

Performance Coal - UBB 4-5-10 (1)

Chris Blanchard, Jason Whitehead, Everett Hager, Jack Roles, Pat Hilbert and myself traveled in from the Ellis Portal on a mantrip. We encountered blocks on the track at the intake overcasts. (@ 4'x4' hole) We removed the blocks and continued inby. We encountered ~~the~~ Jim Blake at @ 47 BK. He had his SCSR on and told us he put SCSR's on everyone except Seward Scott. Pat Hilbert, AMF HG 22, took control of Jim and the remaining members began walking inby. Everett, Jack and myself carried the SCSR caches off of our mantrip. Chris + Jason encountered the TG 22 Mantrip first and flagged us to hurry up. Upon arrival at the mantrip, he opened the cache and began removing the SCSR's from the injured members and putting on new SCSR's. James Woods was breathing (labouring a "heavy") \ he did not detect a pulse on

the remaining members, but put ②
SCSR's on them anyway. We called
(yelled/flagged) for the other mantrip
and began loading the members back
in the mantrip. Pat brought the other
mantrip to us and we loaded the
remaining members and started outside.
We encountered Gary May, Block Super,
and Berman Cornett, Safety Director.
Gary got in the mantrip and began
treating Steve Harrah. We traveled
outside and unloaded the members
and began treating them.
