all possible samples.

The sample estimate and an estimate of its standard error permit us to construct interval estimates with prescribed confidence that the interval includes the average result of all possible samples. If all possible samples were selected under essentially the same conditions and an estimate and its estimated standard error were calculated from each sample, then (1) approximately 66.7 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average value of all possible samples; and (2) approximately 95.0 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average value of all possible samples. We call an interval from two standard errors below the estimate to two standard errors above the estimate a 95 percent confidence interval.

To illustrate this concept, consider the data and standard errors appearing in table 109. For the 2006 estimate that 9.3 percent of 16- to 24-year-olds were high school dropouts, the table shows that the standard error is 0.22 percent. The sampling error above and below the stated figure is approximately double (1.96) the standard error, or about 0.43 percentage points. Therefore, we can create a 95 percent confidence interval, which is approximately 8.87 to 9.73 (9.3 percent ± 1.96 x 0.22 percent).

Analysis of standard errors can help assess how valid a comparison between two estimates might be. The *standard error of a difference* between two independent sample estimates is equal to the square root of the sum of the squared standard errors of the estimates. The standard error (*se*) of the difference between independent sample estimates *a* and *b* is

$$se_{a-b} = (se_a^2 + se_b^2)^{1/2}$$

It should be noted that most of the standard error estimates presented in the *Digest* and in the original documents are approximations. That is, to derive estimates of standard errors that would be applicable to a wide variety of items and could be prepared at a moderate cost, a number of approximations were required. As a result, the standard error estimates pro-

vide a general order of magnitude rather than the exact standard error for any specific item. The preceding discussion on sampling variability was directed toward a situation concerning one or two estimates. Determining the accuracy of statistical projections is more difficult. In general, the further away the projection date is from the date of the actual data being used for the projection, the greater the probable error in the projections. If, for instance, annual data from 1970 to 2006 are being used to project enrollment in institutions of higher education, the further beyond 2006 one projects, the more variability there is in the projection. One will be less sure of the 2017 enrollment projection than of the 2007 projection. A detailed discussion of the projections methodology is contained in *Projections of Education Statistics to 2017* (National Center for Education Statistics [NCES] 2008-078).

Nonsampling Errors

Universe and sample surveys are subject to nonsampling errors. Nonsampling errors may arise when respondents or interviewers interpret questions differently; when respondents must estimate values, or when coders, keyers, and other processors handle answers differently; when people who should be included in the universe are not; or when people fail to respond (completely or partially). Nonsampling errors usually, but not always, result in an underestimate of total survey error and thus an overestimate of the precision of survey estimates. Since estimating the magnitude of nonsampling errors often would require special experiments or access to independent data, these nonsampling errors are seldom measured.

To compensate for nonresponse, adjustments of the sample estimates are often made. For universe surveys, an adjustment made for either type of nonresponse, total or partial, is often referred to as an imputation, which is often a substitution of the "average" questionnaire response for the nonresponse. For universe surveys, imputations are usually made separately within various groups of sample members that have similar survey characteristics. For sample surveys, missing cases (i.e., total nonresponse) are handled through nonresponse adjustments to the sample weights. For sample surveys, imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are similar to those of the nonrespondent. For more information, see the *NCES Statistical Standards* (NCES 2003-601).

Although the magnitude of nonsampling error in the data compiled in this *Digest* is frequently unknown, idiosyncrasies that have been identified are noted in the appropriate tables.

National Center for Education Statistics (NCES)

Baccalaureate and Beyond Longitudinal Study

The Baccalaureate and Beyond Longitudinal Study (B&B) is based on the National Postsecondary Student Aid

Study (NPSAS) and provides information concerning education and work experience after completing the bachelor's degree. A special emphasis of B&B is on those entering teaching. B&B provides cross-sectional information 1 year after bachelor's degree completion (comparable to the information that was provided in the Recent College Graduates study), while at the same time providing longitudinal data concerning entry into and progress through graduate-level education and the workforce. This information has not been available through follow-ups involving high school cohorts or even college-entry cohorts, both of which are restricted in the number who actually complete a bachelor's degree and continue their education.

B&B followed NPSAS baccalaureate degree completers for a 10-year period after completion, beginning with NPSAS:93. About 11,000 students who completed their degrees in the 1992–93 academic year were included in the first B&B (B&B:93/94). In addition to the student data, B&B collected postsecondary transcripts covering the undergraduate period, which provided complete information on progress and persistence at the undergraduate level. The second B&B follow-up took place in spring 1997 (B&B:93/97) and gathered information on employment history, family formation, and enrollment in graduate programs. The third B&B follow-up occurred in 2003 (B&B:93/03) and provides information concerning graduate study and long-term employment experiences after degree completion.

The most recent B&B cohort, which was associated with NPSAS:2000, included 11,700 students who completed their degrees in the 1999–2000 academic year. The first and only planned follow-up survey of this cohort was conducted in 2001 (B&B:2000/01) and focused on time to degree completion, participation in postbaccalaureate education and employment, and the activities of newly qualified teachers.

Further information on B&B may be obtained from

Beginning Postsecondary Students Longitudinal Study

The Beginning Postsecondary Students Longitudinal Study (BPS) provides information on persistence, progress, and attainment from initial time of entry into postsecondary education through entering and leaving the workforce. BPS includes traditional and nontraditional (e.g., older) students and is representative of all beginning students in postsecondary education. BPS follows first-time, beginning students for at least 5 years at approximately 2-year intervals, collecting

student data and financial aid reports. By starting with a cohort that has already entered postsecondary education and following it for 5 years, BPS can determine to what extent students who start postsecondary education at various ages differ in their progress, persistence, and attainment. The first BPS was conducted in 1989–90, with follow-ups in 1992 and 1994. The second BPS was conducted in 1995–96, with follow-ups in 1998 and 2001. A third BPS cohort is based on NPSAS:04, with the first BPS follow-up in 2006 and the second in 2009.

Common Core of Data

NCES uses the Common Core of Data (CCD) to acquire and maintain statistical data from each of the 50 states, the District of Columbia, the Bureau of Indian Education, Department of Defense dependents schools (overseas and domestic), and the other jurisdictions. Information about staff and students is reported annually at the school, local education agency (LEA) or school district, and state levels. Information about revenues and expenditures is also collected at the state and LEA levels.

Data are collected for a particular school year via an online reporting system open to state education agencies during the school year. Beginning with the 2006–07 school year, nonfiscal CCD data are collected through the Department of Education's Education Data Exchange Network (EDEN). Since the CCD is a universe collection, CCD data are not subject to sampling errors. However, nonsampling errors could come from two sources: nonresponse and inaccurate reporting. Almost all of the states submit the five CCD survey instruments each year, but submissions are sometimes incomplete.

Misreporting can occur when 58 education agencies compile and submit data for approximately 97,000 public schools and over 17,000 local education agencies. Typically, this results from varying interpretations of NCES definitions and differing record-keeping systems. NCES attempts to minimize these errors by working closely with the state education agencies through the National Forum on Education Statistics.

The state education agencies report data to NCES from data collected and edited in their regular reporting cycles. NCES encourages the agencies to incorporate into their own survey systems the NCES items they do not already collect so that these items will also be available for the subsequent CCD survey. Over time, this has meant fewer missing data cells in each state's response, reducing the need to impute data.

NCES subjects data from the state education agencies to a comprehensive edit. Where data are determined to be inconsistent, missing, or out of range, NCES contacts the agencies for verification. NCES-prepared state summary forms are returned to the agencies for verification. Each year, states are also given an opportunity to revise their state-level aggregates from the previous survey cycle.

Early Childhood Longitudinal Study, Birth Cohort 2001

The Early Childhood Longitudinal Study, Birth Cohort (ECLS-B) is designed to provide decisionmakers, researchers, child care providers, teachers, and parents with nationally representative information about children's early learning experiences and the transition to child care and school. Children's physical and cognitive development, care, and learning experiences at home and school are measured using standardized assessments from birth through kindergarten entry.

Data were collected from a sample of about 10,700 children born in the United States in 2001, representing a population of approximately 4 million. The children participating in the study come from diverse socioeconomic and racial/ethnic backgrounds, with oversamples of Chinese, other Asian and Pacific Islander, American Indian/Alaska Native, twin, and moderately low and very low birth weight children. Children, their parents

(including nonresident and resident fathers), their child care providers, and their teachers provide information on children's cognitive, social, emotional, and physical development across multiple settings (e.g., home, child care, and school).

At 9 months (2001–02), 2 years (2003–04), 4 years (2005), 5 years (2006), and 6 years (2007), parents are asked about themselves, their families, and their children; fathers are asked about themselves and the role they play in supporting their child's care and development; and children are observed and assessed. In addition, starting when children are about 2 years old, child care and early education providers are asked to provide information about their own experience and training, their relationship with the child, and the setting's learning environment. When the children are in kindergarten (2006 and 2007), teachers are asked to provide information about the children's early academic skills and the classroom environment. Schoollevel data, merged from two other NCES data sets (the Common Core of Data and the Private School Survey), and residential zip codes collected at each wave, support community descriptions.

Early Childhood Longitudinal Study, Kindergarten Class of 1998–99

The Early Childhood Longitudinal Study, Kindergarten Class of 1998-99 (ECLS-K) was designed to provide detailed information on children's early school experiences. The study began in the fall of 1998. A nationally representative sample of 22,782 children enrolled in 1,277 kindergarten programs during the 1998–99 school year was selected to participate in the ECLS-K. The children attended both public and private kindergartens, and fullday and part-day programs. The sample included children from different racial/ethnic and socioeconomic backgrounds and oversamples of Asian and Pacific Islander children and private school kindergartners. Base-year data were collected in the fall and spring of the kindergarten year. Data were collected again in the fall of first grade (from a 30 percent subsample of schools) and the spring of first grade, and then in the spring of third grade in 2002 and the spring of fifth grade in 2004. The same children were followed through the eighth grade.

The ECLS-K includes a direct child cognitive assessment that is administered one-on-one with each child in the study. The assessment uses a computer-assisted personal interview (CAPI) approach and a two-stage adaptive testing methodology. In the eighth grade, a two-stage adaptive paper-and-pencil assessment was administered in small groups. The assessment includes three cognitive domains—reading, mathematics, and general knowledge—at kindergarten and first grade. General knowledge was replaced by science at the third, fifth, and eighth grades. Children's height and weight are measured at each data collection point, and a direct measure of children's psychomotor development was administered in the fall of the kindergarten year only. In addition to these measures, the ECLS-K collects information about children's social skills and academic achievement through teacher reports, and through student reports at the third, fifth, and eighth grades.

A computer-assisted telephone interview with the children's parents/guardians is conducted at each data collection point. Parents/guardians are asked to provide key information about their children on subjects such as family demographics (e.g., family members, age, relation to child, race/ethnicity), family structure (e.g., household members and composition), parent involvement, home educational activities (e.g., reading to the child), child health, parental education and employment status, and child's social skills and behaviors.

Data on the schools that children attend and their classrooms are collected by self-administered questionnaires completed by school administrators and classroom teachers. Administrators provide information about the school population, programs, and policies. At the classroom level, data are collected on the composition of the classroom, teaching practices, curriculum, and teacher qualifications and experience. In addition, special education teachers and related services staff provide reports on the services received by children with disabilities.

Education Longitudinal Study of 2002

The Education Longitudinal Study of 2002 (ELS:2002) is a longitudinal survey that is monitoring the transitions of a national probability sample of 10th-graders in public, Catholic, and other private schools. Survey waves follow both students and high school dropouts and monitor the transition of the cohort to postsecondary education, the labor force, and family formation.

In the base year of the study, of 1,221 eligible contacted schools, 752 participated, for an overall weighted school participation rate of approximately 68 percent (62 percent

unweighted). Of 17,591 selected eligible students, 15,362 participated, for an overall weighted student response rate of approximately 87 percent. (School and student weighted response rates reflect use of the base weight [design weight] and do not include nonresponse adjustments.) Information for the study is obtained not just from students and their school records, but also from the students' parents, their teachers, their librarians, and the administrators of their schools.

The first follow-up was conducted in 2004, when most sample members were high school seniors. Base-year students who remained in their base schools were resurveyed and tested in mathematics, along with a freshening sample to make the study representative of spring 2004 high school seniors nationwide. Students who were not still at their base schools were administered a questionnaire.

The second follow-up, completed in 2006, continued to follow the sample of students into postsecondary education or work, or both. The next follow-up is scheduled for 2012.

Fast Response Survey System

The Fast Response Survey System (FRSS) was established in 1975 to collect issue-oriented data quickly and with a minimal burden on respondents. The FRSS, whose surveys collect and report data on key education issues at the elementary and secondary levels, was designed to meet the data needs of Department of Education analysts, planners, and decisionmakers when information could not be collected quickly through NCES's large recurring surveys. Findings from FRSS surveys have been included in congressional reports, testimony to congressional subcommittees, NCES reports, and other Department of Education reports. The findings are also often used by state and local education officials.

Data collected through FRSS surveys are representative at the national level, drawing from a universe that is appropriate for each study. The FRSS collects data from state education agencies and national samples of other educational organizations and participants, including local education agencies, public and private elementary and secondary schools, elementary and secondary school teachers and principals, and public libraries and school libraries. To ensure a minimal burden on respondents, the surveys are generally limited to three pages of questions, with a response burden of about 30 minutes per respondent. Sample sizes are rela-

tively small (usually about 1,000 to 1,500 respondents per survey) so that data collection can be completed quickly.

Condition of America's Public School Facilities: 1999

This report (NCES 2000-032) provides national data about the condition of public schools in 1999 based on a survey conducted by NCES using its Fast Response Survey System (FRSS). Specifically, this report provides information about the condition of school facilities and the costs to bring them into good condition; school plans for repairs, renovations, and replacements; the age of public schools; and overcrowding and practices used to address overcrowding. The results presented in this report are based on questionnaire data for 903 public elementary and secondary schools in the United States. The responses were weighted to produce national estimates that represent all regular public schools in the United States.

Internet Access in U.S. Public Schools and Classrooms

The Internet Access in U.S. Public Schools and Classrooms survey is part of the NCES Fast Response Survey System (FRSS). It is designed to assess the federal government's commitment to assist every school and classroom in connecting to the Internet by the year 2000. In 1994, NCES began surveying approximately 1,000 public schools each year about their access to the Internet, access in classrooms, and, since 1996, their type of internet connections. Recent administrations of this survey have been expanded to cover emerging issues. The 2003 survey was designed to update the questions in the 2002 survey and covered the following topics: school connectivity, student access to computers and the Internet, school websites, technologies and procedures to prevent student access to inappropriate websites, and teacher

professional development on how to incorporate use of the Internet into the curriculum.

In 2005 respondents were asked about the number of instructional computers with access to the Internet, the types of Internet connections, technologies and procedures used to prevent student access to inappropriate material on the Internet, and the availability of hand-held and laptop computers for students and teachers. Respondents also provided information on teacher professional development in integrating the use of the Internet into the curriculum and using the Internet to provide opportunities and information for teaching and learning.

The 2005 survey on internet access was the last in this series, since internet access in schools has been nearly 100 percent since 2003.

Further information on internet access in public schools and classrooms may be obtained from

Federal Support for Education

NCES prepares an annual compilation of federal funds for education for the *Digest*. Data for U.S. Department of Education programs come from the *Budget of the United States Government*. Budget offices of other federal agencies provide information for all other federal program support except for research funds, which are obligations reported by the National Science Foundation in *Federal Funds for Research and Development*. Some data are estimated, based on reports from the federal agencies contacted and the *Budget of the United States Government*.

Except for money spent on research, outlays are used to report program funds to the extent possible. Some Digest tables report program funds as obligations, as noted in the title of the table. Some federal program funds not commonly recognized as education assistance are also included in the totals reported. For example, portions of federal funds paid to some states and counties as shared revenues resulting from the sale of timber and minerals from public lands have been estimated as funds used for education purposes. Parts of the funds received by states (in 1980) and localities (in all years) under the General Revenue Sharing Program are also included, as are portions of federal funds received by the District of Columbia. The share of these funds allocated to education is assumed to be equal to the share of general funds expended for elementary and secondary education by states and localities in the same year as reported by the U.S. Census Bureau in its annual publication, Government Finances.

The share of federal funds for the District of Columbia assigned to education is assumed to be equal to the share of the city's general fund expenditures for each level of education.

For the job training programs conducted by the Department of Labor, only estimated sums spent on classroom training have been reported as educational program support.

During the 1970s, the Office of Management and Budget (OMB) prepared an annual analysis of federal education program support. These were published in the Budget of the United States Government, Special Analyses. The information presented in this report is not, however, a continuation of the OMB series. A number of differences in the two series should be noted. OMB required all federal agencies to report outlays for education-related programs using a standardized form, thereby assuring agency compliance in reporting. The scope of education programs reported in the Digest differs from the scope of programs reported in the OMB reports. Off-budget items such as the annual volume of guaranteed student loans were not included in OMB's reports. Finally, while some mention is made of an annual estimate of federal tax expenditures, OMB did not include them in its annual analysis of federal education support. Estimated federal tax expenditures for education are the difference between current federal tax receipts and what these receipts would be without existing education deductions to income allowed by federal tax provisions.

Recipients' data are estimated based on Estimating Federal Funds for Education: A New Approach Applied to Fiscal Year 1980 (Miller, V., and Noell, J., 1982, Journal of Education Finance); Federal Support for Education, various years; and the Catalog of Federal Domestic Assistance (cfda.gov). The recipients' data are estimated and tend to undercount institutions of higher education, students, and local education agencies. This is because some of the federal programs have more than one recipient receiving funds. In these cases, the recipients were put into a "mixed recipients" category, because there was no way to disaggregate the amount each recipient received.

Further information on federal support for education may be obtained from

High School and Beyond Longitudinal Study

The High School and Beyond Longitudinal Study (HS&B) is a national longitudinal survey of individuals who were high school sophomores and seniors in 1980. The base-year survey

(conducted in 1980) was a probability sample of 1,015 high schools with a target number of 36 sophomores and 36 seniors in each school. A total of 58,270 students participated in the base-year survey. Substitutions were made for nonparticipating schools—but not for students—in those strata where it was possible. Overall, 1,122 schools were selected in the original sample and 811 of these schools participated in the survey. An additional 204 schools were drawn in a replacement sample. Student refusals and absences resulted in an 82 percent completion rate for the survey.

Several small groups in the population were oversampled to allow for special study of certain types of schools and students. Students completed questionnaires and took a battery of cognitive tests. In addition, a sample of parents of sophomores and seniors (about 3,600 for each cohort) was surveyed.

HS&B first follow-up activities took place in the spring of 1982. The sample for the first follow-up survey included approximately 30,000 people who were sophomores in 1980. The completion rate for sample members eligible for on-campus survey administration was about 96 percent. About 89 percent of the students who left school between the base-year and first follow-up surveys (e.g., dropouts, transfer students, and early graduates) completed the first follow-up sophomore questionnaire.

As part of the first follow-up survey of HS&B, transcripts were requested in fall 1982 for an 18,152-member subsample of the sophomore cohort. Of the 15,941 transcripts actually obtained, 1,969 were excluded because the students had dropped out of school before graduation, 799 were excluded because they were incomplete, and 1,057 were excluded because the students graduated before 1982 or the transcripts indicated neither a dropout status nor graduation. Thus, 12,116 transcripts were utilized for the overall curriculum analysis presented in this publication. All courses in each transcript were assigned a 6-digit code based on the Classification of Secondary School Courses (a coding system developed to standardize course descriptions; see http://nces.ed.gov/sur veys/hst/courses.asp). Credits earned in each course are expressed in Carnegie units. (The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. To receive credit for a course, the student must have received a passing grade—"pass," "D," or higher.) Students who transferred from public to private schools or from private to public schools between their sophomore and senior years were eliminated from public/private analyses.

In designing the senior cohort first follow-up survey, one of the goals was to reduce the size of the retained sample while still keeping sufficient numbers of minorities to allow important policy analyses. A total of 11,227 (94 percent) of the 11,995 people subsampled completed the questionnaire. Information was obtained about the respondents' school and employment experiences, family status, and attitudes and plans.

The samples for the second follow-up, which took place in spring 1984, consisted of about 12,000 members of the senior cohort and about 15,000 members of the sophomore cohort. The completion rate for the senior cohort was 91 percent, and the completion rate for the sophomore cohort was 92 percent.

HS&B third follow-up data collection activities were performed in spring 1986. Both the sophomore and senior cohort samples for this round of data collection were the same as those used for the second follow-up survey. The completion rates for the sophomore and senior cohort samples were 91 percent and 88 percent, respectively.

HS&B fourth follow-up data collection activities were performed in 1992, but only surveyed the 1980 sophomore class. They examined aspects of these students' early adult years, such as enrollment in postsecondary education, experience in the labor market, marriage and child rearing, and voting behavior.

Appendix table A-1 contains the maximum number of HS&B cases that are available for tabulations of specific classification variables used throughout this publication.

The standard error (se) of an individual percentage (p) based on HS&B data can be approximated by the formula

$$se_p = DEFT [p(100 - p)/n]^{1/2}$$

where n is the sample size and DEFT, the square root of the design effect, is a factor used to adjust for the particular sample design used in HS&B. Appendix table A-2 provides the DEFT factors for different HS&B samples and subsamples.

In evaluating a difference between two independent percentages, the standard error of the difference may be conservatively approximated by taking the square root of the sum of the squared standard errors of the two percentages. For example, in the 1986 follow-up of 1980 sophomores, 84.0 percent of the men and 77.2 percent of the women felt that being successful in work was "very important," a difference of 6.8 percentage points. Using the formula and the sample sizes from table A-1 and the DEFT factors from table A-2, the standard errors of the two percentages being compared are calculated to be

$$1.43[(84.0)(16.0)/(5,391)]^{1/2} = .714$$

 $1.43[(77.2)(22.8)/(5,857)]^{1/2} = .784$

Therefore, the standard error of the difference is

$$(.714^2 + .784^2)^{1/2} = (.510 + .615)^{1/2} = 1.06$$

The sampling error of the difference is approximately double the standard error, or approximately 2.1 percentage points, and the 95 percent confidence interval for the difference is 6.8 ± 2.1 , or 4.7 to 8.9 percentage points.

The standard error estimation procedure outlined above does not compensate for survey item nonresponse, which is a source of nonsampling error. (Table A-1 reflects the maximum number of responses that could be tabulated by demographic characteristics.) For example, of the 10,925 respondents in the 1984 follow-up survey of 1980 high school graduates, 372, or 3.4 percent, did not respond to the particular question on whether they had ever used a pocket calculator. Item nonresponse varied considerably. A very low nonresponse rate of 0.1 percent was obtained for a question asking whether the respondent had attended a postsecondary

institution. A much higher item nonresponse rate of 12.2 percent was obtained for a question asking if the respondent had used a micro- or minicomputer in high school. Typical item nonresponse rates ranged from 3 to 4 percent.

The Hispanic analyses presented in this publication rely on students' self-identification as members of one of four Hispanic subgroups: Mexican, Mexican-American, Chicano; Cuban; Puerto Rican, Puertorriqueño, Boricuan; or other Hispanic ethnicities.

An NCES series of technical reports and data file user's manuals, available electronically, provides additional information on the survey methodology.

High School Transcript Study Tabulations

High school transcript studies have been conducted since 1982 and are associated with a major NCES data collection. The studies collect information that is contained in a student's high school record—courses taken while attending secondary school, information on credits earned, when specific courses were taken, and final grades.

A high school transcript study was conducted in 2004 as part of the Education Longitudinal Study of 2002 (ELS:2002/2004). A total of 1,549 schools participated in the request for transcripts, for an unweighted participation rate of approximately 79 percent. Transcript information was received on 14,920 members of the student sample (not just graduates), for an unweighted response rate of 91 percent.

Similar studies were conducted of the coursetaking patterns of 1982, 1987, 1990, 1992, 1994, 1998, and 2000 high school graduates. The 1982 data are based on approximately 12,000 transcripts collected by the High School and Beyond Longitudinal Study (HS&B). The 1987 data are based on approximately 22,799 transcripts from 433 schools obtained as part of the 1987 NAEP High School Transcript Study, a scope comparable to that of the NAEP transcript studies conducted in 1990, 1994, 1998, and 2000. The 1992 data are based on approximately 7,600 transcripts collected by the National Education Longitudinal Study of 1988 (NELS:88/92). The 2005 NAEP High School Transcript Study collected a sample of over 26,000 transcripts from 640 public schools and 80 private schools.

Because the 1982 HS&B transcript study used a different method for identifying students with disabilities than was used in NAEP transcript studies after 1982, and in order to make the statistical summaries as comparable as possible, all the counts and percentages in this report are restricted to students whose records indicate that they had not participated in a special education program. This restriction lowers the number of 1990 graduates represented in the tables to 20,866.

Integrated Postsecondary Education Data System

The Integrated Postsecondary Education Data System (IPEDS) surveys approximately 6,800 postsecondary institutions, including universities and colleges, as well as institutions offering technical and vocational education beyond the high school level. IPEDS, which began in 1986, replaced the Higher Education General Information Survey (HEGIS).

IPEDS consists of eight interrelated components that obtain information on who provides postsecondary education (institutions), who participates in it and completes it (students), what programs are offered and what programs are completed, and both the human and financial resources involved in the provision of institutionally based postsecondary education. Until 2000, these components included institutional characteristics, fall enrollment, completions, salaries, finance, and fall staff. Beginning in 2000, data were collected in the fall for institutional characteristics and completions; in the winter for employees by assigned position (EAP), salaries, and fall staff; and in the spring for enrollment, student financial aid, finances, and graduation rates. With the winter 2005-06 survey, the employees by assigned position, fall staff, and salaries components were merged into the human resources component. In 2007-08, the enrollment component was broken into two separate components: 12-month enrollment (collected in the fall) and fall enrollment (collected in the spring).

The degree-granting institutions portion of IPEDS is a census of colleges awarding associate's or higher degrees that are eligible to participate in Title IV financial aid programs. Prior

to 1993, data from technical and vocational institutions were collected through a sample survey. Beginning in 1993, all data are gathered in a census of all postsecondary institutions. The tabulations on "institutional characteristics" developed for editions of the *Digest* from 1993 forward are based on lists of all institutions and are not subject to sampling errors.

The definition of institutions generally thought of as offering college and university education changed as of 1996. The old standard for higher education institutions included those institutions that had courses leading to an associate's or higher degree or that had courses accepted for credit toward those degrees. Higher education institutions were accredited by an agency or association that was recognized by the U.S. Department of Education or were recognized directly by the Secretary of Education. Tables, or portions of tables, that use only this standard are noted as "higher education" in the Digest. The newer standard includes institutions that award associate's or higher degrees and that are eligible to participate in Title IV federal financial aid programs. Tables that contain any data according to this standard are titled "degree-granting" institutions. Time-series tables may contain data from both series, and they are noted accordingly. The impact of this change on data collected in 1996 was not large. For example, tables on faculty salaries and benefits were only affected to a very small extent. Also, degrees awarded at the bachelor's level or higher were not heavily affected. The largest impact was on private 2-year college enrollment. In contrast, most of the data on public 4-year colleges were affected to a minimal extent. The impact on enrollment in public 2-year colleges was noticeable in certain states, but was relatively small at the national level. Overall, total enrollment for all institutions was about one-half a percent higher in 1996 for degree-granting institutions than for higher education institutions.

Prior to the establishment of IPEDS in 1986, HEGIS acquired and maintained statistical data on the characteristics and operations of institutions of higher education. Implemented in 1966, HEGIS was an annual universe survey of institutions accredited at the college level by an agency recognized by the Secretary of the U.S. Department of Education. These institutions were listed in NCES's *Education Directory, Colleges and Universities*.

HEGIS surveys collected information on institutional characteristics, faculty salaries, finances, enrollment, and degrees. Since these surveys, like IPEDS, were distributed to all higher education institutions, the data presented are not subject to sampling error. However, they are subject to nonsampling error, the sources of which varied with the survey instrument.

The NCES Taskforce for IPEDS Redesign recognized that there were issues related to the consistency of data definitions as well as the accuracy, reliability, and validity of other quality measures within and across surveys. The IPEDS redesign in 2000 provided institution-specific web-based data forms. While the new system shortened data processing time and provided better data consistency, it did not address the accuracy of the data provided by institutions.

Beginning in 2003–04 with the Prior Year Data Revision System, prior-year data have been available to institutions

entering current data. This allows institutions to make changes to their prior-year entries either by adjusting the data or by providing missing data. These revisions allow the evaluation of the data's accuracy by looking at the changes made.

NCES conducted a study (NCES 2005-175) of the 2002–03 data that were revised in 2003–04 to determine the accuracy of the imputations, track the institutions that submitted revised data, and analyze the revised data they submitted. When institutions made changes to their data, it was assumed that the revised data were the "true" data. The data were analyzed for the number and type of institutions making changes, the type of changes, the magnitude of the changes, and the impact on published data.

Because NCES imputes missing data, imputation procedures were also addressed by the Redesign Taskforce. For the 2003–04 assessment, differences between revised values and values that were imputed in the original files were compared (i.e., revised value minus imputed value). These differences were then used to provide an assessment of the effectiveness of imputation procedures. The size of the differences also provides an indication of the accuracy of imputation procedures. To assess the overall impact of changes on aggregate IPEDS estimates, published tables for each component were reconstructed using the revised 2002–03 data. These reconstructed tables were then compared to the published tables to determine the magnitude of aggregate bias and the direction of this bias.

Though IPEDS provides the most comprehensive data system for postsecondary education, there are 100 or more entities that collect their own information from postsecondary institutions. This raises the issue of how valid IPEDS data are when compared to education data collected by non-IPEDS sources. In the Data Quality Study, Thomson Peterson data were chosen to assess the validity of IPEDS data because Thomson Peterson is one of the largest and most comprehensive sources of postsecondary data available.

Not all IPEDS components could be compared to Thomson Peterson. Either Thomson Peterson did not collect data related to a particular IPEDS component, or the data items collected by Thomson Peterson were not comparable to the IPEDS items (i.e., the data items were defined differently). Comparisons were made for a selected number of data items in five areas—tuition and price, employees by assigned position, enrollment, student financial aid, and finance. More details on the accuracy and reliability of IPEDS data can be found in the *Integrated Postsecondary Education Data System Data Quality Study* (NCES 2005-175).

Fall (12-Month Enrollment)

Data on 12-month enrollment are collected for award levels ranging from postsecondary certificates of less than 1 year to doctoral degrees. The 12-month period used is selected by the institution and can be either July 1 through June 30 or September 1 through August 31. Data are collected by race/ethnicity and gender, and include unduplicated headcounts and instructional activity (contact or credit hours). These data are also used to calculate a full-timeequivalent (FTE) enrollment based on instructional activity. FTE enrollment is useful for gauging the size of the educational enterprise at the institution. Prior to the 2007-08 IPEDS data collection, the data collected in the 12-Month Enrollment survey were part of the Fall Enrollment survey. However, to improve the timeliness of the data, a separate survey component was developed in 2007. The data are now collected in the fall for the previous academic year.

Fall (Completions)

This survey was part of the HEGIS series throughout its existence. However, the degree classification taxonomy was revised in 1970–71, 1982–83, 1991–92, and 2002–03. Collection of degree data has been maintained through IPEDS.

Degrees-conferred trend tables arranged by the 2002-03 classification are included in the *Digest* to provide consistent data from 1970-71 to the most recent year. Data in this edition on associate's and other formal awards below the baccalaureate degree, by field of study, cannot be made comparable with figures from prior to 1982-83. The nonresponse rate does not appear to be a significant source of nonsampling error for this survey. The response rate over the years has been high, with both the degree-granting institution response rate and the overall response rate for non-degree-granting institutions at almost 100 percent in fall 2006. Because of the high response rate for degree-granting institutions, nonsampling error caused by imputation is also minimal. Imputation methods and the response bias analysis for the fall 2006 survey are discussed in Postsecondary Institutions in the United States: Fall 2006 and Degrees and Other Awards Conferred: 2005-06 (NCES 2007-166).

The Integrated Postsecondary Education Data System Data Quality Study (NCES 2005-175) indicated that most Title IV institutions supplying revised data on completions in 2003–04 were able to supply missing data for the prior year. The small differences between imputed data for the prior year

and the revised actual data supplied by the institution indicated that the imputed values produced by NCES were acceptable.

Fall (Institutional Characteristics)

This survey collects the basic information necessary to classify institutions, including control, level, and types of programs offered, as well as information on tuition, fees, and room and board charges. Beginning in 2000, the survey collected institutional pricing data from institutions with first-time, full-time, degree/certificate-seeking undergraduate students. Unduplicated full-year enrollment counts and instructional activity are now collected in the Fall Enrollment survey. The overall response rate was at almost 100 percent for Title IV degree-granting institutions for 2007 data.

The Integrated Postsecondary Education Data System Data Quality Study (NCES 2005-175) looked at tuition and price in Title IV institutions. Only 8 percent of institutions in 2002–03 and 2003–04 reported the same data to IPEDS and Thomson Peterson consistently across all selected data items. Differences in wordings or survey items may account for some of these inconsistencies.

Winter (Fall Staff)

The fall staff data presented in this publication were collected by NCES through IPEDS, which collects data from postsecondary institutions, including all 2- and 4-year degree-granting education institutions. IPEDS collects staff data biennially, in odd numbered years.

Questionnaires for the 2005–06 Fall Staff survey were completed on the IPEDS data collection website between December 2005 and January 2006; respondents report employment statistics for their institution that cover the payroll period in the fall of the survey year. The 2005–06 survey had an overall response rate of 99.9 percent and a response rate of 99.9 percent for both degree-granting institutions and

for non-degree-granting institutions. Imputation methods and the response bias analysis for the 2005–06 Fall Staff survey are discussed in *Employees in Postsecondary Institutions*, Fall 2005, and Salaries of Full-Time Instructional Faculty, 2005–06 (NCES 2007-150).

The most recent data quality study, *Integrated Postsecondary Education Data System Data Quality Study* (NCES 2005-175), found that for 2003–04 employee data items, changes were made by 1.2 percent (77) of the institutions that responded. All who made changes made changes that resulted in different employee counts. For both institutional and aggregate differences, the changes had little impact on the original employee count submissions. A large number of institutions reported different staff data to IPEDS and Thomson Peterson; however, the magnitude of the differences was small—usually no more than 17 faculty members for any faculty variable.

Winter (Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty)

This institutional survey was conducted for most years from 1966–67 to 1987–88; it has been conducted annually since 1989–90, except for 2000–01. Although the survey form has changed a number of times during these years, only comparable data are presented.

Between 1966–67 and 1985–86, this survey differed from other HEGIS surveys in that imputations were not made for nonrespondents. Thus, there is some possibility that the salary averages presented in this report may differ from the results of a complete enumeration of all colleges and universities. Beginning with the surveys for 1987–88, the IPEDS data tabulation procedures included imputations for survey nonrespondents. The response rate for the 2005–06 survey was 99.9 percent for degree-granting institutions. A number of institutions affected by Hurricanes Rita and Katrina did not respond and their data were not imputed. Imputation methods and the response bias analysis for the 2005-06 survey are discussed in Employees in Postsecondary Institutions, Fall 2005, and Salaries of Full-Time Instructional Faculty, 2005-06 (NCES 2007-150). Although data from this survey are not subject to sampling error, sources of nonsampling error may include computational errors and misclassification in reporting and processing. The electronic reporting system does allow corrections to prior-year reported or missed data, and this should help with these problems. Also, NCES reviews individual institutions' data for internal and longitudinal consistency and contacts institutions to check inconsistent data.

The Integrated Postsecondary Education Data System Data Quality Study (NCES 2005-175) found that only 1.3 percent of the responding Title IV institutions in 2003–04 made changes to their salaries data. The differences between the imputed data and the revised data were small and found to have little impact on the published data.

Winter/Spring (Fall Enrollment)

This survey has been part of the HEGIS and IPEDS series since 1966. Response rates for this survey have been relatively high, generally exceeding 85 percent. Beginning in 2000, with web-based data collection, higher response rates were attained. In 2005–06, the overall response rates were 100.0 percent for degree-granting 4-year private not-for-profit institutions, 2-year public institutions, and 2-year private not-for-profit institutions; the response rate was 99.8 percent for 4-year public institutions. Imputation methods and the response bias analysis for the 2005–06 survey are discussed in *Enrollment in Postsecondary Institutions, Fall 2005*; *Graduation Rates, 1999 & 2002 Cohorts; and Financial Statistics, Fiscal Year 2005* (NCES 2007-154).

Beginning with the fall 1986 survey and the introduction of IPEDS (see above), the survey was redesigned. The survey allows (in alternating years) for the collection of age and residence data. Beginning in 2000, the survey collected instructional activity and unduplicated headcount data, which are needed to compute a standardized, full-time-equivalent (FTE) enrollment statistic for the entire academic year.

The Integrated Postsecondary Education Data System Data Quality Study (NCES 2005-175) showed that public institutions made the majority of changes to enrollment data during the 2004 revision period. The majority of changes were made to unduplicated headcount data, with the net differences between the original data and the revised data at about 1 percent. Part-time students in general and enrollment in private not-for-profit institutions were often underestimated. The fewest changes by institutions were to Classification of Instructional Programs (CIP) code data. (The CIP is a taxonomic coding scheme that contains titles and descriptions of primarily postsecondary instructional programs.) More institutions provided enrollment data to IPEDS than to Thomson Peterson. A fairly high percentage of institutions that provided data to both provided the same

data, and among those that did not, the difference in magnitude was less than 10 percent.

Washington, DC 20006
jessica.shedd@ed.gov
http://nces.ed.gov/ipeds

Spring (Finance)

This survey was part of the HEGIS series and has been continued under IPEDS. Substantial changes were made in the financial survey instruments in fiscal year (FY) 1976, FY 82, FY 87, FY 97, and FY 02. While these changes were significant, considerable effort has been made to present only comparable information on trends in this report and to note inconsistencies. The FY 76 survey instrument contained numerous revisions to earlier survey forms, which made direct comparisons of line items very difficult. Beginning in FY 82, Pell Grant data were collected in the categories of federal restricted grant and contract revenues and restricted scholarship and fellowship expenditures. Finance tables for this publication have been adjusted by subtracting the largely duplicative Pell Grant amounts from the later data to maintain comparability with pre-FY 82 data. The introduction of IPEDS in the FY 87 survey included several important changes to the survey instrument and data processing procedures. Beginning in FY 97, data for private institutions were collected using new financial concepts consistent with Financial Accounting Standards Board (FASB) reporting standards, which provide a more comprehensive view of college finance activities. The data for public institutions continued to be collected using the older survey form. The data for public and private institutions were no longer comparable and, as a result, no longer presented together in analysis tables. In FY 01, public institutions had the option of either continuing to report using Government Accounting Standards Board (GASB) standards or using the new FASB reporting standards. Beginning in FY 02, public institutions had three options: the original GASB standards, the FASB standards, or the new GASB Statement 35 standards (GASB35). Because of the complexity of the multiple forms used by public institutions, finance data for public institutions for some recent years are not presented in the Digest.

Possible sources of nonsampling error in the financial statistics include nonresponse, imputation, and misclassification. The response rate has been about 85 to 90 percent for most of the historic years presented in the *Digest*; however, in more recent years, response rates have been much higher because Title IV institutions are required to respond. The 2002 IPEDS data collection was a full-scale web-based col-

lection, which offered features that improved the quality and timeliness of the data. The ability of IPEDS to tailor online data entry forms for each institution based on characteristics such as institutional control, level of institution, and calendar system, and the institutions' ability to submit their data online, were two such features that improved response. The response rate for the FY 06 Finance survey was 100 percent for degree-granting institutions. Imputation methods and the response bias analysis for the FY 06 survey are discussed in *Enrollment in Postsecondary Institutions, Fall 2006; Graduation Rates, 2000 & 2003 Cohorts; and Financial Statistics, Fiscal Year 2006* (NCES 2008-173).

Two general methods of imputation were used in HEGIS. If prior-year data were available for a nonresponding institution, they were inflated using the Higher Education Price Index and adjusted according to changes in enrollments. If prior-year data were not available, current data were used from peer institutions selected for location (state or region), control, level, and enrollment size of institution. In most cases, estimates for nonreporting institutions in HEGIS were made using data from peer institutions.

Beginning with FY 87, IPEDS included all postsecondary institutions, but maintained comparability with earlier surveys by allowing 2- and 4-year institutions to be tabulated separately. For FY 87 through FY 91, in order to maintain comparability with the historical time series of HEGIS institutions, data were combined from two of the three different survey forms that make up IPEDS. The vast majority of the data were tabulated from form 1, which was used to collect information from public and private not-for-profit 2- and 4-year colleges. Form 2, a condensed form, was used to gather data for 2-year for-profit institutions. Because of the differences in the data requested on the two forms, several assumptions were made about the form 2 reports so that their figures could be included in the degree-granting institution totals.

In IPEDS, the form 2 institutions were not asked to separate appropriations from grants and contracts, nor were they asked to separate state from local sources of funding. For the form 2 institutions, all federal revenues were assumed to be federal grants and contracts, and all state and local revenues were assumed to be restricted state grants and contracts. All other form 2 sources of revenue, except for tuition and fees and sales and services of educational activities, were included under "other." Similar adjustments were made to the expenditure accounts. The form 2 institutions reported instruction and scholarship and fellowship expenditures only. All other educational and general expenditures were allocated to academic support.

The Integrated Postsecondary Education Data System Data Quality Study (NCES 2005-175) found that only a small percentage (2.9 percent, or 168) of postsecondary institutions either revised 2002–03 data or submitted data for items they previously left unreported. Though relatively few institutions made changes, the changes made were relatively large—greater than 10 percent of the original data. With a

few exceptions, these changes, large as they were, did not greatly affect the aggregate totals.

Again, institutions were more likely to report data to IPEDS than to Thomson Peterson, and there was a higher percentage reporting different values among those reporting to both. The magnitude of the difference was generally greater for research expenditures. It is likely that the large differences are a function of the way institutions report these data to both entities.

Library Statistics

On October 1, 2007, the administration of the Public Libraries Survey (PLS) and the State Library Agencies (StLA) Survey was transferred to the Institute of Museum and Library Services (IMLS). The transfer of these surveys to IMLS is the result of President Bush's fiscal year 2007 budget request.

Public library statistics were collected annually by NCES using the PLS and disseminated annually through the Federal-State Cooperative System (FSCS) for Public Library Data. Descriptive statistics were produced for over 9,200 public libraries. The PLS included information about staffing; operating income and expenditures; type of governance; type of administrative structure; size of collection; and service measures such as reference transactions, public service hours, interlibrary loans, circulation, and library visits. In FSCS, respondents supplied the information electronically, and data were edited and tabulated in machine-readable form.

The respondents were 9,200 public libraries identified in the 50 states and the District of Columbia by state library agencies. At the state level, FSCS was administered by State Data Coordinators, appointed by the Chief Officer of each State Library Agency. The State Data Coordinator collected the requested data from local public libraries and submitted these data to NCES. An annual training conference sponsored by NCES was provided for the State Data Coordinators. All 50 states and the District of Columbia submitted data for individual public libraries, which were also aggregated to state and national levels.

From 1994 through 2006, NCES conducted the StLA Survey for the 50 states and the District of Columbia. A state library agency is the official agency of a state that is charged by state law with the extension and development of public library services throughout the state and that has adequate authority under state law to administer state plans in accor-

dance with the provisions of the Library Services and Technology Act (LSTA) of 2003. The StLA Survey collected data on services, collections, staffing, revenue, and expenditures.

Under the Academic Libraries Survey (ALS), NCES surveyed academic libraries on a 3-year cycle between 1966 and 1988. From 1988 through 1999, ALS was a component of the Integrated Postsecondary Education Data System (IPEDS) and was on a 2-year cycle. Beginning with fiscal year (FY) 2000, ALS was no longer a component of IPEDS, but it remains on a 2-year cycle. ALS provides data on about 3,700 academic libraries. In aggregate, these data provide an overview of the status of academic libraries nationally and statewide. The survey collects data on the libraries in the entire universe of degree-granting institutions. Beginning with the collection of FY 2000 data, the ALS changed to web-based data collection. ALS produces descriptive statistics on academic libraries in postsecondary institutions in the 50 states, the District of Columbia, and the outlying areas.

School library data were collected on the School and Principal Surveys during the 1990–91 Schools and Staffing Survey (SASS). The School Library Media Centers (LMC) Survey became a component of SASS with the 1993–94 administration. Since then, the LMC Survey has been conducted during the 1999–2000, 2003–04, and 2007–08 school years. During the 2003–04 administration, only the public and Bureau of Indian Education (BIE) school library media centers were surveyed. School library questions focus on staff, collections, equipment, services, and expenditures.

National Adult Literacy Survey

The National Adult Literacy Survey (NALS), funded by the U.S. Department of Education and 12 states, was created in 1992 as a new measure of literacy. The aim of the survey was to profile the English literacy of adults in the United States based on their performance across a wide array of tasks that reflect the types of materials and demands they encounter in their daily lives.

To gather information on adults' literacy skills, trained staff interviewed a nationally representative sample of nearly 13,600 individuals age 16 and older during the first 8 months of 1992. These participants had been randomly selected to represent the adult population in the country as a whole. Black and Hispanic households were oversampled to ensure reliable estimates of literacy proficiencies and to permit analyses of the performance of these subpopulations. In

addition, some 1,100 inmates from 80 federal and state prisons were interviewed to gather information on the proficiencies of the prison population. In total, nearly 26,000 adults were surveyed.

Each survey participant was asked to spend approximately an hour responding to a series of diverse literacy tasks, as well as questions about his or her demographic characteristics, educational background, reading practices, and other areas related to literacy. Based on their responses to the survey tasks, adults received proficiency scores along three scales that reflect varying degrees of skill in prose, document, and quantitative literacy. The results of the 1992 survey were first published in a report, *Adult Literacy in America: A First Look at the Findings of the National Adult Literacy Survey* (NCES 93-275), in September 1993.

National Assessment of Adult Literacy

The 2003 National Assessment of Adult Literacy (NAAL) was conducted to measure both English literacy and health literacy. The assessment was administered to 19,000 adults (including 1,200 prison inmates) age 16 and over in all 50 states and the District of Columbia. Components of the assessment included a background questionnaire, a prison component, the State Assessment of Adult Literacy (SAAL), a health literacy component, the Fluency Addition to NAAL (FAN), and the Adult Literacy Supplemental Assessment (ALSA). The assessment measured literacy directly through the completion of tasks, and results were reported using the following achievement levels: *Below Basic, Basic, Intermediate*, and *Proficient*.

By comparing the 1992 NALS and 2003 NAAL results, NAAL provides an indicator of the progress of adult literacy in the nation.

National Assessment of Educational Progress

The National Assessment of Educational Progress (NAEP) is a series of cross-sectional studies initially implemented in 1969 to gather information about selected levels of educational achievement across the country. At the national level, NAEP is divided into two assessments: main NAEP and long-term trend NAEP. NAEP has surveyed students at specific ages (9, 13, and 17) for the long-term trend NAEP and at grades 4, 8, and 11 or 12 for the main NAEP, state NAEP, and long-term writing NAEP. NAEP has also surveyed young adults (ages 25 to 35).

NAEP long-term trend assessments are designed to inform the nation of changes in the basic achievement of America's youth. Nationally representative samples of students have been assessed in science, mathematics, and reading at ages 9, 13, and 17 since the early 1970s. Students were assessed in writing at grades 4, 8, and 11 between 1984 and 1996. To measure trends accurately, assessment items (mostly multiple choice) and procedures have remained unchanged since the first assessment in each subject. Recent trend assessments were conducted in 1994, 1996, 1999, and 2004. Nearly 33,000 students took part in the 2004 trend assessment. Results are reported as average scores for the nation, for regions, and for various subgroups of the population, such as racial and ethnic groups. Data from the trend assessments are available in the most recent report, NAEP 2004 Trends in Academic Progress (NCES 2005-464). The most recent long-term trend assessment (of reading and mathematics) was administered in early 2008 with release of data scheduled for 2009.

The 2004 NAEP long-term trend assessments marked the end of tests designed and administered from 1971, marked the beginning of a modified design that provides greater accommodations for students with disabilities and English language learners, and limited the assessments to reading and math. Science and writing are now assessed only in main NAEP.

To ensure that the assessment results can be reported on the same trend line, a "bridge" assessment was administered in addition to the modified assessment. Students were randomly assigned to take either the bridge assessment or the modified assessment. The bridge assessment replicated the instrument given in 1999 and used the same administrative techniques. The 2004 modified assessment provides the basis of comparison for all future assessments, and the bridge links its results to the results from the past 30 years.

In the main national NAEP, a nationally representative sample of students is assessed at grades 4, 8, and 12 in various academic subjects. The assessments change periodically and are based on frameworks developed by the National Assessment Governing Board (NAGB). Items include both multiple-choice and constructed-response (requiring written answers) items. Results are reported in two ways. Average scores are reported for the nation, for participating states and jurisdictions, and for subgroups of the population. In addi-

tion, the percentage of students at or above *Basic*, *Proficient*, and *Advanced* achievement levels is reported for these same groups. The achievement levels are developed by NAGB.

From 1990 until 2001, main NAEP was conducted for states and other jurisdictions that chose to participate (e.g., 47 participated in 1996). Prior to 1992, the national NAEP samples were not designed to support the reporting of accurate and representative state-level results. Separate representative samples of students were selected for each participating jurisdiction. State data are usually available at grades 4 and/or 8, and may not include all subjects assessed in the national-level assessment. In 1994, for example, NAEP assessed reading, geography, and history at the national level at grades 4, 8, and 12; however, only reading at grade 4 was assessed at the state level. In 1996, mathematics and science were assessed nationally at grades 4, 8, and 12; at the state level, mathematics was assessed at grades 4 and 8, and science was assessed at grade 8 only. In 1997, the arts were assessed only at the national level, at grade 8. Reading and writing were assessed in 1998 at the national level for grades 4, 8, and 12 and at the state level for grades 4 and 8; civics was also assessed in 1998 at the national level for grades 4, 8, and 12. These assessments generally involved about 130,000 students at the national and state levels.

In 2002, under the provisions of the No Child Left Behind Act of 2001, all states began to participate in main NAEP and a separate national sample was replaced with the aggregate of all state samples. In 2002, students were assessed in reading and writing at grades 4, 8, and 12 for the national assessment and at grades 4 and 8 for the state assessment. In 2003, reading and mathematics were assessed at grades 4 and 8 for both national and state assessments.

The NAEP national samples in 2003 and 2005 were obtained by aggregating the samples from each state, rather than by obtaining an independently selected national sample. As a consequence, the size of the national sample increased, and smaller differences between scores across years or types of students were found to be statistically significant than would have been detected in previous assessments.

The assessment data presented in this publication were derived from tests designed and conducted by the Education Commission of the States (from 1969 to 1983) and by the Educational Testing Service (ETS) (from 1983 to the present).

Sample sizes and overall participation rates in 2004 for the long-term trend reading assessment for the bridge group were 5,200 9-year-olds (81 percent), 5,700 13-year-olds (77 percent), and 3,800 17-year-olds (55 percent); for those taking the modified assessment, the sizes and rates for the bridge group were 7,300 9-year-olds (80 percent), 7,500 13-year-olds (76 percent), and 7,600 17-year-olds (56 percent). Sample sizes and overall participation rates for the math assessment for the bridge group were 4,600 9-year-olds (80 percent), 4,700 13-year-olds (76 percent), and 4,600 17-year-olds (57 percent); for those taking the modified assessment, the sizes and rates for the bridge group were 7,500 9-year-olds (80 percent), 8,300 13-year-olds (76 percent), and 8,300 17-year-olds (56 percent).

Sample sizes for the reading proficiency portion of the 1999 NAEP long-term trend study were 5,793 for 9-year-olds, 5,933 for 13-year-olds, and 5,288 for 17-year-olds. Overall participation rates were 78 percent, 73 percent, and 59 percent, respectively. Sample sizes for the math and science portions of the 1999 long-term trend study were 6,032 9-year-olds, 5,941 13-year-olds, and 3,795 17-year-olds.

The main NAEP assessments are conducted separately from the long-term assessments. The 2000 mathematics assessment was administered to 13,511 4th-graders, 15,694 8th-graders, and 13,432 12th-graders. The response rates were 96 percent for 4th-graders, 92 percent for 8th-graders, and 77 percent for 12th-graders. The 2003 mathematics assessment was administered to 190,147 4th-graders and 153,189 8th-graders. About 172,000 4th-graders, 162,000 8th-graders, and over 21,000 12th-graders participated in the 2005 assessment.

In 2000, a reading assessment was administered to 77,914 4th-graders. The response rate was 96 percent. In 2002, a reading assessment was administered to 140,487 4th-graders, 115,176 8th-graders, and 14,724 12th-graders. The 2003 reading assessment was administered to 187,581 4th-graders and 155,183 8th-graders. Over 165,000 4th-graders, 159,000 8th-graders, and 21,000 12th-graders participated in the assessment in 2005.

The 1997–98 writing assessment was administered to 19,816 4th-graders, 20,586 8th-graders, and 19,505 12th-graders. The response rates were 95 percent for the 4th-graders, 92 percent for the 8th-graders, and 80 percent for the 12th-graders. The 2002 writing assessment was administered to 139,200 4th-graders, 118,500 8th-graders, and 18,500 12th-graders. The 2007 writing assessment was administered to 139,900 8th-graders and 27,900 12th-graders with response rates of 92 percent and 80 percent respectively.

In 1995–96, a science assessment was administered to 7,305 4th-graders, 7,774 8th-graders, and 7,537 12th-graders. The response rates were 94 percent for the 4th-graders, 94 percent for the 8th-graders, and 93 percent for the 12th-graders. In 2000, a science assessment was administered to 16,749 4th-graders, 16,837 8th-graders, and 15,879 12th-graders. The response rates were 96 percent for the 4th-graders, 92 percent for the 8th-graders, and 76 percent for the 12th-graders. More than 300,000 students in grades 4, 8, and 12 participated in the 2005 science assessment.

The 1993–94 geography assessment was administered to 5,507 4th-graders, 6,878 8th-graders, and 6,234 12th-graders. The response rates for the assessment were 93 percent for the 4th-graders, 93 percent for the 8th-graders, and 90 percent for the 12th-graders. The 2000–01 geography assessment was administered to 7,779 4th-graders, 10,037 8th-graders, and 9,660 12th-graders. The response rates were 95 percent for the 4th-graders, 93 percent for the 8th-graders, and 77 percent for the 12th-graders. The next geography assessment is scheduled for 2009–10.

The 2006 U.S. history assessment, the first since 2001, was administered to over 29,000 students in grades 4, 8, and 12

nationwide. Students in public, private, Department of Defense, and Bureau of Indian Affairs schools were assessed.

The 2006 civics assessment was administered to approximately 25,000 students in grades 4, 8, and 12 nationwide. The response rates for the respective grades were 95 percent, 92 percent, and 72 percent. The previous civics assessment was in 1998.

In 2006, an economics assessment was administered at grade 12 for the first time. Results are based on a nationally representative sample of 11,500 12th-graders from 590 public and private schools. The student participation rate was 72 percent for public school students and 87 percent for private school students.

Information from NAEP is subject to both nonsampling and sampling errors. Two possible sources of nonsampling error are nonparticipation and instrumentation. Certain populations have been oversampled to ensure samples of sufficient size for analysis. Instrumentation nonsampling error could result from failure of the test instruments to measure what is being taught and, in turn, what the students are learning.

National Education Longitudinal Study of 1988

The National Education Longitudinal Study of 1988 (NELS:88) was the third major secondary school student longitudinal study conducted by NCES. The two studies that preceded NELS:88, the National Longitudinal Study of the High School Class of 1972 (NLS:72) and the High School and Beyond Longitudinal Study (HS&B) in 1980, surveyed high school seniors (and sophomores in HS&B) through high school, postsecondary education, and work and family formation experiences. Unlike its predecessors, NELS:88 began with a cohort of 8th-grade students. In 1988, some 25,000 8th-graders, their parents, their teachers, and their school principals were surveyed. Follow-ups were conducted in 1990 and 1992, when a majority of these students were in the 10th and 12th grades, respectively, and then 2 years after their scheduled high school graduation, in 1994. A fourth follow-up was conducted in 2000.

NELS:88 was designed to provide trend data about critical transitions experienced by young people as they develop, attend school, and embark on their careers. It complements and strengthens state and local efforts by furnishing new information on how school policies, teacher practices, and family involvement affect student educational outcomes (i.e., academic achievement, persistence in school, and par-

ticipation in postsecondary education). For the base year, NELS:88 included a multifaceted student questionnaire, four cognitive tests, a parent questionnaire, a teacher questionnaire, and a school questionnaire.

In 1990, when most of the students were in 10th grade, students, school dropouts, their teachers, and their school principals were surveyed. (Parents were not surveyed in the 1990 follow-up.) In 1992, when most of the students were in 12th grade, the second follow-up conducted surveys of students, dropouts, parents, teachers, and school principals. Also, information from the students' transcripts was collected. The 1994 survey data were collected when most sample members had completed high school. The primary goals of the 1994 survey were (1) to provide data for trend comparisons with NLS:72 and HS&B; (2) to address issues of employment and postsecondary access and choice; and (3) to ascertain how many dropouts had returned to school and by what route. The 2000 follow-up examined the educational and labor market outcomes of the 1988 cohort at a time of transition. Most had been out of high school 8 years; many had completed their postsecondary educations, were embarking on first or even second careers, and were starting families.

National Household Education Surveys Program

The National Household Education Surveys Program (NHES) is a data collection system that is designed to address a wide range of education-related issues. Surveys have been conducted in 1991, 1993, 1995, 1996, 1999, 2001, 2003, 2005, and 2007. NHES targets specific populations for detailed data collection. It is intended to provide more detailed data on the topics and populations of interest than are collected through supplements to other household surveys.

The topics addressed by NHES:1991 were early child-hood education and adult education. About 60,000 house-holds were screened for NHES:1991. In the Early Childhood Education Survey, about 14,000 parents/guardians of 3- to 8-year-olds completed interviews about their children's early educational experiences. Included in this component were participation in nonparental care/education; care arrangements and school; and family, household, and child characteristics. In the NHES:1991 Adult Education Survey, about 9,800 people 16 years of age and older, identified as having participated in an adult education activity in the previous 12 months, were questioned about their activities. Data were

collected on programs and up to four courses, including the subject matter, duration, sponsorship, purpose, and cost. Information on the household and the adult's background and current employment was also collected.

In NHES:1993, nearly 64,000 households were screened. Approximately 11,000 parents of 3- to 7-year-olds completed interviews for the School Readiness Survey. Topics included the developmental characteristics of preschoolers; school adjustment and teacher feedback to parents for kindergartners and primary students; center-based program participation; early school experiences; home activities with family members; and health status. In the School Safety and Discipline Survey, about 12,700 parents of children in grades 3 to 12 and about 6,500 youth in grades 6 to 12 were interviewed about their school experiences. Topics included the school learning environment, discipline policy, safety at school, victimization, the availability and use of alcohol/ drugs, and alcohol/drug education. Peer norms for behavior in school and substance use were also included in this topical component. Extensive family and household background information was collected, as well as characteristics of the school attended by the child.

In NHES:1995, the Early Childhood Program Participation Survey and the Adult Education Survey were similar to those fielded in 1991. In the Early Childhood component, about 14,000 parents of children from birth to third grade were interviewed out of 16,000 sampled, for a completion rate of 90 percent. In the Adult Education Survey, about 25,000 adults were sampled and 80 percent (20,000) completed the interview.

NHES:1996 covered parent and family involvement in education and civic involvement. Data on homeschooling and school choice also were collected. The 1996 survey screened about 56,000 households. For the Parent and Family Involvement in Education Survey, nearly 21,000 parents of children in grades 3 to 12 were interviewed. For the Civic Involvement Survey, about 8,000 youth in grades 6 to 12, about 9,000 parents, and about 2,000 adults were interviewed. The 1996 survey also addressed public library use. Adults in almost 55,000 households were interviewed to support state-level estimates of household public library use.

NHES:1999 collected end-of-decade estimates of key indicators from the surveys conducted throughout the 1990s. Approximately 60,000 households were screened for a total of about 31,000 interviews with parents of children from birth through 12th grade (including about 6,900 infants, toddlers, and preschoolers) and adults age 16 or older not enrolled in grade 12 or below. Key indicators included participation of children in nonparental care and early childhood programs, school experiences, parent/family involvement in education at home and at school, youth community service activities, plans for future education, and adult participation in educational activities and community service.

NHES:2001 included two surveys that were largely repeats of similar surveys included in earlier NHES collections. The Early Childhood Program Participation Survey

was similar in content to the Early Childhood Program Participation Survey fielded as part of NHES:1995, and the Adult Education and Lifelong Learning Survey was similar in content to the Adult Education Survey of NHES:1995. The Before- and After-School Programs and Activities Survey, while containing items fielded in earlier NHES collections, had a number of new items that collected information about what school-age children were doing during the time they spent in child care or in other activities, what parents were looking for in care arrangements and activities, and parent evaluations of care arrangements and activities. Parents of approximately 6,700 children from birth to age 6 who were not yet in kindergarten completed Early Childhood Program Participation Survey interviews. Nearly 10,900 adults completed Adult Education and Lifelong Learning Survey interviews, and parents of nearly 9,600 children in kindergarten through grade 8 completed Before- and After-School Programs and Activities Survey interviews.

NHES:2003 included two surveys: the Parent and Family Involvement in Education Survey and the Adult Education for Work-Related Reasons Survey (the first administration). Whereas previous adult education surveys were more general in scope, this survey had a narrower focus on occupation-related adult education programs. It collected in-depth information about training and education in which adults participated specifically for workrelated reasons, either to prepare for work or a career, or to maintain or improve work-related skills and knowledge they already had. The Parent and Family Involvement Survey expanded on the first survey fielded on this topic in 1996. In 2003, screeners were completed with 32,049 households. About 12,700 of the 16,000 sampled adults completed the Adult Education for Work-Related Reasons Survey, for a response rate of 76 percent. For the Parent and Family Involvement in Education Survey, interviews were completed by the parents of about 12,400 of the 14,900 sampled children in kindergarten through grade 12, yielding a unit response rate of 83 percent.

NHES:2005 included surveys that covered adult education, early childhood program participation, and after-school programs and activities. Data were collected from about 8,900 adults for the Adult Education Survey, parents of about 7,200 children for the Early Childhood Program Participation Survey, and parents of nearly 11,700 children for the After-School Programs and Activities Survey. These surveys were substantially similar to the surveys conducted in 2001, with the exceptions that the Adult Education Survey addressed a new topic, informal learning activities for personal interest, and the Early Childhood Program Participation Survey and After-School Programs and Activities Survey did not collect information about before-school care for school-age children.

NHES:2007 fielded the Parent and Family Involvement in Education Survey and the School Readiness Survey. These surveys were similar in design and content to surveys included in the 2003 and 1993 collections, respectively. New

features added to the Parent and Family Involvement Survey were questions about supplemental education services provided by schools and school districts (including use of and satisfaction with such services), as well as questions to efficiently identify the school attended by the sampled students. New features added to the School Readiness Survey were questions that collected details about TV programs watched by the sampled children. For the Parent and Family Involvement Survey, interviews were completed with parents of 10,681 sampled children in kindergarten through 12th grade, including 10,370 students enrolled in public or private schools and 311 homeschooled children. For the School Readiness Survey, interviews were completed with parents of 2,633 sampled children ages 3 to 6 and not yet in kindergarten. Parents who were interviewed about children in kindergarten through second grade for the Parent and Family Involvement Survey were also asked some questions about these children's school readiness.

National Longitudinal Study of the High School Class of 1972

The National Longitudinal Study of the High School Class of 1972 (NLS:72) began with the collection of base-year survey data from a sample of about 19,000 high school seniors in the spring of 1972. Five follow-up surveys of these students were conducted in 1973, 1974, 1976, 1979, and 1986. NLS:72 was designed to provide the education community with information on the transitions of young adults from high school through postsecondary education and the workplace.

In addition to the follow-ups, a number of supplemental data collection efforts were undertaken. For example, a Post-secondary Education Transcript Study (PETS) was undertaken in 1984; in 1986, the fifth follow-up included a supplement for those who became teachers.

The sample design for NLS:72 was a stratified, two-stage probability sample of 12th-grade students from all schools, public and private, in the 50 states and the District of Columbia during the 1971–72 school year. During the first stage of sampling, about 1,070 schools were selected for participation in the base-year survey. As many as 18 students were selected at random from each of the sample schools. The sizes of both the school and student samples were increased during the first follow-up survey. Beginning with the first follow-up and continuing through the fourth follow-up,

about 1,300 schools participated in the survey and slightly fewer than 23,500 students were sampled. The response rates for each of the different rounds of data collection were 80 percent or higher.

Sample retention rates across the survey years were quite high. For example, of the individuals responding to the baseyear questionnaire, the percentages who responded to the first, second, third, and fourth follow-up questionnaires were about 94, 93, 89, and 83 percent, respectively.

National Postsecondary Student Aid Study

The National Postsecondary Student Aid Study (NPSAS) is a comprehensive nationwide study of how students and their families pay for postsecondary education. It covers nationally representative samples of undergraduates, graduates, and first-professional students in the 50 states, the District of Columbia, and Puerto Rico, including students attending less-than-2-year institutions, community colleges, 4-year colleges, and major universities. Participants include students who do not receive aid and their parents, as well as students who do receive financial aid and their parents. Study results are used to help guide future federal policy regarding student financial aid. NPSAS was conducted every 3 years. Beginning with the 1999–2000 study, NPSAS is conducted every 4 years.

The first NPSAS was conducted during the 1986–87 school year. Data were gathered from about 1,074 colleges, universities, and other postsecondary institutions; 60,000 students; and 14,000 parents. These data provided information on the cost of postsecondary education, the distribution of financial aid, and the characteristics of both aided and nonaided students and their families.

As a part of NPSAS:93, information on 77,000 undergraduates and graduate students enrolled during the school year was collected at 1,000 postsecondary institutions. The sample included students enrolled at any time between July 1, 1992, and June 30, 1993. About 66,000 students and a subsample of their parents were interviewed by telephone. NPSAS:96 contained information on more than 48,000 undergraduate and graduate students from 973 postsecondary institutions enrolled at any time during the 1995–96 school year. NPSAS:2000 included nearly 62,000 students (49,930 undergraduates, 10,640 graduate students, and 1,200 first-professional students) from 999 postsecondary

institutions. NPSAS:04 collected data on 69,100 undergraduates and 31,800 graduate students from 1,360 postsecondary institutions.

National Study of Postsecondary Faculty

The National Study of Postsecondary Faculty (NSOPF) was designed to provide data about faculty to postsecondary researchers, planners, and policymakers. NSOPF is the most comprehensive study of faculty in postsecondary education institutions ever undertaken.

The first cycle of NSOPF (NSOPF:88) was conducted by NCES with support from the National Endowment for the Humanities (NEH) in 1987-88 with a sample of 480 colleges and universities, over 3,000 department chairpeople, and over 11,000 instructional faculty. The second cycle of NSOPF (NSOPF:93) was conducted by NCES with support from NEH and the National Science Foundation in 1992-93. NSOPF:93 was limited to surveys of institutions and faculty, but with a substantially expanded sample of 974 colleges and universities, and 31,354 faculty and instructional staff. The third cycle, NSPOF:99, included 960 degree-granting postsecondary institutions and approximately 18,000 faculty and instructional staff. The fourth cycle of NSOPF was conducted in 2003-04 and included 1,080 degree-granting postsecondary institutions and approximately 26,000 faculty and instructional staff. The fifth cycle is scheduled to take place in 2008-09.

Private School Universe Survey

The purposes of the Private School Universe Survey (PSS) data collection activities are (1) to build an accurate and complete list of private schools to serve as a sampling frame for NCES sample surveys of private schools; and (2) to report data on the total number of private schools, teachers, and stu-

dents in the survey universe. Begun in 1989, the PSS has been conducted every 2 years, and data for the 1989–90, 1991–92, 1993–94, 1995–96, 1997–98, 1999–2000, 2001–02, 2003–04, and 2005–2006 school years have been released.

The PSS produces data similar to that of the CCD for public schools, and can be used for public-private comparisons. The data are useful for a variety of policy and research-relevant issues, such as the growth of religiously affiliated schools, the number of private high school graduates, the length of the school year for various private schools, and the number of private school students and teachers.

The target population for this universe survey is all private schools in the United States that meet the PSS criteria of a private school (i.e., the private school is an institution that provides instruction for any of grades K through 12, has one or more teachers to give instruction, is not administered by a public agency, and is not operated in a private home). The survey universe is composed of schools identified from a variety of sources. The main source is a list frame initially developed for the 1989–90 PSS. The list is updated regularly by matching it with lists provided by nationwide private school associations, state departments of education, and other national guides and sources that list private schools. The other source is an area frame search in approximately 124 geographic areas, conducted by the U.S. Census Bureau.

Further information on the PSS may be obtained from

Projections of Education Statistics

Since 1964, NCES has published projections of key statistics for elementary and secondary schools and institutions of higher education. The latest report is titled *Projections of Education Statistics to 2017* (NCES 2008-078). These projections include statistics for enrollments, instructional staff, graduates, earned degrees, and expenditures. These reports include several alternative projection series and a methodology section describing the techniques and assumptions used to prepare them. Data in this edition of the *Digest* reflect the middle alternative projection series.

Differences between the reported and projected values are, of course, almost inevitable. An evaluation of past projections revealed that, at the elementary and secondary level, projections of enrollments have been quite accurate: mean absolute percentage differences for enrollment ranged from 0.3 to 1.3 percent for projections from 1 to 5 years in the future, while those for teachers were less than 3 percent. At the higher education level, projections of

enrollment have been fairly accurate: mean absolute percentage differences were 5 percent or less for projections from 1 to 5 years into the future.

Further information on *Projections of Education Statistics* may be obtained from

Recent College Graduates Study

Between 1976 and 1991, NCES conducted periodic surveys of baccalaureate and master's degree recipients 1 year after graduation with the Recent College Graduates (RCG) Study. The RCG Study—which has been replaced by the Baccalaureate and Beyond Longitudinal Study (B&B) (see listing above)—concentrated on those graduates entering the teaching profession. The study linked respondents' major field of study with outcomes such as whether the respondent entered the labor force or was seeking additional education. Labor force data collected included employment status (unemployed, employed part time, or employed full time), occupation, salary, career potential, relation to major field of study, and need for a college degree. To obtain accurate results on teachers, graduates with a major in education were oversampled. The last two studies oversampled education majors and increased the sampling of graduates with majors in other fields.

For each of the selected institutions, a list of graduates by major field of study was obtained, and a sample of graduates was drawn by major field of study. Graduates in certain major fields of study (e.g., education, mathematics, physical sciences) were sampled at higher rates than were graduates in other fields. Roughly 1 year after graduation, the sample of graduates was located, contacted by mail or telephone, and asked to respond to the questionnaire.

The locating process was more detailed than that in most surveys. Nonresponse rates were directly related to the time, effort, and resources used in locating graduates, rather than to graduates' refusals to participate. Despite the difficulties in locating graduates, RCG response rates are comparable to studies that do not face problems locating their sample membership.

The 1976 study of 1974–75 college graduates was the first, and smallest, of the series. The sample consisted of 211 schools, of which 200 (96 percent) responded. Of the 5,854 graduates in the sample, 4,350 responded, for a response rate of 79 percent.

The 1981 study was somewhat larger, covering 297 institutions and 15,852 graduates. Responses were obtained

from 283 institutions, for an institutional response rate of 95 percent, and from 9,312 graduates (716 others were determined to be out of scope), for a response rate of 74 percent.

The 1985 study sampled 404 colleges and 18,738 graduates, of whom 17,853 were found to be in scope. Responses were obtained from 13,200 graduates, for a response rate of 78 percent. The response rate for colleges was 98 percent. The 1987 study sampled 21,957 graduates. Responses were received from 16,878, for a response rate of nearly 80 percent.

The 1991 study sampled 18,135 graduates of 400 bachelor's and master's degree-granting institutions, including 16,172 bachelor's degrees recipients and 1,963 master's degree recipients receiving diplomas between July 1, 1989, and June 30, 1990. Random samples of graduates were selected from lists stratified by field of study. Graduates in education, mathematics, and the physical sciences were sampled at a higher rate, as were minority graduates, to provide a sufficient number of these graduates for analysis purposes. The graduates included in the sample were selected in proportion to the institution's number of graduates. The institutional response rate was 95 percent, and the graduate response rate was 83 percent.

Appendix table A-3 contains sample sizes for number of graduates, by field, for the 1976, 1981, 1985, 1987, and 1991 surveys.

School Survey on Crime and Safety (SSOCS)

The most recent School Survey on Crime and Safety (SSOCS) for which data are available was conducted by NCES in spring/summer of the 2005–06 school year. SSOCS focuses on incidents of specific crimes/offenses and a variety of specific discipline issues in public schools. It also covers characteristics of school policies, school violence prevention programs and policies, and school characteristics that have been associated with school crime. The survey was conducted with a nationally representative sample of regular public elementary, middle, and high schools in the 50 states and the District of Columbia. Special education, alternative, and vocational schools; schools in the other jurisdictions; and schools that taught only prekindergarten, kindergarten, or adult education were not included in the sample.

The sampling frame for the 2006 SSOCS was constructed from the public school universe file created for the 2003-04 Schools and Staffing Survey from the 2003-04 Common Core of Data (CCD) Public Elementary/Secondary School Universe File. The sample was stratified by instructional level, type of locale (urbanicity), and enrollment size. The sample of schools in each instructional level was allocated to each of the 16 cells formed by the cross-classification of the four categories of enrollment size and four types of locale. The sample was allocated to each subgroup in proportion to the sum of the square roots of the total student enrollment in each school in that stratum. The effective sample size within each stratum was then inflated to account for nonresponse. Once the final sample sizes were determined for each of the 64 strata, the subgroups were sorted by region and percent minority enrollment, and an initial sample of 3,565 schools was selected. Of those schools, 2,724 completed the survey. In March 2006, questionnaires were mailed to school principals, who were asked to complete the survey or to have it completed by the person at the school most knowledgeable about discipline issues. The weighted overall response rate was 80.6 percent, and item nonresponse rates ranged from 0 to 33.7 percent. A nonresponse bias analysis was conducted on the 13 items with weighted item nonresponse rates greater than 15 percent, and it was determined that the increased potential for bias in these items was not enough to warrant their exclusion from the data file. Weights were developed to adjust for the variable probabilities of selection and differential nonresponse and can be used to produce national estimates for regular public schools in the 2005-06 school year.

Schools and Staffing Survey

The Schools and Staffing Survey (SASS) is a set of linked questionnaires used to collect data on the nation's public and private elementary and secondary teaching force, characteristics of schools and school principals, demand for teachers, and school/school district policies. SASS data are collected through a mail questionnaire with telephone follow-up. SASS was first conducted for NCES by the Census Bureau during the 1987-88 school year. SASS subsequently was conducted in 1990-91, 1993-94, 1999-2000, 2003-04, and 2007-08 (2007-08 to be released in June 2009). The 1990-91, 1993-94, 1999-2000, 2003-04, and 2007-08 SASS also obtained data on Bureau of Indian Education

(BIE) schools (schools funded or operated by the BIE). The universe of charter schools in operation in 1998-99 was given the Charter School Questionnaire to complete as part of the 1999-2000 SASS. In the 2003-04 SASS administration, charter schools were not administered a separate questionnaire, but were included in the public school sample. Another change in the 2003-04 administration included a revised data collection methodology using a primary in-person contact with the school with the aim of reducing the field follow-up phase. Also, school library media centers were surveyed only in the public and BIE schools. (See discussion on the School Library Media Centers Survey in "Library Statistics Program," above.)

The 2003-04 SASS estimates are based on a sample consisting of approximately 8,000 public schools, 2,500 private schools, and 145 BIE schools. The public school sample for the 2003-04 SASS was based on an adjusted public school universe file from the 2001–02 school year Common Core of Data (CCD), the compilation of all the nation's public school districts and public schools. The sampling frame includes regular public schools, Department of Defense-operated military base schools in the United States, and other schools, such as special education, vocational, and alternative schools. SASS is designed to provide national estimates for public and private school characteristics and state estimates for school districts, public schools, principals, and teachers. In addition, the teacher survey is designed to allow comparisons between new and experienced teachers and between bilingual/English as a second language (ESL) teachers and other teachers.

The BIE sample consisted of all BIE schools that met the SASS definition of a school.

The private school sample for the 2003–04 SASS was selected from the 2001-02 Private School Universe Survey, supplemented with updates from state lists collected by the Census Bureau and lists by private school associations and religious denominations. Private school estimates are available at the national level and by private school affiliation.

In 2003-04, the weighted response rate for the School District Questionnaire was 82.9 percent. Weighted response rates for the Public School Principal Questionnaire, the Private School Principal Questionnaire, and the BIE-funded School Principal Questionnaire were 82.2 percent, 74.9 percent, and 90.7 percent, respectively.

Weighted response rates in 2003-04 for the Public School Questionnaire, the Private School Questionnaire, and the BIE-funded School Questionnaire were 80.8 percent, 75.9 percent, and 89.5 percent, respectively. The weighted overall response rates were 84.8 percent for public school teachers, 82.4 percent for private school teachers, and 92.0 percent for BIE-funded school teachers.

The Data Analysis System at http://nces.ed.gov/sur veys/sass/das.asp may be used to access public school, public teacher, private school, and private teacher publicuse data. There is also a methodology report on SASS, the Quality Profile for SASS, Rounds 1–3: 1987–1995, Aspects of the Quality of Data in the Schools and Staffing Surveys (SASS) (NCES 2000-308).

Teacher Follow-up Survey (TFS)

The Teacher Follow-up Survey is a SASS survey whose purpose is to determine how many teachers remain at the same school, move to another school, or leave the profession in the year following a SASS administration. It is administered to elementary and secondary teachers in the fifty states and the District of Columbia. The TFS uses two questionnaires, one for teachers who left teaching since the previous SASS administration and another for those who are still teaching either in the same school as last year or in a different school. The objective of the TFS is to focus on the characteristics of each group in order to answer questions about teacher mobility and attrition.

The National Longitudinal Transition Study-2

The National Longitudinal Transition Study-2 (NLTS-2) is a follow-up of the original National Longitudinal Transition Study conducted from 1985 through 1993. NLTS-2 began in 2001 with a sample of special education students who were ages 13 through 16 and in at least 7th grade on December 1, 2000. The study will continue for 10 years and

is designed to provide a national picture of these youths' experiences and achievements as they transition into adulthood. Data will be collected from parents, youth, and schools by survey, telephone interviews, student assessments, and transcripts.

NLTS-2 is designed to align with the original NLTS by including many of the same questions and data items, thus allowing comparisons between the NLTS and NLTS-2 youths' experiences. NLTS-2 also includes items that have been collected in other national databases to permit comparisons between NLTS-2 youth and the general youth population.

Office for Civil Rights

OCR Elementary and Secondary School Survey

The OCR Elementary and Secondary School (E&S) Survey has been used since 1968 by the U.S. Department of Education's Office for Civil Rights (OCR) to obtain trend data from the nation's public elementary and secondary schools. The E&S Survey provides information about the enrollment of students in public schools in every state and about some education services provided to those students. These data are reported by race/ethnicity, sex, and disability.

Data in the E&S Survey are collected pursuant to 34 C.F.R. Section 100.6(b) of the Department of Education regulation implementing Title VI of the Civil Rights Act of 1964. The requirements are also incorporated by reference in Department regulations implementing Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975. School, district, state, and national data are currently available. Data from individual public schools and districts are used to generate projected national and state data.

In recent surveys, the sample has been approximately 6,000 districts and 60,000 schools; however, in 2000, data were collected from all public school districts. In sample surveys, the following districts are sampled with certainty: districts having more than 25,000 students; all districts in states having 25 or fewer public school districts; and districts subject to federal court order and monitored by the U.S. Department of Justice. The survey is conducted biennially (with few exceptions). Data currently are available from the 2006 survey.

Data marked with an exclamation point (!) have a nonresponse rate of more than 30 percent. Numbers should be used with caution due to large statistical uncertainty in the esti-

mate. The methodology for flagging "large statistical uncertainties" is based on a standard error for each projected item.

Office of Special Education and Rehabilitative Services

Annual Report to Congress on the Implementation of the Individuals With Disabilities Education Act

The Individuals With Disabilities Education Act (IDEA), formerly the Education of the Handicapped Act (EHA), requires the Secretary of Education to transmit to Congress annually a report describing the progress made in serving the nation's children with disabilities. This annual report contains information on children served by public schools under the provisions of Part B of the IDEA and on children served in state-operated programs for the disabled under Chapter I of the Elementary and Secondary Education Act.

Statistics on children receiving special education and related services in various settings and school personnel providing such services are reported in an annual submission of data to the Office of Special Education and Rehabilitative Services (OSERS) by the 50 states, the District of Columbia, and the outlying areas. The child count information is based on the number of children with disabilities receiving special education and related services on December 1 of each year. Count information is available from http://www.ideadata.org.

Since each participant in programs for the disabled is reported to OSERS, the data are not subject to sampling error. However, nonsampling error can arise from a variety of sources. Some states follow a noncategorical approach to the delivery of special education services, but produce counts by disabling condition because Part B of the EHA requires it. In those states that do categorize their disabled students, definitions and labeling practices vary.

Further information on this annual report to Congress may be obtained from

Office of Vocational and Adult Education

Division of Adult Education and Literacy

The Division of Adult Education and Literacy (DAEL) promotes programs that help American adults get the basic skills they need to be productive workers, family members, and citizens. The major areas of support are Adult Basic Education, Adult Secondary Education, and English Language Acquisition. These programs emphasize basic skills such as reading, writing, math, English language competency, and problem solving. Each year, DAEL reports enrollment numbers in state-administered adult education programs for these major areas of support for all 50 states, the District of Columbia, and the eight U.S. jurisdictions (American Samoa, the Federated States of Micronesia, Guam, the Marshall Islands, the Northern Marianas, Palau, Puerto Rico, and the U.S. Virgin Islands).

Further information on DAEL may be obtained from

Office of Vocational and Adult Education Division of Adult Education and Literacy U.S. Department of Education 400 Maryland Avenue SW Washington, DC 20202 http://www.ed.gov/about/offices/list/ovae/pi/AdultEd/

Other Governmental Agencies

Bureau of Labor Statistics

Consumer Price Indexes

The Consumer Price Index (CPI) represents changes in prices of all goods and services purchased for consumption by urban households. Indexes are available for two population groups: a CPI for All Urban Consumers (CPI-U) and a CPI for Urban Wage Earners and Clerical Workers (CPI-W). Unless otherwise specified, data in the *Digest* are adjusted for inflation using the CPI-U. These values are frequently adjusted to a school-year basis by averaging the July through June figures. Price indexes are available for the United States, the four Census regions, size of city, cross-classifications of regions and size classes, and 26 local areas. The major uses of the CPI include as an economic indicator, as a deflator of other economic series, and as a means of adjusting income.

Also available is the Consumer Price Index research series using current methods (CPI-U-RS), which presents an estimate of the CPI-U from 1978 to the present that incorporates most of the improvements that the Bureau of Labor Statistics has made over that time span into the entire series. The historical price index series of the CPI-U does not reflect these changes, though these changes do make the present and future CPI more accurate. The limitations of the CPI-U-RS include considerable uncertainty surrounding the magnitude

of the adjustments and the several improvements in the CPI that have not been incorporated into the CPI-U-RS for various reasons. Nonetheless, the CPI-U-RS can serve as a valuable proxy for researchers needing a historical estimate of inflation using current methods.

Further information on consumer price indexes may be obtained from

Consumer Price Indexes Bureau of Labor Statistics U.S. Department of Labor 2 Massachusetts Avenue NE Washington, DC 20212 http://www.bls.gov/cpi

Employment and Unemployment Surveys

Statistics on the employment and unemployment status of the population and related data are compiled by the Bureau of Labor Statistics (BLS) using data from the Current Population Survey (CPS) (see below) and other surveys. The Current Population Survey, a monthly household survey conducted by the U.S. Census Bureau for the Bureau of Labor Statistics, provides a comprehensive body of information on the employment and unemployment experience of the Nation's population, classified by age, sex, race, and various other characteristics.

U.S. Department of Labor
2 Massachusetts Avenue NE
Washington, DC 20212
cpsinfo@bls.gov
http://www.bls.gov/bls/employment.htm

Census Bureau

Census of Population—Education in the United States

Some tables in this report are based on a part of the decennial census that consists of questions asked of a one-in-six sample of people and housing units in the United States. This sample was asked more detailed questions about income, occupation, and housing costs, in addition to general demographic information.

School Enrollment. People classified as enrolled in school reported attending a "regular" public or private school or college. They were asked whether the institution they attended was public or private and what level of school they were enrolled in.

Educational Attainment. Data for educational attainment were tabulated for people age 15 and older and classified according to the highest grade completed or the highest degree received. Instructions were also given to include the

level of the previous grade attended or the highest degree received for people currently enrolled in school.

Poverty Status. To determine poverty status, answers to income questions were used to make comparisons to the appropriate poverty threshold. All people except those who were institutionalized, people in military group quarters and college dormitories, and unrelated people under age 15 were considered. If the total income of each family or unrelated individual in the sample was below the corresponding cutoff, that family or individual was classified as "below the poverty level."

http://www.census.gov/prod/www/abs/decenial.html
http://www.census.gov/main/www/cen2000.html

Current Population Survey

The Current Population Survey (CPS) is a monthly survey of about 60,000 households conducted by the U.S. Census Bureau for the Bureau of Labor Statistics. The CPS is the primary source of information of labor force statistics for the U.S. noninstitutionalized population (e.g., excludes military personnel and their families living on bases and inmates of institutions). In addition, supplemental questionnaires are used to provide further information about the U.S. population. Specifically, in October, detailed questions regarding school enrollment and school characteristics are asked. In March, detailed questions regarding income are asked.

The current sample design, introduced in July 2001, includes about 72,000 households. Each month about 60,000 of the 72,000 households are eligible for interview and of those 7 to 8 percent are not interviewed because of temporary absence or unavailability. Information is obtained each month from those in the household 15 years of age and older and demographic data are collected for children 0–14 years of age. Prior to July 2001, data was collected in the CPS from about 50,000 dwelling units. The samples are initially selected based on the decennial census files and are periodically updated to reflect new housing construction.

The estimation procedure employed for monthly CPS data involves inflating weighted sample results to independent estimates of characteristics of the civilian noninstitutional population in the United States by age, sex, and race. These independent estimates are based on statistics from decennial censuses; statistics on births, deaths, immigration, and emigration; and statistics on the population in the armed services. Generalized standard error tables are provided in the *Current Population* Reports or methods for deriving standard errors can be found within the CPS tech-

nical documentation at http://www.census.gov/apsd/tech doc/cps/cps-main.html. The CPS data are subject to both nonsampling and sampling errors.

Caution should also be used when comparing data from 1994 through 2001, which reflect 1990 census-based population controls, with data from 1993 and earlier, which reflect 1980 or earlier census-based population controls, as well as with data from 2002 onward, which reflect 2000 census-based controls. Changes in population controls generally have relatively little impact on summary measures such as means, medians, and percentage distributions. They can have a significant impact on population counts. For example, use of the 1990 census-based population control resulted in about a 1 percent increase in the civilian noninstitutional population and in the number of families and households. Thus, estimates of levels for data collected in 1994 and later years will differ from those for earlier years by more than what could be attributed to actual changes in the population. These differences could be disproportionately greater for certain subpopulation groups than for the total population.

Further information on CPS may be obtained from

Education and Social Stratification Branch Population Division Census Bureau U.S. Department of Commerce Washington, DC 20233 http://www.census.gov/cps

Dropouts

Each October, the Current Population Survey (CPS) includes supplemental questions on the enrollment status of the population 3 years old and over as part of the monthly basic survey on labor force participation. In addition to gathering the information on school enrollment, with the limitations on accuracy as noted below under "School Enrollment," the survey data permit calculations of dropout rates. Both status and event dropout rates are tabulated from the October CPS. The Digest provides information using the status rate calculation. Event rates describe the proportion of students who leave school each year without completing a high school program. Status rates provide cumulative data on dropouts among all young adults within a specified age range. Status rates are higher than event rates because they include all dropouts ages 16 through 24, regardless of when they last attended school.

In addition to other survey limitations, dropout rates may be affected by survey coverage and exclusion of the institutionalized population. The incarcerated population has grown more rapidly and has a higher dropout rate than the general population. Dropout rates for the total population might be higher than those for the noninstitutionalized population if the prison and jail populations were included in the dropout rate calculations. On the other hand, if military personnel, who tend to be high school graduates, were

included, it might offset some or all of the impact from the theoretical inclusion of the jail and prison population.

Another area of concern with tabulations involving young people in household surveys is the relatively low coverage ratio compared to older age groups. CPS undercoverage results from missed housing units and missed people within sample households. Overall CPS undercoverage is estimated to be about 8 percent. CPS undercoverage varies with age, sex, and race. Generally, undercoverage is larger for males than for females and larger for Blacks and other races combined than for Whites. For example, in 2007 the undercoverage ratio for Black 20- to 24-year-old males is 31 percent. Ratio estimation to independent age-sex-race-Hispanic population controls partially corrects for the bias due to undercoverage. Further information on CPS methodology may be obtained from http://www.census.gov/cps.

Further information on the calculation of dropouts and dropout rates may be obtained from *Dropout Rates in the United States: 2005* at http://nces.ed.gov/pubs2007/dropout05/ or by contacting

Chris Chapman

Early Childhood, International, and Crosscutting Studies Division

Early Childhood and Household Studies Program National Center for Education Statistics 1990 K Street NW Washington, DC 20006 chris.chapman@ed.gov

Educational Attainment

Reports documenting educational attainment are produced by the Census Bureau using March CPS supplement (Annual Social and Economic Supplement (ASEC)) results. The sample size for the 2007 March supplement increased to about 98,000 households, with about 83,000 eligible for interview and about 76,000 interviews completed. The latest release is *Educational Attainment in the United States:* 2007, which may be downloaded at http://www.census.gov/population/www/socdemo/education/cps2007.html.

In addition to the general constraints of CPS, some data indicate that the respondents have a tendency to overestimate the educational level of members of their household. Some inaccuracy is due to a lack of the respondent's knowledge of the exact educational attainment of each household member and the hesitancy to acknowledge anything less than a high school education. Another cause of nonsampling variability is the change in the numbers in the armed services over the years.

The March 2007 basic CPS response rate was 90.6 percent and the ASEC household-level response rate was 91.5 percent for a total supplement response rate of 82.9 percent.

Further information on CPS's educational attainment may be obtained from the CPS website at http://www.census.gov/cps.

Further information on CPS's educational attainment data may be obtained from

Education and Social Stratification Branch
Census Bureau
U.S. Department of Commerce
Washington, DC 20233
http://www.census.gov/population/www/socdemo/educ-attn.html

School Enrollment

Each October, the Current Population Survey (CPS) includes supplemental questions on the enrollment status of the population 3 years old and over. Prior to 2001, the October supplement consisted of approximately 47,000 interviewed households. Beginning with the October 2001 supplement, the sample was expanded by 9,000 to a total of approximately 56,000 interviewed households. The main sources of nonsampling variability in the responses to the supplement are those inherent in the survey instrument. The question of current enrollment may not be answered accurately for various reasons. Some respondents may not know current grade information for every student in the household, a problem especially prevalent for households with members in college or in nursery school. Confusion over college credits or hours taken by a student may make it difficult to determine the year in which the student is enrolled. Problems may occur with the definition of nursery school (a group or class organized to provide educational experiences for children), where respondents' interpretations of "educational experiences" vary.

The October 2006 basic CPS household-level response rate was 91.9 percent and the school enrollment supplement person-level response rate was 96.1 percent. Since these rates are determined at different levels they cannot be combined to derive an overall response rate.

Further information on CPS methodology may be obtained from http://www.census.gov/cps.

Government Finances

The Census Bureau conducts an Annual Survey of Government Finances as authorized by law under Title 13, United States Code, Section 182. This survey covers the entire range of government finance activities: revenue, expenditure, debt, and assets. Revenues and expenditures comprise actual receipts and payments of a government and its agencies, including government-operated enterprises, utilities, and public trust funds. The expenditure-reporting

categories comprise all amounts of money paid out by a government and its agencies, with the exception of amounts for debt retirement and for loan, investment, agency, and private trust transactions.

Most of the federal government statistics are based on figures that appear in *The Budget of the United States Government*. Since the classification used by the Census Bureau for reporting state and local government finance statistics differs in a number of important respects from the classification used in the U.S. budget, it was necessary to adjust the federal data. For this report, federal budget expenditures include interest accrued, but not paid, during the fiscal year; Census data on interest are on a disbursement basis.

State government finances are based primarily on the annual Census Bureau Survey of Government Finances. Census analysts compile figures from official records and reports of the state governments for most of the state financial data. States differ in the ways they administer activities; they may fund such activities directly, or they may disburse the money to a lower level government or government agency. Therefore, caution is advised when attempting to make a direct comparison between states on their state fiscal aid data.

The sample of local governments is drawn from the periodic Census of Governments and consists of certain local governments sampled with certainty plus a sample below the certainty level. Finance data for all school districts are collected on an annual basis and released through the NCES Common Core of Data system.

The statistics in *Government Finances* that are based wholly or partly on data from the sample are subject to sampling error. State government finance data are not subject to sampling error. Estimates of major U.S. totals for local governments are subject to a computed sampling variability of less than one-half of 1 percent. The estimates are also subject to the inaccuracies in classification, response, and processing that would occur if a complete census had been conducted under the same conditions as the sample.

Further information on government finances may be obtained from

Governments Division
Census Bureau
U.S. Department of Commerce
Washington, DC 20233
http://www.census.gov/govs/www/

Survey of Income and Program Participation

The main objective of the Survey of Income and Program Participation (SIPP) is to provide accurate and comprehensive information about the income and program participation of individuals and households in the United States, and about the principal determinants of income and program participation. SIPP offers detailed information on cash and noncash income on a subannual basis. The survey also collects data on taxes, assets, liabilities, and participation in government transfer

programs. SIPP data allow the government to evaluate the effectiveness of federal, state, and local programs.

The survey design is a continuous series of national panels, with sample size ranging from approximately 14,000 to 36,700 interviewed households. The duration of each panel ranges from 2 1/2 years to 4 years. The SIPP sample is a multistage-stratified sample of the U.S. civilian noninstitutionalized population. For the 1984–93 panels, a panel of households was introduced each year in February. A 4-year panel was introduced in April 1996. A 2000 panel was introduced in February 2000 for two waves. A 3-year 2001 panel was introduced in February 2001. All household members 15 years old and over are interviewed by self-response, if possible. Proxy response is permitted when household members are not available for interviewing.

The SIPP content is built around a "core" of labor force, program participation, and income questions designed to measure the economic situation of people in the United States. These questions expand the data currently available on the distribution of cash and noncash income and are repeated at each interviewing wave. The survey uses a 4-month recall period, with approximately the same number of interviews being conducted in each month of the 4-month period for each wave. Interviews are conducted by personal visit and by decentralized telephone.

The survey has been designed to also provide a broader context for analysis by adding questions on a variety of topics not covered in the core section. These questions are labeled "topical modules" and are assigned to particular interviewing waves of the survey. Topics covered by the modules include personal history, child care, wealth, program eligibility, child support, disability, school enrollment, taxes, and annual income.

Further information on the SIPP may be obtained from

Economics and Statistics Administration Census Bureau U.S. Department of Commerce Washington, DC 20233 http://www.census.gov/sipp/overview.html

National Institute on Drug Abuse

The National Institute on Drug Abuse of the U.S. Department of Health and Human Services is the primary supporter of the long-term study entitled "Monitoring the Future: A Continuing Study of the Lifestyles and Values of Youth," conducted by the University of Michigan Institute for Social Research. One component of the study deals with student drug abuse. Results of the national sample survey have been published annually since 1975. With the exception of 1975, when about 9,400 students participated in the survey, the annual samples comprise roughly 16,000 students in 133 schools. Students complete self-administered questionnaires given to them in their classrooms by University of Michigan personnel. Each year, 8th-, 10th-, and 12th-graders are surveyed (12th-graders since 1975, and 8th- and 10th-graders since 1991). The 8th- and 10th-grade surveys are anonymous,

while the 12th-grade survey is confidential. The 10th-grade samples involve about 17,000 students in 140 schools each year, while the 8th-grade samples have approximately 18,000 students in about 150 schools. In all, approximately 50,000 students from about 420 public and private secondary schools are surveyed annually. Over the years, the response rate has varied from 77 to 86 percent. Beginning with the class of 1976 a randomly selected sample from each senior class has been followed in the years after high school on a continuing basis.

Understandably, there is some reluctance to admit illegal activities. Also, students who are out of school on the day of the survey are nonrespondents, and the survey does not include high school dropouts. The inclusion of absentees and dropouts would tend to increase the proportion of individuals who had used drugs. A 1983 study found that the inclusion of absentees could increase some of the drug usage estimates by as much as 2.7 percentage points. (Details on that study and its methodology were published in *Drug Use Among American High School Students, College Students, and Other Young Adults*, by L.D. Johnston, P.M. O'Malley, and J.G. Bachman, available from the National Clearinghouse on Drug Abuse Information, 5600 Fishers Lane, Rockville, MD 20857.)

Further information on the Monitoring the Future drug abuse survey may be obtained from

National Institute on Drug Abuse Division of Epidemiology and Statistical Analysis 5600 Fishers Lane Rockville, MD 20857 http://www.monitoringthefuture.org

National Science Foundation

Federal Funds Survey

The annual Federal Funds Survey is the primary source of information about federal funding for R&D in the United States. It is used by policymakers in the executive and legislative branches of the federal government in determining policies, laws, and regulations affecting science; it is also used by those who follow science trends in every sector of the economy, including university administrators and professors, economic and political analysts, R&D managers inside and outside the government, the science press, and leading members of the science community in the United States and around the world.

The survey is completed by the 15 federal departments and their 70 subagencies and 15 independent agencies that conduct R&D programs. The sample is obtained from information in the president's budget submitted to Congress.

Federal funds data, as collected, span 3 government fiscal years: the fiscal year just completed, the current fiscal year, and the president's budget year. Actual data are collected for the year just completed; estimates are obtained for the current fiscal year and the budget year.

The data is collected and managed online; this system was designed to help improve survey reporting by offering respondents direct online reporting and editing. The Federal Funds Survey has a response rate of 100 percent with no known item nonresponse, The information included in this survey has been stable since FY 1973, when federal obligations for research to universities and colleges by agency and detailed Science & Engineering fields were added to the survey.

Further information on federal funds for research and development may be obtained from

Survey of Earned Doctorates

The Survey of Earned Doctorates has collected basic statistics from the universe of doctoral recipients in the United States each year since 1958. It has been supported by five federal agencies: the National Science Foundation, in conjunction with the U.S. Department of Education; the National Endowment for the Humanities; the U.S. Department of Agriculture; and the National Institutes of Health.

With the assistance of graduate deans, a survey form is distributed to each person completing the requirements for a doctorate. Of the 45,596 new research doctorates granted in 2006, the response rate was 92 percent. The questionnaire obtains information on sex, race/ethnicity, marital status, citizenship, disabilities, dependents, specialty field of doctorate, educational institutions attended, time spent in completion of doctorate, financial support, education debt, postgraduation plans, and educational attainment of parents.

Survey of Graduate Students and Postdoctorates in Science and Engineering

The Survey of Graduate Students and Postdoctorates in Science and Engineering, also known as the graduate student survey (GSS), is an annual survey at the academic department level of all U.S. institutions offering graduate programs in any science, engineering, or health field. It is an institution-based survey that provides data on the number and characteristics of

graduate science and engineering students enrolled in approximately 600 U.S. academic institutions.

Data for the 2006 GSS were collected at the beginning of academic year 2006–07. This survey includes all branch campuses, affiliated research centers, and separately organized components—such as medical or dental schools, nursing schools, and schools of public health—from all academic institutions that offer doctor's and master's degree programs. Only those graduate students enrolled for credit in a master's or doctoral program in science or engineering in the fall of 2006 were included in the survey. M.D., D.O., D.V.M., or D.D.S. candidates, interns, and residents were counted if they were concurrently working on a master's or doctoral degree in science or engineering or were enrolled in a joint M.D./Ph.D. program.

The final 2006 survey universe consisted of 707 reporting units (schools) at 586 graduate institutions: 212 master's-granting institutions and 495 reporting units associated with 374 doctorate-granting institutions.

Substance Abuse and Mental Health Services Administration

National Survey on Drug Use and Health

Conducted by the federal government since 1971, the National Survey on Drug Use and Health (NSDUH) is an annual survey of the civilian, noninstitutionalized population of the United States age 12 or older. It is the primary source of information on the prevalence, patterns, and consequences of alcohol, tobacco, and illegal drug abuse. The survey collects data by administering questionnaires to a representative sample of the population (since 1999, the NSDUH interview has been carried out using computer-assisted interviewing). NSDUH collects information from residents of households, noninstitutional group quarters, and civilians living on military bases. The main results of the NSDUH present national estimates of rates of use, numbers of users, and other measures related to illicit drugs, alcohol, and tobacco products.

Prior to 2002, the survey was called the National Household Survey on Drug Abuse (NHSDA). Because of improvements to the survey in 2002, the data from 2002 through 2006 should not be compared with 2001 and earlier NHSDA data to assess changes in substance use over time. The 2006 NSDUH screened 151,288 addresses, and 137,057 completed interviews were obtained. The survey was conducted from January through December 2006. Weighted response rates were 90.6

percent for household screening and 74.2 percent for interviewing. The 2005 NSDUH was the first in a coordinated 5-year sample design providing estimates for all 50 states and the District of Columbia for the years 2005 through 2009. Because the 2005 design enables estimates to be developed by state, states may be viewed as the first level of stratification, as well as a reporting variable.

Further information on the 2006 NSDUH may be obtained from

SAMHSA, Office of Applied Studies 1 Choke Cherry Road, Room 7-1044 Rockville, MD 28057 http://www.oas.samhsa.gov/nsduh.htm

Other Organization Sources

American College Testing Program

The ACT assessment is designed to measure educational development in the areas of English, mathematics, social studies, and natural sciences. The ACT assessment is taken by college-bound high school students and by all graduating seniors in Colorado and Illinois. The test results are used to predict how well students might perform in college.

Prior to the 1984–85 school year, national norms were based on a 10 percent sample of the students taking the test. Since then, national norms are based on the test scores of all students taking the test. Beginning with 1984–85, these norms have been based on the most recent ACT scores available from students scheduled to graduate in the spring of the year. Duplicate test records are no longer used to produce national figures.

Separate ACT standard scores are computed for English, mathematics, science reasoning, and, as of October 1989, reading. ACT standard scores are reported for each subject area on a scale from 1 to 36. The four ACT standard scores have a mean (average) of 21.2 and a standard deviation of 5.0 for test-taking students nationally. A composite score is obtained by taking the simple average of the four standard scores and is an indication of a student's overall academic development across these subject areas.

It should be noted that graduating students who take the ACT assessment are not necessarily representative of graduating students nationally. Students who live in the Midwest, Rocky Mountains, Plains, and South are overrepresented among ACT-tested students as compared to graduating students nationally. These students more often attend public colleges and universities, which require the ACT assessment more often than the SAT test.

Further information on the ACT may be obtained from

The American College Testing Program 500 ACT Drive P.O. Box 168 Iowa City, IA 52243 http://www.act.org/

American Council on Education

One of the American Council on Education's (ACE) programs and services is the General Educational Development Testing Service (GEDTS), which develops and distributes General Educational Development (GED) tests. A GED credential documents high school-level academic skills. It was first administered in 1942 to returning World War II veterans and first administered to civilians in 1947. ACE publishes the *GED Testing Program Statistical Report*. This report looks at those who take the GED, test performance statistics, and historical information on the GED testing program. Attempting to make comparisons across jurisdictions is problematic since each jurisdiction manages its own GED testing program. As such, each jurisdiction develops its own policies which would be reflected in its testing program outcomes such as pass rates.

Further information on the GED may be obtained from

American Council on Education One Dupont Circle NW Washington, DC 20036 http://www.acenet.edu http://www.gedtest.org

College Entrance Examination Board

The Admissions Testing Program of the College Board comprises a number of college admissions tests, including the Preliminary Scholastic Assessment Test (PSAT) and the Scholastic Assessment Test (SAT). High school students participate in the testing program as sophomores, juniors, or seniors—some more than once during these 3 years. If they have taken the tests more than once, only the most recent scores are tabulated. The PSAT and SAT report subscores in the areas of mathematics and verbal ability.

The SAT results are not representative of high school students or college-bound students nationally since the sample is self-selected, i.e., taken by students who need the results to apply to a particular college or university. Public colleges in many states, particularly in the Midwest, parts of the South, and the West, require ACT scores rather than SAT scores. The proportion of students taking the SAT in these states is very low and is inappropriate for comparison. In recent years, more than 1.4 million high school students have taken the SAT examination annually. The latest version of the SAT, which includes a writing component, was first administered in March 2005.

Further information on the SAT can be obtained from

College Entrance Examination Board Educational Testing Service Princeton, NJ 08541 http://www.collegeboard.org/

Commonfund Institute

Commonfund Institute took over management of the Higher Education Price Index (HEPI) in September 2004 from Research Associates of Washington, which originated the index in 1961. HEPI measures average changes in prices of goods and services purchased by colleges and universities through educational and general expenditures. Sponsored research and auxiliary enterprises are not priced by HEPI.

HEPI is based on the prices (or salaries) of faculty and of administrators and other professional service personnel; clerical, technical, service, and other nonprofessional personnel; and contracted services, such as data processing, communication, transportation, supplies and materials, equipment, books and periodicals, and utilities. These represent the items purchased for current operations by colleges and universities. Prices for these items are obtained from salary surveys conducted by various national higher education associations, the American Association of University Professors, the Bureau of Labor Statistics, and the National Center for Education Statistics; and from components of the Consumer Price Index (CPI) and the Producer Price Index (PPI) published by the U.S. Department of Labor, Bureau of Labor Statistics.

The quantities of these goods and services have been kept constant based on the 1971–72 buying pattern of colleges and universities. The weights assigned the various items, which represent their relative importance in the current-fund educational and general budget, are estimated national averages. Variance in spending patterns of individual institutions from these national averages reduces only slightly the applicability of HEPI to any given institutional situation. Modest differences in the weights attached to expenditure categories have little effect on overall index values. This is because HEPI is dominated by the trend in faculty salaries and similar salary trends for other personnel hired by institutions, which minimizes the impact of price changes in other items purchased in relatively small quantities.

Further information on HEPI may be obtained from

Commonfund Institute 15 Old Danbury Road P.O. Box 812 Wilton, CT 06897-0812 http://www.commonfund.org

Council for Aid to Education

The Council for Aid to Education, Inc. (CAE) is a not-forprofit corporation funded by contributions from businesses. CAE largely provides consulting and research services to corporations and information on voluntary support services to education institutions. Each year, CAE conducts a survey of colleges and universities and private elementary and secondary schools to obtain information on the amounts, sources, and purposes of private gifts, grants, and bequests received during the academic year.

Charitable contributions to colleges and universities in the United States grew by 6.3 percent in 2007 with the average

increase in contributions to higher education institutions at 6.5 percent. The \$29.75 billion raised in 2007 is the highest total ever reported.

Alumni giving declined by 1.5 percent. However, alumni giving in 2007 is still 16.5 percent higher than it was in 2005. Foundation giving increased by 19.7 percent after increasing 1.4 percent in 2006. Corporate giving increased 4.3 percent over the 2006 amount.

Survey forms are reviewed by CAE for internal consistency before preparing a computerized database. Institutional reports of voluntary support data from the CAE Survey of Voluntary Support of Education are more comprehensive and detailed than the related data in the Integrated Postsecondary Education Data System (IPEDS) Finance survey conducted by NCES. The results from the Survey of Voluntary Support of Education are published in the annual *Voluntary Support of Education*, which may be purchased from CAE.

Council of Chief State School Officers

The Council of Chief State School Officers (CCSSO) is a nonprofit organization of the 57 public officials who head departments of public education in every state, the outlying areas, the District of Columbia, and the U.S. Department of Defense dependents schools. In 1985, the CCSSO founded the State Education Assessment Center to provide a locus of leadership to the states to improve the monitoring and assessment of education. This center has since combined with two other CCSSO centers to form the Division of State Services and Technical Assistance, which supports state education agencies in developing standards-based systems that enable all children to succeed. Key State Education Policies on PK-12 Education is one of the publications issued by the State Educators Project. Most of the data are obtained from a member questionnaire, and the remainder of the data are from federal government agencies.

Further information on CCSSO publications may be obtained from

Rolf Blank State Education Indicators Program Council of Chief State School Officers One Massachusetts Avenue NW 7th Floor Washington, DC 20001 http://www.ccsso.org

Education Commission of the States

Clearinghouse Notes

The Education Commission of the States (ECS) Clearing-house collects information on laws and standards in the field of education and reports them periodically in *Clearinghouse Notes*. ECS collects information about administrators, principals, and teachers. It also examines policy areas, such as assessment and testing, collective bargaining, early childhood issues, quality education, and school schedules. The information is collected by reading state newsletters, tracking state legislation, and surveying state education agencies. Data are verified by the individual states when necessary. Even though ECS monitors state activity on a continuous basis, it updates the reports only when there is significant change.

StateNotes

ECS regularly issues compilations, comparisons, and summaries of state policies on a number of education issues, including high school graduation requirements and school term information. ECS monitors state education activities for changes in education policies and updates ECS state information accordingly.

Further information on *Clearinghouse Notes* and *StateNotes* is available from

Graduate Record Examinations Board

Graduate Record Examinations (GRE) tests are taken by individuals applying to graduate or professional school. GRE offers two types of tests, the General Test and Subject Tests. The General Test, which is mainly offered on computer, measures verbal, quantitative, and analytical writing skills. The writing section consists of two analytical writing tasks and replaced the analytical reasoning section on the general GRE after December 31, 2002. The Subject Tests measure achievement in subject areas that include biochemistry, cell and molecular biology, biology, chemistry, computer science, literature in English, mathematics, physics, and psychology. Each graduate institution or division of the institution determines which GRE tests are required for admission.

Individuals may take GRE tests more than once. Score reports only reflect scores earned within the past 5-year period.

Further information on the GRE may be obtained from

Graduate Record Examinations Board Educational Testing Service Princeton, NJ 08541 http://www.gre.org

Institute of International Education

Each year, the Institute of International Education (IIE) conducts a survey of the number of foreign students studying in American colleges and universities and reports these data in the publication *Open Doors*. All of the regionally accredited institutions in NCES's Integrated Postsecondary Education Data System (IPEDS) are surveyed by IIE. The foreign student enrollment data presented in the *Digest* are drawn from IIE surveys that ask institutions for information on enrollment of foreign students, as well as student characteristics, such as country of origin. For the 2006–07 survey, approximately 65.2 percent of the 2,702 institutions surveyed reported data.

Additional information can be obtained from the publication *Open Doors* or by contacting

Sharon Witherell

International Association for the Evaluation of Educational Achievement

The International Association for the Evaluation of Educational Achievement, known as the IEA, is composed of governmental research centers and national research institutions around the world whose aim is to investigate education problems common among countries. Since its inception in 1958, the IEA has conducted more than 23 research studies of cross-national achievement. The regular cycle of studies encompasses learning in basic school subjects. Examples are the Trends in International Mathematics and Science Study (TIMSS) and the Progress in International Reading Literacy Study (PIRLS). IEA projects also include studies of particular interest to IEA members, such as the TIMSS 1999 Video Study of Mathematics and Science Teaching, the Civic Education Study (see below), and studies on information technology in education and preprimary education.

Further information on the International Association for the Evaluation of Educational Achievement may be obtained from

http://www.iea.nl

Civic Education Study

In 1994, the IEA General Assembly, composed of the research institutes participating in IEA projects, decided to undertake a two-phase study of civic knowledge called the Civic Education Study (CivEd). Phase I of CivEd, begun in 1996, was designed to collect extensive documentary evidence and expert opinion describing the circumstances, content, and process of civic education in 24 countries. Phase II, the assessment phase of the study, conducted in 1999, was designed to assess the civic knowledge of 14-year-old students across 28 countries. The assessment items in CivEd were designed to measure knowledge and understanding of key principles that are universal across democracies. Another key component of the Phase II study focuses on measuring the attitudes of students toward civic issues. Although the study was designed as an international comparison, the data collected allow individual countries to conduct in-depth, national-level comparisons and analyses. The next survey is scheduled for 2008–09.

Further information on the IEA Civic Education Study may be obtained from

Trends in International Mathematics and Science Study

The Trends in International Mathematics and Science Study (TIMSS, formerly known as the Third International Mathematics and Science Study) provides reliable and timely data on the mathematics and science achievement of U.S. students compared to that of students in other countries. TIMSS data have been collected in 1995, 1999, 2003, and 2007. TIMSS collects information through mathematics and science achievement tests and questionnaires. The questionnaires request information to help provide a context for the performance scores, focusing on such topics as students' attitudes and beliefs about learning, students' habits and homework, and their lives both in and outside of school; teachers' attitudes and beliefs about teaching and learning, teaching assignments, class size and organization, instructional practices, and participation in professional development activities; and principals' viewpoints on policy and budget responsibilities, curriculum and instruction issues, and student behavior, as well as descriptions of the organization of schools and courses. The assessments and questionnaires are designed to specifications in a guiding framework. The TIMSS framework describes the mathematics and science content to be assessed by providing grade-specific objectives, an overview of the assessment design, and guidelines for item development.

Each participating country, like the United States, is required to draw random samples of schools. In the United States, a national probability sample drawn for each study has resulted in over 500 schools and approximately 33,000 students participating in 1995, 221 schools and 9,000 students participating in 1999, and 480 schools and almost 19,000 students participating in 2003. This sample design ensures the appropriate number of schools and students are participating to provide a representative sample of the students in a specific grade in the United States as a whole.

The 2003 U.S. fourth-grade sample achieved an initial school response rate of 70 percent (weighted), with a school response rate of 82 percent after replacement schools were added. From the schools that agreed to participate, students were sampled in intact classes. A total of 10,795 fourthgrade students were sampled for the assessment, and 9,829 participated, for a 95 percent student response rate. The resulting fourth-grade overall response rate, with replacements included, was 78 percent. The U.S. eighth-grade sample achieved an initial school response rate of 71 percent, with a school response rate of 78 percent after replacement schools were added. A total of 9,891 students were sampled for the eighth-grade assessment, and 8,912 completed the assessment, for a 94 percent student response rate. The resulting eighth-grade overall response rate, with replacements included, was 73 percent.

National Association of College and University Business Officers

The National Association of College and University Business Officers (NACUBO) is a nonprofit professional organization representing chief administrative and financial officers at more than 2,500 colleges and universities across the country. Over two-thirds of all institutions of higher learning in the United States are members of NACUBO. Each year, TIAA-CREF Trust Company, a pension system for educators and a manager of college endowments, conducts an in-depth study of college and university endowments for NACUBO, through its subsidiary, the Trust Company. Endowment assets for 2006 NACUBO Endowment Study participants are for the fiscal year ending June 30, 2006.

Endowments include stocks, bonds, cash, and real estate that colleges and universities receive as gifts. Colleges or universities receiving endowments may not spend the endowment principal, only investment income derived from the principal. Quasi-endowments (year-end surplus assets that institutions choose to treat as permanent capital) may also be included in an investment pool's endowment composition. Also, because donors frequently stipulate that their gifts support specific programs at colleges and universities, the overall size of the endowment can be misleading in terms of available income to support the education of undergraduate students. For example, the income from an endowment gift to a medical school or law school may only be spent on those schools. In such cases, the income would not be available to support undergraduate education. Thus, at some research universities with extensive graduate and professional schools, as little as one-third of the institution's endowment may actually be available to generate income to support undergraduate programs and students.

The 2007 study was administered entirely in a web-based format; there were 785 respondents.

Further information on the 2006 NACUBO Endowment Study may be obtained from

National Association of College and University Business Officers 1110 Vermont Ave., N.W., Suite 800 Washington, DC 20005 http://www.nacubo.org

National Association of State Directors of Teacher Education and Certification

The National Association of State Directors of Teacher Education and Certification (NASDTEC) was organized in 1928 to represent professional standards boards and commissions and state departments of education that are responsible for the preparation, licensure, and discipline of educational personnel. Currently, NASDTEC's membership includes all 50 states, the District of Columbia, the U.S. Department of Defense Education Activity, U.S. jurisdictions, and Canadian provinces and territories.

The NASDTEC Manual on the Preparation & Certification of Educational Personnel (NASDTEC Manual) was printed between 1984 and 2004, when it was replaced by an online publication, KnowledgeBase. This is an expanded version of the Manual and is the most comprehensive source of state-by-state information pertaining to the certification requirements and preparation of teachers and other school personnel in the United States and Canada.

Further information on KnowledgeBase may be obtained from

Roy Einreinhofer, Executive Director NASDTEC

1225 Providence Rd., PMB #116 Whitinsville, MA 01588 rje@nasdtec.com http://www.nasdtec.info/

National Catholic Educational Association

The National Catholic Educational Association (NCEA) has been providing leadership and service to Catholic education since 1904. NCEA began to publish *The United States Catholic Elementary and Secondary Schools: Annual Statistical Report on Schools, Enrollment and Staffing* in 1970 because of the lack of educational data on the private sector. The report is based on data gathered by each of the 176 archdiocesan and diocesan offices of education in the United States. These data enable NCEA to present information on school enrollment and staffing patterns for prekindergarten through grade 12. The first part of the report presents data concerning the context of American education, while the following segment focuses on statistical data of Catholic schools. Statistics include enrollment by grade level, ethnicity, and religious affiliation.

Further information on *The United States Catholic Ele*mentary and Secondary Schools: Annual Statistical Report on Schools, Enrollment, and Staffing may be obtained from

Estimates of School Statistics

The National Education Association (NEA) produces *Estimates of School Statistics* annually. This report provides projections of public school enrollment, employment and personnel compensation, and finances, as reported by individual state departments of education. The state-level data in *Estimates of School Statistics* allow broad assessments of trends in the above areas. These data should be looked at with the understanding that the state-level data do not necessarily reflect the varying conditions within a state on education issues.

Data in this report are provided by state and District of Columbia departments of education and by other, mostly governmental, sources. Surveys are sent to the departments of education requesting estimated data for the current year and revisions to 4 years of historical data, as necessary. Twice a year, NEA submits current-year estimates on more than 35 education statistics to state departments of education for verification or revision. The estimates are generated

using regression analyses and are used in the *Estimates* report only if the states do not provide current data.

Further information on *Estimates of School Statistics* may be obtained from

NEA Rankings & Estimates Team—NEA Research 1201 16th Street NW Washington, DC 20036 http://www.nea.org/aboutnea/contact.html http://www.nea.org

Status of the American Public School Teacher

The Status of the American Public School Teacher Survey is conducted every 5 years by the National Education Association (NEA). The survey was designed by the NEA Research Division and was initially administered in 1956. The intent of the survey is to solicit information covering various aspects of public school teachers' professional, family, and civic lives.

In the 2000–01 survey, 1,467 public school teachers responded and the response rate was 67.4 percent.

Possible sources of nonsampling errors are nonresponses, misinterpretation, and—when comparing data over years—changes in the sampling method and instrument. Misinterpretation of the survey items should be minimal, as the sample responding is not from the general population, but one knowledgeable about the area of concern. The sampling procedure changed after 1956 and some wording of items has changed over different administrations of the survey.

Since sampling is used, sampling variability is inherent in the data. An approximation to the maximum standard error for estimating the population percentages is 1.4 percent. Approximations for significance for other comparisons appear in appendix table A-6. To estimate the 95 percent confidence interval for population percentages, the maximum standard error of 1.4 percent is multiplied by 2 (1.4 x 2). The resulting percentage (2.8) is added and subtracted from the population estimate to establish upper and lower bounds for the confidence interval.

Further information on the Status of the American Public School Teacher Survey may be obtained from

Organization for Economic Cooperation and Development

Education at a Glance (EAG)

The Organization for Economic Cooperation and Development (OECD) publishes analyses of national policies and survey data in education, training, and economics in about 30 countries. The countries surveyed are Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Korea, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Slovak Republic, Spain, Sweden, Switzerland, Turkey, United Kingdom, and United States. In addition to these OECD countries, several partner countries are surveyed for EAG—Brazil, Chile, Estonia, Israel, Russian Federation, and Slovenia.

To highlight current education issues and create a set of comparative education indicators that represent key features of education systems, OECD initiated the International Education Indicators Project (INES) and charged the Centre for Educational Research and Innovation (CERI) with developing the cross-national indicators for it. The development of these indicators involved representatives of the OECD countries and the OECD Secretariat. Improvements in data quality and comparability among OECD countries have resulted from the country-to-country interaction sponsored through the INES project. The most recent publication in this series is *Education at a Glance*, *OECD Indicators*, 2008.

The OECD Handbook for Internationally Comparative Education Statistics: Concepts, Standards, Definitions and Classifications provides countries with specific guidance on how to prepare information for OECD education surveys; facilitate countries' understanding of OECD indicators and their use in policy analysis; and provides a reference for collecting and assimilating educational data. Chapter 7 of the OECD Handbook for Internationally Comparative Education Statistics contains a discussion of data quality issues.

Program for International Student Assessment

The Program for International Student Assessment (PISA) is a system of international assessments that focus on 15-year-olds' capabilities in reading literacy, mathematics literacy, and science literacy. PISA also includes measures of general, or cross-curricular, competencies such as learning strategies. PISA emphasizes functional skills that students have acquired as they near the end of mandatory schooling. PISA is organized by the Organization for Economic Cooperation and Development (OECD), an intergovernmental organization of industrialized countries, and was administered for the first time in 2000, when 43 countries participated. In 2003, 41 countries took part in the assessment, and in 2006, 57 jurisdictions (30 OECD members and 27 nonmembers) participated in the assessment.

PISA is a 2-hour-long paper-and-pencil exam. Assessment items include a combination of multiple-choice and open-ended questions, which require students to come up with their own response. PISA scores are reported on a scale with a mean score of 500 and a standard deviation of 100.

PISA is implemented on a 3-year cycle that began in 2000. Each PISA assessment cycle focuses on one subject in particular, although all three subjects are assessed every 3 years. In the first cycle, PISA 2000, reading literacy was the major focus, occupying roughly two-thirds of assessment time. For 2003, PISA focused on mathematics literacy as well as the ability of students to solve problems in real-life settings. In 2006, PISA focused on science literacy.

The intent of PISA reporting is to provide an overall description of performance in reading literacy, mathematics literacy, and science literacy every 3 years, and to provide a more detailed look at each domain in the years when it is the major focus. These cycles will allow countries to compare changes in trends for each of the three subject areas over time.

To implement PISA, each of the participating countries selects a nationally representative sample of 15-year-olds, regardless of grade level. In the United States, nearly 5,600 students from public and nonpublic schools took the PISA 2006 assessment.

In each country, the assessment is translated into the primary language of instruction; in the United States, all materials are written in English.

Phi Delta Kappa/Gallup Poll

Public Attitudes Toward the Public Schools Survey

Each year, the Gallup Poll conducts the Public Attitudes Toward the Public Schools Survey, funded by the Phi Delta Kappa Educational Foundation. The survey includes interviews with adults representing the civilian noninstitutional population, age 18 and older.

Gallup uses an unclustered, directory-assisted, random-digit-dial telephone sample, based on a proportionate stratified sampling design. In 2000, the final sample was weighted so that the distribution corresponded with the U.S. Census Bureau's Current Population Survey (CPS) estimates for the adult population living in households with telephones in the continental United States. The sample used in the 40th (2008) annual survey was made up of a total of 1,002 adults age 18 and older. Field work for the survey was conducted between June 4 and July 3, 2008.

The survey is a sample survey and is subject to sampling error. The size of the error depends largely on the number of respondents providing data. Appendix table A-4 shows the approximate sampling errors associated with different percentages and sample sizes for the survey. Appendix table A-5 provides approximate sampling errors for comparisons of two sample percentages.

For example, an estimated percentage of about 10 percent based on the responses of 1,000 sample members maintains an approximate sampling error of 2 percent at the 95 percent confidence level. The sampling error for the difference in two percentages (50 percent versus 41 percent) based on two samples of 750 members and 400 members, respectively, is about 8 percent at the 95 percent confidence level.

United Nations Educational, Scientific, and Cultural Organization

The United Nations Educational, Scientific, and Cultural Organization (UNESCO) conducts annual surveys of education statistics of its member countries. Data from official surveys are supplemented by information obtained by UNESCO through other publications and sources. Each year, more than 200 countries reply to the UNESCO surveys. In some cases, estimates are made by UNESCO for particular items, such as world and continent totals. While great efforts are made to make them as comparable as possible, the data still reflect the vast differences among the countries of the world in the structure of education. While there is some agreement about the reporting of primary and secondary data, tertiary-level data (i.e., postsecondary education data) present numerous substantive problems. Some countries report only university enrollment, while other countries report all postsecondary enrollment, including enrollment in vocational and technical schools and correspondence programs. A very high proportion of some countries' tertiary-level students attend institutions in other countries. The member countries that provide data to UNESCO are responsible for their validity. Thus, data for particular countries are subject to nonsampling error and perhaps sampling error as well. Users should examine footnotes carefully to recognize some of the data limitations.

fewer than four semesters were classified as part time. Students who had neither enrolled on a full-time nor part-time basis in each of the four semesters were classified as never enrolled.

NOTE: Data from students who dropped out of school between the 10th and 12th grades were not used in analyses of sophomore samples. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, High School and Beyond Study of 1980 Sophomores (HS&B-So:80/82, HS&B-So:80/84, and HS&B-So:80/86); and High School and Beyond Study of 1980 Seniors (HS&B-Sr:80/82, HS&B-Sr:80/84, and HS&B-Sr:80/86).

¹The SES index is a composite of five equally weighted measures: father's education, mother's education, family income, father's occupation, and presence of certain items in the respondent's household

²Includes attendance at a vocational, trade, or business school, or 2-year college; or attendance at a 4-year college resulting in less than a bachelor's degree.

³Includes those with a bachelor's or higher level degree.

⁴Postsecondary education status was determined by students' enrollment in academic or vocational study during the four semesters—fall 1982, spring 1983, fall 1983, and spring 1984—following their scheduled high school graduation. Students who enrolled in full-time study in each of the four semesters were classified as full time. Students who were enrolled in part-time study in any of the four semesters and those who were enrolled in full-time study in

⁵Responses to questions concerning participation in each of 15 different extracurricular activity areas (i.e., varsity sports, debate, band, subject-matter clubs, etc.) were used to classify students' overall level of participation in extracurricular activities. The difference between the sum of the three category respondent counts and the total sample size is due to missing data.

APPENDIX B **Definitions**

Academic support This category of college expenditures includes expenditures for support services that are an integral part of the institution's primary missions of instruction, research, or public service. It also includes expenditures for libraries, galleries, audio/visual services, academic computing support, ancillary support, academic administration, personnel development, and course and curriculum development.

Achievement test An examination that measures the extent to which a person has acquired certain information or mastered certain skills, usually as a result of specific instruction.

Achievement levels, NAEP Specific achievement levels for each subject area and grade to provide a context for interesting student performance. At this time they are being used on a trial basis.

Basic—denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

Proficient—represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

Advanced—signifies superior performance.

Administrative support staff Includes personnel dealing with salary, benefits, supplies, and contractual fees for the office of the principal, full-time department chairpeople, and graduation expenses.

Agriculture Courses designed to improve competencies in agricultural occupations. Included is the study of agricultural production, supplies, mechanization and products, agricultural science, forestry, and related services.

ACT The ACT (formerly the American College Testing Program) assessment program measures educational development and readiness to pursue college-level coursework in English, mathematics, natural science, and social studies. Student performance on the tests does not reflect innate ability and is influenced by a student's educational preparedness.

Alternative schools Alternative schools serve students whose needs cannot be met in a regular, special education, or vocational school. They provide nontraditional education and may serve as an adjunct to a regular school. Although these

schools fall outside the categories of regular, special education, and vocational education, they may provide similar services or curriculum. Some examples of alternative schools are schools for potential dropouts; residential treatment centers for substance abuse (if they provide elementary or secondary education); schools for chronic truants; and schools for students with behavioral problems.

Appropriation (federal funds) Budget authority provided through the congressional appropriation process that permits federal agencies to incur obligations and to make payments.

Appropriation (institutional revenues) An amount (other than a grant or contract) received from or made available to an institution through an act of a legislative body.

Associate's degree A degree granted for the successful completion of a sub-baccalaureate program of studies, usually requiring at least 2 years (or equivalent) of full-time college-level study. This includes degrees granted in a cooperative or work-study program.

Auxiliary enterprises This category includes those essentially self-supporting operations which exist to furnish a service to students, faculty, or staff, and which charge a fee that is directly related to, although not necessarily equal to, the cost of the service. Examples are residence halls, food services, college stores, and intercollegiate athletics.

Average daily attendance (ADA) The aggregate attendance of a school during a reporting period (normally a school year) divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered days in session.

Average daily membership (ADM) The aggregate membership of a school during a reporting period (normally a school year) divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered as days in session. The average daily membership for groups of schools having varying lengths of terms is the average of the average daily memberships obtained for the individual schools.

Bachelor's degree A degree granted for the successful completion of a baccalaureate program of studies, usually requiring at least 4 years (or equivalent) of full-time college-level study. This includes degrees granted in a cooperative or work-study program.

Books Non-periodical printed publications bound in hard or soft covers, or in loose-leaf format, of at least 49 pages, exclusive of the cover pages; juvenile nonperiodical publications of any length found in hard or soft covers.

Budget authority (BA) Authority provided by law to enter into obligations that will result in immediate or future outlays. It may be classified by the period of availability (1-year, multiple-year, no-year), by the timing of congressional action (current or permanent), or by the manner of determining the amount available (definite or indefinite).

Business Program of instruction that prepares individuals for a variety of activities in planning, organizing, directing, and controlling business office systems and procedures.

Capital outlay Funds for the acquisition of land and buildings; building construction, remodeling, and additions; the initial installation or extension of service systems and other built-in equipment; and site improvement. The category also encompasses architectural and engineering services including the development of blueprints.

Carnegie unit The number of credits a student received for a course taken every day, one period per day, for a full year; a factor used to standardize all credits indicated on transcripts across studies.

Catholic school A private school over which a Roman Catholic church group exercises some control or provides some form of subsidy. Catholic schools for the most part include those operated or supported by a parish, a group of parishes, a diocese, or a Catholic religious order.

Central cities The largest cities, with 50,000 or more inhabitants, in a Metropolitan Statistical Area (MSA). Additional cities within the metropolitan area can also be classified as "central cities" if they meet certain employment, population, and employment/residence ratio requirements.

City school See Locale codes.

Class size The membership of a class at a given date.

Classification of Instructional Programs (CIP) The CIP is a taxonomic coding scheme that contains titles and descriptions of primarily postsecondary instructional programs. It was developed to facilitate NCES's collection and reporting of postsecondary degree completions by major field of study using standard classifications that capture the majority of

reportable program activity. It was originally published in 1980 and was revised in 1985, 1990, and 2000.

Classification of Secondary School Courses (CSSC) A modification of the Classification of Instructional Programs used for classifying high school courses. The CSSC contains over 2,200 course codes that help compare the thousands of high school transcripts collected from different schools.

Classroom teacher A staff member assigned the professional activities of instructing pupils in self-contained classes or courses, or in classroom situations; usually expressed in full-time equivalents.

Cohort A group of individuals that have a statistical factor in common, for example, year of birth.

College A postsecondary school which offers general or liberal arts education, usually leading to an associate, bachelor's, master's, doctor's, or first-professional degree. Junior colleges and community colleges are included under this terminology.

Combined Statistical Area (CSA) A combination of areas, each of which contains a core with a substantial population nucleus as well as adjacent communities having a high degree of economic and social integration with that core. A CSA is a region with social and economic ties as measured by commuting, but at lower levels than are found within each component area. CSAs represent larger regions that reflect broader social and economic interactions, such as wholesaling, commodity distribution, and weekend recreation activities.

Combined elementary and secondary school A school which encompasses instruction at both the elementary and the secondary levels; includes schools starting with grade 6 or below and ending with grade 9 or above.

Computer science A group of instructional programs that describes computer and information sciences, including computer programming, data processing, and information systems.

Consolidated Metropolitan Statistical Area (CMSA) An area that meets the requirements of a Metropolitan Statistical Area (MSA—see below) and has a population of 1 million or more, the components of which are large urbanized counties or a cluster of counties (cities and towns in New England) having moderate to substantial commuting and employment interchange.

Constant dollars Dollar amounts that have been adjusted by means of price and cost indexes to eliminate inflationary factors and allow direct comparison across years.

Consumer Price Index (CPI) This price index measures the average change in the cost of a fixed market basket of goods and services purchased by consumers.

Consumption That portion of income which is spent on the purchase of goods and services rather than being saved.

Control of institutions A classification of institutions of elementary/secondary or higher education by whether the institution is operated by publicly elected or appointed officials and derives its primary support from public funds (public control) or by privately elected or appointed officials and derives its major source of funds from private sources (private control).

Credit The unit of value, awarded for the successful completion of certain courses, intended to indicate the quantity of course instruction in relation to the total requirements for a diploma, certificate, or degree. Credits are frequently expressed in terms such as "Carnegie units," "semester credit hours," and "quarter credit hours."

Current dollars Dollar amounts that have not been adjusted to compensate for inflation.

Current expenditures (elementary/secondary) The expenditures for operating local public schools, excluding capital outlay and interest on school debt. These expenditures include such items as salaries for school personnel, fixed charges, student transportation, school books and materials, and energy costs. Beginning in 1980–81, expenditures for state administration are excluded.

Current expenditures per pupil in average daily attendance Current expenditures for the regular school term divided by the average daily attendance of full-time pupils (or full-time equivalency of pupils) during the term. See also Current expenditures and Average daily attendance.

Current-fund expenditures (higher education) Money spent to meet current operating costs, including salaries, wages, utilities, student services, public services, research libraries, scholarships and fellowships, auxiliary enterprises, hospitals, and independent operations; excludes loans, capital expenditures, and investments.

Current-fund revenues (higher education) Money received during the current fiscal year from revenue which can be used to pay obligations currently due, and surpluses reappropriated for the current fiscal year.

Current Population Survey See Appendix A: Guide to Sources.

Degree-granting institutions Postsecondary institutions that are eligible for Title IV federal financial aid programs and grant an associate's or higher degree. For an institution to be eligible to participate in Title IV financial aid programs it must offer a program of at least 300 clock hours in length,

have accreditation recognized by the U.S. Department of Education, have been in business for at least 2 years, and have signed a participation agreement with the Department.

Disabilities, children with Those children evaluated as having any of the following impairments and needing special education and related services because of these impairments. (These definitions apply specifically to data from the U.S. Office of Special Education and Rehabilitative Services presented in this publication.)

Deafness Having a hearing impairment which is so severe that the student is impaired in processing linguistic information through hearing (with or without amplification) and which adversely affects educational performance.

Deaf-blindness Having concomitant hearing and visual impairments which cause such severe communication and other developmental and educational problems that the student cannot be accommodated in special education programs solely for deaf or blind students.

Hearing impairment Having a hearing impairment, whether permanent or fluctuating, which adversely affects the student's educational performance, but which is not included under the definition of "deaf" in this section.

Mental retardation Having significantly subaverage general intellectual functioning, existing concurrently with defects in adaptive behavior and manifested during the developmental period, which adversely affects the child's educational performance.

Multiple disabilities Having concomitant impairments (such as mentally retarded-blind, mentally retarded-orthopedically impaired, etc.), the combination of which causes such severe educational problems that the student cannot be accommodated in special education programs solely for one of the impairments. Term does not include deaf-blind students.

Orthopedic impairment Having a severe orthopedic impairment which adversely affects a student's educational performance. The term includes impairment resulting from congenital anomaly, disease, or other causes.

Other health impairment Having limited strength, vitality, or alertness due to chronic or acute health problems, such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes which adversely affects the student's educational performance.

Serious emotional disturbance Exhibiting one or more of the following characteristics over a long period of time, to a marked degree, and adversely affecting educational performance: an inability to learn which cannot be explained by intellectual, sensory, or health factors; an inability to build or maintain satisfactory interpersonal relationships with peers and teachers; inappropriate types of behavior or feelings under normal circumstances; a

general pervasive mood of unhappiness or depression; or a tendency to develop physical symptoms or fears associated with personal or school problems. This term does not include children who are socially maladjusted, unless they also display one or more of the listed characteristics.

Specific learning disability Having a disorder in one or more of the basic psychological processes involved in understanding or in using spoken or written language, which may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations. The term includes such conditions as perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The term does not include children who have learning problems which are primarily the result of visual, hearing, or environmental, cultural, or economic disadvantage.

Speech/language impairment Having a communication disorder, such as stuttering, impaired articulation, language impairment, or voice impairment, which adversely affects the student's educational performance.

Visual impairment Having a visual impairment which, even with correction, adversely affects the student's educational performance. The term includes partially seeing and blind children.

Disposable personal income Current income received by persons less their contributions for social insurance, personal tax, and nontax payments. It is the income available to persons for spending and saving. Nontax payments include passport fees, fines and penalties, donations, and tuitions and fees paid to schools and hospitals operated mainly by the government. See also Personal income.

Doctor's degree An earned degree carrying the title of Doctor. The Doctor of Philosophy degree (Ph.D.) is the highest academic degree and requires mastery within a field of knowledge and demonstrated ability to perform scholarly research. Other doctorates are awarded for fulfilling specialized requirements in professional fields, such as education (Ed.D.), musical arts (D.M.A.), business administration (D.B.A.), and engineering (D.Eng. or D.E.S.). Many doctor's degrees in academic and professional fields require an earned master's degree as a prerequisite. First-professional degrees, such as M.D. and D.D.S., are not included under this heading.

Educational and general expenditures The sum of current funds expenditures on instruction, research, public service, academic support, student services, institutional support, operation and maintenance of plant, and awards from restricted and unrestricted funds.

Educational attainment The highest grade of regular school attended and completed.

Elementary education/programs Learning experiences concerned with the knowledge, skills, appreciations, attitudes, and behavioral characteristics which are considered to be needed by all pupils in terms of their awareness of life within our culture and the world of work, and which normally may be achieved during the elementary school years (usually kindergarten through grade 8 or kindergarten through grade 6), as defined by applicable state laws and regulations.

Elementary school A school classified as elementary by state and local practice and composed of any span of grades not above grade 8. A preschool or kindergarten school is included under this heading only if it is an integral part of an elementary school or a regularly established school system.

Elementary/secondary school As reported in this publication, includes only regular schools (i.e., schools that are part of state and local school systems, and also most not-for-profit private elementary/secondary schools, both religiously affiliated and nonsectarian). Schools not reported include subcollegiate departments of institutions of higher education, residential schools for exceptional children, federal schools for American Indians, and federal schools on military posts and other federal installations.

Employment Includes civilian, noninstitutional persons who: (1) worked during any part of the survey week as paid employees; worked in their own business, profession, or farm; or worked 15 hours or more as unpaid workers in a family-owned enterprise; or (2) were not working but had jobs or businesses from which they were temporarily absent due to illness, bad weather, vacation, labor-management dispute, or personal reasons whether or not they were seeking another job.

Endowment A trust fund set aside to provide a perpetual source of revenue from the proceeds of the endowment investments. Endowment funds are often created by donations from benefactors of an institution, who may designate the use of the endowment revenue. Normally, institutions or their representatives manage the investments, but they are not permitted to spend the endowment fund itself, only the proceeds from the investments. Typical uses of endowments would be an endowed chair for a particular department or for a scholarship fund. Endowment totals tabulated in this book also include funds functioning as endowments, such as funds left over from the previous year and placed with the endowment investments by the institution. These funds may be withdrawn by the institution and spent as current funds at any time. Endowments are evaluated by two different measures, book value and market value. Book value is the purchase price of the endowment investment. Market value is the current worth of the endowment investment. Thus, the book value of a stock held in an endowment fund would be the purchase price of the stock. The market value of the stock would be its selling price as of a given day.

Engineering Instructional programs that describe the mathematical and natural science knowledge gained by study, experience, and practice and applied with judgment to develop ways to utilize the materials and forces of nature economically. Include programs that prepare individuals to support and assist engineers and similar professionals.

English A group of instructional programs that describes the English language arts, including composition, creative writing, and the study of literature.

Enrollment The total number of students registered in a given school unit at a given time, generally in the fall of a year.

Expenditures Charges incurred, whether paid or unpaid, which are presumed to benefit the current fiscal year. For elementary/secondary schools, these include all charges for current outlays plus capital outlays and interest on school debt. For institutions of higher education, these include current outlays plus capital outlays. For government, these include charges net of recoveries and other correcting transactions other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Government expenditures include only external transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments.

Expenditures per pupil Charges incurred for a particular period of time divided by a student unit of measure, such as average daily attendance or fall enrollment.

Extracurricular activities Activities that are not part of the required curriculum and that take place outside of the regular course of study. As used here, they include both schoolsponsored (e.g., varsity athletics, drama, and debate clubs) and community-sponsored (e.g., hobby clubs and youth organizations like the Junior Chamber of Commerce or Boy Scouts) activities.

Family A group of two people or more (one of whom is the householder) related by birth, marriage, or adoption and residing together. All such people (including related subfamily members) are considered as members of one family.

Federal funds Amounts collected and used by the federal government for the general purposes of the government. There are four types of federal fund accounts: the general fund, special funds, public enterprise funds, and intragovernmental funds. The major federal fund is the general fund, which is derived from general taxes and borrowing. Federal funds also include certain earmarked collections, such as those generated by and used to finance a continuing cycle of business-type operations.

Federal sources Includes federal appropriations, grants, and contracts, and federally-funded research and development centers (FFRDCs). Federally subsidized student loans are not included.

First-professional degree A degree that signifies both completion of the academic requirements for beginning practice in a given profession and a level of professional skill beyond that normally required for a bachelor's degree. This degree usually is based on a program requiring at least 2 academic years of work prior to entrance and a total of at least 6 academic years of work to complete the degree program, including both prior-required college work and the professional program itself. By NCES definition, first-professional degrees are awarded in the fields of dentistry (D.D.S. or D.M.D.), medicine (M.D.), optometry (O.D.), osteopathic medicine (D.O.), pharmacy (D.Phar.), podiatric medicine (D.P.M.), veterinary medicine (D.V.M.), chiropractic (D.C. or D.C.M.), law (J.D.), and theological professions (M.Div. or M.H.L.).

First-professional enrollment The number of students enrolled in a professional school or program which requires at least 2 years of academic college work for entrance and a total of at least 6 years for a degree. By NCES definition, first-professional enrollment includes only students in certain programs. (See also First-professional degree for a list of programs.)

Fiscal year The yearly accounting period for the federal government, which begins on October 1 and ends on the following September 30. The fiscal year is designated by the calendar year in which it ends; e.g., fiscal year 2006 begins on October 1, 2005, and ends on September 30, 2006. (From fiscal year 1844 to fiscal year 1976, the fiscal year began on July 1 and ended on the following June 30.)

For-profit institution A private institution in which the individual(s) or agency in control receives compensation other than wages, rent, or other expenses for the assumption of risk.

Foreign languages A group of instructional programs that describes the structure and use of language that is common or indigenous to people of the same community or nation, the same geographical area, or the same cultural traditions. Programs cover such features as sound, literature, syntax, phonology, semantics, sentences, prose, and verse, as well as the development of skills and attitudes used in communicating and evaluating thoughts and feelings through oral and written language.

Full-time enrollment The number of students enrolled in higher education courses with total credit load equal to at least 75 percent of the normal full-time course load.

Full-time-equivalent (FTE) enrollment For institutions of higher education, enrollment of full-time students, plus the full-time equivalent of part-time students. The full-time equivalent of the part-time students is estimated using different factors depending on the type and control of institution and level of student.

Full-time-equivalent teacher See Instructional staff.

Full-time instructional faculty Those members of the instruction/research staff who are employed full time as defined by the institution, including faculty with released time for research and faculty on sabbatical leave. Full time counts exclude faculty who are employed to teach less than two semesters, three quarters, two trimesters, or two 4-month sessions; replacements for faculty on sabbatical leave or those on leave without pay; faculty for preclinical and clinical medicine; faculty who are donating their services; faculty who are members of military organizations and paid on a different pay scale from civilian employees; academic officers, whose primary duties are administrative; and graduate students who assist in the instruction of courses.

Full-time worker In educational institutions, an employee whose position requires being on the job on school days throughout the school year at least the number of hours the schools are in session. For higher education, a member of an educational institution's staff who is employed full time.

General administration support services Includes salary, benefits, supplies, and contractual fees for boards of education staff and executive administration. Excludes state administration.

General Educational Development (GED) program Academic instruction to prepare persons to take the high school equivalency examination. See also GED recipient.

GED recipient A person who has obtained certification of high school equivalency by meeting state requirements and passing an approved exam, which is intended to provide an appraisal of the person's achievement or performance in the broad subject matter areas usually required for high school graduation.

General program A program of studies designed to prepare students for the common activities of a citizen, family member, and worker. A general program of studies may include instruction in both academic and vocational areas.

Government appropriation An amount (other than a grant or contract) received from or made available to an institution through an act of a legislative body.

Government grant or contract Revenues from a government agency for a specific research project or other program.

Graduate An individual who has received formal recognition for the successful completion of a prescribed program of studies.

Graduate enrollment The number of students who hold the bachelor's or first-professional degree, or the equivalent, and who are working towards a master's or doctor's degree. First-professional students are counted separately. These enrollment data measure those students who are registered at a particular time during the fall. At some institutions, graduate enrollment also includes students who are in postbaccalaure-

ate classes, but not in degree programs. In most tables, graduate enrollment includes all students in regular graduate programs and all students in postbaccalaureate classes, but not in degree programs (unclassified postbaccalaureate students).

Graduate Record Examination (GRE) Multiple-choice examinations administered by the Educational Testing Service and taken by college students who are intending to attend certain graduate schools. There are two types of testing available: (1) the general exam which measures critical thinking, analytical writing, verbal reasoning, and quantitative reasoning skills, and (2) the subject test which is offered in eight specific subjects and gauges undergraduate achievement in a specific field. The subject tests are intended for those who have majored in or have extensive background in that specific area.

Graduation Formal recognition given an individual for the successful completion of a prescribed program of studies.

Gross domestic product (GDP) The total national output of goods and services valued at market prices. GDP can be viewed in terms of expenditure categories which include purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. A number of inclusions, however, represent imputed values, the most important of which is rental value of owner-occupied housing. GDP, in this broad context, measures the output attributable to the factors of production—labor and property—supplied by U.S. residents.

Handicapped See Disabilities, children with.

Higher education Study beyond secondary school at an institution that offers programs terminating in an associate, baccalaureate, or higher degree.

Higher education institutions (Carnegie classification)

Doctorate-granting Characterized by a significant level and breadth of activity in commitment to doctoral-level education as measured by the number of doctorate recipients and the diversity in doctoral-level program offerings.

Master's Characterized by diverse postbaccalaureate programs (including first-professional), but not engaged in significant doctoral-level education.

Baccalaureate Characterized by primary emphasis on general undergraduate, baccalaureate-level education. Not significantly engaged in postbaccalaureate education.

Special focus Baccalaureate or postbaccalaureate institution emphasizing one area (plus closely related specialties), such as business or engineering. The programmatic emphasis is measured by the percentage of degrees granted in the program area.

Associate's Conferring at least 90 percent of its degrees and awards for work below the bachelor's level.

Tribal Colleges and universities that are members of the American Indian Higher Education Consortium, as identified in IPEDS Institutional Characteristics.

Non-degree-granting Offering undergraduate or graduate study, but not conferring degrees or awards. In this volume, these institutions are included under Specialized.

Higher education institutions (basic classification)

4-year institution An institution legally authorized to offer and offering at least a 4-year program of college-level studies wholly or principally creditable toward a baccalaureate degree. In some tables, a further division between universities and other 4-year institutions is made. A "university" is a postsecondary institution which typically comprises one or more graduate professional schools (see also University). For purposes of trend comparisons in this volume, the selection of universities has been held constant for all tabulations after 1982. "Other 4-year institutions" would include the rest of the nonuniversity 4-year institutions.

2-year institution An institution legally authorized to offer and offering at least a 2-year program of college-level studies which terminates in an associate degree or is principally creditable toward a baccalaureate degree. Also includes some institutions that have a less than 2-year program, but were designated as institutions of higher education in the Higher Education General Information Survey.

Higher Education Price Index A price index which measures average changes in the prices of goods and services purchased by colleges and universities through current-fund education and general expenditures (excluding expenditures for sponsored research and auxiliary enterprises).

High school A secondary school offering the final years of high school work necessary for graduation, usually includes grades 10, 11, 12 (in a 6-3-3 plan) or grades 9, 10, 11, and 12 (in a 6-2-4 plan).

High school program A program of studies designed to prepare students for their postsecondary education and occupation. Three types of programs are usually distinguished—academic, vocational, and general. An academic program is designed to prepare students for continued study at a college or university. A vocational program is designed to prepare students for employment in one or more semiskilled, skilled, or technical occupations. A general program is designed to provide students with the understanding and competence to function effectively in a free society and usually represents a mixture of academic and vocational components.

Hispanic serving institutions pursuant to 302 (d) of Public Law 102-325 (20 U.S.C. 1059c), most recently amended December 20, 1993, in 2(a)(7) of Public Law 103-208, where Hispanic serving institutions are defined as those with full-time-equivalent undergraduate enrollment of Hispanic students at 25 percent or more.

Historically black colleges and universities Accredited institutions of higher education established prior to 1964 with the principal mission of educating black Americans. Federal regulations (20 U.S.C. 1061 (2)) allow for certain exceptions of the founding date.

Household All the people who occupy a housing unit. A house, apartment, mobile home, or other group of rooms, or a single room, is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters, that is, when the occupants do not live and eat with any other people in the structure, and there is direct access from the outside or through a common hall.

Housing unit A house, an apartment, a mobile home, a group of rooms, or a single room that is occupied as separate living quarters.

Income tax Taxes levied on net income, that is, on gross income less certain deductions permitted by law. These taxes can be levied on individuals or on corporations or unincorporated businesses where the income is taxed distinctly from individual income.

Independent operations A group of self-supporting activities under control of a college or university. For purposes of financial surveys conducted by the National Center for Education Statistics, this category is composed principally of federally funded research and development centers (FFRDC).

Institutional support The category of higher education expenditures that includes day-to-day operational support for colleges, excluding expenditures for physical plant operations. Examples of institutional support include general administrative services, executive direction and planning, legal and fiscal operations, and community relations.

Instruction (colleges and universities) That functional category including expenditures of the colleges, schools, departments, and other instructional divisions of higher education institutions and expenditures for departmental research and public service which are not separately budgeted; includes expenditures for both credit and noncredit activities. Excludes expenditures for academic administration where the primary function is administration (e.g., academic deans).

Instruction (elementary and secondary) Instruction encompasses all activities dealing directly with the interaction between teachers and students. Teaching may be provided

for students in a school classroom, in another location such as a home or hospital, and in other learning situations such as those involving co-curricular activities. Instruction may be provided through some other approved medium, such as television, radio, telephone, and correspondence. Instruction expenditures include: salaries, employee benefits, purchased services, supplies, and tuition to private schools.

Instructional staff Full-time-equivalent number of positions, not the number of different individuals occupying the positions during the school year. In local schools, includes all public elementary and secondary (junior and senior high) day-school positions that are in the nature of teaching or in the improvement of the teaching-learning situation; includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff, and excludes administrative staff, attendance personnel, clerical personnel, and junior college staff.

Instructional support services Includes salary, benefits, supplies, and contractual fees for staff providing instructional improvement, educational media (library and audiovisual), and other instructional support services.

Junior high school A separately organized and administered secondary school intermediate between the elementary and senior high schools, usually includes grades 7, 8, and 9 (in a 6-3-3 plan) or grades 7 and 8 (in a 6-2-4 plan).

Labor force People employed as civilians, unemployed but looking for work, or in the armed services during the survey week. The "civilian labor force" comprises all civilians classified as employed or unemployed. See also Unemployed.

Land-grant colleges The First Morrill Act of 1862 facilitated the establishment of colleges through grants of land or funds in lieu of land. The Second Morrill Act in 1890 provided for money grants and for the establishment of black land-grant colleges and universities in those states with dual systems of higher education.

Local education agency (LEA) See School district.

Locale codes A classification system to describe a location. The "Metro-Centric" locale codes, developed in the 1980s, classified all schools and school districts based on their county's proximity to metro statistical areas (MSA) and their specific location's population size and density. In 2006, the "Urban-Centric" locale codes were introduced. These locale codes are based on an address's proximity to an urbanized area. For more information see http://nces.ed.gov/ccd/rural_locales.asp.

Pre-2006 Metro-Centric Locale Codes

Large City: A central city of a consolidated metropolitan statistical area (CMSA) or MSA, with the city having a population greater than or equal to 250,000.

Mid-size City: A central city of a CMSA or MSA, with the city having a population less than 250,000.

Urban Fringe of a Large City: Any territory within a CMSA or MSA of a Large City and defined as urban by the Census Bureau.

Urban Fringe of a Mid-size City: Any territory within a CMSA or MSA of a Mid-size City and defined as urban by the Census Bureau.

Large Town: An incorporated place or Census-designated place with a population greater than or equal to 25,000 and located outside a CMSA or MSA.

Small Town: An incorporated place or Census-designated place with a population less than 25,000 and greater than or equal to 2,500 and located outside a CMSA or MSA.

Rural, Outside MSA: Any territory designated as rural by the Census Bureau that is outside a CMSA or MSA of a Large or Mid-size City.

Rural, Inside MSA: Any territory designated as rural by the Census Bureau that is within a CMSA or MSA of a Large or Mid-size City.

2006 Urban-Centric Locale Codes

City, Large: Territory inside an urbanized area and inside a principal city with population of 250,000 or more.

City, Midsize: Territory inside an urbanized area and inside a principal city with population less than 250,000 and greater than or equal to 100,000.

City, Small: Territory inside an urbanized area and inside a principal city with population less than 100,000.

Suburb, **Large**: Territory outside a principal city and inside an urbanized area with population of 250,000 or more.

Suburb, Midsize: Territory outside a principal city and inside an urbanized area with population less than 250,000 and greater than or equal to 100,000.

Suburb, Small: Territory outside a principal city and inside an urbanized area with population less than 100,000.

Town, Fringe: Territory inside an urban cluster that is less than or equal to 10 miles from an urbanized area.

Town, Distant: Territory inside an urban cluster that is more than 10 miles and less than or equal to 35 miles from an urbanized area.

Town, Remote: Territory inside an urban cluster that is more than 35 miles from an urbanized area.

Rural, Fringe: Census-defined rural territory that is less than or equal to 5 miles from an urbanized area, as well as rural territory that is less than or equal to 2.5 miles from an urban cluster.

Rural, Distant: Census-defined rural territory that is more than 5 miles but less than or equal to 25 miles from an urbanized area, as well as rural territory that is more than 2.5 miles but less than or equal to 10 miles from an urban cluster.

Rural, Remote: Census-defined rural territory that is more than 25 miles from an urbanized area and is also more than 10 miles from an urban cluster.

Mandatory transfer A transfer of current funds that must be made in order to fulfill a binding legal obligation of the institution. Included under mandatory transfers are debt service provisions relating to academic and administrative buildings, including (1) amounts set aside for debt retirement and interest and (2) required provisions for renewal and replacement of buildings to the extent these are not financed from other funds.

Master's degree A degree awarded for successful completion of a program generally requiring 1 or 2 years of full-time college-level study beyond the bachelor's degree. One type of master's degree, including the Master of Arts degree, or M.A., and the Master of Science degree, or M.S., is awarded in the liberal arts and sciences for advanced scholarship in a subject field or discipline and demonstrated ability to perform scholarly research. A second type of master's degree is awarded for the completion of a professionally oriented program, for example, an M.Ed. in education, an M.B.A. in business administration, an M.F.A. in fine arts, an M.M. in music, an M.S.W. in social work, and an M.P.A. in public administration. A third type of master's degree is awarded in professional fields for study beyond the first-professional degree, for example, the Master of Laws (L.L.M.) and Master of Science in various medical specializations.

Mathematics A group of instructional programs that describes the science of numbers and their operations, interrelations, combinations, generalizations, and abstractions and of space configurations and their structure, measurement, transformations, and generalizations.

Mean test score The score obtained by dividing the sum of the scores of all individuals in a group by the number of individuals in that group.

Metropolitan population The population residing in Metropolitan Statistical Areas (MSAs). See Metropolitan Statistical Area.

Metropolitan Statistical Area (MSA) A large population nucleus and the nearby communities which have a high degree of economic and social integration with that nucleus. Each MSA consists of one or more entire counties (or county equivalents) that meet specified standards pertaining to population, commuting ties, and metropolitan character. In New England, towns and cities, rather than counties, are the basic

units. MSAs are designated by the Office of Management and Budget. An MSA includes a city and, generally, its entire urban area and the remainder of the county or counties in which the urban area is located. An MSA also includes such additional outlying counties which meet specified criteria relating to metropolitan character and level of commuting of workers into the central city or counties. Specified criteria governing the definition of MSAs recognized before 1980 are published in *Standard Metropolitan Statistical Areas: 1975*, issued by the Office of Management and Budget. New MSAs were designated when 1980 counts showed that they met one or both of the following criteria:

- 1. Included a city with a population of at least 50,000 within their corporate limits, or
- 2. Included a Census Bureau-defined urbanized area (which must have a population of at least 50,000) and a total MSA population of at least 100,000 (or, in New England, 75,000).

Migration Geographic mobility involving a change of usual residence between clearly defined geographic units, that is, between counties, states, or regions.

Minimum-competency testing Measuring the acquisition of competence or skills to or beyond a certain specified standard.

National Assessment of Educational Progress (NAEP) See Appendix A: Guide to Sources.

Newly qualified teacher People who: (1) first became eligible for a teaching license during the period of the study referenced or who were teaching at the time of survey, but were not certified or eligible for a teaching license; and (2) had never held full-time, regular teaching positions (as opposed to substitute) prior to completing the requirements for the degree which brought them into the survey.

Nonmetropolitan residence group The population residing outside Metropolitan Statistical Areas. See Metropolitan Statistical Area.

Nonresident alien A person who is not a citizen of the United States and who is in this country on a temporary basis and does not have the right to remain indefinitely.

Nonsupervisory instructional staff People such as curriculum specialists, counselors, librarians, remedial specialists, and others possessing education certification, but not responsible for day-to-day teaching of the same group of pupils.

Not-for-profit institution A private institution in which the individual(s) or agency in control receives no compensation other than wages, rent, or other expenses for the assumption of risk. Not-for-profit institutions may be either independent not-for-profit (i.e., having no religious affiliation) or religiously affiliated.

Obligations Amounts of orders placed, contracts awarded, services received, or similar legally binding commitments made by federal agencies during a given period that will require outlays during the same or some future period.

Occupational home economics Courses of instruction emphasizing the acquisition of competencies needed for getting and holding a job or preparing for advancement in an occupational area using home economics knowledge and skills.

Occupied housing unit Separate living quarters with occupants currently inhabiting the unit. See also Housing unit.

Off-budget federal entities Organizational entities, federally owned in whole or in part, whose transactions belong in the budget under current budget accounting concepts, but that have been excluded from the budget totals under provisions of law.

Operation and maintenance services Includes salary, benefits, supplies, and contractual fees for supervision of operations and maintenance, operating buildings (heating, lighting, ventilating, repair, and replacement), care and upkeep of grounds and equipment, vehicle operations and maintenance (other than student transportation), security, and other operations and maintenance services.

Other foreign languages and literatures Any instructional program in foreign languages and literatures not listed in the table, including language groups and individual languages, such as the non-Semitic African languages, Native American languages, the Celtic languages, Pacific language groups, the Ural-Altaic languages, Basque, and others.

Other support services Includes salary, benefits, supplies, and contractual fees for business support services, central support services, and other support services not otherwise classified.

Other support services staff All staff not reported in other categories. This group includes media personnel, social workers, bus drivers, security, cafeteria workers, and other staff.

Outlays The value of checks issued, interest accrued on the public debt, or other payments made, net of refunds and reimbursements.

Part-time enrollment The number of students enrolled in higher education courses with a total credit load less than 75 percent of the normal full-time credit load.

Personal income Current income received by people from all sources, minus their personal contributions for social insurance. Classified as "people" are individuals (including owners of unincorporated firms), nonprofit institutions serving individuals, private trust funds, and private noninsured welfare funds. Personal income includes transfers (payments not resulting from current production) from government and

business such as social security benefits and military pensions, but excludes transfers among people.

Physical plant assets Includes the values of land, buildings, and equipment owned, rented, or utilized by colleges. Does not include those plant values which are a part of endowment or other capital fund investments in real estate; excludes construction in progress.

Postbaccalaureate enrollment The number of graduate and first-professional students working towards advanced degrees and of students enrolled in graduate-level classes, but not enrolled in degree programs. See also Graduate enrollment and First-professional enrollment.

Postsecondary education The provision of formal instructional programs with a curriculum designed primarily for students who have completed the requirements for a high school diploma or equivalent. This includes programs of an academic, vocational, and continuing professional education purpose, and excludes avocational and adult basic education programs.

Private school or institution A school or institution which is controlled by an individual or agency other than a state, a subdivision of a state, or the federal government, which is usually supported primarily by other than public funds, and the operation of whose program rests with other than publicly elected or appointed officials. Private schools and institutions include both not-for-profit and for-profit institutions.

Property tax The sum of money collected from a tax levied against the value of property.

Proprietary (for profit) institution A private institution in which the individual(s) or agency in control receives compensation other than wages, rent, or other expenses for the assumption of risk.

Public school or institution A school or institution controlled and operated by publicly elected or appointed officials and deriving its primary support from public funds.

Pupil/teacher ratio The enrollment of pupils at a given period of time, divided by the full-time-equivalent number of classroom teachers serving these pupils during the same period.

Racial/ethnic group Classification indicating general racial or ethnic heritage based on self-identification, as in data collected by the Census Bureau or on observer identification, as in data collected by the Office for Civil Rights. These categories are in accordance with the Office of Management and Budget standard classification scheme presented below:

White A person having origins in any of the original peoples of Europe, North Africa, or the Middle East. Normally excludes people of Hispanic origin except for

tabulations produced by the Census Bureau, which are noted accordingly in this volume.

Black A person having origins in any of the black racial groups in Africa. Normally excludes people of Hispanic origin except for tabulations produced by the Census Bureau, which are noted accordingly in this volume.

Hispanic A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

Asian A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent, e.g., China, India, Japan, the Philippines, Vietnam, and Korea.

Native Hawaiian/Other Pacific Islander A person having origins in any of the original peoples of the Pacific Islands, e.g., Hawaii, Guam, and Samoa.

American Indian or Alaska Native A person having origins in any of the original peoples of North America and South America and maintains their cultural identification through tribal affiliation or community recognition.

Related children Related children in a family include own children and all other children in the household who are related to the householder by birth, marriage, or adoption.

Remedial education Instruction for a student lacking those reading, writing, or math skills necessary to perform collegelevel work at the level required by the attended institution.

Resident population Includes civilian population and armed forces personnel residing within the United States; excludes armed forces personnel residing overseas.

Revenue All funds received from external sources, net of refunds, and correcting transactions. Noncash transactions, such as receipt of services, commodities, or other receipts in kind are excluded, as are funds received from the issuance of debt, liquidation of investments, and nonroutine sale of property.

Rural school See Locale codes.

Salary The total amount regularly paid or stipulated to be paid to an individual, before deductions, for personal services rendered while on the payroll of a business or organization.

Sales and services Revenues derived from the sales of goods or services that are incidental to the conduct of instruction, research, or public service. Examples include film rentals, scientific and literary publications, testing services, university presses, and dairy products.

Sales tax Tax imposed upon the sale and consumption of goods and services. It can be imposed either as a general tax

on the retail price of all goods and services sold or as a tax on the sale of selected goods and services.

Scholarships and fellowships This category of college expenditures applies only to money given in the form of outright grants and trainee stipends to individuals enrolled in formal coursework, either for credit or not. Aid to students in the form of tuition or fee remissions is included. College work-study funds are excluded and are reported under the program in which the student is working.

SAT An examination administered by the Educational Testing Service and used to predict the facility with which an individual will progress in learning college-level academic subjects. It was formerly called the Scholastic Assessment Test.

School A division of the school system consisting of students in one or more grades or other identifiable groups and organized to give instruction of a defined type. One school may share a building with another school or one school may be housed in several buildings.

School administration support services Includes salary, benefits, supplies, and contractual fees for the office of the principal, full-time department chairpeople, and graduation expenses.

School climate The social system and culture of the school, including the organizational structure of the school and values and expectations within it.

School district An education agency at the local level that exists primarily to operate public schools or to contract for public school services. Synonyms are "local basic administrative unit" and "local education agency."

Science The body of related courses concerned with knowledge of the physical and biological world and with the processes of discovering and validating this knowledge.

Secondary enrollment The total number of students registered in a school beginning with the next grade following an elementary or middle school (usually 7, 8, or 9) and ending with or below grade 12 at a given time.

Secondary instructional level The general level of instruction provided for pupils in secondary schools (generally covering grades 7 through 12 or 9 through 12) and any instruction of a comparable nature and difficulty provided for adults and youth beyond the age of compulsory school attendance.

Secondary school A school comprising any span of grades beginning with the next grade following an elementary or middle school (usually 7, 8, or 9) and ending with or below grade 12. Both junior high schools and senior high schools are included.

Senior high school A secondary school offering the final years of high school work necessary for graduation.

Serial volumes Publications issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals, newspapers, annuals, memoirs, proceedings, and transactions of societies.

Social studies A group of instructional programs that describes the substantive portions of behavior, past and present activities, interactions, and organizations of people associated together for religious, benevolent, cultural, scientific, political, patriotic, or other purposes.

Socioeconomic status (SES) For the High School and Beyond study and the National Longitudinal Study of the High School Class of 1972, the SES index is a composite of five equally weighted, standardized components: father's education, mother's education, family income, father's occupation, and household items. The terms high, middle, and low SES refer to the upper, middle two, and lower quartiles of the weighted SES composite index distribution.

Special education Direct instructional activities or special learning experiences designed primarily for students identified as having exceptionalities in one or more aspects of the cognitive process or as being underachievers in relation to general level or model of their overall abilities. Such services usually are directed at students with the following conditions: (1) physically handicapped; (2) emotionally disabled; (3) culturally different, including compensatory education; (4) mentally retarded; and (5) students with learning disabilities. Programs for the mentally gifted and talented are also included in some special education programs. See also Disabilities.

Standardized test A test composed of a systematic sampling of behavior, administered and scored according to specific instructions, capable of being interpreted in terms of adequate norms, and for which there are data on reliability and validity.

Standardized test performance The weighted distributions of composite scores from standardized tests used to group students according to performance.

Standard Metropolitan Statistical Area (SMSA) See Metropolitan Statistical Area (MSA).

Student An individual for whom instruction is provided in an educational program under the jurisdiction of a school, school system, or other education institution. No distinction is made between the terms "student" and "pupil," though "student" may refer to one receiving instruction at any level while "pupil" refers only to one attending school at the elementary or secondary level. A student may receive instruction in a school facility or in another location, such as at home or in a hospital. Instruction may be provided by direct student-

teacher interaction or by some other approved medium such as television, radio, telephone, and correspondence.

Student support services Includes salary, benefits, supplies, and contractual fees for staff providing attendance and social work, guidance, health, psychological services, speech pathology, audiology, and other support to students.

Subject-matter club Organizations that are formed around a shared interest in a particular area of study and whose primary activities promote that interest. Examples of such organizations are math, science, business, and history clubs.

Supervisory staff Principals, assistant principals, and supervisors of instruction; does not include superintendents or assistant superintendents.

Tax base The collective value of objects, assets, and income components against which a tax is levied.

Tax expenditures Losses of tax revenue attributable to provisions of the federal income tax laws that allow a special exclusion, exemption, or deduction from gross income or provide a special credit, preferential rate of tax, or a deferral of tax liability affecting individual or corporate income tax liabilities.

Teacher see Instructional staff.

Technical education A program of vocational instruction that ordinarily includes the study of the sciences and mathematics underlying a technology, as well as the methods, skills, and materials commonly used and the services performed in the technology. Technical education prepares individuals for positions—such as draftsman or lab technician—in the occupational area between the skilled craftsman and the professional person.

Title IV Refers to a section of the Higher Education Act of 1965 that covers the administration of the federal student financial aid program.

Title IV eligible institution A postsecondary institution that meets the criteria for participating in the federal student financial aid program. An eligible institution must be any of the following: (1) an institution of higher education (with public or private, non-profit control), (2) a proprietary institution (with private for-profit control), and (3) a postsecondary vocational institution (with public or private, not-for-profit control). In addition, it must have acceptable legal authorization, acceptable accreditation and admission stands, eligible academic program(s), administrative capability, and financial responsibility.

Total expenditure per pupil in average daily attendance Includes all expenditures allocable to per pupil costs divided by average daily attendance. These allocable expenditures include current expenditures for regular school programs,

interest on school debt, and capital outlay. Beginning in 1980–81, expenditures for state administration are excluded and expenditures for other programs (summer schools, community colleges, and private schools) are included.

Town school See Locale codes.

Trade and industrial occupations The branch of vocational education which is concerned with preparing people for initial employment or with updating or retraining workers in a wide range of trade and industrial occupations. Such occupations are skilled or semiskilled and are concerned with layout designing, producing, processing, assembling, testing, maintaining, servicing, or repairing any product or commodity.

Transcript An official list of all courses taken by a student at a school or college showing the final grade received for each course, with definitions of the various grades given at the institution.

Trust funds Amounts collected and used by the federal government for carrying out specific purposes and programs according to terms of a trust agreement or statute, such as the social security and unemployment trust funds. Trust fund receipts that are not anticipated to be used in the immediate future are generally invested in interest-bearing government securities and earn interest for the trust fund.

Tuition and fees A payment or charge for instruction or compensation for services, privileges, or the use of equipment, books, or other goods.

Unclassified students Students who are not candidates for a degree or other formal award, although they are taking higher education courses for credit in regular classes with other students.

Unadjusted dollars See Current dollars.

Undergraduate students Students registered at an institution of higher education who are working in a program leading to a baccalaureate degree or other formal award below the baccalaureate, such as an associate degree.

Unemployed Civilians who had no employment but were available for work and: (1) had engaged in any specific job seeking activity within the past 4 weeks; (2) were waiting to be called back to a job from which they had been laid off; or (3) were waiting to report to a new wage or salary job within 30 days.

U.S. Service Academies These institutions of higher education are controlled by the U.S. Department of Defense and the U.S. Department of Transportation. The 5 institutions counted in the NCES surveys of degree granting institutions include: the U.S. Air Force Academy, U.S. Coast Guard Academy, U.S. Merchant Marine Academy, U.S. Military Academy, and the U.S. Naval Academy.

University An institution of higher education consisting of a liberal arts college, a diverse graduate program, and usually two or more professional schools or faculties and empowered to confer degrees in various fields of study. For purposes of maintaining trend data in this publication, the selection of university institutions has not been revised since 1982.

Urban fringe school See Locale codes.

Visual and performing arts A group of instructional programs that generally describes the historic development, aesthetic qualities, and creative processes of the visual and performing arts.

Vocational education Organized educational programs, services, and activities which are directly related to the preparation of individuals for paid or unpaid employment, or for additional preparation for a career, requiring other than a baccalaureate or advanced degree.

APPENDIX C Index of Table Numbers

Academic rank of faculty in postsecondary institutions, 249, 253

by field of study, 254, 255	range for compulsory school attendance, 165
salaries by, 257, 258, 261, 262	reading scores by, 117, 119, 120
tenure by, 264	school-age population, by state, 17
by type and control of institution, 252	student financial aid by, 335, 337, 338
Academic support, expenditures at postsecondary institutions, 364,	students exiting special education, 111
365	teachers in public schools, 69
Achievement of elementary and secondary students. See also	unemployment rate, 382
under individual subjects	Agriculture
mathematics, 136	associate's degrees in, 269, 270, 282, 283
reading, 123	bachelor's degrees in, 10, 271, 285, 286
science, 138	degrees conferred in, 275, 277, 296
ACT (American College Testing Program) scores, 145, 327	doctor's degrees in, 273, 291, 292
Administration/Administrative staff	enrollment in postsecondary education, 232
postsecondary institutions, expenditures for, 361, 362	institutions conferring degrees in, 278
in public elementary and secondary schools, 80, 81, 82, 83	master's degrees in, 272, 288, 289
public elementary and secondary schools, expenditures for, 174,	Alcohol usage
176, 177, 178, 179	by high school seniors, 164
Admission requirements for postsecondary institutions, 326	by teenagers, 163
Admissions to undergraduate institutions, 327	violence and drug usage on school property, 162
Adult education, 369, 370, 371	by young adults, 395, 396
Advanced Placement courses in public secondary schools, 152,	Algebra course work in high school, 133
156	Alumni, support for postsecondary institutions, 358
Affiliation of postsecondary institutions, 197	American Indians/Alaska Natives
Age	ACT (American College Testing Program) scores, 145
adult education participation, 370, 371	with associate's degrees, 281, 282, 283
attendance status at postsecondary institutions, 190	attendance patterns by tenth-graders, 157
bachelor's degrees by, 10	with bachelor's degrees, 10, 284, 285, 286
center-based preprimary programs and, 44	course work by high school graduates in mathematics and
child care arrangements by, 45, 46, 47	science, 149, 150
cognitive and motor skills by, 112	distribution in public schools, 97
computer usage, 429, 430, 432	with doctor's degrees, 290, 291, 292
educational attainment by, 8, 9	educational attainment by state, 12
enrollment in grades 9 to 12 compared to population, 55	employment of high school seniors, 387
faculty in postsecondary institutions, 252, 253	enrollment distribution in public schools by state, 41
field of study in postsecondary institutions by, 232	estimates of resident population by age, 16
GED (General Educational Development) credentials issued by,	with first-professional degrees, 293, 294, 295
108	gifted and talented students by state, 53, 54
international comparisons of bachelor's degree recipients, 415	high school graduates and dropouts, 107
international comparisons of school-age population, 400	with master's degrees, 287, 288, 289
internet usage, 428	mathematics scores by grade, 136
labor force participation by, 381	postsecondary institutions
language, mathematics and motor skills by, 114	employment in, 246
literacy skills of adults, 386	enrollment in, 226, 227
mathematics scores by, 131, 132, 133	enrollment in by state, 228, 229
mental and physical skills by, 113	faculty in, 249, 253, 255
percentage of population enrolled in school by, 6, 7	in public charter and traditional public schools, 101
population by, 15, 16	reading scores and achievement levels of fourth-graders, 121
postsecondary enrollment by, 192	reading scores by grade, 118

preprimary education and, 43

SAT scores for college-bound seniors, 141	science scores of eighth-graders in public schools, 139
