

Regulation as shown is dumping air feeder on belts

These & stoppings need removed

Why leave these & controls in place??

Needs to be regulated

Cut-throughs will be isolated and controlled. Controls will be installed prior to cutting through. The area will be ventilated until immediately prior to cut-through.

Show Revision in Phases
 (1) Phase 1 as present Ventilation
 (2) Proposed changes & set up for mining & h.w. mining show Barriers to be left on top & bottom of panel to protect Mains on both ends
 (3) Show AFTER mining & where EP's & mp's will be fan bleedor system to be evaluated

Are these portals completed & ready for travel?? Under last approved revision??

This corner dead air space

Air Reading at Regulation

MSHA MOUNT HOPE, WV
 OCT 23 2009
 RECEIVED VENTILATION
